What about the monitors' main job -- monitoring critically ill patients? Through multitasking technology, the monitors are able to run the courseware without diminishing their monitoring capabilities in any way.

The courses give nurses the opportunity to learn from computerized clinical simulations without leaving their unit. Nurses who complete these courses earn CEUs, which can help them qualify for CCRN certification, meet state relicensing requirements, comply with hospital staff development requirements and qualify for higher merit pay.

The critical-care nursing simulations are authored by experts in nursing education and clinical practice and are developed as a joint publishing venture with the American Association of Critical Care Nurses. That group has also approved these courses for Category A continuing education credit.

Founded in 1979, Medi-Sim is the oldest commercial producer of educational software for the health care community. The company is also the only commercial software developer to offer CAI nursing courses that are approved for continuing education credit by the American Nurses' Association.

SpaceLabs is a leading manufacturer of clinical information systems, patient monitoring equipment and diagnostic monitoring products.

MORGAN HILL, CA (MAY 21) BUSINESS WIRE - Redlake Corp., Morgan Hill-based manufacturer of high speed instrumentation film camera equipment and video

graphic imaging products, announced Monday the unaudited results of its fourth quarter and audited results of its fiscal year ended March 31, 1990.

For the fourth quarter ended March 31, 1990, the company's net revenues increased substantially compared to the like period a year ago. The company had a net income for the fourth quarter compared to a net loss for the comparable period as a result of increased revenues and lower cost of sales.

Net revenues increased $546,451, or 103 percent, from $530,916 in the quarter ended March 31, 1989 to $1,077,367 in the quarter ended March 31, 1990. The increase in revenues was the result of higher order rates in the photo-instrumentation products and sales from the imaging products. Photo-instrumentation product sales were $973,457 and imaging product sales were $103,910.

There was a net income of $131,040 in the fourth quarter of fiscal year 1990 as a result of increased revenues and lower cost of sales. In addition, there was a $39,800 tax benefit arising from carryforward of prior period operating loss.

For the fiscal year ended March 31, 1990, net revenues increased $774,819, or 29 percent, from $2,692,384 in fiscal year 1989 to $3,467,203 in fiscal year 1990.

The increase in net revenues was the result of a good order rate in the instrumentation camera products and sales from the videographic imaging products. Net revenues from instrumentation camera products and videographic imaging products were $3,155,348 and $311,855, respectively.

There was a net income of $102,004 as a result of increased revenues and lower cost of sales and a tax benefit arising from carryforward of prior period operating loss.

The company expects to continue to be profitable in the first quarter of fiscal year 1991, according to Stephen W. Ferrell, president, Redlake Corp.

SAUSALITO, CA (MAY 18) BUSINESS WIRE - Autodesk Inc. (NASDAQ/NMS:ACAD) Monday announced that it has reached an agreement with ASG (the Archsoft Group) which allows ASG to resume responsibility for the development and marketing of upgrades to the U.S. version of AutoCAD AEC Architectural -- Autodesk's add-on template that customizes AutoCAD specifically for

architects.

Upgrades to the AEC product will be distributed under ASG's own brand name.

Autodesk licensed the AEC Architectural template from ASG (formerly Archsoft and Chase Systems) in 1984, and has since developed, sold and supported the product. The license agreement between Autodesk and ASG will terminate on Sept. 1, 1990, at which time Autodesk will no longer sell the product, company official said.

Autodesk will continue to support existing AutoCAD AEC Architectural customers, through the company's network of Authorized AutoCAD Resellers, until Sept. 1, 1991.

The announcement does not affect the AEC Architectural product licensed and developed by Autodesk Ltd., the company's subsidiary in the United Kingdom.

For more information customers should contact their local authorized dealer. For the name of their nearest dealer, customers may call Autodesk at 800/445-5415.

Autodesk develops, markets and supports a family of computer-aided design engineering and animation software products for desktop computers and workstations. For more information, please call 415/331-0356 or GO ADESK on CompuServe.

PHOENIX (MAY 21) BUSINESS WIRE - Emerald Homes Monday announced that it has elected Lewis J. Wright, president and chief executive officer.

Wright replaces Philip J. Polich who has been elected chairman of the board of Emerald Homes Inc., its managing general partner.

Wright is well known in the Arizona homebuilding industry, having served as chief executive officer of Hallcraft Homes from 1974 to 1978, at which time Hallcraft was merged with Nu-West Arizona Inc. He succeeded to the chairmanship of that company which later became Nu-West Inc. which he also served as chairman.

Nu-West Inc. was one of the Southwest's leading homebuilding companies. Wright remained at Nu-West until 1984, at which time he was appointed to the faculty at Arizona State University. In 1988 he was elected vice

chairman of the board of Phoenix-based Western Savings. He resigned that position in 1989 and has managed his own company, The Wright Group, until the present time.

The company also announced the appointment of Robert Larson as chief operating officer and chief financial officer. Larson served as a division controller for Nu-West Inc., as controller for Homes by Dave Brown, and was most recently vice president-finance for Estes Communities.

Charles D. Harris will continue in his role as executive vice president and general manager.

Emerald also announced that Arthur Andersen & Co. has been appointed auditors for the company and that they have accepted this appointment.

Emerald's units are listed on the New York Stock Exchange and traded under the symbol ''EHP.''

CHULA VISTA, CA (MAY 21) BUSINESS WIRE - Rohr Industries Inc. Monday announced the re-institution of its stock buy-back program.

''We are considering purchasing from time to time, up to about 300,000 shares of our common stock,'' said a company spokesperson, ''because we believe it is a good investment at the current price level. We may use the purchased stock to further fund our employee stock ownership plan or for other general purposes.''

Previously, Rohr purchased approximately 200,000 shares, a part of which went to the employee stock ownership plan.

Rohr Industries Inc. designs, integrates, manufactures and supports aircraft engine nacelle systems and components for commercial, military and business aircraft. The company also manufactures solid rocket motor casings for space programs. Rohr, with headquarters in Chula Vista, has 10 facilities in the United States and one in Europe.

NEWPORT BEACH, CA (MAY 12) BUSINESS WIRE - The former chief executive officer and chairman of Mercury Savings, Leonard Shane, has advised Federal officials that he will no longer accept ''stand by'' compensation as instituted unilaterally by the Resolution Trust Corp.

''When RTC took control of Mercury 90 days ago, its designated conservator James Klingensmith, asked me both personally and in a letter to be available on call for transition and other assistance,'' Shane said. ''He designated my status as being paid administrative leave, and in turn I assured Klingensmith of my cooperation and assistance.

''However, Klingensmith left for another RTC assignment some time ago, his successor has also been replaced, and I have not been called upon and it appears to me that there is little likelihood that there is any intention of doing so.''

Shane said that he has never met or spoken with the current RTC official in charge, James Zemcik.

Shane said that he has ''written to Zemcik advising him I will no longer accept compensation in the absence of some active role which benefits the public and Mercury. I believe such compensation is unwarranted even at the drastically reduced level created when I reduced my pay voluntarily, long before RTC was involved.

''I do not believe that the RTC-designated standby status has any real meaning and that in effect my employment was terminated. I certainly am not seeking nor do I want to accept compensation paid for reasons other than anticipated value to the association.''

Shane said he no longer considers himself to be an employee of Mercury, but reiterated to Zemcik his availability to assist where needed, particularly in the matters of litigation and in areas where historical perspective and past actions are important.

Shane pointed out that several matters remain to be resolved.

''I assume that matters relating to the separation will be handled in line with association policy and practice, as they have been consistently with others,'' Shane said.

''The matter of my retirement benefit, based on 26 years of employment, seems to be headed for court, where I have filed a suit to enforce my pension rights. Several other matters, including the corporate obligation to indemnify me for legal services in lawsuits where Mercury is a defendant and I am named as an officer may also need court action since it appears that the RTC will not honor the indemnity nor will it respond to inquiries and requests about the indemnity.''

Shane, 68, had previously announced his intention to retire.

CHICAGO (MAY 21) BUSINESS WIRE - John Nuveen & Co. Inc. announced the initial public offerings of common stock of two new closed-end funds, the Nuveen California Municipal Market Opportunity Fund Inc. and the Nuveen New York Municipal Market Opportunity Fund Inc.

The California Municipal Market Opportunity Fund Inc. issued 7 million shares of common stock at a price of $15 per share, raising a total of $105 million. The New York Municipal Market Opportunity Fund issued 5 million shares, also at $15 per share, raising a total of $75 million.

If the underwriters' overallotments for both funds are exercised in full, the total California fund offering will rise to $114 million and the New York fund to $84 million.

Both funds began trading Friday on the New York Stock Exchange. The symbol for the California fund is NCO, while the symbol for the New York is NNO.

Alex. Brown & Sons Inc. served as the lead manager of both underwritings.

Co-managers for the Nuveen California Municipal Market Opportunity Fund offering included PaineWebber Inc., John Nuveen & Co. Inc.,

Prudential-Bache Capital Funding, Shearson Lehman Hutton Inc., Smith Barney, Harris Upham & Co. Inc., Bateman Eichler, Hill Richards Inc. and Crowell Weedon & Co.

Co-managers for the Nuveen New York Municipal Market Opportunity Fund offering included PaineWebber Inc., John Nuveen & Co. Inc., Prudential-Bache Capital Funding, Shearson Lehman Hutton Inc., Smith Barney, Harris Upham & Co. Inc. and Gruntal & Co. Inc.

Each fund's primary investment objective is current income exempt from federal, state and where applicable, city taxes. The secondary investment objective of each Fund is to outperform its respective state municipal market through the selection of undervalued or underrated securities.

Flexible capital structures will allow both funds, upon the approval of their respective boards, to issue shares of preferred stock. It is the current intention of both funds to issue preferred stock approximately three to six months after the completion of these offerings. Preferred shares would pay dividends based on shorter-term tax exempt rates.

The proceeds of the common and any preferred stock offerings will be invested in diversified portfolios of longer-term investment-grade quality municipal bonds.

Both funds expect to declare their first dividends about 60 days and pay them about 90 days after the completion of these offerings.

The funds are managed by Nuveen Advisory Corp.,a wholly owned subsidiary of Nuveen. Nuveen has sponsored more than $38 billion of tax-free unit trusts and funds nationwide.

Founded in 1898 and headquartered in Chicago, Nuveen is the oldest and largest investment banking firm specializing in underwriting, trading and marketing of municipal bonds, and of tax-free unit trusts, mutual funds and closed-end funds.

For more complete information, including charges and expenses, investors should contact their securities representatives of John Nuveen & Co. Inc., 333 W. Wacker Dr., Chicago, IL, 60606, for a prospectus and read it carefully before investing.

JACKSONVILLE, FL (MAY 21) BUSINESS WIRE - Insituform Southeast Corp.

(NASDAQ:ISEC) announced record revenues of $20.10 million for the year ended March 31, as compared with revenues of $15.44 million for the year ended March 31, 1989, an increase of 30 percent.

Net income for the year ended March 31 was a record $1.50 million, or 38 cents per share, as compared with $1.27 million, or 32 cents per share, for the year ended March 31, 1989, an increase of 18 percent.

For the quarter ended March 31, revenues were $5.79 million and net income was $541,000, or 14 cents per share, as compared with revenues of $3.99 million and net income of $328,000, or 8 cents per share for the like period last year, increases of 45 percent and 65 percent, respectively.

Revenues for fiscal 1990 were the highest in the company's history. Throughout the year, backlog remained strong, allowing time to plan operations and optimize performance. Selling, general and administrative (SG&A) expense was higher in fiscal 1990 than in fiscal 1989. However, as a percentage of revenues, SG&A in fiscal 1990 was 13.9 percent, down from 15.4 percent in fiscal 1989.

R&D expenses increased to $420,000 during fiscal 1990, up from $280,000 in fiscal 1989.

Company president James J. Baird Jr. said: ''Fiscal 1990 was a banner year in most respects. Revenues continued an upward trend, as did net income. In fact, over the last five years, revenues and net income have increased at compounded annual rates of approximately 40 percent and 34 percent, respectively.

''As of May 2, 1990, our backlog was $8.5 million, which we believe is a reflection of the success and confidence that we share with our clients.''

Baird said: ''We remain dedicated to providing the highest-quality environmental products and services to our clients in a timely and professional manner. As further evidence of this dedication, we announced on May 15, 1990, the addition of two new product lines which will allow us to offer a full spectrum of quality products and services: the Trenchless Lateral Reconstruction System (TLRS) and Manhole Reconstruction/Rehabilitation.

''With TLRS, we can now offer the advantage of non-disruptive, trenchless reconstruction of lateral sewer pipelines (service lines). Manhole Reconstruction/Rehabilitation will allow us to offer several methods to address deterioration of manholes.

''With the combination of Insituform, TLRS and Manhole Reconstruction/Rehabilitation, we can offer our clients a total reconstruction solution to their water/wastewater underground

infrastructure problems.''

Insituform Southeast is engaged primarily in the business of protecting the environment by solving infrastructure problems in water and wastewater systems for industry and government. The company is the leading supplier of non-disruptive pipeline reconstruction and repair in Alabama, Florida, Georgia, North Carolina and South Carolina, and is the exclusive licensee of the Insituform Process in those states.

STAMFORD, CT (MAY 21) BUSINESS WIRE - Nycom Information Services Inc. (NASDAQ:NYCM) Monday reported revenues of $2,572,876, for the first quarter ended March 31, 1990, compared with revenues of $212,756, for the quarter ended March 31, 1989.

The company also reported a net loss of $1,771,745, or 6 cents per share, compared with a net loss of $1,756,326, or 8 cents per share in 1989.

David Lyons, chairman and chief executive officer stated: ''The first quarter results do not take into account the acquisition of American Network Exchange Inc. which has been completed as of the beginning of the second quarter. With the acquisition of AMNEX, we look forward to continued growth in our revenue and subscriber base, as well as realization of cost savings due to the economies of scale which typically accompany a consolidation of this kind.''

HOUSTON (MAY 21) BUSINESS WIRE - American General Corp. (NYSE-AGC) announced Monday that based on preliminary results of the shareholder vote at the May 2 annual meeting the AGC board position prevailed on all issues.

The results reported today by the independent inspectors of election indicated that the AGC board slate of six director nominees carried by a

margin of two-to-one decisively defeating a slate proposed by Torchmark Corp. The shareholders also supported American General's position by rejecting a resolution proposed by Torchmark.

Upon certification of final results, the six nominees on the American General slate will join the nine continuing directors on the board. The three first-time directors on the AGC slate are: Brady F. Carruth, president and CEO of Gulf Coast Capital Corp.; Richard J.V. Johnson, chairman, CEO and publisher of the Houston Chronicle Publishing Co.; and Robert E. Smittcamp, president and CEO of Lyons-Magnus Co. Inc. The three re-elected directors are: Harold S. Hook, chairman and CEO; Michael J. Poulos, president; and Henry S. Romaine, vice chairman and chief investment officer. Although American General does not anticipate a change in these results, they remain subject to review and challenge.

American General is an insurance and financial services organization with assets of $32 billion and total equity of $4.4 billion. Headquartered in Houston, the company has subsidiaries that operate in 50 states and Canada. The company groups its operating subsidiaries into three business segments: Insurance - Home Service; Insurance - Special Markets; and Finance/Real Estate. American General common stock is listed on the New York, Pacific, London, and Swiss Stock Exchanges.

MILPITAS, CA (MAY 21) BUSINESS WIRE - Diasonics Inc. (ASE:DIA) Monday announced that James R. Higdon has joined the company as chief financial officer.

Higdon joins Diasonics from MicroPower Systems Inc., where he was chief financial officer and responsible for all administrative functions. Prior to MicroPower Systems, Higdon spent 16 years with Texas Instruments Inc., where he held a number of responsible positions in financial management including senior financial officer for two of T.I.'s business units: The Consumers Electronics Group and Geophysical Service Inc.

Higdon holds a BBA in economics from the University of Houston, a master of science degree in industrial administration from Carnegie Mellon University, and is a certified public accountant.

Jerry McMillin, chief financial officer for the past three years, will continue as senior vice president of the company. McMillin has made major contributions to the company, and will continue to assist Stewart Carrell, chairman and chief executive officer, on key operations and financial

projects.

In announcing the appointment, Carrell said: ''We are fortunate to have Jim Higdon. His extensive background in the full range of financial management responsibilities will make him a valuable member of our management team. And retaining Jerry McMillin's active involvement in the company is an important plus.''

Diasonics Inc. is a leader in the development and manufacture of computer-based medical instrumentation. Diasonics corporate headquarters are located at 1565 Barber Lane, Milpitas, Calif., 95035; telephone 408/432-9000.

RENO, NE (MAY 22) BUSINESS WIRE - The board of directors of Sierra Pacific Resources (NYSE:SRP) Monday elected Austin W. Stedham, 61, as chairman and chief executive officer of the diversified holding company.

Stedham replaces Joe L. Gremban, 70, who announced his long-planned retirement today at the corporation's annual shareholders meeting in Reno, Nev. The announcement follows the orderly plan for transition of responsibility from Gremban to Stedham announced earlier this year when Stedham was named president of Resources, a title he will continue to hold.

He joined Sierra Pacific Power in 1985 as senior vice president corporate services following an extensive career with Kansas Power and Light Co., where he held a number of positions including regional vice president, vice president of division operations and vice president of gas distribution.

He was elected executive vice president and chief operating officer of Sierra Pacific Power in 1985 and president in 1986. In January of this year, he was elected president of Sierra Pacific Resources.

Stedham's more than 35 years of utility experience covers most phases of utility operations including design, construction and operation of electric and gas distribution systems and marketing, billing, collection and customer service systems management.

He holds a bachelor of science degree in electrical engineering from Kansas State University and is active in numerous professional and industry associations. He also is active in community and civic organizations including the United Way, Boy Scouts and the Greater

Reno-Sparks Chamber of Commerce.

The board also announced that Gremban has been retained as a consultant to Stedham and Sierra Pacific Resources on the Thousand Springs Project, a regional independent power generation project under development in northeastern Nevada by Resources' subsidiary, Great Basin Energy Co., and seven other regional, national and international firms.

Stedham lauded Gremban's more than 28 years of service to the Reno-based company which has operating subsidiaries involved in utility service, oil and gas exploration, land development and independent power generation projects.

LOS ANGELES (MAY 21) BUSINESS WIRE - RCM TECHNOLOGIES INC. (NASDAQ: RCMT, RCMTZ; BSE Symbol: RMT) Monday announced that it has designated CBI Services Inc. to act as general contractor for the installation of RCM's advanced air pollution control process, ''System 99,'' at utility plant sites.

CBI Services Inc., a subsidiary of CBI Industries (Sales: $1.1 billion), has performed construction, manufacturing and engineering services for 380 utility clients for fossil fuel power plants during the past 15 years.

Additionally, RCM announced that the companies have agreed to discuss a future option that will include a joint venture marketing and manufacturing program.

System 99 was developed to meet utilities demand for combined Sulphur Dioxide and Nitrous Oxide reductions at coal-burning plants to comply with new and pending air pollution and acid rain emissions standards.

RCM TECHNOLOGIES INC. is involved in the development and marketing of its patented ''System 99'' which is designed to control hazardous emissions from smoke stacks, a major cause of acid rain. RCM also provides professional engineering and technical services for major corporations in aerospace, chemical and industrial manufacturing.

KANSAS CITY, MO (MAY 21) BUSINESS WIRE - U.S. Technologies Inc. (NASDAQ:USXX) Monday reported net sales of $1,686,377 for the first quarter ended March 31, an increase of 46.8 percent from $1,148,916 for the like period in 1989.

Net income for the quarter was $92,807 or one cent per share, a 21.6 percent rise from $76,341 or one cent per share for the first quarter period of 1989.

According to Ryan Corley, president of U.S. Technologies Inc., sales rose sharply because of the combination of new customers and increased repeat business from existing customers.

Corley announced a significant corporate development by the company's newest subsidiary, Republic Technology Corp. Republic has introduced the Remote Processing Module (RPM) units to the microcomputer networking market.

This is a proprietary hardware product which is small, quiet, secure and inexpensive and will operate on many computer network operating systems.

SAN JOSE, CA (MAY 21) BUSINESS WIRE - International CMOS Technology announced Monday that for the last seven months sales have increased 8-10 percent per month, allowing ICT to experience record sales growth.

Currently, sales for the first seven months of fiscal 1990 have surpassed sales for the entire 1989 fiscal year. This growth is credited in part to the increased capital ICT has received over the last several months. With the introduction of seven new products in the next quarter, profit margins are expected to increase, allowing for an improvement in the company's overall financial position.

''I expect to see this sales trend continuing over the next several months and I am very pleased with the increased interest in our products. ICT is well positioned to handle our current growth. At the rate which we are going, we are approaching a 100 percent increase from last year revenues '' stated Drew Allen Osterman, chairman and chief executive officer.

International CMOS Technology Inc.(ICT) designs, manufactures and markets user programmable integrated circuits. ICT's products include a variety of memory and logic devices, and the development tools for designing with user programmable products. ICT is publicly owned and traded over the counter (pink sheets).

#90141b0618 05/21/1990 ~Business Wire

WESTLAKE VILLAGE, CA (MAY 21) BUSINESS WIRE - Consolidated Energy Systems Inc. (OTC), announced record revenues for the first nine months of its current fiscal year and, in a separate matter, the signing of a preliminary agreement to acquire and develop a multi-megawatt, multi-million dollar cogeneration project.

The revenue growth for the nine-month period ending March 31, 1990, as compared to that period ending March 31, 1989, reflects a $634,250 increase in revenues to $834,500.

Revenues for the current period also substantially exceed, by almost 300 percent, entire revenues for the previous fiscal year. Management now expects revenues for the current year ending June 30, 1990, to approach $1.5 million (including post-April 19 revenues for the recently acquired subsidiary, Decade Technology).

While gross profits for the nine-month period were also higher than a year earlier, the net loss increased approximately $146,000. This loss reflects the temporary phenomenon that the company's two largest cogeneration projects, operating through its MUPA partnership, had been down for repairs, entailing higher maintenance costs and lower revenues.

Both projects were back on-line by mid-April and their revenue stream has resumed. Accordingly, management still expects a substantially reduced final net loss for the current fiscal year as compared to the prior year. These continuing losses are also a product of substantial interest costs attributable to the recent significant investments in cogeneration assets.

Consolidated will document technical, economic and financial viability of the project so that permanent financing can be secured prior to finalizing the purchase. Fixed development and construction management fees already have been negotiated in favor of the company. Preliminary analyses project the size of the cogeneration facility at between 3,000 and 4,500 kW, entailing capital cost of between $4 and $6 million.

James Brodie, the company's senior vice president, engineering, will

oversee the due diligence investigation.

Consolidated Energy Systems Inc., founded in 1984, is a publicly traded company with emphasis on developing cogeneration and energy conservation projects. Consolidated has been a public company since 1987.

#90141b0619 05/21/1990 ~Business Wire

RANCHO CORDOVA, CA (MAY 21) BUSINESS WIRE - Insta Cool Incorporated of North America (NASDAQ:KOOL) announced Monday that it has reached an agreement in principle with Liquid Carbonic Incorporated Canada, a leading supplier of expendable refrigerants and industrial gases, to jointly develop food-processing applications for Insta Cool technology in Canada.

Insta Cool manufactures ultra-rapid freezing equipment for the freezing of human blood plasma.

Under the terms of the agreement, Liquid Carbonic will become the exclusive marketer/distributor in Canada for the food applications of the Insta Cool technology. Additionally, the agreement provides that Insta Cool will supply the technology and Liquid Carbonic will supply capital and marketing.

Liquid Carbonic is a subsidiary of Chicago-based Liquid Carbonic Industries, which has worldwide operations. In Canada, Liquid Carbonic has annual revenues in excess of $130 million and employs 750.

Philip Coelho, president and chief executive officer of Insta Cool, commented, ''This strategic alliance with a major supplier of food freezing equipment will now provide us with a path to fully develop this potentially large market for our ultra-rapid freezing process.''

Ultra-rapid freezing is estimated to be 6 percent of the total refrigeration market or approximately $1 billion annually in North America.

Insta Cool currently designs, manufactures and markets worldwide ultra-rapid blood plasma freezers utilizing the Insta Cool technology. Insta Cool received FDA approval for the crust freezing of chickens in October 1989 and had previously received approval from the FDA for the freezing of human blood in 1987.

Insta Cool's technology offers significant advantages over other freezing technologies currently in use, according to the company. In tests carried out at the University of California at Davis, Insta Cool's freezing

rapidity achieved a 93 percent kill rate of Salmonella bacteria on test chickens.

Also, the technology can significantly reduce costs over other ultra-rapid freezing methods while significantly improving the product quality over conventional freezing methods. Customers include the American Red Cross and major healthcare corporations.

EL SEGUNDO, CA (MAY 21) BUSINESS WIRE - International Rectifier Corp. (NYSE,PSE:IRF) and Siliconix Inc. (NASDAQ:SILIQ) Monday announced an agreement resolving the patent litigation between them which began in July 1986.

By the terms of the agreement, Siliconix will pay International Rectifier $12 million over a two-year period and will acquire a royalty-bearing license under the litigated patents. A prior licensee under IR's power MOSFET patents, Unitrode Corp., will receive a portion of the amounts payable to IR under the agreement.

Siliconix filed for protection under Chapter 11 of the bankruptcy code on April 10. Accordingly, implementation of the agreement is subject to the approval of the bankruptcy court.

Richard J. Kulle, Siliconix' president and chief executive officer, stated that this settlement is the crucial factor that will enable Siliconix to emerge as swiftly as the bankruptcy law and the courts will allow from the company's Chapter 11 status.

On April 9, a Federal District Court in Los Angeles held valid all five of IR's key U.S. patents relating to power MOSFET technology and ruled that Siliconix had infringed those patents.

The April 9 court ruling upheld IR's U.S. Patents Nos. 4,376,286; 4,593,302; 4,642,666; 4,680,853; and 4,705,759.

Siliconix is a leading supplier of advanced semiconductor products for motor controls, power supplies, computer peripherals, telecommunications, instrumentation and automotive systems. In business for 28 years, Siliconix is a publicly traded company on the NASDAQ board.

International Rectifier is a major worldwide supplier of power semiconductors and the international leader in power MOSFETs with its

HEXFET line. The company is also a leading manufacturer of CMOS power ICs and microelectronic power IC solid state relays.

#90141b0621 05/21/1990 ~Business Wire

NEW YORK (MAY 21) BUSINESS WIRE - Masstor Systems Corp. (NASDAQ:MSCO) Monday announced the sale and installation of an M960 Mass Storage System at TransMark Inc., the wholly owned subsidiary of TransUnion Corp., one of the three largest credit bureaus in the United States.

TransUnion is part of The Marmon Group of Chicago. A dollar figure was not disclosed.

D.G. Wojtal, director at TransMark stated that, ''The M960 will enable us to substantially reduce processing time through the automation of certain labor intensive operations. We evaluated numerous alternatives and have determined that the M960 provides us with the most cost effective solution.''

The M960 Mass Storage System, introduced in 1988, combines hardware, robotics and proprietary data management software to provide up to 1,760 gigabytes of on-line data processing and imaging data storage. With a price per magabyte of under $2, the M960 uniquely fills the price/capacity/performance gap within the standard on-line data storage hierarchy.

For very high volume storage applications, Masstor also provides M1000 Storage Modules for the M960 System, which hold up to two terabytes of on-line data in nine square feet of floorspace for as little as 80 cents per megabyte.

Founded in 1976, Masstor Systems Corp. manufactures and services storage and archival systems for IBM, Cray, DEC and Honeywell Bull mainframe customers with very high volume applications.

It has over 100 large company and institutional customers in 10 countries in North America and Europe. Its focused business strategy helps leading MIS managers quickly leverage their huge installed mainframe investments by automating their storage processes and expanding the on-line availability of corporate information.

#90141b0623 05/21/1990 ~Business Wire

BELLEVUE, WA (MAY 21) BUSINESS WIRE - JOBSource Inc. Monday introduced the first personal computer software reference guide designed to make it easier for individuals to find a job.

With JOBS ON FILE, individuals can gain access to up-to-date information on as many as 1,000 companies in over 40 major industries in the top 40 U.S. cities. It provides users with listings of companies, current mailing addresses, contact names and statistical reference information such as employee count and revenue.

With JOBS ON FILE, a complete job search manager, a user can analyze company data, create mailing lists of companies to address, write and print cover letters and manage follow-up telephone contact. ''People need to land a job faster and with less stress and frustration,'' said Warren Sly, president of JOBSource Inc. ''Computers are great for managing database research and executing time-consuming tasks. JOBS ON FILE cuts the job search busy work so the individual can spend more time taking care of himself.''

JOBS ON FILE combines an easy-to-use database with a simple word processor and an intuitive interface of simple menus and dialogue boxes. The user can analyze relevent job information, select companies to mail to and build mailing lists. The word processor requires the user to write only the body of the letter; the program merges all heading and address information into every letter on the mailing list, cutting preparation and printing time by as much as 90 percent.

''JOBS ON FILE takes the legwork out of the job search,'' said Shelly Newcomer, a senior at the University of Washington. ''It makes the job search almost enjoyable.''

In order to locate the ''perfect'' job, today's job seekers need easy access to current, accurate and manageable information on the industry and company of choice. However, prospective employees -- including new college graduates, the currently employed seeking a job change, and others looking for a job -- must search through numerous directories and periodicals for potential contacts. Often they need to make expensive telephone contact with each target employer to verify or correct published information.

JOBS ON FILE is designed to meet these needs in a single resource that provides strong convenience benefits for the individual pursuing employment. JOBS ON FILE offers on a single disk information on as many as a thousand firms per industry or city. The data can be manipulated and analyzed to quickly indentify ideal target companies using the job seekers' criteria -- at their convenience. Because the information is current, phone verification time and charges are eliminated, as is the typing required to enter the data, saving the user time and money.

Based in Bellevue, JOBSource Inc. develops and markets personal computer reference software that provides information publishing products and services to help individuals find jobs quickly, inexpensively and efficiently.

MIAMI, FL (MAY 21) BUSINESS WIRE - Peoples Telephone Co. Inc. (NASDAQ:PTEL) Monday announced that it has entered into three major telephone placement agreements which will provide revenues of approximately $9 million.

The first is a three year agreement to provide approximately 600 telephones to the Dade County Public School system which will generate approximately $4 million in revenues. Dade County is the fourth largest school district in the United States with roughly 280,000 students.

The second is a three year agreement which will provide $1.5 million in revenue with Kimco Development Corp. to provide approximately 150 telephones to its Florida properties. Kimco operates 33 shopping centers in Florida with over four million square feet and is one of the 10 largest shopping center developers in the United States.

The third is a five year agreement totalling $3.5 million in revenue with Federal Realty Investment Trust to provide approximately 200 telephones to all of its shopping centers in 10 states. Federal Realty operates 42 shopping centers with over 4.5 million square feet.

Jeffrey Hanft, chairman of the board and chief executive officer of

Peoples Telephone Co., stated, ''The company will begin installation for all of these agreements within the next 30 days. Our current installation backlog of nearly 2,000 telephones is the largest in the company's history. We will continue to pursue new agreements and acquisitions to facilitate our growth as one of the leaders in the industry.''

Peoples Telephone is one of the nation's leading public communications companies, operating over 8,000 pay telephones in 17 states.

SUNNYVALE, CA (MAY 21) BUSINESS WIRE - MIPS Computer Systems Inc. (NASDAQ:MIPS), Monday announced two new products that represent breakthroughs in their performance and price classes.

The MIPS Magnum 3000 workstation, the first in a series, delivers unprecedented performance and storage capacity starting at $8,990. The RC3230 RISComputer server allows RAM and disk capacity far in excess of what was previously available, and starts at $11,740 for an operational configuration with a 200 MB disk. Both are based on the 25 MHz MIPS R3000 CPU.

Performance of both products has been measured at 17.8 SPECmarks (19.4 integer, 16.8 floating point) and 3.6 MFlops (LINPACK double precision, FORTRAN). The expansion capability of the systems complements their high performance. Main memory is expandable from 8 MB to 128 MB, while SCSI-based disk capacity can be expanded to over 6 GB.

The Magnum 3000 and RC3230 are designed to be board-upgradeable to the next generation of MIPS technology, underlining MIPS' commitment to preserve hardware and software investments while providing a path to keep the customer on the leading edge of the price/performance curve.

The MIPS Magnum 3000 and RC3230 provide powerful environments for designing products incorporating MIPS RISC architecture. Advanced design tools are available from leading software vendors such as Cadence and Valid Logic, as well as the System Programmer's Package, MIPS' suite of RISC design tools.

The systems also offer robust environments for developing OSF/Motif-based applications. The graphics environment of the Magnum and RC3230 is

RISCwindows, a MIPS performance-tuned version of the OSF/Motif graphical user interface, and X-Window System. A wide selection of development tools are also available from MIPS, including its suite of RISCompilers, as well as from third-parties.

They include LISP, PROLOG, a variety of fourth-generation languages and leading database packages.

The RC3230 server has the performance and capacity to support an office network of personal computers, workstations, X-stations and terminals. The system provides a powerful client/server-environment from which office professionals can share files, peripherals and other computing resources.

MIPS Computer Systems Inc. is a leading supplier of RISC-based products at all levels of integration, from components to boards to systems and software, which it sells through resellers worldwide.

#90141b0627 05/21/1990 ~Business Wire

BOISE, ID (MAY 21) BUSINESS WIRE - Trus Joist Corp. has become the first foreign manufacturer of structural laminated veneer lumber to receive the Japanese Agricultural Standard (JAS) certification.

Trus Joist's manufacturing facility in Stayton, Ore., obtained the certification from the Japanese government. It is now the world's only structural laminated veneer lumber plant certified to put the JAS stamp on its trademarked product, MICRO-LAM laminated veneer lumber. Laminated veneer lumber is a high-technology wood product used in residential and commercial construction.

Trus Joist personnel began the lengthy certification process in 1988. Japanese inspectors visited the Stayton plant in October of 1989, and again in January and March of this year. Each time they rigorously inspected the manufacturing process and tested the product at the facility.

The JAS stamp is highly coveted in Japan. ''Roughly, it says the government stands behind the quality of both the manufacturing location and the product. Coupled with the recent tariff reduction on our MICRO-LAM LVL from 20 percent to 3.9 percent, it bodes very well for our export prospects to Japan,'' commented Keith Erickson, director of international business for the Boise company. The JAS stamp also means

that Trus Joist's LVL will qualify for use in certain Japanese buildings whose financing requires that only JAS products be used.

The laminated veneer lumber manufactured at the Stayton plant is made from Douglas fir. It is used for various purposes including trusses, headers, beams, floor joists, scaffolding, concrete forming and bridges.

Trus Joist is a division of TJ International, a specialty building products company headquartered in Boise.

#90141b0628 05/21/1990 ~Business Wire

SANTA CLARA, CA (MAY 21) BUSINESS WIRE - International Rectifier Corp. (NYSE,PSE:IRF) and Siliconix Inc. (NASDAQ:SILIQ) Monday announced an agreement resolving the patent litigation between them which began in July 1986.

By the terms of the agreement, Siliconix will pay International Rectifier $12 million over a two-year period and will acquire a royalty-bearing license under the litigated patents. A prior licensee under IR's power MOSFET patents, Unitrode Corp., will receive a portion of the amounts payable to IR under the agreement.

Siliconix filed for protection under Chapter 11 of the bankruptcy code on April 10. Accordingly, implementation of the agreement is subject to the approval of the bankruptcy court.

Richard J. Kulle, Siliconix' president and chief executive officer, stated that this settlement is the crucial factor that will enable Siliconix to emerge as swiftly as the bankruptcy law and the courts will allow from the company's Chapter 11 status.

On April 9, a Federal District Court in Los Angeles held valid all five of IR's U.S. patents relating to power MOSFET technology and ruled that Siliconix had infringed those patents.

The April 9 court ruling upheld IR's U.S. Patents Nos. 4,376,286; 4,593,302; 4,642,666; 4,680,853; and 4,705,759.

Siliconix is a leading supplier of advanced semiconductor products for motor controls, power supplies, computer peripherals, telecommunications, instrumentation and automotive systems. In business for 28 years, Siliconix is a publicly traded company on the NASDAQ National Market

System.

#90141b0630 05/21/1990 ~Business Wire

SANTA CLARA, CA (MAY 21) BUSINESS WIRE - Siliconix Monday revealed a number of proactive measures it has been taking to emerge quickly from Chapter 11 status.

The measures were unveiled against a backdrop of record bookings in the first quarter of 1990, a robust forecast for second-quarter bookings, and an out-of-court settlement over a patent infringement lawsuit with International Rectifier.

To assure the immediate availability of new financing, Siliconix has retained the investment banking firm of Houlihan, Lokey, Howard & Zukin, a widely recognized specialist in financial restructuring. Accordingly, Siliconix expects to have new financing in place within about 30 days.

While the company is viable and there are no immediate cash flow problems, additional cash is needed to increase manufacturing capacity, especially in light of the record bookings.

Siliconix has also engaged new legal counsel for the Chapter 11 proceedings. Brobeck, Phleger & Harrison, a leading San Francisco firm dedicated to high technology companies, will represent Siliconix in developing and confirming a plan of reorganization to expedite the exit from Chapter 11.

At the company's annual shareholders' meeting held on Thursday, May 3, Peter Weber, executive vice president of sales and marketing, announced developments that continue to strengthen the company's market position.

''While military business is declining, our business in the industrial market is growing. As this shift occurs, we have been pruning our low-volume, low-margin products and focusing on high-volume, high-margin opportunities, particularly in the motor control and power supply arenas.

Siliconix is a leading supplier of advanced semiconductor products for motor controls, power supplies, computer peripherals, telecommunications, instrumentation and automotive systems. In business for 28 years, Siliconix is a publicly traded company on the NASDAQ board.

SAN FRANCISCO (MAY 21) BUSINESS WIRE - Bank of the West Monday announced completion of the purchase of Central Bank and CB Insurance Agency from Central Banking System Inc. (CBSI).

The addition of Central Bank's 46 branches and $900,000,000 in assets makes Bank of the West the tenth largest bank in California.

''The marriage of Central Bank with Bank of the West significantly increases our ability to serve the growing banking needs of Northern Californians. Our long traditions of community banking make a natural fit for our customers and our employees.

''The amalgamation of banking products and services will definitely benefit consumers, small businesses and commercial customers,'' stated Michel Larrouilh, president and chief executive officer of Bank of the West.

The purchase agreement has been approved by both banking regulatory authorities and CBSI shareholders. Under the agreement, Bank of the West paid $42,800,000, less transaction expenses, in cash to CBSI.

''The acquisition of Central Bank's branch system is a logical addition to the existing Bank of the West retail branch network. The new branch system encompasses more than 86 branches, primarily in Northern California serving communities throughout the San Francisco Bay Area and Central Valley,'' Don McGrath, Bank of the West chief operating officer, stated.

In addition to the Northern California network, Bank of the West has branches in Beverly Hills, San Diego and Newport Beach.

The acquisition provides several new services to Central Bank customers starting today when the branches officially become Bank of the West. These beneficial services include three times the number of available ATMs longer banking hours, and Saturday banking.

Bank of the West is a member of the Banque Nationale de Paris Group (BNP), one of the world's largest banks. BNP's 2,700 offices in 80 countries enable Bank of the West to provide its customers with a wide range of global banking services.

#90141b0640 05/21/1990 ~Business Wire

CHICAGO (MAY 21) BUSINESS WIRE - NCR Corp. Monday unveiled its 2750 Hand-Held Order Entry system at the National Restaurant Association (NRA) trade show.

The 2750 Hand-Held system brings the power of a point of sale system to the server's hand, using miniature hand-held technology. The system transmits orders from the dining area to the kitchen or the bar, replacing the traditional pad and pencil and increasing the speed of the restaurant ordering process. These portable units can be used both indoors and outdoors due to the system's ability to employ radio frequency transmissions.

With this terminal, the server enters an order at the customer's table. Then, with the touch of a key instantaneously transmits the order to a 2760 terminal, which routes the order to the kitchen/bar, where the orders are displayed or printed. This all happens without the server ever leaving the customer's table, making the ordering process quick and efficient. Later, the NCR system even prints out the guest check.

''The NCR 2750 Hand-Held system saves time and improves accuracy, by standardizing order-taking procedures and eliminating handwritten orders, another example of the technology leadership NCR is providing to the hospitality industry,'' said Tony Fano, vice president, NCR's Retail Systems Division.

''Because the product platform is based on industry standards, the Hand-Held Order Entry system fits in with NCR's Open, Cooperative Computing strategy to provide enterprise-wide computing solutions based on open systems,'' said Fano.

The NCR 2750 Hand-Held units are already in use at the Trump Taj Mahal Casino in Atlantic City, N.J.

Service and maintenance support for the terminals and base stations will be provided by NCR's 16,000 field and software engineers, at 1,300 locations worldwide in 120 countries.

A minimum configuration will cost approximately $10,000. This configuration includes the 2760 Food Service System base station, two terminals and a battery recharger. The 2750 Hand- Held Order Entry systems will be available in June through the NCR direct sales force, authorized VARs and resellers.

NCR, based in Dayton, Ohio, develops manufactures, markets and supports business information processing for world wide markets.

NEW CANAAN, CT (MAY 21) BUSINESS WIRE - G. Lee Thompson, chairman and chief executive officer of Smith Corona Corp. (NYSE: SCO), Monday announced the appointment of William D. Henderson as president and chief operating officer, effective July 1.

Henderson (43) has spent nine years as an executive officer and group vice president at Hanson Industries, the U.S. arm of Hanson PLC. He has also served as president and chief executive officer of Durkees Famous Foods and an executive at FMC Corp.

In his new post at Smith Corona, Henderson will be responsible for Smith Corona operations, including worldwide marketing, sales, manufacturing and engineering.

Thompson will continue as chairman and chief executive officer of Smith Corona, as well as being responsible for the company's Office Supplies Inc. and Histacount Corp. subsidiaries.

Thompson stated, ''We are fortunate to be able to appoint a person of Mr. Hendeson's capabilities, with his broad experience encompassing comsumer and industrial products. He further brings to the company a strong operational and financial background and a familiarity with the operating style of Smith and Corona.''

Thompson further stated, that the appointment of Henderson ''represents a vital step forward as the company positions itself for growth both internally and externally. Mr. Henderson's wealth of experience at the operating level will enable me to concentrate on the strategic development of Smith Corona as a growing international firm.''

Henderson graduated from Denison University and the University of Virginia where he received his MBA. He served as an officer in the U.S. Navy. He

is married, with two sons, and presently resides in Rumson, N.J.

Smith Corona, based in New Canaan, is the world's largest manufacturer of portable electronic typewriters and personal word processors. The company also manufactures and sells office supplies, forms and customized printed products.

HARTFORD, CT (MAY 21) BUSINESS WIRE - United Technologies Corp., through various subsidiaries, has reached a definitive agreement to sell UT Automotive's automotive sealing business to Schlegel Corp., a subsidiary of BTR PLC, a British company, for approximately $200 million.

According to Frederick D. Hay, president of UT Automotive's Engineered Systems Division in Detroit, Mich., the sale will allow the division to concentrate more fully on its core businesses, such as molded and padded interior trim products and systems, steering wheels, insulation and acoustical products and hydraulic hose assemblies.

Proceeds of the sale will be used to reduce debt incurred by UTC's acquisition of Sheller-Globe Corp. late last year.

The automotive sealing systems business develops, manufactures and markets automotive body sealing products. It consists of plants in Keokuk, Iowa; Montpelier, Ind.; and Hayward, Calif.; marketing and technical operations in Detroit; and ownership of Mesnel, S.A., a French corporation, and Permolca, S.A. a Spanish corporation. The business employs 4,100 people worldwide and generated sales of approximately $275 million in 1989.

The sale is subject to the appropriate U.S. and foreign government approvals.

UT Automotive, based in Dearborn, Mich., supplies electrical, electromechanical, electronic and interior trim systems and components to the worldwide automotive industry. It is a unit of United Technologies Corp., based in Hartford, Conn., which provides a broad range of high-technology products and support services to the aerospace, building systems and automotive industries.

LOUISVILLE, CO (MAY 21) BUSINESS WIRE - Storage Technology Corp. (NYSE: STK) and Hewlett-Packard Co. (NYSE: HWP) Monday announced an original equipment manufacturer (OEM) agreement in which Hewlett-Packard will provide StorageTek with high-capacity 5.25-inch disk drives for use in future storage products utilizing RAID (Redundant Array of Inexpensive Disk) architectures.

StorageTek believes this contract may be valued at over $300 million.

''In the 1990s, the salient customers requirement for disk storage is 100-percent availability of all users' data,'' said Don Swatik, StorageTek vice president and product line manager of disk products.

''The reliability of HP's disk drives coupled with StorageTek's advanced fault-tolerant architectures will assure that availability for our customers. We are solidifying a stragegic relationship between StorageTek and Hewlett-Packard. This is founded in our mutually shared values of high quality, excellent reliability and lowest total cost of ownership.''

''This agreement is a significant milestone in HP's continued OEM market success,'' said Donald L. Curtis, general manager of HP's Disk Mechanisms Division. ''We are extremely pleased our disk drives will be a key component of StorageTek's future products.''

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for worldwide excellence in quality and support.

Storage Technology manufactures, markets and services, worldwide, information storage and retrieval subsystems for high-performance computers.

LOS ANGELES, CA (MAY 21) BUSINESS WIRE - TPA of America Inc. (OTC:TPS) Monday announced that the semiannual interest payment on the company's 10 percent Convertible Subordinated Debentures, which was due May 1, 1990, has been paid.

Pursuant to the terms of the Trust Indenture under which the Debentures were issued by the company, a failure by the company to pay an installment of interest when due constitutes an Event of Default under the Indenture, only if the nonpayment continues for thirty days. The payment was made within the 30-day period.

In light of the company's current financial condition, and the implementation of a corporate restructuring plan, the company is continuing to review the terms of the Debentures and examining possible strategies for satisfying the company's obligations to the Debentureholders.

TPA of America Inc. through it subsidiary, HealthCare Strategies Inc., provides a variety of health care cost containment and utilization review services for health care benefit plans. Its services include pre-admission and concurrent review, individual case management, and prospective ambulatory review procedures. The company's common stock trades in the over-the-counter market.

MOUNTAIN VIEW, CA (MAY 21) BUSINESS WIRE - In response to a growing need to manage installed thin net-based networks, SynOptics Communications, Inc. (NASDAQ/NMS:SNPX) Monday announced a new module for its LattisNet System 3000 wiring concentrator that allows the use of thin coaxial cable (thin net) for connecting workstations in a star-configured Ethernet local area network (LAN).

The LattisNet Model 3301 Thin Net Host Module, compatible with IEEE 10BASE2, plugs into the Ethernet/network managemnt bus on the System 3000 backplane just like other Ethernet module options for the System 3000.

The Model 3301 is fully integrated with the LattisNet Network Management system and SNMP Ethernet Agent. Complete monitoring and control of thin net segments is provided through the graphic user interface of LattisNet Network Management.

Diagnostic information operates as ususal with the Model 3301, including logging of collisions and CRC errors, activity counters for good packets and bytes, as well as the ability to set thresholds, find nodes, dynamically, log statistics and set alias names.

10BASE2 is the IEEE 802.3 (Ethernet) standard that defines the functional, electrical and mechanical characteristics of the Medium Attachment Unit (MAU) and the associated 50-ohm coaxial medium, commonly called thin net.

The Model 3301 has eight BNC ports for RG-58 coaxial cable connections. A complete set of LEDs indicate module and port status at a glance. In accordance with the IEEE 802.3 10BASE2 standard, each thin net segment can support up to 30 daisy-chained station attachments and be up to 185 meters in length.

SynOptics Communications designs, manufactures and markets local area networking products based on its Network Utility Architecture, a value-added product strategy which incorporates network connectivitiy, internetworking and network management solutions into an integrated networking system.

Revenue of $77.3 million was reported for the fiscal year ended Dec. 31, 1989. Earnings for the like period were $9.4 million, or $1.22 per share. The company has headquarters at 501 E. Middlefield Road, Mountain View, CA., 94043. Telephone 415/960-1100.

NEWTON, MA (MAY 21) BUSINESS WIRE - Staples Inc. (NASDAQ: SPLS) announced Monday that sales and earnings had increased significantly during its first quarter, ended April 29, 1990.

Staples pioneered the office superstore industry and today operates 48 office superstores in the Northeast United States.

Sales rose 70.3 percent from the prior year quarter to $63,504,000, while net earnings increased 133.9 percent to $2,809,000 (28 cents per share). In the prior year quarter, Staples earned $1,201,000 (15 cents per share) on sales of $37,283,000. Staples earnings in the current quarter included an extraordinary credit of $918,000 related to the utilization of net operating loss carry-forwards.

Without benefit of such credit, earnings were $1,891,000 or 19 cents per share.

Sales at stores and delivery hubs that have been open for more than a year increased 24.2 percent over the comparable prior year period.

Staples opened eight new stores during the first quarter to end the period with 46 stores and anticipates growing to at least 70 stores by the end of its fiscal year. It plans to open at least six stores and a full-line, 80,000 square foot, distribution center in Southern California during the second half of calendar year 1990.

The full-line distribution center will enhance the company's ability to serve its California customers on a cost-effective basis. Leases for six Los Angeles and Orange County stores have been signed.

Chairman and Chief Executive Officer, Thomas G. Stemberg noted that, ''We are pleased to have achieved these earnings despite incurring costs associated with adding a total of eight new stores to our network and continuing to build our infrastructure.''

''We were a bit surprised by the strength of our comparable unit sales, as we continue to saturate our eastern mega-markets. A majority of the stores we opened in the quarter were within the trading area of an existing unit, as we seek to maximize convenience for our customers and leverage our fixed expenses in each market. Inevitably, this strategy will continue to reduce comparable store sales increases.''

EMERYVILLE, CA (MAY 21) BUSINESS WIRE - Cetus Corp. Monday announced the appointment of R. Jefferson Works as senior vice president and chief financial officer; Katharine A. Russell as senior vice president of corporate affairs and Peter D. Staple as vice president of legal affairs.

Russell and Works have also been appointed to the company's operating committee.

In his new capacity, Works is responsible for the treasury, finance and accounting functions, as well as the information systems and services departments at Cetus. He most recently served as vice president and treasurer of the company.

Works, 37, joined Cetus in September 1983 as assistant treasurer and was appointed treasurer in 1984. Previously, he served as assistant treasurer of Long's Drug Stores Inc. and, prior to that, as a senior accountant with

Price Waterhouse.

As senior vice president of corporate affairs, Russell has responsibility for the corporate communications, human resources and administration groups at Cetus. She most recently served as vice resident of public relations and investor communications.

Russell, 42, joined Cetus in October 1983 and was appointed vice president three years later. Previously, she served in a series of progressively responsible positions within the corporate communications group at Baxter Travenol Laboratories Inc.

As vice president of legal affairs, Staple, 38, continues with responsibility for the company's general legal matter. Prior to joining the company in October 1983, Staple specialized in corporate and securities law at the San Francisco law firm of Heller, Ehrman, White and McAuliffe.

Cetus Corp. is a leading biotechnology company primarily engaged in the development, manufacturing and marketing of pharmaceutical products to treat cancers and serious infectious diseases.

The company also is developing commercial applications of its GeneAmp polymerase chain reaction (PCR) technology. Founded in 1971, Cetus is based in Emeryville, and also operates EuroCetus in Amsterdam, Netherlands.

BOSTON (MAY 21) BUSINESS WIRE - The Boston Software Works Inc. (BSW) Monday announced InterOFFICE/XL, a new product in BSW's family of InterOFFICE electronic mail gateway products.

InterOFFICE/XL provides transparent electronic mail gateway services between Hewlett-Packard's DeskManager, Digital Equipment Corporation's ALL-IN-1 and Wang Laboratories' VS OFFICE office automation products.

Transparent electronic mail gateway connectivity between these office automation products is achieved by connecting InterOFFICE/XL with its companion components InterOFFICE/VAX (DEC ALL-IN-1 gateway) or InterOFFICE/VS (Wang VS OFFICE gateway).

InterOFFICE/XL is a software-only product that installs on a Hewlett-Packard MPE/XL system running HP's DeskManager office automation product.

''With this new addition to our product line, we are able to demonstrate the unique 'mix and match' nature of our gateways,'' said Larry Campbell. ''With InterOFFICE/XL, BSW now offers department, division and enterprise wide electronic mail and document exchange for leading office automation systems.''

To achieve transparency for the user, InterOFFICE/XL includes many convenient features. InterOFFICE/XL's ''automatic directory synchronization'' feature eliminates the need for users to learn complicated addressing procedures in order to send mail to ALL-IN-1 or VS OFFICE users.

The InterOFFICE family's peer-to-peer architecture, requires that a user install only one copy of InterOFFICE/XL per DeskManager network. In a separate announcement today, BSW announced the availability of two new, unbundled versions of InterOFFICE gateway products that work with InterOFFICE/XL.

These products are InterOFFICE/VS version 1.02 for Wang's VS OFFICE, and InterOFFICE/VAX version 1.02 for Digital Equipment Corporation's ALL-IN-1.

Available in September 1990 from the Boston Software Works, InterOFFICE/XL may be licensed for a one time fee of $4,500 to $21,500. License fees vary according to machine size. Telephone, on-site and installation support services are also available.

The Boston Software Works is a five-year-old, privately-held software development firm, specializing in high quality office automation integration and coexistence products.

NEW YORK (MAY 21) BUSINESS WIRE - Users of Stratus XA2000 Continuous Processing (tm) computer systems will be able to share data quickly and easily with a wide range of other computers, thanks to a new software release from New York software developer Spectrum Concepts, Inc.

The software is scheduled to be announced Monday, May 21 in connection with the ''Stratagem'' Stratus user's group conference in Amsterdam, the Netherlands.

XCOM 6.2 will be available on the Stratus XA2000 under a third party agreement between Spectrum Concepts and Stratus Computer, Inc. IBM

remarkets Stratus XA2000 products worldwide as the IBM System/88 product family.

''With the release of XCOM 6.2 for Stratus and S/88, those who require 'fault-tolerant' computing -- major financial institutions and others -- now have simplified access to the broadest range of corporate computing resources,'' said Keith Eisenstark of Spectrum Concepts.

XCOM 6.2 allows any computer equipped with XCOM 6.2 to exchange data with any other XCOM 6.2 equipped computer. Eisenstark said that XCOM 6.2 supports the industry's widest range of environments, including IBM mainframes; S/3X and AS/400; DOS and OS/2 PCs; Local Area Networks; DEC VAX; UNIX-based workstations from Apollo, Sun, and others; Apple Macintosh; and more.

When introduced in March, 1987, XCOM 6.2 was the first off- the-shelf software to incorporate SNA and SAA compliant APPC/LU 6.2 communications technology. It since has been proven on thousands of computers, at major organizations worldwide. Applications include software distribution, electronic data interchange (EDI), remote publishing, unattended file transfer, and data consolidation among field offices and headquarters.

License fees for the Stratus and S/88 versions of XCOM 6.2 range from $6,000 to $16,000, depending on configuration. Versions for other environments range from $495 to $39,000. Multi-unit and corporate licensing plans are available.

Product details are available from Spectrum Concepts, Inc., 150 Broadway, New York, NY, 10038, 212-766-4400; or Spectrum Concepts, Ltd., Beatty House Suite 6, Admirals Way, London, England, E14 9UF, 071-538-1099.

#90141b0660 05/21/1990 ~Business Wire

MOUNTAIN VIEW, CA (MAY 21) BUSINESS WIRE - DDI Pharmaceuticals Inc. (NASDAQ/NMS:DDIX) announced at its annual meeting, May 18, 1990, that it has received a ''Notice of Allowance,'' which signifies the U.S. Patent

and Trademark Office's intention to issue a patent to DDI for its form of long-acting superoxide dismutase (SOD).

DDI's long-acting SOD has a few long strands of an inert polymer coupled to each SOD molecule, resulting in approximately 300 times longer persistence in the bloodstream than is observed for unmodified SOD. In animal studies, DDI's long-acting SOD has displayed longer persistence in the bloodstream and less tendency to induce allergic reactions than other forms of SOD.

''We believe that our long-acting SOD has tremendous potential. Its greatly extended persistence makes DDI's long-acting SOD a good candidate for development as a weekly systemic treatment for chronic diseases in which the free-radical of oxygen called superoxide might play a role,'' said Henry Lerman, DDI's president.

''Our diligent efforts have resulted in early allowance of this patent, which should enable us to accelerate seeking business arrangements for development of our long-acting SOD,'' he added.

DDI is the pioneering developer of pharmaceutical forms of SOD, a naturally occurring enzyme, and is now developing long-acting forms of both bovine SOD and genetically engineered human SOD for early preclinical tests. In addition, DDI is conducting U.S. Phase 3 clinical studies of bovine SOD to treat osteoarthritis of the knee.

Bovine SOD has been marketed in Europe since the early 1980s by DDI's licensees. During that time, more than 9 million injections of bovine SOD have been administered, primarily for treatment of osteoarthritis by local injection into the affected joint.

#90141b0661 05/21/1990 ~Business Wire

BERKELEY, CA (MAY 21) BUSINESS WIRE - General Parametrics Corp. (NASDAQ: GPAR), a leading manufacturer of desktop presentation products, Monday announced results for its second quarter ended April 30, 1990.

Second quarter sales were $2,410,000, a decrease from sales of $6,217,000 for the second quarter of fiscal 1989. The company stated that the second quarter net loss was $722,000 (nine cents per share) as compared to net income of $530,000 (seven cents per share) for the second quarter of last year.

The company stated that the decreased sales and the resultant loss was

primarily the result of increased competition, narrowing of its dealers' focus on a limited portion of its product line, and the softness currently being experienced in certain segments of the industry. The company also stated that it has completed its previously announced reduction in work force in order to control costs.

Revenues for the first six months of fiscal 1990 were $6,047,000, compared to $12,686,000, for the first half of last year. The net loss was $470,000 or six cents per share, for the six months ended April 30, compared to net income of $1,406,000, or 18 cents, for the first half of fiscal 1989.

The company's cash, cash equivalents and short-term investments were $18,652,000 on April 30, compared to its fiscal 1989 year-end balance of $19,657,000. During the first half of fiscal 1990, the company paid out two dividends totaling $942,000, which accounts for substantially all of the decrease from year-end.

The company also announced that its board of directors has decided to suspend the quarterly dividend based on the lower sales in the second quarter. The board of directors indicated that it would review the dividend policy based on subsequent quarterly performance.

General Parametrics, founded in 1981, is a leading producer of desktop presentation hardware and software products for the corporate and government workplace. Its complete line of desktop presentation solutions work with IBM and Apple Macintosh systems.

The company pioneered the electronic presentation marketplace in 1984 and now has a full line of VideoShow models covering a wide range of cost/performance.

SAN DIEGO, CA (MAY 21) BUSINESS WIRE - PSICOR Inc. (NASDAQ:PCOR) announced Monday that Michael W. Dunaway, chairman and chief executive officer, will receive an honorary doctorate from the University of Colorado.

The doctorate of science degree will be awarded to Dunaway on Saturday, May 26, 1990, at the University of Colorado Health Sciences Center commencement ceremonies.

Dunaway is being honored as a pioneer in the development of training programs for cardiopulmonary perfusion specialists and the creation of a subspecialty within the discipline of surgery.

He is a past president (1975-1977) and life member of the American Society

of Extracorporeal Technology. He was also a member of the committee that developed and administered the profession's first certification examination in 1972.

Dunaway received his own perfusion training at the Cleveland Clinic. In 1968, he founded PSICOR Inc. to provide hospitals with cost-effective perfusion services on a contract basis. Under his leadership, PSICOR has grown into a $60 million plus company.

Today, PSICOR is the nation's leading providor of cardiovascular technology and services. The company supplies nearly 400 hospitals with advanced life-sustaining supplies and expert resource management on a cost-effective contract basis.

MILPITAS, CA (MAY 21) BUSINESS WIRE - Qume Corp. (NASDAQ: QUME) and an investor group led by David S. Lee, Qume's chairman and chief executive officer, and Wearne Brothers Limited of Singapore and certain of its affiliates Monday jointly announced that the company's board of directors has approved and the company has signed a merger agreement with New Qume Corp., a corporation formed by Mr. Lee, Wearns and certain other investors.

The merger agreement provides for the acquisition of the company in a cash merger which would result in the public stockholders of the company receiving $7.25 per share in cash.

Completion of the merger is subject to certain conditions, including the approval of stockholders of the company at a meeting of the stockholders expected to occur by September 1990 and filings with governmental agencies. The merger is also subject to receipt by the investor group of sufficient financing to complete the merger.

The merger agreement and merger were recommended by a special committee of the company's outside directors, which was advised by the First Boston Corp. The merger agreement specifically permits the company to solicit other proposals to acquire the company, subject to the payment of a break-up fee of $1 million if the company terminates the merger agreement to accept a more favorable acquisition proposal.

Consistent with the terms of the merger agreement, the special committee

has directed The First Boston Corp. to continue to solicit and be available to receive inquiries from, and provide information to, any other parties interested in the possible acquisition of the company and, in conjunction with the special committee, enter into discussions and negotiations with such parties in connection with any such indicated interest.

New Qume Corp. is obligated under the merger agreement to use its best efforts to obtain the financing contemplated by the merger agreement. Wearne Brothers Limited has committed to provide, subject to certain conditions, including completion of definitive financing documents, certain financing for the transaction in an amount of up to approximately $70 million.

The merger agreement may be terminated by the company after June 10, 1990, if definitive agreements relating to the financing of the merger are not entered into by that date.

The $1 million break-up fee is not payable with respect to proposals recieved from third parties before such definitive financing agreements are completed that result in termination of the merger agreement by the company.

Qume Corp. manufactures and markets a wide variety of computer peripheral products under the trade name Qume for page printers, terminals and supplies and Data Technology for disk drive storage controllers, chip sets high-capacity flexible disk drives and subsystems.

STAMFORD, CT (MAY 21) BUSINESS WIRE - Citizens Utilities Co. (NASDAQ: CITUA-CITUB) and Louisiana General Services Inc. (NYSE; LGS) have obtained the approval of their respective boards of directors and have signed a definitive agreement providing for Louisiana General Services Inc. to be merged with and into Citizens Utilities Co. and thereafter operate as a division of Citizens Utilities Co., according to Citizens' President and Chief Executive Officer Ishier Jacobson.

Under the terms of the merger agreement, each Louisiana General Services common share, together with the rights associated with that share, will be converted into approximately 67-one-hundreths (.6719) of a share of Citizens Utilities Co. Series B stock.

The completion of the merger is subject, among other things, to the receipt of all necessary regulatory and shareholder approvals.

Citizens Utilities is a diversified operating public utility providing telecommunications - including cellular and paging - electric, water, wastewater and gas services to more than 492,000 consumer connections in over 500 communities in 12 states: Arizona, California, Colorado, Hawaii, Idaho, Indiana, Illinois, Nevada, Ohio, Pennsylvania, Utah and Vermont.

Louisiana General Services is principally engaged in residential, commercial and industrial gas operations in Louisiana.

#90141b0669 05/21/1990 ~Business Wire

AUSTIN, TX (MAY 21) BUSINESS WIRE - HealthVest (ASE:HVT) Monday announced a loss of $116.8 million, or $10.57 per share for the year ended Dec. 31, 1989.

This compares with net income in 1988 of $24.0 million or $2.06 per share. Funds available for distribution, or reinvestment totaled$19.3 million or $1.74 per share in 1989, compared with $31.0 million, or $2.66 per share in 1988.

As previously announced, the results included a year-end writedown of asset values totaling $127.4 million. This writedown in carrying values reflects primarily the recent financial difficulties of Healthcare International Inc., the Trust's principal operator.

HealthVest incurred generally higher expenses in 1989 compared with the year before. In particular, interest costs increased 43 percent to $26.2 million from $18.3 in 1988 due primarily to a higher average amount of debt outstanding during 1989. Also, other expenses increased 151 percent to $4.7 million in 1989 from $1.9 million in 1988, reflecting primarily legal and financial consulting fees associated with HealthVest's negotiations with Healthcare and with the Trust's lenders.

The cancellation of the Trust's advisory agreement with Healthcare, in September 1989, accounted for the lower amount of advisory fees recorded during 1989. However, as a self-advised REIT, HealthVest incurred additional operating expenses in the last quarter of 1989.

Healthvest's independent accountants' report on the 1989 financial statements was unqualified. However, the auditors' report contained

paragraphs discussing HealthVest's relationship with Healthcare, the nature of the asset writedowns, HealthVest's default of its senior debt agreements and the uncertain outcome of pending litigation. In addition, the report discussed HealthVest's dependence upon Healthcare and the resulting uncertainty concerning HealthVest's ability to continue as a going concern.

HealthVest is a self-administered Real Estate Investment Trust (REIT) that invests in income-producing health care-related properties including psychiatric, general health and rehabilitation hospitals, skilled nursing facilities, retirement centers, medical office buildings, medically oriented fitness centers, and facilities offering other related health care products and services.

ROSEMONT, IL (MAY 21) BUSINESS WIRE - Andrew Corp. Monday announced NetLynx/5394, a remote local area network-to-IBM Midrange computer system gateway.

With NetLynx/5394, any NETBIOS-compatible LAN can communicate with a remote IBM System/3X or AS/400.

NetLynx/5394 consists of a SDLC interface board and software. The interface can be installed in any network basic I/O system- (NETBIOS) compatible LAN node that is attached to the minicomputer via a SDLC interface.

The software enables each LAN node to emulate IBM 5250 terminals and printers to communicate with the IBM midrange system. NetLynx emulates an IBM 5251 Model 12, 5294 or 5394 cluster controller, enabling up to nine users per gateway adapter. A variety of LAN interfaces is supported, including ARCNET, Ethernet, STARLAN and Token Ring as well as Novell's NetWare, Banyan's Vines, 3COM and IBM PC LAN operating system.

NetLynx supports IBM's text entry assist feature as well as file transfer programs such as IBM PC Support/36, PC Support/38 and Emulator Transfer Utility (ETU).

NetLynx/5394 will be available for delivery in June and lists at $1,995. To receive literature and additional information, call Andrew Corp. at 1-800-733-0331.

Andrew Corp. is a full-service designer and manufacturer of gateway

devices and emulation boards that provide connectivity between IBM computers and non-IBM peripherals, local area network products for Token Ring systems and wiring products for local interconnection of terminals and computers.

#90141b0671 05/21/1990 ~Business Wire

MILPITAS, CA (MAY 21) BUSINESS WIRE - Qume Corp. (NASDAQ: QUME) Monday announced that in its fourth quarter ended Feb. 28, 1990, the company recorded net income of $827,000, or seven cents per share, on revenues of $54.5 million, compared to net income of $2,029,000, or 17 cents per share on revenue of $56.1 million for the same quarter last year.

These results are net of $477,000, or four cents per share, of income attributable to minority interest in the company's Taiwan subsidiaries, which reduced consolidated results for the quarter.

The current quarter's income before provision for income taxes and minority interest was approximately $4.4 million. This included a capital gain of approximately $6.9 million relating to completion of the private placement of common stock of Qume Corp. Taiwan (Qume Taiwan), one of the company's Taiwan subsidiaries.

The capital gain was partially offset by an operating loss of $2 million and interest and other expenses of $0.5 million. In the fourth quarter of last year, the company's operating income of $3.6 million.

The company retains a 72 percent ownership in Qume Taiwan. The tax provision was unusually high in the quarter due to taxes related to both the Taiwan capital gains transactions and to a year-end cash and share dividend declared by DTC Technology Corp., also a Taiwan subsidiary.

The company has an effective ownership of 70 percent in DTC Technology Corp. Neither minority interest or capital gains affected net income in the fourth quarter of last year.

For the fiscal year ended Feb. 28, 1990, net income was $8,671,000, or 73 cents per share, on revenues of $222.3 million. The current year net income is net of income attributable to minority interest in the company's Taiwan subsidiaries of $1,968,000, or 17 cents per share.

The annual income before provision for income taxes and minority interest was approximately $17.5 million. This included capital gains of approximately $11.8 million from a private placement of common stock of

DTC Technology Corp. and private placements of common stock of Qume Taiwan.

For the corresponding period last year, net income was $5,036,000, or 43 cents per share, on revenues of $183.2 million. Neither minority interest nor capital gains affected net income in that period.

Qume Corp. manufactures and markets a wide variety of computer peripheral products under the trade name Qume for page printers, terminals and supplies and Data Technology for disk drive storage controllers, chip sets high-capacity flexible disk drives and subsystems.

#90141b0675 05/21/1990 ~Business Wire

VALENCIA, CA (MAY 21) BUSINESS WIRE - Huntway Partners L.P. (NYSE: HWY) Monday announced that it has entered into an amended and restated credit agreement with its bank to restructure its existing bank credit facilities into a $17 million term loan and a $31 million letter of credit/working capital facility.

Huntway has also completed a $5 million private placement of 625,000 newly issued preference units at $8 per unit to affiliates of Reprise Holdings Inc., the general partner of Huntway's managing general partner. As a condition to such issuance, Huntway has amended its partnership agreement to permit a portion of the proceeds from these units to be distributed as available cash on May 30.

The closing of these two agreements and the amendement to the partnership agreement will enable Huntway to pay the previously announced quarterly distribution of available cash of 34.5 cents on May 30 to each preference unit outstanding on the record date of May 15.

The bank agreement permits subsequent distributions to preference unitholders only to the extent Huntway's future operating performance meets certain targeted levels specified in the bank agreement and Huntway is in compliance with the covenants under this agreement. The agreement does not permit distributions on the common units until the bank term loan has been reduced to $5 million.

Huntway owns and operates three crude oil refineries, two in California and one in Arizona, which primarily produce liquid asphalt for use in road construction and repair. Its preference units (other than the newly issued preference units) are traded on the New York Stock Exchange.

VAN NUYS, CA (MAY 21) BUSINESS WIRE - Valley Federal Savings and Loan Association (NASDAQ/NMS: VFED) Monday announced that its board of directors has executed an operating agreement with the Office of Thrift Supervision (OTS).

The operating agreement sets forth the conditions to the approval of Valley Federal's capital plan by the OTS. The OTS approved Valley Federal's capital plan on May 1.

Scott Braly, Valley Federal's president and chief executive officer, said: "Execution of the operating agreement completes the approval process for Valley Federal's capital plan. Now we can move forward in rebuilding the company's capital base and reestablishing our credentials as a viable financial institution."

The operating agreement rescinds the restrictions imposed by the OTS in early January of this year. Valley Federal also announced that the OTS has formally approved Braly as the company's president and chief executive officer. Braly is also Valley Federal's chief financial officer.

Valley Federal has assets of approximately $2.9 billion. Valley Federal's deposits are insured by the FDIC and are backed by the full faith and credit of the U.S. government.

#90141b0677 05/21/1990 ~Business Wire

LOS ANGELES (MAY 21) BUSINESS WIRE - Falcon Cable Systems Co., a California Limited Partnership (ASE:FAL), Monday reported higher revenue and cash flow for the first quarter ended March 31, 1990.

In the first quarter of 1990, revenues increased by 27 percent and operating income before depreciation and amortization grew by 38 percent over the same period in the prior year.

''Despite the fact that our units are trading well below their initial public offering price, Falcon continues to show solid increases in both revenue and cash flow. These increases have resulted from acquisitions, internal subscriber growth and improved operations,'' said Marc B. Nathanson, chief executive officer and chairman of the board.

''Falcon's operations remain fundamentally sound and recent acquisitions have been successfully integrated,'' added Nathanson.

Falcon achieved revenues of $8,608,800, for the three months ended March 31, 1990, compared with $6,779,600, for the same period in 1989.

Operating income before depreciation and amortization for the three months ended March 31, 1990, rose to $4,370,800, from the prior year total of $3,171,000.

At the end of the first quarter, Falcon had subscribers totaling 165,381. This total represents a 26 percent increase over the subscriber total of 131,200 on March 31, 1989. This increase includes 11,400 basic subscribers acquired on March 1, 1990, in Coos Bay, Ore.

As expected, Falcon experienced a net loss of $2,500,100, or 39 cents per equivalent limited partnership unit for the three months ended March 31, 1990, compared with a net loss of $786,800, or 12 cents per equivalent limited partnership unit for the same period in 1989.

This net loss is principally attributable to increases in non-cash depreciation and amortization expense and increased interest charges due to acquisitions and capital expenditures.

Falcon is currently in a contract stalemate with Cooke Media Group Inc. and its affiliates regarding the status of certain cable systems serving Cottage Grove and Florence, Ore., originally scheduled to be purchased by Falcon from Cooke in April 1990.

Falcon and Cooke are currently in negotiations with respect to these acquisitions, however, there can be no assurance regarding the outcome of such negotiations or that these acquisitions will be consummated.

Falcon owns, operates and develops ''classic'' cable television systems in more than 115 communities in California and western Oregon that do not receive a wide variety of clear broadcast reception.

Falcon Cable Systems is one of seven separate partnerships operated by Falcon Holding Group Inc., which together (including announced acquisitions) serve more than 800,000 subscribers in over 500 communities in 28 states.

RESEARCH TRIANGLE PARK, NC (MAY 21) BUSINESS WIRE - Broadband Technologies Inc. (BBT), developer of the BBT System, a fiberoptic subscriber loop transport system for telephone companies, Monday announced it has received $10 million in a second round of financing from several major investors.

The financing includes strong participation from first-round investors TA Associates of Boston, Accel Partners of San Francisco and Princeton, N.J., and Abacus Ventures of Greenwich, Conn.

New investors include Goldman, Sachs & Co. of New York, Saint Paul Venture Capital of Minnesota, 31 Venture Capital of Boston, Boston Capital Ventures of Boston and Chicago, and the venture capital group of NYNEX Corp.

''This financing builds on the tremendous momentum we are experiencing at BBT,'' said Salim A.L. Bhatia, president, chief executive officer and company co-founder. ''Reaction to the BBT system from the Regional Bell Operating Companies and independent telephone firms has been extremely favorable.

''This funding will enable us to enhance the system and to put into place the necessary infrastructure to meet the needs of our customers.''

The BBT system is currently being field tested by Bell Atlantic, while NYNEX is testing the system in its Science & Technology Center. BBT is also in negotiations with a number of additional telephone companies and expects to announce several new trials in the next few months.

The BBT system is the first fiberoptic subscriber loop transport system to meet the telephone companies' needs for a cost-effective way to provide basic voice services today, together with an upgrade path to provide subscribers with advanced new services.

These services include impulse pay-per-view television, high-definition video, high-speed data transmission, online, interactive consumer information services, and numerous other value-added services.

BBT was founded in 1988 as a spinoff from Siecor, a joint venture of Siemens and Corning Inc. that is the world leader in supplying fiberoptic cable systems for the public telephone network. The company's management team has extensive experience in developing and marketing telecommunications systems for the industry's major firms, including Alcatel, AT&T Bell Laboratories, Corning Inc. Harris Corp., Northern Telecom and Siecor.

#90141b0694 05/21/1990 ~Business Wire

SAUSALITO, CA (MAY 21) BUSINESS WIRE - SBT Corp. has announced the addition of a new financial analysis and report writing module to the SBT Database Accounting Library.

SBT Financial Reporter is a Lotus 1-2-3 add-in that designs and produces custom financial reports by reading accounting data from SBT General Ledger.

SBT Financial Reporter maintains the simplicity that has made Lotus 1-2-3 the most popular spreadsheet available and uses standard accounting terminology like ''year-to-date,'' ''previous period,'' and ''current balance.''

Complete integration with SBT General Ledger includes password protection, sequence numbering, automatic location of the SBT General Ledger data files, and compatibility with popular database programs including dBASE, FoxBASE+, and Clipper.

More than a report writer, SBT Financial Reporter is a powerful financial analysis tool to analyze current financial situations, make projections, and assess ''what if'' possibilities. ''There is no other comparable product in power and simplicity,'' noted Peter Winokur, SBT Director of Product Management.

''The reporting and analysis flexibility provided by this program is outstanding. Lotus 1-2-3 users will be able to use this program almost instantly,'' added Carol Zuniga, SBT Manager of Accounting. Zuniga uses SBT Financial Reporter to generate and analyze SBT's own comprehensive financial reports.

SBT Financial Reporter includes tutorials for creating reports as well as a complete context-sensitive help system. Sample worksheets for standard business reports include an Income Statement, Balance Sheet, Statement of Changes in Financial Position, Operating Ratio, and Departmental Income Analysis.

The program can also generate Consolidation reports, Multi-Year Comparisons, 12-month Comparative Reports, Percentage Change, Cash Flow Analysis, Budgets, Taxation Planning, Summary and Detail reports and

graphs.

SBT Financial Reporter links Lotus 1-2-3 directly to SBT data files using SBT specific Lotus functions. Reports are updated automatically from dBASE data files with current information simply by recalculating the worksheet.

SBT Financial Reporter is compatible with Lotus 1-2-3 versions 2.01 and 2.2. and has a suggested retail price of $495.

SBT Corp. manufactures the SBT Database Accounting Library and the SBT Database Executive Library. The SBT Database Accounting Library, a complete modular accounting system, is the most widely used accounting software, with 100,000 business users in more than 70 countries. The new SBT Database Executive Library features modules which facilitate business communications and other operational activities.

SBT markets products for MS-DOS, Macintosh, UNIX/XENIX, VMS and other popular operating environments.

SBT has set an industry standard for modifiable accounting software with modules available in both source code and compiled versions. In November of 1989, SBT was awarded the Data Based Advisor Reader's Choice Award for Best Accounting System as well as the DBMS Reader's Choice Award for Favorite Source Code Package.

GUNTERSVILLE, AL (MAY 21) BUSINESS WIRE - William J. Hebding, chairman and chief executive officer of Comptronix Corp. (NASDAQ/NMS:CMPX), Monday announced that Comptronix has completed the acquisition of the printed

circuit board assembly operations of Ampex Recording Systems Corp.

Based in Redwood City, Calif., Ampex Recording Systems Corp. manufactures high-end professional and automated studio recording systems for the television industry worldwide.

The printed circuit board assembly operations which Comptronix acquired from Ampex are located in Colorado Springs, Colo. The facility, which employs approximately 125 people, has been used by Ampex to provide printed circuit boards for its own operations.

Comptronix expects the Colorado Springs facility to continue to provide $15 million to $20 million worth of circuit board assembly services annually to Ampex in addition to attracting new contract manufacturing customers.

Hebding stated, ''The Ampex facility will begin contributing to our revenues immediately and should have a favorable impact on our second half results. Over the longer term, the facility will provide an excellent base from which to expand our western operations. As a complement to our San Jose, Calif., plant, the Colorado Springs location gives us a stronger presence in the western U.S. and enhances our revenue potential in this important market area.''

Comptronix Corp. provides contract manufacturing services to original equipment manufacturers in the electronics industry and specializes in assembling printed circuit boards for customers requiring strict quality control and prompt, responsive service.

#90141b0704 05/21/1990 ~Business Wire
LONDON (MAY 21) BUSINESS WIRE - The following is a statement by chairman of Carlton Communications Plc, Michael Green.

''I am pleased to report respectable progress in the six months to 31st March, 1990.

''Turnover, including share of associates has increased by 72 percent to $665 million (405 million pounds).

''Profits before tax have increased by 54 percent to $106.7 million (64.9 million pounds).

''Earnings per share were $0.362 ($0.359) 1/822.02p (21.83p)3/8.

''The interim dividend is being increased by 80 percent to $0.095 (5.508p) net. The directors intend to recommend a final dividend of $0.14 (8.551p) net. Together with improving the balance between the interim and final, this will bring the total dividends for the year to $0.235 (14.059p) net, which is a 50 percent increase over 1989.

''Carlton's principal activity remains the supply of products and services to the television, film and video industries. These have been, and continue to be, industries with above average growth due to more broadcasting hours, technological change, and the emerging ''sell-through'' video market.

''Demand for our television and sound products has continued to grow as a result of the increase in the number of European television stations and post-production facilities, as well as the change from analogue to digital technology.

''Carlton companies have launched a number of innovative new products in the last six months which have been well received.

''Abekas took an unprecedented number of orders for its new A82 composite digital vision mixer when it was launched at the U.S.'s main industry trade show in April - the National Association of Broadcaster's convention in Atlanta.

''Shipments are expected to begin in the last quarter of 1990.

''New products from Quantel like Harriet, a dynamic graphics workstation; Picturebox, a sophisticated system for broadcasters which stores and presents graphics and still pictures; and Harrytrack, which adds an audio edit facility to the Harry video editing system, have attracted considerable interest.

''ITN has recently ordered a system for its new headquarters in London based on four Pictureboxes within a fully integrated Quantel system.

''Quantel is now addressing new markets with its proprietary technology and continues the arduous and time-consuming task of challenging existing working practices with new techniques.

''The High Court has unambigouosly upheld Quantel's Paintbox patents in two recent cases. The company spends significant resources on research and development and will continue to protect its investment wherever necessary.

''Video is now established as a medium in its own right. Demand for pre-recorded video cassettes of feature films, special interest programs

and promotional material has been strong.

''In the pre-Christmas period last year, demand at Technicolor outstripped capacity and work had to be sub-contracted.

''Since then Carlton has made a significant investment in additional capacity which should be sufficient for the foreseeable future.''

''Film studios are beginning to release major feature films on video throughout the year rather than concentrating on the peak period before Christmas.

''This will increase demand and improve plant utilization at Technicolor. Walt Disney and Warner Bros. launched major new titles on video in the first three months of this year including ''Honey I Shrunk the Kids' and ''Lethal Weapon II.''

In May, Walt Disney released ''The Little Mermaid'' - one of its most recent box-office successes - on video in the U.S. and estimates in the trade press anticipate sales of up to 10 million units.

''Video is also becoming widely used for sales promotion. Technicolor recently produced several million copies of a promotional tape for Burger King based on the box office hit ''Teenage Mutant Ninja Turtles.'' Price competition to supply these types of ''premium'' videos is strong.

''Demand for video in Europe is growing faster than in the US with penetration building up from a low level in several large markets. ''Technicolor's film business has increased market share which has led to a better utilization of its production facilities. The increase in the numer of releases by the major US film studios this year and the growth in the number of screens has increased demand for film prints.

''Carlton's post-production companies in London, New York and Los Angeles have continued to perform well, reflecting the overall growth of the market in which their broad spread of customers operate. Activities range from repackaging programs for international markets and post producing television programs and commercials, to providing uplink facilities for three satellite channels, and operating outside broadcast units for use all over Europe.

''Profits at Central Independent Television PLC, of which Carlton owns 20 percent, fell slightly in its second half and this is reflected in its contribution to these interim figures.

''The breakdown of Carlton's sales and pre-tax profits by division show that while sales have increased substantially, there has also been an overall reduction in pre-tax margins. This is particularly true in the

Television, Video and Sound Products division where the decrease in margins reflects price competition in some areas. Margins in the Television and Film Services division improved, reflecting increased plant utilization.

''I am pleased to report that Carlton currently has net cash, or cash equivalents, in excess of $98.6 million (60 million pounds) and shareholders' funds of approximately $657 million (400 million pounds).

''I am aware that there is greater competition in some of Carlton's markets and that the general economic climate may affect orders in the short term. However, the first six months have shown good organic growth across the group and the prospects for our industry remain encouraging.''

PEABODY, MA (MAY 21) BUSINESS WIRE - Ergo Computing Inc. Monday announced an 80386SX-based personal computer with an innovative modular design that allows the machine to double as a full-function office desktop or powerful lightweight portable.

Initial shipments of the machine, named the Brick, are scheduled for July.

The heart of the system is the small core module (CPU and disk drives) weighing 8.3 pounds and measuring 3 x 8 x 11 inches. The core module can be coupled with various optional accessories, including a full-size monitor, portable liquid crystal display (LCD) screen, docking station and different keyboards to configure it for either office use or travel.

''The Brick is designed to embody many of the best features of desktop PCs and laptops,'' said Ergo President Tom Spalding. ''It has desktop power and true portability without the limitations of laptop displays and

keyboards. The Brick is really two computers in one -- desktop and portable -- for less than the price of many comparably powered laptops.''

The Brick features a 16 Mhz 386SX microprocessor and incorporates the Chips and Technologies LEAP chip set. It can be configured with one to eight megabytes (MB) of random access memory (RAM) on the system board and is fully compatible with MS-DOS, UNIX and OS/2 operating systems.

The machine's core module fits neatly into one half of a standard briefcase, leaving room in the other half for notebooks, papers and other work-related materials. The core module's half-briefcase-size form factor is attractive to laptop users, who typically spend 85 percent of their time working at known destinations.

By keeping an extra monitor and full-size keyboard at a secondary work locations, such as a home office, Brick users can trim a typical 17-pound laptop packgage to about eight pounds. Moreover, they aren't confined to a laptop's display or undersized keyboard.

Extended VGA graphics are standard, and the Brick is fully EGA, CGA and MDA-compatible. VGA resolution is up to 1024 x 768 pixels with 16 displayable colors. One MB of video RAM is standard. The Brick has the highest-resolution graphics capability available among laptops or portables and supports Microsoft's Windows in modes up to 1024 x 768, as well as at lower resolutions.

Input/Output includes one parallel and two serial ports and a 180-pin master docking station connector.

The Brick's optional paper-white, backlit VGA LCD display utilizes the latest thin-film, super-twist technology from Sharp Electronics. The self-standing display, which also works with other IBM and IBM-compatible PCs, is scheduled to be available in late 1990.

#90141b0720 05/21/1990 ~Business Wire

NEW YORK (MAY 21) BUSINESS WIRE - By integrating a number of existing software products using Microsoft Windows 3.0, Andersen Consulting and Microsoft have developed an application for Microsoft that not only helps product managers design and cost new products, but also enforces company-wide design and packaging guidelines.

Microsoft Windows 3.0 and Toolbook from Asymetrix provide a powerful combination, one that redefines the PC desktop and allows applications like Product Manager's Workbench (PM Workbench) to be developed and delivered quickly and effectively on standard PC platforms, according to Bob Caldwell, Andersen Consulting product manager for Microsoft.

''Windows 3.0 and Toolbook are really the glue that hold the application together,'' Caldwell says. ''Windows 3.0 provides the advanced operating environment allowing access to all available memory. Toolbook and Excel provide the graphical user interface.''

The PM Workbench is an example of integrating technology to solve a specific business problem, says Rick Stuckey, Technology Services partner for Andersen Consulting. Here the concept of an ''intelligent'' product manager's workbench is created through the integration of several existing software products: Microsoft Excel, Nenron Data's Nexpert Object, Future Soft's DynaComm and Cyco International's Automanager. All are brought together under Windows 3.0 and Asymetrix Toolbook.

The system showcases the full benefit of an architecture using an embedded expert system shell. The PM Workbench provides users with the ability to quickly configure a product and estimate production cost for materials, labor and burden over the expected life of the product, explains John Morris, Andersen Consulting partner.

''The communications gap between planning engineers and product managers at Microsoft is bridged by the system,'' continues Morris.

''In addition to automatic cost of goods calculations on new product designs, the workbench also provides Microsoft with on-line viewing of CAD

drawings of existing products and inquiry access to the minicomputer-based manufacturing package for the review of existing designs.

Andersen Consulting has a Client Server group which specializes in the design and development of advanced applications which are constructed under the ''Client Server'' architecture, utilizing the suite of Microsoft applications and operating system products.

Andersen Consulting has helped organizations apply technology for competitive advantage since 1954 when it installed the first computer application for commercial use. The organization helps clients use information in all phases of their management activities -- strategic, industry, operations and financial.

Andersen Consulting's worldwide client base has access to more than 18,000 highly trained professionals serving clients through 157 offices in 45 countries. Andersen Consulting is part of the Arthur Andersen Worldwide Organization.

#90141b0721 05/21/1990 ~Business Wire

CAMBRIDGE, MA (MAY 21) BUSINESS WIRE - Lotus Development Corp. Monday announced a new version of Lotus Agenda, its best selling personal information manager product.

Based on 18 months of research and development with current Agenda 1.0 users and first-time users, the new release dramatically reduces the time required for new users to learn to use the product. First-time users can be productive with Agenda 2.0 in 30 minutes, or they can return the product directly to Lotus within 30 days after purchase for a refund, the company said.

Lotus Agenda helps business professionals organize, track and view the personal information vital to managing their work effectively. With Agenda PC users can quickly and easily organize and manage their to-do lists, activity and meeting calendars, schedules and random information from multiple sources.

First released in July 1988, Agenda has been acclaimed as a technologically powerful and flexible personal infomation manager that far surpasses the capability of list managers, outliners and traditional

organizing tools. Thousands of individual managers and their corporations have successfully implemented Agenda as an institution-wide time project and account management tool. In fact, based on monthly user surveys, nine out of 10 users said they would recommend Agenda to their peers.

Agenda 2.0's date and time features allow a user to enter information such as: ''Meeting with Tom next Tuesday at 10 a.m.'' and the application will correctly identify and log the exact month, day and time of ''next Tuesday at 10 a.m.'' A new ''Datebook'' view allows users to scan their schedule in a format similar to paper formats. For example, date and time information can be viewed on a daily, weekly, monthly or quarterly basis. Agenda 2.0 also features a pop-up calendar that enables users to plan an accurate schedule with a minimum of time and effort.

Experienced and new users will have greater access to information through new wider views. Basic column math equips managers to perform expense tracking and project budgets. Agenda 2.0 also features new pop-up boxes that make it easy to customize.

Agenda 2.0 features printing improvements including postscript printing support. For many managers, the ability to print well-formatted status reports, action lists and date books that have been organized in Agenda 2.0 is a valuable addition to the new version.

Application Tools for Corporate Developers

Agenda 2.0 provides and excellent environment for developing corporate-wide applications. The new release includes a greatly enhanced macro facility including support for customized menus, definable keys, screen control, and error handling. In addition, Agenda 2.0 allows a developer to project views, categories and macros to prevent users from inadvertantly altering applications.

Portability and Networking

Agenda 2.0 is ideally suited to both the desktop and portable PC environments. Managers using Agenda 2.0 in a networked environment will be able to share customer, account, project and other information. Release 2.0 will include the Lotus-standard file reservation system which allows Agenda users to share files across the network. At a later date, standard Node and Server licensing options will be available.

''Agenda 2.0 removes the biggest hurdle users had with the first release -- that it was hard to get up and running quickly,'' said Paul Paget, director, Agenda marketing. ''We tested Agenda 2.0 with managers who had never used Agenda. In an independent usability lab, first time users were organizing and viewing their information within a half-hour with the new release and the redesigned documentation,'' he said. Simple to Learn

Agenda 2.0 features four Starter Applications to help new users become productive quickly and begin experiencing immediate benefits. The Starter Applications -- Activities Planner, Account Manager, People Manager and Information sifter were developed from research on how people actually use Agenda. Together with the completely redesigned documentation, including Quick Start and Starter Applications, new users can move through the start-up process and begin entering and organizing their personal information.

Grant Tipler, a manager in corporate banking at Royal Bank of Canada, said ''If you're like most managers, you begin ever day by trying to remember what you and your staff didn't get to yesterday and what you had better get accomplished today. Agenda 2.0 is the PC product that managers and professionals at every level in a company need to stay on top of the mountain of information required to effectively perform their jobs.''

New Features for Flexibility and Ease of Use

Agenda enables managers to continually modify and update information and to see the implications of new or changed information immediately. After entering random information such as a task list, meeting schedule, project calendar, or a customer contact list in a starter application, Agenda 2.0 users can browse and view their personal information organized by date, person, project, or any other perspective they chose.

The first shipment is planned for Summer 1990. Current Agenda users can upgrade to Agenda 2.0 for $99. Lotus Agenda is available from Lotus authorized resellers. The suggested retail price for Lotus Agenda is $395. Users who purchase Agenda 1.0 or 1.01 from May 21, through 30 days after shipment will be able to upgrade for a materials and handling charge of $30. If for any reason a user is not satisfied with Agenda, the product can be returned to Lotus, with a proof of purchase within 30 days of purchase for a refund of the purchase price. Agenda runs under DOS 2.1 or higher.

MIAMI (MAY 21) BUSINESS WIRE - NEOLENS Inc. (NASDAQ:NEOL) Monday announced that the company has received over $2.4 million in proceeds from the exercise of NEOLENS' Stock Purchase Warrants.

This sum represents approximately 98 percent of the total outstanding warrants which expired May 15. The funds will be allocated for working capital as the company intensifies its sales and marketing efforts.

Norman Davidson, chairman said, ''We are excited about being at this particular junction. Not only do we have the continued support of our shareholders, but we are poised for an extremely positive year ahead.''

NEOLENS, based in Miami, manufactures a wide range of polycarbonate ophthalmic lenses, including sunglasses and specialty glasses. Industry experts consider the NEOLENS product superior to conventional plastic lenses as well as to other polycarbonate lenses.

MANSFIELD, MA (MAY 21) BUSINESS WIRE - Motorola Inc. announced Monday that it is adding universal drug testing for all U.S. employees to its existing pre-employment and "for cause" drug testing policy.

Codex Corp., a subsidiary of Motorola, will also be implementing the corporate policy. Motorola will begin to phase in the expanded policy in September 1990 with full implementation in January 1991, for all U.S. operations except where such testing is restricted by state or local laws.

The expanded policy prohibits non-prescriptive use, manufacture, distribution, and possession of certain illegal drugs and controlled substances by any of Motorola's domestic workforce.

"The Policy Committee of Motorola firmly believes that the illegal use of drugs threatens the vitality of our society, our company, and our families " said Motorola Chairman and Chief Executive Officer George Fisher.

"It is widely known that illegal drug use exists in the workplace," he said, "and Motorola knows it is not an exception. Motorola's primary concerns are the impact of drugs on the quality of our products and services, our ability to meet customer, stockholder and employee performance expectations, and our ability to provide a safe, secure and healthy environment in which to work.

"The objective of our policy is the achievement of a drug-free workforce," Fisher said, "But an additional benefit will be our ability to make a difference in the communities where we live and work".

Motorola must also meet the requirements of the Drug-Free Work Place Act of 1988 which requires all U.S. companies to certify that they will provide a drug-free workplace.

In addition, as a supplier to the government, certain segments of Motorola must meet the requirements of the Department of Defense Drug-Free Work Force Regulations and certain segments must meet the U.S. Department of Transportation Regulations.

Under the expanded policy guidelines, each employee will be selected for testing at least once during the next three years using a non-biased computer selection program.

The test method will be urinalysis. The analysis will be conducted by CompuChem Laboratory in Research Triangle Park, N.C. the company that provides Motorola's current pre-employment drug testing.

CompuChem will test for amphetamines, barbiturates, benzodiazepines, cocaine, cannabinoids, methodone, methaqualone, opiates, and phencyclidine. Each sample will be screened by enzyme immunoassay procedures. Positive samples will be tested again by gas chromatography/mass spectrometry, a highly specific test which will be used to confirm the results.

#90141b0730 05/21/1990 ~Business Wire

BEDFORD HEIGHTS, OH (MAY 21) BUSINESS WIRE - Riser Foods Inc. (AMEX:RSR), Monday announced its third quarter results for fiscal 1990 which continued its strong trend of improvements over last year.

Earnings for the third quarter of fiscal 1990 increased $3.3 million over last year while earnings year-to-date have risen $11.7 million over last year.

Riser's results for its third quarter of fiscal 1990, a 12 week quarter which ended April 7, 1990, boasted net income of $1.9 million, or 23 cents per common share, on sales of $243.3 million in fiscal 1990 as compared to a loss of $1.4 million, or 18 cents per common share, or sales of $243.3 million last year. Same store sales for Riser's Stop-N-Shop stores rose 1.9 percent over last year during the third quarter. These increases were offset by same-store sales decreases in Riser's Carl's stores of 8.6 percent.

Riser reported net income of $5.9 million, or 72 cents per common share, on sales of $816.8 million for the forty weeks ended April 7, 1990 as compared to a net loss of $7.5 million, or 95 cents per common share, on sales of $834.2 million forty weeks ended April 8, 1989.

Riser noted that the net loss for the forty weeks ended April 8, 1989 included a one-time gain on the sale of 11 stores which amounted to approximately $3.3 million or 41 cents per common share. Same store sales for Riser's Stop-N-Shop stores have risen 4.0 percent over last year during the forty weeks ended April 7, 1990. These increases were offset by same-store sales decreases in Riser's Carl's stores of 6.2 percent. Riser said that total sales between years were negatively impacted by the loss of sales attributed to the closing or sales of 12 retail units last year.

Riser disclosed that its third quarter results included a one-time charge of $1.5 million to provide for an uncollectible account in its wholesale division.

Riser's current year's results include an extraordinary income item of $1.6 million year-to-date and $400,000 for the third quarter of 1990 representing the utilization of a portion of the company's federal income tax net operating loss carryforward. These extraordinary items partially offset Riser's income tax provisions which amounted to $2.6 million and $800,000 respectively. No credit provision for income taxes was recorded in the prior year due to limitations on the carryback of fiscal 1989 losses.

Riser has improved its debt to equity ratio from 7.8 to 1 at fiscal year-end to 5.7 to 1 at the end of the third quarter. Additionally, Riser earned a permanent .5 percent reduction in its interest rate under its current revolving credit and term loan facility in the third quarter of fiscal 1990 as a result of these improved operations. This reduction affects approximately $40 million of Riser's borrowings.

Riser attributes its turnaround to management's diligence in reducing administrative overhead and controlling operating expenditures coupled with better management of operating margins. Riser also noted that results for the third quarter and year-to-date may not be indicative of the

results for a full year due to the seasonality of Riser's business.

KING OF PRUSSIA, PA (MAY 21) BUSINESS WIRE - Envirosafe Services Inc. (NASDAQ: ENVI), announced Monday that it has been advised by EnviroSource Inc. (which owns approximately 62.5 percent of Envirosafe) that due to market conditions and other factors, EnvirSource has decided not to initiate negotiations with respect to the tax free transaction announced Jan. 17, 1990, in which holders of Envirosafe common stock would have received Envirosource common shares.

EnviroSource stated that, depending upon market conditions, capital and financing availability lender consents and other factors, it intended to acquire additional shares of Envirosafe common stock from time to time. Such acquisitions may be effected through open market purchases.

Envirosafe provides off-site hazardous waste disposal services. The company owns major disposal sites in Oregon, Ohio and near Grand View, Idaho -- two of the 23 such sites authorized under federal law -- and is seeking to obtain permits for new facilities near Devers, Texas and Narvon Pa.

CALABASAS, CA (MAY 21) BUSINESS WIRE - Tekelec Monday announced new monitoring applications, user-interface upgrades, and additional development options to its Chameleon 32 and Chameleon 20 data network test systems.

Version 4.2 software includes a BERT (Bit Error Rate Test) application, Dual Line Display, and extended operation and development features. Tekelec is also releasing a new version of its C Development System option for the Chameleon 32.

''Network managers and product developers always have an upgrade path after purchasing Chameleon 32 or 20 systems. Tekelec ensures that its products continually meet currrent standards as well as provide testing for widely used communications software and equipment,'' said Peter N. Vicars, president and chief executive officer.

The BERT application software provides synchronous and asynchronous Bit Error Rate Testing. Users can select synchronous data rates from 50bps to 64kbps and asynchronous data rates from 50 bps to 19.2kbps.

The Dual Line Display feature represents network data in a 2-line format showing the actual sequence of data as it was captured by the Chameleon. The DCE (Data Circuit-terminating Equipment) data is displayed over the DTE (Data Terminal Equipment) showing packets received from both sides of the line concurrently for instant analysis.

Tekelec is also releasing an upgraded C Development System option for its Chameleon 32. The newest release includes libraries enabling programmers to read Chameleon BRI and PRI menu parameters into their own apllications. It also now includes 25 sample programs illustrating Chameleon 32 C programming capabilities.

Chameleon software Version 4.2 and the new C Development System option will be available during the third quarter. The Chameleon 32 system pricing starts from $19,000 and the Chameleon 20, a compact version of the 32, starts from $14,000. The standard software is included in all new systems, and upgrades are available to existing customers. The C Development System sells for $3,200.

Recognized as a leading test equipment manufacturer, Tekelec's product line encompasses testing of data protocols (ISDN, X.25), transmission services and equipment (T1, FT1, DDS, DS3), signaling (SS7, GSM), and emerging intelligent network applications. Its products are actively marketed worldwide with subsidiaries in Japan and the United Kingdom.

#90141b0752 05/21/1990 ~Business Wire

LOUISVILLE, KY (MAY 21) BUSINESS WIRE - ICH (ASE:ICH) announced Monday that Robert L. Beisenherz will join the company as executive vice president as of June 1, 1990.

ICH also announced the appointment of Martin H. Ruby as executive vice president effective immediately.

Beisenherz will function in a senior staff role, working closely with the ICH management team. For the past 17 years, Beisenherz has been a consulting actuary with Lewis & Ellis Inc. In addition to being a principal in the firm, he is nationally recognized for his work in insurance industry mergers and acquisitions.

He has served as a consultant to ICH since 1978, and has assisted in a number of major transactions. He has also prepared financial projections for both regulators, banks, rating agencies and auditors.

Beisenherz is a Fellow of the Society of Actuaries and a member of the American Academy of Actuaries. He serves on the actuarial appraisal Task Force of the Actuarial Standards Board of the American Academy of Actuaries, which develops standards of appraisals.

He is on an Industry Advisory Board for NCNB Texas and has been a frequent speaker for seminars and professional meetings. He has also published articles in Best's Review and The Actuarial Digest.

''Bob's knowledge of the company and technical and financial background will be invaluable to ICH as we continue to strengthen management and position the company for growth in the 1990s,'' said John Franco, chief executive officer of ICH.

''Since Bob has been so deeply involved in preparing financial projections

for ICH as a consultant, we think it's a great vote of confidence that he has decided to join us,'' Franco said.

Ruby has joined ICH in its endeavor to create and build a non-conventional integrated asset-liability business, which will focus on innovative accumulation products, including Guaranteed Investment Contracts (GICs), Funding Agreements and Annuity Contracts with unique features.

An existing ICH subsidiary, Constitution Life Insurance Co., is being restructured to support this highly specialized business.

Prior to joining ICH, Ruby was managing director of Capital Holding's Accumulation and Investment Group. A Louisville native, Ruby is a Fellow of the Society of Actuaries, and holds a Bachelor of Science from Purdue University and a Master of Business Administration from Bellarmine College.

John Franco, chief executive officer of ICH, said, ''Marty Ruby will be a tremendous plus for ICH. He is recognized throughout the industry for his innovative work in the field of asset-liability management, and he will play a major role in helping ICH to achieve its goal of making our accumulation business a fast growing and highly profitable line.''

''With the addition of Bob and Marty to the team John Franco has assembled I think we have an array of talent which is unmatched in the industry,'' said Bob Shaw, chairman of ICH. ''I think we are going to make a lot of people again take notice over the next few years at the growth potential of the ICH companies.

''I am pleased to have both these individuals available and believe their presence further enhances the successful development of our accumulation and other businesses.

''In Bob Beisenherz's case, I also am delighted to have access to his complete and detailed knowledge of the economics of ICH and its operating subsidiaries. Further, he can be helpful in valuing potential acquisition type investments for Consolidated National Corp. so long as there is no conflict with ICH.''

#90141b0755 05/21/1990 ~Business Wire

ARLINGTON, TX (MAY 21) BUSINESS WIRE - Total Assets Protection Inc., Monday reported sharply higher revenues for its first quarter ended March 31, 1990 and a smaller operating loss.

TAP also reported net earnings in the quarter vs. a net loss in the qaurter last year.

Contract revenues rose to $6,607,227 in the period from $2,614,331 in the year ago quarter. The operating loss was almost cut in half amounting to $670,367 this year compared with $1,255,909 at the same point last year.

After a $651,668 gain on final settlement of discontinued operations, previously accrued, first quarter net earnings amounted to $7,784, or less than one cent a share, compared with last year's quarterly net loss of $1,165,369, or 28 cents per share. There were 4,147,907 weighted average shares outstanding in this year's quarter and 4,146,574 last year.

President J.C. Matlock noted that the revenue gains came entirely from TAP's turnkey and Systems Integration Division's equipment sales where margins are lower than for consulting revenues. Equipment sales rose to $5,349,183 for the quarter, up from $1,262,046 in the year ago quarter.

''This growth was due to the success and maturation of the systems integration group we established in 1985 plus the stragtegic alliance with IBM that provides substantial turnkey opportunities,'' he noted.

The company became a regional service partner with IBM in early 1989 for computer facility planning, design and construction, he added.

''Management is optimistic about the earnings potential for the balance of 1990. Our outlook is based upon a positive perception regarding several large contracts under negotiation one of which was recently signed. Also, we have cut overhead $125,000 a quarter, entered a sales and marketing arrangement with EMCOM for its full line of advanced, real-time computer network performance monitoring and management systems, and we are strengthening our bidding and project control function,'' Matlock stated.

Concerning TAP's balance sheet, he said the company's current ratio stood at 1.6 to 1 at the end of the quarter compared with 1.5 to 1 at Dec. 31, working capital amounted to $1,979,569 shareholders' equity totalled $2,996,037 or 72 cents per weighted average share and the company had just $180,582 in long term liabilities.

The $1.7 million in obligations under captial leases at Dec. 31, 1989, are no longer carried on the balance sheet due to the company's settlement of those obligations.

TAP continues its pursuit of its best options in Australia and is investigating capital funding opportunities to bolster liquidity longer term, Matlock concluded.

TAP is an international architectural, engineering and consulting company

providing fail-safe solutions for information system environments. TAP services include the planning and design of computer centers and other technologically enhanced facilities, communications consulting, security analysis, contingency planning and technology integration.

PHILADELPHIA (MAY 21) BUSINESS WIRE - Keystone Ventures Inc., the wholly-owned, for-profit holding company of Pennsylvania Blue Shield, Monday announced the establishment of Carefree Learning Centers Inc., a child care company which will operate in the southeastern Pennsylvania region.

Concurrently, Keystone Ventures also announced the establishment of Keystone Real Estate Development Co. Inc., which will acquire properties and construct and lease the child care company's facilities.

Carefree Learning Centers Inc. will provide high-quality, child care for children between the ages of six months and six years. The center also will provide both before and after school programs for children up to age 11. Each center will be licensed by the Pennsylvania Departments of Education and Public Welfare and will apply for accreditation with National Association for the Education of Young Persons (NAEYC).

The company plans to open 12 child care centers in southeastern Pennsylvania over the next three years, with the first scheduled to be opened in late August at 1700 Market Street, Philadelphia Final negotiations also are under way for locations in Chester, Bucks and Lehigh counties. A total of four centers is scheduled for opening during the third and fourth quarters of 1990.

Keystone Venture's executive vice president and chief operating officer, Richard J. Neeson, who also will serve as the president of both the child care and the real estate subsidiary, said that Carefree Learning Centers Inc. plans to become a major regional participant in what has become an $11 billion annual market for child care services in the United States.

Citing data recently reported by the Delaware Valley Child Care Council, Neeson explained that the new company has been established to meet a well-documented need for reputable, quality child care in the Delaware Valley.

According to the Council's report, there is a local shortage of 20,000 regulated child care spaces for children ages five and under whose mothers are in the labor force. The Council's study also pointed out that there are child care spaces for 44 percent of such children, and for only 17 percent of all children ages 12 and under with employed mothers.

Keystone Ventures Inc. was formed by the parent company in 1987 as a holding company to carry out its diversification efforts. Keystone Ventures' mission is to develop, acquire and operate primarily health-related enterprises where future revenues and profits will provide a broader financial base for the parent company.

UPPER SADDLE RIVER, NJ (MAY 21) BUSINESS WIRE - Western Union Corp. announced Monday that it has reached an agreement with MCI Communications Corp. under which the two companies will interconnect their public electronic mail services, allowing the exchange of messages between subscribers.

The Western Union 400 service will be interconnected with MCI Mail's XChange 400 service, using the international X.400 standards. Western Union 400 service is fully integrated with the company's EasyLink public messaging service.

"This interconnection between the Western Union and MCI public electronic mail services is a significant step not only for our two companies, but for the entire electronic mail industry," said Peter S. Anderson, president of Western Union's Business Services unit. "Large public and private communities of E-mail users on both networks now will be able to communicate with each other."

Western Union previously announced X.400 interconnections with AT&T Mail, SprintMail, General Electric Information Services and the IBM Information Network.

"MCI is pleased to be providing this interconnection with Western Union because it introduces new business communications options for our customers," said Beth Blumenfeld, president of MCI International, a

subsidiary of MCI Communications Corp.

In addition to Western Union 400 service, Western Union offers OfficeAccess software products, which connect computerized office systems such as DEC, Wang, Data General, IBM Personal System/2 and the IBM Personal Computer with EasyLink. Through NetworkAccess service, users of PROFS, DISOSS and SNADS can access EasyLink services.

MCI Mail was introduced in September 1983 and provides a complete range of messaging options, including electronic mail, fax, telex, hardcopy postal and courier delivery worldwide. MCI Mail can be accessed from almost 80 countries.

Western Union Corp. provides a broad range of messaging, financial and other services, both domestically and internationally, to meet specific needs of business customers and individual consumers. The company is the leading provider of public electronic mail services, which enable its business customers to reach more than seven million electronic mail, fax and telex users worldwide.

FAIRFIELD, NJ (MAY 21) BUSINESS WIRE - Measurement Specialties, Inc. (NASDAQ Symbol:MMSS) Monday announced that it is presently engaged in preliminary negotiations with two major industrial instrumentation companies concerning the sale of the Company or the sale of a substantial interest in the Company.

Since negotiations are in their preliminary stages and no agreement in principal has been reached regarding price and/or structure of the transactions, the Company is unable to state the degree of probability that either of such transactions will be consummated.

Based upon preliminary negotiations to date, the Company estimates that a decision by such prospective purchasers as to whether they will either

purchase or offer to invest in the Company will be made by July 1990.

Measurement Specialties Inc. designs, manufactures and markets low cost digital weight, temperature, distance and pressure measurement products. The Company's technological advantage over its competition is based on innovations it has made in the field of micro machined semi-conductor sensors, the development of application specific integrated circuits and the creation of a computer aided calibration and test system.

#90141b0822 05/21/1990 ~Business Wire

DALLAS (MAY 21) BUSINESS WIRE - Southmark Corp. (NYSE: SM) Monday today reported results for the third fiscal quarter and nine months ended March 31.

For the three months ended March 31, 1990, Southmark reported net loss of $59 million, versus net loss of $1.0 billion in the comparable period of fiscal 1989. Revenues for the fiscal 1990 quarter totalled $268 million, compared with $406 million during the same period a year earlier.

For the nine months, the company reported net loss of $207 million, compared with net loss of $1.1 billion for the nine months ended March 31, 1989. Revenues for the first nine months were $791 million, versus $1.5 billion in the first nine months of fiscal 1989. The loss in the third quarter is attributable to a combination of factors, including greatly reduced real estate sales.

Additionally, the company received reduced revenues from management fees and lease payments from rental properties, as well as reduced interest income.

These revenue reductions were partially offset by reductions in general and administrative expenses due to the sale of businesses and further reductions in staff, as well as the benefit derived from the non-accrual of $100 million of interest on Southmark's unsecured indebtedness during the bankruptcy proceeding.

The company also incurred costs associated with its reorganization activities including increased financial advisory, accounting and legal expenses arising out of the bankruptcy proceeding.

Southmark is continuing its business operations under Bankruptcy Court supervision as it attempts to obtain confirmation of a plan of reorganization. The plan calls for reorganized Southmark to liquidate

most of the company's assets, with the exception of its wholly owned thrift subsidiary, San Jacinto Savings Association. As previously reported Southmark has entered into a settlement agreement with the Office of Trift Supervision which provides for the company to contribute $100 million in assets to San Jacinto, subject to certain conditions including confirmation of Southmark's plan of reorganization.

As of March 31, San Jacinto reported negative shareholders' equity of $50.8 million and regulatory capital below minimums required by law. San Jacinto is in the process of implementing a business plan designed to improve the institution's financial position through selected asset sales and a renewed emphasis on its core thrift operations.

Southmark, headquartered in Dallas, is a real estate and financial services company operating under Chapter 11 of the U.S. Bankruptcy Code.

ATLANTA (MAY 21) BUSINESS WIRE - First Financial Management Corp. (NYSE:FFM) Monday annoucned the acquisition of Electro Data Corp. (EDC) of Denver.

EDC is the leading provider of credit card authorization and settlement services to the luxury hotel and resort industry. FFMC's wholly-owned subsidiary, NaBANCO, will assume the processing of EDC's merchant business which accounts for over $800 million in annual credit card volume.

In making this announcement, Patrick H. Thomas, chairman, president and chief executive officer of First Financial Management Corp., said, ''EDC will provide additional revenues to our growing Merchant Services business particularly as it relates to the hospitality segment where EDC's leadership is well known within the industry. I am pleased to welcome EDC as a part of FFMC and look forward to a long-term relationship with its employees and customers.''

Ronald R. Nation, president of EDC, commented on the transaction, ''We are very enthusiastic about our new relationship with First Financial Management Corp. and NaBANCO, the leaders in our industry. This agreement enhances our ability to provide improved customer service and new products to our current customer base and creates opportunities for new business expansion.''

FFMC is an information services company which offers a broad range of data processing and related services to a large and diverse customer base.

FFMC is one of the major suppliers of financial data processing services to banks, thrifts, credit unions and mortgage servicers, a leader in data imaging, micrographics, electronic data base services, and health and pharmaceutical claims processing, and one of the largest merchant credit card processors in the country.

FFMC also owns Georgia Federal Bank FSB, the largest thrift institution based in Georgia, First Family Financial Services, a major regional consumer finance company, and MicroBilt, a leading producer of custom data communications and information processing systems.

In addition, FFMC is a member of 41 ATM interchange systems across the United States. Its common stock is currently traded on the NYSE under the symbol FFM. Its debentures are quoted through NASDAQ under the symbol FFMCG.

PROVO, UT (APRIL 21) BUSINESS WIRE - Novell Inc. and Hewlett-Packard Co. Monday announced a licensing agreement that will enable HP to offer

Novell's Portable NetWare network operating system to users of its HP 3000 Model 900 RISC- based minicomputers.

Portable NetWare, announced in February 1989, is an OEM version of NetWare that can be ported to a variety of operating system platforms. The product provides NetWare services, such as centralized file and print queue management, resource accounting and network security.

Portable NetWare also offers connectivity to host-resident data and to other NetWare servers and clients on the network. Portable NetWare v3.0 is currently shipping to licensed development partners.

''Hewlett-Packard is a strong and important Portable NetWare development company,'' said James C. Bills, Novell executive vice president of sales. ''The HP 3000 minicomputer and NetWare share many of the same customers within the Fortune 1000.

''Novell is pleased to support HP in providing Portable NetWare as a means to connect HP 3000 and NetWare users over the same network. We see this agreement as another sign that HP recognizes the importance of NetWare in its computing environment.''

''We need to provide our customers with appropriate tools to build client/server applications within their existing information systems environment,'' said Robert J. Frankenberg, general manager of HP's Information Networks Group. ''With this agreement, HP can provide users an OLTP- based server to integrate communications on the desktop, or anywhere on the network.''

This announcement extends a solid working relationship between the two companies. HP is a NetWare Service Organization (NSO), whereby its worldwide service organization is contracted to service NetWare customers. HP is also part of Novell's Independent Manufacturers' Support Program (IMSP) which has certified that HP's equipment is compatible with NetWare. In a separate agreement,

Novell has licensed Portable NetWare to Innovus of Hamilton, Ontario, Canada. Innovus will provide Portable NetWare on the HP 9000 computer running the HP-UX operating system. Innovus provides software-conversion services to a number of applications, enabling them to run on HP minicomputers.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries.

Novell is the leading independent provider of open, high-performance performance network computing software products. The company's NetWare network operating system has become a worldwide standard for personal computer-based local area networks. Novell common stock is traded on the NASDAQ National Market System under the symbol NOVL.

SOMERVILLE, MA (MAY 21) BUSINESS WIRE - Somerset Bankshares, Inc. (NASDAQ: SOSA) announced Monday that it has entered into a standstill agreement with Snyder, von Seldeneck Partners IV of Philadelphia, and its affiliates (the ''Snyder Group'').

Under the terms of the standstill agreement, the Snyder Group has withdrawn its nominees for election as directors at the 1990 annual meeting of stockholders and Somerset has agreed to enlarge the current number of seats on its board of directors to 12 and to elect the Snyder Group's designee, Keith L. Sachs of Rydal, Pa., as a director for a three-year term expiring in 1993. Mr. Sachs' term will begin following the 1990 annual meeting of stockholders scheduled for June 19, 1990. The Snyder Group also agreed that it will not acquire beneficial ownership in excess of 9.9 percent of the outstanding common stock of Somerset and will not participate in any proxy contests involving Somerset.

Somerset reiterated its intention to engage an investment banking firm to examine and consider merger and acquisition opportunities and any other alternatives to increase shareholder value during the next few years.

Thomas J. Kelly, chairman, president and chief executive officer of Somerset stated he is pleased that Mr. Sachs will be joining the board and said that he is looking forward to his assistance and support. Mr. Sachs is the chairman of the board and chief executive officer of Saxco International, Inc., a distributor of glass and plastic containers and other packaging materials based in Horsham, Pa.

#90141b0850 05/21/1990 ~Business Wire

NEW YORK (MAY 21) BUSINESS WIRE - Commodore Environmental Services, Inc. (OTC) today announced unaudited results for the three months ended March 31, 1990.

Revenues from continuing operations for the three months ended March 31, 1990 were $287,000 compared to $289,000 in the first quarter of 1989.

The net loss from continuing operations for the three months ended March 31,1990 was $25,000 or $.001 per share as compared to a net loss from continuing operations of $15,000 or less than $.001 per share in the comparable period one year ago.

The net loss for the quarter was $25,000 or $.001 per share versus net income of $335,000 or $.006 per share in the comparable period one year ago, of which $350,000 or $.006 per share relates to net income from discontinued operations.

Effective December 31, 1989, Commodore entered into arrangements to sell its operating subsidiaries, as further described below. As a result the consolidated statement of operations for the three month period ended March 31, 1989 has been restated to reflect these operations as discontinued operations.

Revenues for the first quarter of fiscal 1989 from discontinued operations were $11,864,000. As previously announced, as part of Management's ongoing effort to reduce Commodore's outstanding debt to its lending institution, the Company has decided to sell its environmental business. In February 1990, Commodore signed an agreement to sell its wholly-owned subsidiary, Hesco Environmental Safety Co., Inc., to a company controlled by members

of the Hesco management team.

In consideration of the sale of Hesco stock to the Hesco buyers, the Buyers will obtain financing and repay approximately $22 million of Hesco's related debt to its lending institution.

Commodore also announced in February 1990 that it had signed a letter of intent to sell its 80.1% shares of common stock and all of the outstanding preferred stock of its Allwash subsidiary for approximately $9,220,000 in cash and a release of certain bank debt guaranteed by Commodore, to members of the management team and other investors. Substantially all of the net cash proceeds from the Allwash sale will be applied to the retirement of certain outstanding Commodore obligations.

The consummation of both sales are contingent upon several matters, including approval by Commodore's Board of Directors and holders of a majority of its common stock, availability of sufficient financing and receipt of a Fairness Opinion by Commodore's Board of Directors. Commodore anticipates the closing of both transactions in the current quarter ending June 30, 1990.

Commodore noted that it plans to acquire a new business or businesses. It intends to form a committee to seek out and investigate acquisition possibilities by the Company. The Company will consider acquisitions in a number of business areas and will look for companies that are currently profitable.

GREENWOOD, SC (MAY 21) BUSINESS WIRE - United Financial Corp. of S.C. Inc. (NASDAQ/NMS:UNSA)(''United'') Monday announced that it has received regulatory approval for the merger/conversion of Home Federal of Rock Hill (''Home Federal'').

As a result of the transaction, Home Federal, located in Rock Hill, S.C., will become a wholly owned subsidiary of United. The combined organization will have assets in excess of $500 million.

James McDonald, chairman of United Financial, commented: ''We have been working toward this approval for several months and are pleased to

announce the Securities and Exchange Commission and Office of Thrift Supervision actions to our shareholders and customers.

''Although the approval process took longer than expected due to a backlog of activities at different regulatory levels, we remained extremely excited with this opportunity to join forces with Home Federal.

''During the application process, we have had the opportunity of getting to know the management, employees, and board members of Home Federal much better and have found them and their operation to be everything we expected. We remained convinced that the addition of Home Federal to our Holding company should bring only good news in the future for all parties involved.

''We look forward to working with Home Federal's chief operating officer, Butch Honeycutt and his management team and the employees, as well as Chairman of the Board Marshall Doswell and the entire Home Federal Board of Directors.''

A secondary offering of United's shares will take place shortly in regard to the conversion of Home Federal from a mutual savings bank to a stock chartered bank. The merger is expected to be finalized by the end of June 1990.

United Financial Corp. of S.C Inc. is a unitary savings and loan holding company the sole subsidiary of which is United Savings Bank Inc. of Greenwood. United Savings Bank Inc. serves Greenville, Greenwood and the surrounding area through five full-service and two limited-service offices.

WAYLAND, MA (MAY 21) BUSINESS WIRE - Candela Laser Corp. (CLZR) Monday announced it has recieved a grant from the National Institutes of Health, under the Small Business Innovation Research (SBIR) program. The grant, valued at $48,284, brings the total of SBIR grants to Candela to more than $3 million.

In conjunction with the National Institute of Arthritis and Musculoskeletal and Skin Disease, Candela will develop a laser system for percutaneous decompression of herniated lumbar disks. The laser has the advantage of a minimally invasive technique, a procedure performed on an outpatient basis with greater patient acceptance.

The work will be conducted in collaboration with Dr. Matthew Quigley and

Dr. Joseph Maroon of Allegheny General Hospital in Pittsburgh, Pa.

Commenting on the SBIR grant, Dr. Michael Lesiecki of Candela said, ''The SBIR program has made a significant contribution to Candela's success. It has fostered new and unique concepts, as well as specific applications and products that are in the forefront of medical technology.

For example, the Candela LaserTripter, cleared for biliary as well as urinary stone treatment, has been used in more than 15,000 procedures. Candela's dermatology systems have proven themselves with more than 50,000 patient procedures.''

FORT WORTH, TX (MAY 21) BUSINESS WIRE - Lomak Petroleum Inc., (''the company''), Monday announced its first quarter results.

Revenues for the three months ended March 31, 1990 reached $1.3 million, a 12 percent increase over the prior year period. Net income rose to $46,000 from a $45,000 deficit in 1989. At March 31, 1990, stockholders' equity totalled $1,154,000.

Subsequent to the end of the quarter, the company privately placed $2.5 million of 8 percent convertible preferred stock and purchased 39 percent of another small independent.

The preferred placement, which is now expected to raise almost $2.75 million in aggregate, was arranged to strengthen the company's equity capital and to help fund its ongoing acquisition program.

On May 15, 1990, the company purchased 39 percent of the stock of Dallas Oil & Minerals Inc. (''DOIL''), a small Fort Worth based oil company for $1.8 million in cash.

Within 30 days, Lomak expects to purchase 100 percent of the stock of a small Ohio based producer for approximately $1.6 million.

If Lomak is eventually able to acquire the remainder of DOIL and the Ohio company's affiliated property interests, the company's asset base will more than double.

Simultaneously, the company announced that John H. Pinkerton, the senior vice president - Acqusitions of Snyder Oil Corp. has resigned to become president of Lomak. The appointment was effective May 16, 1990.

The company is engaged in the acquisition, production and development of oil and gas properties and provides brine disposal and other ancillary services to the oil industry. The company's common stock is listed on NASDAQ under the symbol ''LOMK''.

DUBLIN, GA (MAY 21) BUSINESS WIRE - In the wake of Earth Day and America's renewed interest in environmental issues, Southeast Paper Manufacturing Co., North America's largest manufacturer of 100 percent recycled newsprint, will dedicate its second newspaper recycling machine during an open house and dedication ceremony in Dublin, Ga., on May 22.

''With our reputation for producing the highest quality recycled newsprint the state-of-the-art expansion reinforces our leadership role in the industry,'' stated Ron Wilson, president of Southeast Paper.

''Our recycled newsprint is used by leading newspaper publishers, who report that its performance is consistently equal to or better than all of their other newsprint suppliers.''

With the $330 plus million expansion, Southeast Paper doubled its capacity consuming over one-half million tons of old newspaper in the production of 450,000 short tons of recycled newsprint.

In addition to the new Valmet 358 inch paper machine, the expansion included the construction of a new pulping operation, boiler and turbine generators for generating electrical power. As a result of the expansion, employment at the mill increased to more than 400 employees, and employment at Southeast Recycling Corp. (SRC), Southeast Paper's raw material collection subsidiary, increased to 250.

The dedication ceremony will begin at 1:30 p.m. at Southeast Paper -- located on Shaddock Creek Drive in Dublin. An open house and tour of the facility will follow. Both the ceremony and open house/tour are open to the public.

Southeast Paper Manufacturing Co. is an equal partnership of Cox Enterprises Inc., Media General Inc. and Knight-Ridder Inc., three leading national media companies. SRC purchases and processes old newspaper through its 18 processing facilities and other sources as raw material supply for the production of recycled newsprint at the Dublin mill.

WASHINGTON (MAY 21) BUSINESS WIRE - In response to a projected 65 percent growth in demand for radiologic technologists by the year 2000, Picker International Monday became the first corporate sponsor of the Summit on Manpower -- a consortium of 17 national health care organizations formed to develop a long-range solution to the growing shortage of technologists in radiology and related fields.

The current rate of increase in radiologic technologists -- about 4,000 to 5,000 per year -- falls well short of the projected 6,000 per year needed, according to the Summit on Manpower. Further, radiologic technology schools have experienced a 40 percent decrease in enrollment in the last three years, which further exacerbates the shortfall.

At Summit on Manpower headquarters here, Joseph A. Largey, president of

Picker's Health Care Products Division, the leading U.S. distributor of radiologic supplies, kicked off an aggressive nationwide career education program and presented a check for $50,000 to Summit Chairman Loretta Hanwell and Fund-raising Chairman Howard W. Schwartz.

''A major factor in the projected increased need for radiologic technologists is the aging U.S. population and the consequent increased health care required,'' said Hanwell, Summit chairman and executive director of Central Imaging Services, Pittsburgh.

Picker International, based in Cleveland, is a $750 million global innovator in the design and manufacture of diagnostic imaging systems including computed tomography (CT), magnetic resonance (MR), x-ray, vascular, and nuclear medicine, and is North America's leading supplier of radiographic health care products.

Picker International is a subsidiary of the General Electric Co. (GEC), p.l.c., of the United Kingdom, a diversified multinational corporation with annual sales of $11 billion.

WAYNE, PA (MAY 21) BUSINESS WIRE - Soft-Switch Inc. Monday announces connections with five additional public mail carriers: AT&T, Transpac, British Telecom, INFONET, and GE Information Services (GEIS).

This brings the total number of connections with public mail carriers to nine, more than any other X.400 gateway provider. In addition, the AT&T connection will support the transfer of text, binary files, and revisable documents.

With these announcments Soft-Switch provides its customers with access to 4 million of the estimated 11 million public and private electronic mailboxes worldwide.

Soft-Switch X.400 Gateways also provide access to over 4 million Group III fax machines, and almost 2 million telex machines worldwide. These connections continue to solidify Soft-Switch's leadership position in the private-to-public X.400 arena.

Soft-Switch Inc. provides standards-based connectivity, electronic mail

network management, and mail-enabled applications that add value to customers' expanding electronic mail networks. A 10 year old privately help corporation, it is the acknowledged leader in supplying high performance, open-architecture enterprise mail networks to large corporations. The company also licenses its technology to major office systems vendors and public electronic mail system vendors.

#90141b0890 05/21/1990 ~Business Wire

HUNTINGDON VALLEY, PA (MAY 21) BUSINESS WIRE - FPA Corp. (ASE: FPO), a residential builder with operations in southeastern Pennsylvania, southern New Jersey and Florida, reported a loss from continuing operations of ($7,427,000) or ($1.85) per share on revenues of $19,969,000 during its third fiscal quarter ended March 31, compared to income from continuing operations of $451,000 or 11 cents per share on revenues of $22,395,000 during the prior year's third quarter.

The current year's loss for the quarter from continuing operations included pre-tax adjustments of $5,328,000 for land and inventory writedowns resulting from the continued soft real estate market and $1,800,000 for additional projected losses in Florida.

Continuing operations during the nine months ended March 31 resulted in a loss of ($6,016,000) or ($1.50) per share on revenues of $86,206,000 compared to a loss of ($1,727,000) or (43 cents) per share on revenues of $61,901,000 for the comparable period of the prior year.

In addition to the writedowns discussed above, gross profits on residential units declined approximately $1,500,000 as a result of market conditions. Land and recreation area lease sales increased income from continuing operations by approximately $8,100,000.

On April 11, the company consummated an exchange transaction whereby assets and other securities of the company with a book value of approximately $50 million were exchanged for $39,779,000 of outstanding senior notes and subordinated debentures and related accrued interest totaling $3,400,000. This transaction, which has been reflected in the company's third quarter financial statements, was recorded as an extraordinary loss on early extinguishment of debt of ($9,110,000), net of tax benefit of $1,590,000.

Net loss for the three months ended March 31 was ($16,537,000) or ($4.12) per share compared to a net income of $268,000 or 7 cents per share for the comparable period in the prior year. Net loss for the nine months ended March 31, 1990 was ($15,126,000) or ($3.77) per share compared to a net loss of ($2,356,000) or (59 cents) per share for the nine months ended March 31, 1989.

#90141b0891 05/21/1990 ~Business Wire

BURLINGTON, MA (MAY 18) BUSINESS WIRE - Dynatech Corp. (NASDAQ:DYTC) Monday announced its operating results for the fiscal year ended March 31, 1990.

Sales of $433.3 million rose 8 percent from $399.5 million in the previous year. Net income of $14.7 million, or $1.43 per share, compares to $18.6 million, or $1.53 per share, in fiscal 1989, respectively. Excluding expenses associated with operations restructured or sold, net income per share is $1.60 in fiscal 1990, compared to $1.80 in the prior year.

For the March quarter, record-high revenues of $116.8 million compares with $98.3 million in the same quarter a year ago. Net income is $4.3 million, or 43 cents per share, vs. $950,000, or 1 cent per share, in the fourth quarter of fiscal 1989 which included a 27 cents per share unusual item charge.

J.P. Barger, president and CEO, commented: ''Our performance for the year, while below our standards, reflected steady quarter-to-quarter improvement in recurring earnings per share, excluding unusual items. Incoming orders of $119.8 million in the fourth period were at record levels. We are pleased, although far from satisfied, with these accomplishments given the considerably less-than-robust electronics market we faced during the past year.

''Many of our businesses reported excellent results. Sales of communications products, led by telecommunications test, video and consumer products, scored another solid year of growth. Progress in these areas was diluted by lower domestic sales of communications protocol and network management equipment, and sluggishness in certain defense-related businesses, and by discontinuance and/or sale of certain operations during the year.

''As we look out over the next few quarters, we continue to see an uncertain economic climate. Nevertheless, our cash flow remains strong,

and our debt levels, although higher as a result of our common stock repurchase program, are well within prudent levels which enable us to pursue opportunities as they present themselves. Ending backlog was $85.3 million.''

With annual sales of $433 million, Dynatech Corp.'s high-technology products and systems are used in the collection, processing, analysis, and display of information. Applications for these highly specialized technologies are found in diverse niches of the communications, scientific automotive, aviation and medical markets.

#90141b0903 05/21/1990 ~Business Wire

ATLANTA (MAY 21) BUSINESS WIRE - Fisher Business Systems Inc. (NASDAQ:FBUS) Monday announced that it has made adjustments to the exercise price of certain outstanding common stock purchase warrants.

The company has taken this action in order to provide an incentive to the warrant holders to exercise their warrants prior to the expiration of the warrants on June 10.

There are presently outstanding 643,320 publicly traded warrants to purchase the common stock of the company, each warrant being previously eligible to purchase 1.1 shares of common stock at the price of $2.6148.

The adjusted exercise price with respect to each of these warrants is $1.925, with each warrant continuing to represent the right to purchase 1.1 shares of common stock.

The company has also adjusted the exercise price of certain warrants to purchase an aggregate of 150,000 shares of common stock issued by the company to the managing underwriter of its initial public offering. Each warrant was entitled to purchase 1.2 shares of common stock at an exercise price of $2.8261.

The adjusted exercise price with respect to each of these warrants is $2.076, with each warrant continuing to represent the right to purchase 1.2 shares of common stock.

GROUP LED BY VIKING SUPPLY SHIPS AS OWNS 1,331,100 SHARES (10.68%) OF WESTERN CO OF NORTH AMERICA (TICKER: WSN) OF FORT WORTH, TX.

ANNOUNCEMENT:

On May 10, 1990 Viking Supply filed a call solicitation statement, form of call and letter to stockholders with the SEC with respect to the solicitation of calls by Supply for a special shareholder meeting of Western Co to be held on July 16, 1990.

The purpose of the meeting is to remove without cause the entire board of

directors of Western Co, reduce the number of directors from eight to five and elect Supply's nominees to the vacancies on the board.

Viking intends to commence the solicitation of calls on May 11, 1990.

On May 9, 1990 it received oral notification from the FTC that it's request for early termination of the waiting period with respect to the notification and report filed by Supply to acquire shares of Western Co had been granted.

PURPOSE:

Call solicitation.

SEC - AMENDMENT NUMBER: 9

SHEET METAL WORKERS NATIONAL PENSION FUND OWNS 9,652,915 SHARES (43.50%) OF CHRONAR CORP (TICKER: CRNR) OF HARBERT SOLAR INC..

ANNOUNCEMENT:

On May 11, 1990 Midlantic accelerated the loans outstanding under a 1990 credit agreement due to a default by Chronar Corp, demanding immediate payment from Chronar of $8,374,758.

Sheet Metal is one of the guarantors of certain obligations under the credit agreement and has received a demand from Midlantic for payment of the guaranteed obligations.

Sheet Metal has entered into initial discussions with another bank regarding a replacement line of credit.

Sheet Metal may make an additional investment in Chronar and it is likely that Sheet Metal will provide additional capital.

In the course of considering its additional investment, Sheet Metal's nominees to the board have engaged in discussions with other directors and members of management in order to make changes in the board and in senior management.

PURPOSE:

Default by the issuer.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: NONE

PIAC INC OWNS 4,680,600 SHARES (46.00%) OF PENGO INDUSTRIES INC (TICKER: PGO) OF FORT WORTH, TEXAS.

ANNOUNCEMENT:

According to PENGO's reorganization plan, The Federal Deposit Insurance Corp., Smith-Vasiliou Special Situations Fund LP, The Royal Bank of Canada and InterFirst Funding Corp. acquired their shares as class 3 creditors.

All shares are held in a voting trust, together with shares held by PIAC giving the trust a 92 percent stake. A shareholders agreement restricts the transfer of shares in order to preserve PENGO's tax net operating loss carry forward, while permitting the filers and PIAC to retain voting and beneficial rights in the stock.

It is anticipated that Teachers Insurance and Annuity Assoc. of America, Morgan Guaranty Trust Co. of New York, and Drexel Burnham Lambert Inc. will join the voting trust in the future.

Certain of the provisions of this agreement are implemented in PENGO's bylaws.

The shares held by FDIC, Royal, and Smith-Vasiliou are subject to a shareholders's agreement which contains provisions permitting the parties to nominate one director as long as they hold 10 percent, and gives the parties certain registration rights.

FDIC, Royal and S-V are also parties to a lenders' agreement which provides for voting arrangements among the parties.

Simultaneously withe PIAC's acquisition of the stock,PENGO transferred its interest in three wholly owned subsidiaries and two majority owned subsidiaries to GNPW LP, a Texas limited partnership.

PURPOSE:

Acquisition of shares for investment purposes according to PENGO's reorganization plan.

JERUSALEM (MAY 21) - Israeli troops shot dead three Palestinians and wounded at least 70 in the occupied Gaza Strip on Monday, hospital sources said, while police clashed with thousands of Israeli Arabs.

The latest violence erupted despite a curfew on the entire Gaza Strip as residents of the occupied territories staged a general strike to protest the murder Sunday of eight Palestinian workers by an Israeli gunman near Tel Aviv.

In Israel itself, masked Arab youths in the northern town of Nazareth and Taibeh east of Tel Aviv hurled stones and molotov cocktails at police, who retaliated with rubber bullets and tear gas, witnesses said.

Police detained 15 people in Nazareth, including Nayla Zyad, wife of the town's mayor, Tawfik Zyad.

Residents of dozens of Israeli Arab villages hoisted outlawed Palestinian flags and burnt tyres, while most of the 700,000 Arabs in Israel observed a strike in mourning for the Palestinian workers.

One of the Palestinians reported killed Monday was a 55-year-old woman, Safia Suleiman Jaghoul, shot in the chest during demonstrations at the Khan Yunis refugee camp.

Troops also opened fire on demonstrators in Gaza City, fatally wounding a 17-year-old girl, Manal Suleiman al-Dery, Palestinian sources said. Imad Amel al-Assam, 22, was later shot dead in Rafah refugee camp.

Thousands of Arabs clashed with troops Sunday after a 21-year-old Israeli, a former soldier who police said may be mentally deranged, gunned down the workers at point-blank range in the Rishon le Zion suburb of Tel Aviv.

Arab sources said seven Palestinians were killed in the clashes in the occupied territories and more than 700 wounded.

The latest deaths brought to 684 the number of Palestinians killed by Israeli gunfire since the December 1987 outbreak of an anti-Israeli uprising on the Gaza Strip and West Bank, according to Arab reports.

WINDHOEK (MAY 21) - Angola and Namibia have signed a bilateral accord concerning security in the border region between the countries, Angolan Defence Minister General Pedro Maria Tonya Pedale revealed here Monday.

Gen. Pedale said at a press conference that the accord did not constitute an alliance of security forces against National Union for the Total Independence of Angola (UNITA) rebels.

Western-backed UNITA, which has been engaged in a civil war with the Marxist Luanda government's FAPLA forces since 1975, has its main base in south-eastern Angola at Jamba, a mere 50 kilometres (32 miles) from the Namibian border.

Gen. Pedale said that UNITA elements had committed atrocities against local inhabitants on both sides of the border and said prompt action was needed to control the movement of people and goods to and fro across the border.

"This does not mean a united front between FAPLA and the Namibian army is going to fight against UNITA. It is just a question of maintaining security along the border," Gen. Pedale said.

But UNITA generals have recently expressed fears that newly-independent Namibia, which is ideologically close to Luanda's Marxist government, will open up a new front by launching full-scale cross-border assaults on UNITA bases.

Asked about a possible future joint effort against UNITA by the two armies, Gen. Pedale said Namibia was a sovereign and independent country and that there were international principles that had to be respected.

Backing him, Namibian Home Affairs Minister Hifikepunye Pohamba said that additional Namibian police had been deployed in the border region only to prevent "bandits" from Angola crossing into Namibia.

"We believe that FAPLA in Angola will cope with the internal situation to fight the UNITA bandits," he added. "They do not need to have military assistance from our country."

At the press conference, the two countries issued a joint statement in which they welcomed moves toward the elimination of apartheid in South Africa but noted that Pretoria still remained a potential threat.

"The two delegations recognise that racist South Africa remains the regional power in Southern Africa, from where acts of provocation, economic destabilisation and possible military aggression can be expected," the statement said. "South Africa will remain a potential destabilising factor as long as apartheid is not eradicated."

#90141d0100 05/21/1990 ~French/German News Agency

WASHINGTON (MAY 21) - The United States Monday linked the weekend killing

of eight Arab workers by an Israeli, and subsequent eruption of violent protest in the occupied territories, to Israel's rejection of U.S. efforts to arrange Israeli-Palestinian peace talks.

State Department spokesman Richard Boucher also expressed regret for the violence in the Gaza Strip and the West Bank which followed the killings, and said Washington was "disturbed by the number of casualties inflicted by the Israeli army."

"We've repeatedly called upon the government of Israel to excercise restraint in these situations in order to avoid heavy casualties such as occured yesterday," he said.

"But," he added, "it's not merely enough to have restraint, we need an active,
 viable peace process."

"In the absence of a peace process, the potential for this kind of senseless violence and spiralling responses afterwards goes up," said the spokesman.

On Sunday, an Israeli civilian wearing a military uniform opened fire on a group of Palestinian workers, eight of whom died. Subsequent rioting in the occupied West Bank and Gaza Strip left at least 10 more Arabs dead at the hands of Israeli forces.

While accepting the Israeli assertion that the Israeli gunman involved in Sunday's slayings was deranged and acting alone, Mr. Boucher stressed that to prevent such violence "the hope for peace must be preserved. There must be a belief that peace is possible and that there is a commitment to achieving it."

The United States has been increasingly critical of the failure of the Israeli Government under Premier Yitzhak Shamir to go along with plans for an Israeli-Palestinian dialogue that would lead to elections in the occupied territories and eventual negotiations on the territories' future.

Mr. Boucher added that U.S. diplomats in Tel Aviv and Jerusalem have been meeting with Israeli and Palestinian leaders to discuss the latest unrest.

#90141d0130 05/21/1990 ~French/German News Agency
BUCHAREST (MAY 21) - The first official voting figures on Sunday's election in Romania, released Monday, showed interim President Ion Iliescu racking up almost 90 percent of the ballots in the presidential race.

That result was with more than three million ballots tabulated, which also

showed Mr. Iliescu's ruling National Salvation Front (NSF) drawing more than 70 percent of the vote in the elections for the Chamber of Deputies and the Senate, elected on Sunday at the same time as the president.

The director-general of the Statistics Committee of the Central Election Bureau, Ioan Baciulescu, said that the partial results showed Mr. Iliescu with 2,822,171 votes out of 3,159,909 counted to that point, giving him 89.31 per cent.

His liberal rival, Radu Campeanu, had 169,104 votes or 7.83 percent, and conservative Ion Ratiu 57,495 votes, 2.25 percent. Nearly 16 million Romanians were eligible to vote in the country's first election since the fall of the communist dictatorship in December, and Mr. Baciulescu estimated the turnover at around 80 percent, but no official figure has been announced.

Rompres news agency said that according to the Central Election Bureau, the NSF was winning 73.29 percent of the vote for the Chamber of Deputies, but the agency gave no totals.

It added that the Magyar Democratic Union of Romania was getting 5.68 per cent, Mr. Campeanu's National Liberal Party 4.56 percent, and the National Peasants' Party supporting Mr. Ratiu 1.19 percent.

The Romanian Ecology Movement had 2.14 percent.

Rompres said that in the Senate races, the NSF was pulling 73.5 percent of the vote, the Magyar Democratic Union 5.53 percent, the National Liberal Party 4.77, the ecologists 2.21, and the National Peasants' Party 1.90 percent.

Vote counting did not begin until early Monday, after Sunday's huge turnout forced an extension of polling station hours, by as much as five hours in some places.

The West German organization INFAS and Romanian group IRSOP had estimated on the basis of surveys before the partial official figures were announced that Mr. Iliescu had won 83 percent of the vote in the presidential race.

#90141d0150 05/21/1990 ~French/German News Agency

NAIROBI (MAY 21) - South African black leader Nelson Mandela said here Monday that a coalition government of whites and blacks was possible in South Africa if whites were prepared to provide blacks with full representation.

Speaking during a brief stopover at Nairobi airport after a visit to Cairo,

the official Kenya News Agency (KNA) quoted Mr. Mandela as saying a black-white coalition was possible if "whites agreed to share power on full representation and full rights for all South Africans."

"There were hopes for such an eventuality if the whites could rally behind President Frederik de Klerk in his efforts for political reforms," the deputy president of the African National Congress (ANC) added.

On sanctions, Mr. Mandela reiterated his call on the international community to maintain economic pressure on Pretoria to abandon apartheid.

"Africans were ready to suffer the consequences of those sanctions until the apartheid regime was brought down," KNA quoted Mr. Mandela as saying.

It said he had described British Prime Minister Margaret Thatcher's reason for lifting sanctions as "a feeble one." Mrs. Thatcher has called for an easing of economic sanctions following the release of Mr. Mandela from 27 years in prison in February and the legalization the same month of the ANC.

Mr. Mandela said he had been urgently recalled home from his African tour, during which he visited Algeria, Libya and Egypt, to head the ANC team to negotiations on the modalities of political reforms with the South African government.

Normal activities came to standstill at the Jomo Kenyatta International Airport when Mr. Mandela, accompanied by his wife Winnie, disembarked from a Libyan airlines flight, as crowds jostled to have a glimpse of them.

#90141d0160 05/21/1990 ~French/German News Agency

ABIDJAN (MAY 21) - Ivory Coast President Felix Houphouet-Boigny has promised to examine grievances over working conditions and pay after police in the economic capital went on strike earlier Monday, informed sources said.

Police officers said they would resume their strike if Mr. Houphouet-Boigny failed to respond satisfactorily to their demands by Saturday.

A delegation of 10 police officers told the president they wanted better working and living conditions and state-sponsored insurance and rent. They also called for an end to obligatory deductions from their salary for membership in the ruling Democratic Party (PDCI).

The police strike came less than a week after two mutinies last Monday and Wednesday by army conscripts who were also allowed to put their case to the president.

Hundreds of armed policemen took to the streets here earlier Monday, blocking off routes leading to the central police station in the city center.

Gendarmes were sent to the police station, provoking strong reaction from policemen, but no clashes were reported.

The strikers fired several shots in the air to break up a gathering crowd, and appeared nervous and confused.

Before seeing the president, the police delegation met with Internal Security Minister Issouf Kone and a representative from the presidency, named only as gendarme Colonel Tany.

Meanwhile, hundreds of young men recently released from military service peacefully demonstrated Monday in front of Mr. Houphouet-Boigny's residence for the government's help in finding employment for them or allowing them to re-enlist in the army, witnesses said.

#90141d0230 05/21/1990 ~French/German News Agency

NEW YORK, UNITED NATIONS (MAY 21) - U.N. Secretary General Javier Perez de Cuellar Monday appealed for restraint between India and Pakistan after the assassination of a popular Moslem leader in Kashmir.

Mr. Perez de Cuellar was "shocked and saddened" over the death of the influential religious leader and Moslem high priest Mirwaiz Maulvi Farooq, said U.N. spokesman Francois Giuliani.

The religious leader was killed earlier Monday by four gunmen who entered his fortress-like home in a fashionable Srinagar district posing as visitors.

Security forces killed at least 20 mourners and wounded 200 in efforts to disperse some 10,000 marchers protesting the murder, according to police and witnesses.

-30- 902

#90141d0250 05/21/1990 ~French/German News Agency

WASHINGTON (MAY 21) - U.S. observers determined that Sunday's elections in Romania were free and enthusiastic, but the State Department said it was awaiting further details before deciding if the emerging goverment would merit U.S. aid.

Department spokesman Richard Boucher said that problems with voting and other election day irregularities in Romania "appeared to be minimal,"

although he noted that some opposition figures had reported electoral abuses.

"We see this as an important beginning for Romania," he said, noting that "further improving the process of democracy will be a key task for whatever government emerges."

"We look forward to working with the government that emerges," he added.

Mr. Boucher said a large observer delegation dispatched to Romania by President George Bush had found that voting "was free, peaceful and enthusiastic."

But he added that the election campaign had been flawed, notably by the ruling National Salvation Front's use of government media and resources for its candidates and intimidation and violence targetted against opposition parties.

Initial election results Monday indicated a sweeping victory for the front and its presidential candidate, interim President Ion Iliescu. Final results are not expected until later this week.

The United States has conditioned future aid to Romania and other Eastern European countries above all on the holding of free and fair elections, and repeated U.S. criticism of the front's handling of the election campaign had cast doubt on future relations with a government headed by Mr. Iliescu.

Asked about the issue of possible U.S. aid following Sunday's polls, Mr. Boucher said, "Our assessment of the elections for now are only beginning and we're not prepared to offer conclusions or observations on topics such as that.

He said the U.S. observers were due to arrive back in Washington Wednesday to report their findings in detail.

-30- 2162

#90141d0280 05/21/1990 ~French/German News Agency

CARACAS (MAY 21) - Fire swept through the University Clinic Hospital here Monday, killing three young patients and forcing the evacuation of as many as 300 patients, authorities said.

More than 300 firefighters worked to extinguish the pre-dawn blaze in which one infant, a seven-year-old boy and a 16-year-old youth were killed, officials said.

Hospital director Pedro Paez said 75 patients were evacuated, but firefighters and doctors told local television networks that the evacuees

was around 300.

Mr. Paez said the fire erupted at 12:50 a.m. (0450 GMT) when a water line burst in the clinic's basement, short circuiting the building's electrical system and igniting oxygen bottles stored beneath the hospital.

The hospital, located on the campus of the Central University of Venezuela, was placed under a state of emergency for three days while technicians worked to restore electrical and water service.

#90141d0290 05/21/1990 ~French/German News Agency

MIAMI, FL. (MAY 21) - Ousted Panamanian leader Manuel Antonio Noriega received secret payments from U.S. intelligence agencies, but less than the 11 million dollars he claims to have been given, prosecutors said Monday.

"The government believes that the amount is substantially less than that offered by the defense counsel," said Diane Cossin, a spokeswoman for the U.S. attorney's office. "I cannot be more specific because that information is not public."

To avoid revealing classified information, the prosecution will request that the matter be heard privately by U.S. District Judge William Hoeveler Ms. Cossin said.

The issue was expected to dominate a hearing that began Monday, called to resolve a dispute over a U.S. decision to freeze all of Mr. Noriega's known bank accounts on the grounds that they contain drug profits.

Mr. Noriega's attorneys have subpoenaed payment records from the Central Intelligence Agency, the Drug Enforcement Administration and other intelligence agencies to show the former leader had income from sources other than alleged bribes from Colombia's Medellin drug cartel.

The defense says Mr. Noriega -- a former general in Panama's now-defunct defense force -- carried out many apparently illegal activities in connection with his clandestine work for the U.S. Government.

Defense attorney Frank Rubino say Mr. Noriega also received six or seven million dollars from as yet unidentified countries in exchange for his services as an informant or agent.

Defense lawyers have threatened to withdraw from the case, arguing they cannot be paid or mount an adequate defense while Mr. Noriega's bank accounts are frozen. The ex-leader has 27 accounts frozen around the world with assets prosecutors value at about 20 million dollars.

Mr. Noriega surrendered to U.S. authorities last January 4, two weeks after the U.S. invasion of Panama.

He faces a dozen charges of cocaine trafficking and racketeering. He currently is jailed in Miami, Florida.

His trial is due to begin next year.

#90141d0300 05/21/1990 ~French/German News Agency

MOSCOW (MAY 21) - The Lithuanian government adopted new proposals on Monday in a bid to end a two-month stalemate with Moscow over the Baltic republic's independence declaration, Tass news agency said.

But a spokesman contacted by telephone at the parliament in Vilnius said there was "no question of going back on the declaration itself", voted by parliament on March 11.

Tass did not give details, but said the proposals concerned suspension of the independence proclamation. Lithuanian Prime Minister Kasimiera Prunskiene announced at a news conference that the new proposals had been drawn up.

Mrs. Prunskiene explained that the final version would be decided by the Lithuanian parliament.

Soviet leader Mikhail Gorbachev, who met Mrs. Prunskiene in Moscow last Thursday, insisted that Vilnius must cancel its independence declaration or at least suspend it before Moscow would agree to talks.

Lithuanian President Vytautas Landsbergis stressed on Friday that he was opposed to retracting the independence declaration, although he was willing to consider suspending laws passed since March 11. A majority of Lithuanian deputies shared that view in a debate on the issue at the weekend.

#90141d0340 05/21/1990 ~French/German News Agency

AMMAN (MAY 21) - Hundreds of demonstrators here Monday attacked a hotel run by the American chain Marriott and marched on the U.S. Embassy in a protest over the killing of eight Palestinian workers Sunday near Tel Aviv.

The protesters, mostly from Palestinian refugee camps around Amman, dispersed after Jordanian security forces and anti-riot police used batons to keep the demonstrators away from the embassy, a correspondent at the

scene said.

Jeeps mounted with machine-guns and armoured vehicles were posted around the mission in the Jebel-Amman district of the capital.

At the Marriott Hotel, the demonstrators broke the door and glass front as well as ransacking a flower shop. They replaced Arab flags outside the hotel, except for that of Jordan, with Palestinian flags. A hotel employee was injured in the leg.

An estimated 15,000 demonstrators earlier roamed the streets brandishing black flags to protest the killing of the Palestinian workers by a lone Israeli gunman.

They shouted anti-Israeli and anti-U.S. slogans, demanding revenge for the Tel Aviv murders.

A Jordanian of Palestinian origin Monday attacked a tour bus here with a gun and knife, wounding nine French tourists and a Jordanian driver before he was seized by security forces.

Authoritative sources named the assailant as Ahmad Badwan, 30, saying he was from the West Bank and had lost a family member in the Tel Aviv attack.

King Hussein visited the wounded in hospital to express his condolences, and he vowed the assailant would be punished.

#90141d0380 05/21/1990 ~French/German News Agency

BONN (MAY 21) - The chancellor's office here denied Monday a report published the same day in the U.S. daily Washington Times that Chancellor Helmut Kohl had proposed a West German contribution of 450 million dollars a year for maintenance of Soviet troops in what is now East Germany.

A spokesmen said that "We have made no commitments of that sort". During

the last few weeks, Mr. Kohl has expressed a willingness, in connection with German unification, to contribute to the cost of upkeep of Soviet troops in East Germany.

The Washington Times, quoting U.S. administration sources, said that Mr. Kohl, who left Washington on Friday, had said he was ready to finance the stationing of the Red Army on German soil for five years following unification.

He was said to be willing for West Germany to pay 450 million dollars a year for this purpose, and even to be ready to go as high as 550 million.

The report links up with one published Monday by the West German weekly Der Spiegel, to the effect that Kohl advisor Horst Teltschik had mentioned during a May 5-6 visit to Moscow that West Germany might pay up to 300 million marks (around 180 million dollars) a year to help in upkeep of the Soviet army in East Germany. That report has not been confirmed or denied.

The Washington Times said Moscow had demanded 1.2 billion dollars a year from Bonn for this purpose, "the price for unification". It said the Soviet Union had indicated that its 380,000 men stationed in East Germany would not be brought home before 1995, or even 1997.

Moscow has explained that it could not cope, economically, with massive release of such troops, the Washington newspaper said.

It added that, according to Moscow, East Germany paid 850 million dollars a year before the opening of the Berlin Wall in November for maintaining Soviet troops.

WASHINGTON (MAY 21) - A senior Soviet official complained Monday about the low level of foreign investments in his country, saying foreign investors should act now in anticipation of economic reforms and the convertibility of the ruble.

U.S. Commerce Secretary Robert Mosbacher agreed.

Stanislav Assekritov, deputy chairman of the Soviet State Foreign Economic Commission, recognized that "entrepreneurs' interest focuses on the repatriation of profit."

But, he told a symposium on U.S. economic relations with eastern Europe and the Soviet Union, "initially, at least, one can redirect it into investment in non-convertible rubles or find ways of putting it to work in third countries."

Mr. Assekritov insisted that Soviet economic reform was already under way, leading to the opening of a "huge and untapped market."

Foreign investors could be assured, he added, that "these laws will defend not only their rights and interests, but also financial resources invested in business development."

The Soviet Union needed serious assistance from Western partners, not only in the form of credits but -- more importantly -- in the form of goods to help Moscow improve "the situation on the consumer goods market and food supplies needed to relieve tensions" at home, he said.

There was no point in hiding the fact that the Soviet Union was suffering from severe economic and political problems, he added.

Mr. Assekritov admitted that the current instability in the Soviet Union had led to the departure of more than 50 U.S. companies from the U.S.-USSR Trade and Economic Council.

Mr. Mosbacher described changes in in the Soviet Union and Eastern Europe as providing U.S. business with "the doorstep of another historic opportunity."

U.S. investors, he said, had "a truly unique advantage -- our nation has long been a symbol of hope in Eastern Europe."

TOKYO (MAY 21) - The average salary of Japanese workers increased by 4.3 percent last year, the largest annual rise in seven years, the Japanese Labor Ministry reported Monday.

The average monthly salary increased in July to 214,800 yen (1,615 dollars), not including overtime pay and bonuses paid twice annually that often amount to five or six months of extra salary.

The wage hike is the largest since the five per cent increase from 1981 to 1982.

Men are benefiting from a salary increase of 4.4 percent, while women are enjoying a 3.9 percent rise. The former earn on average 276,100 yen (1,840 dollars) and women earn 166,300 yen (1,110 dollars).

The study also showed a narrowing of the difference between the wages of workers who stay with a company and those who change firms.

In the service and other sectors, newcomers with strong qualifications are paid 1.3 times more than the average worker.

The study was based on 1.4 million Japanese employees working in 57,000 firms of 10 workers or more in both the industrial and service sectors.

WASHINGTON (MAY 21) - The U.S. Department of Agriculture (USDA) Monday predicted the biggest single year increase in U.S. wheat production and warned it would lead to bigger stockpiles and lower prices.

At the same time, the department said, "reduced imports are expected in South Asia."

The USDA said U.S. wheat production for 1990 was expected to hit 2.69 billion bushels, an increase of 650 million bushels compared to the 1989 harvest which was hit by adverse weather.

As well as being the biggest single-year increase, this would be the nation's third largest wheat harvest yet.

The biggest increase, some 44 percent, will be in winter wheat production which is likely to hit 2.09 billion bushels, the USDA said.

The department predicts that farmers will receive 2.90 dollars to 3.30 dollars a bushel for their wheat in 1990-1991, compared to an average 3.71 dollars a bushel in 1989-1990 and 3.72 dollars in 1988-89.

#90141d0570 05/21/1990 ~French/German News Agency

BEIJING (MAY 21) - Chinese Communist Party General Secretary Jiang Zemin believes protests are possible here until June 4, the first anniversary of the crushing of the pro-democracy movement, sources said Monday.

Mr. Jiang made the remarks to former West German chancellor Helmut Schmidt, who is on a private visit to China, during a meeting Monday afternoon, sources in Mr. Schmidt's entourage said.

Mr. Jiang said June 4 could be a significant day as he added that "hostile forces" were trying to use the anniversary of the army's crushing of the democracy movement to stir up trouble, the sources said.

It was thought that Mr. Jiang was referring to the Goddess of Democracy ship, which set sail for Japan Monday to obtain equipment it needs to broadcast pro-democracy news to China from the high seas.

According to the sources, Mr. Jiang said riot police have been deployed, implying that authorities would use them in the event of protests.

Luo Gan, secretary general of the state council, said in a separate meeting with the former chancellor that authorities would not call in the army if last year's events reproduced themselves.

The crackdown from June 3 to June 4 claimed 300 lives, according to an official toll, although Western sources put the figure as high as 1,400.

Deng Xiaoping, with whom the former chancellor met Monday morning, said the leadership was responsible for the protest movement, not the students, according to sources in Mr. Schmidt's entourage.

"The students should not be blamed too much," the sources quoted Mr. Deng as saying. "The roots of the problems lie within the leadership and the Party."

In a speech commemorating the anniversary of May 4, when Chinese intellectuals entered the political scene, Mr. Jiang had held the communist party responsible for the movement.

The sources said Mr. Deng, who has met Mr. Schmidt four times now, was "even in better shape than two years ago," when the former chancellor last stopped in Beijing.

He expressed himself without any apparent difficulty. The 85-year-old leader, who has abandoned all his official duties, was said to have trouble articulating and hearing.

Mr. Luo Gan stressed that if students had stolen arms and set fire to vehicles, they had never attacked soldiers.

WELKOM, SOUTH AFRICA (MAY 22) - A black former city councillor was murdered and his body burnt by a crowd Monday in Thabong township after rioting in which seven black demonstrators were killed by police, a police spokesman said.

Witnesses said the homes of a black city councillor and a policeman were also burnt by rioters in Thabong, which is located near the gold-mining town of Welkom in central South Africa.

Thick columns of smoke were seen rising from several areas in the township, and streets were littered with the remains of barricades put up Sunday by

the protestors.

A police spokesman told Agence France-Presse that the victim had been stabbed in the chest and his body burnt. The head and an arm were partially charred.

The killing brought the death toll from violence in Thabong to eight since Sunday.

The seven others were black demonstrators shot by police. Four died Sunday and three succumbed Monday from their injuries.

Black town councillors and policemen are considered government collaborators by black militants. Throughout South Africa's townships, black city government officials are now the target of a campaign aimed at forcing their resignation.

TOKYO (MAY 22) - Asahi Glass Co. Ltd. said on Tuesday it would set up a joint venture with Compagnie de Saint-Gobain of France in the Netherlands to develop and manufacture next-generation bi-layer glass to be used for automobiles and buildings.

Asahi, Japan's largest glass-maker, and Saint-Gobain, the world's second-largest glass manufacturer, are to establish Bi-Layer Develoment B.V. in Amsterdam in June.

The firm, capitalized at 200,000 guilders (98,000 dollars U.S.), will be equally owned by the two companies, Asahi said.

The bi-layer glass is composed of an outer layer of glass and anorganic-film inner layer and is attracting growing attention from the world's glass industry because of its light weight and easy processing.

The joint venture is expected to start sample shipments by the end of next year, Asahi officials said.

TOKYO (MAY 22) - Sumitomo Heavy Industries Ltd. said Monday it agreed with a West German research institute to acquire its advanced technology for measuring abrasion of auto engine parts.

Officials at Japan's leading shipbuilding company said that technology involving the use of a cyclotron helps drastically reduce the time

required for measuring abrasion to less than 10 minutes from the current 2-10 days.

They said that the agreement with Kernforschungszentrum Karlsruhe GmbH will give Sumitomo exclusive rights to offer measuring services and to manufacturer and market equipment needed for measurement in Japan.

TOKYO (MAY 21) - Orient Corp., one of the leading Japanese consumer credit companies, said Monday it would enter the life insurance business in Japan in a tie-up with Combined Life Insurance Co., a U.S. subsidiary of Aon Corp.

Orient's joint venture, subject to approval by the finance ministry, will be the first case in 11 years of a company in another industry taking such a step in Japan.

The joint venture, to be called Orient Aon Life Insurance Co., will be capitalized at 10 billion yen (65 million dollars) on an equal footing between Orient, affiliated with the Dai-Ichi Kangyo Bank Group, and the Chicago-based Aon group.

Combined Insurance, which set up a Japanese branch in 1982, hopes to expand its sales of insurance policies in the Japanese market by taking advantage of Orient's nationwide network, Orient officials said.

TOKYO (MAY 21) - Juki Corp., Japan's largest industrial sewing machine maker, said Monday it would produce household sewing machines in Shanghai in a joint venture with a Chinese concern from next January.

The joint venture, Shanghai Juki Sewing Machine Co., will be capitalized at 570 million yen (3.7 million dollars), 70 percent owned by Juki and the remainder by the Chinese partner, Juki officials said.

It will produce 2,000 sewing machines per month at a plant in the suburbs of Shanghai in the initial year and its production capacity will be boosted to 6,000 units a month four years later, for export to Japan and other countries, they said.

#90141d7900 05/21/1990 ~French/German News Agency

SYDNEY (MAY 21) - Hongkong Bank of Australia Ltd. on Monday sacked 51

people or eight percent of its staff, the bank said.

The bank's Chief Executive Officer James Yonge said the lay-offs were largely confined to head office and the banking divisions.

"It was a step we had to take as part of integrating the bank with its investment bank and in view of the present economic environment which has resulted in a reduction of general banking activity," Mr. Yonge said.

The bank, which was one of 15 foreign banks to open offices in 1985, last year lost 82 million Australian dollars (62 million U.S.).

Bank officials partially blamed the loss on lending to entrepreneurs such as Alan Bond and Christopher Skase, whose company Qintex Australia Ltd. went into receivership shortly after he bid for Hollywood studio MGMUA.

JAKARTA (MAY 21) - Indonesian Mines and Energy Minister Ginanjar Kartasasmita said on Monday that he was certain world oil prices would reach around 18 dollars again within the next two months.

"I am certain that within the next two months, oil prices will reach around 18 dollars a barrel again as OPEC wants them to be," Mr. Ginanjar said after meeting Indonesian President Suharto.

Ministers of the 13 members of the Organization of Petroleum Exporting Countries (OPEC) earlier this month pledged to reduce production by about 1.445 million barrels per day to bring output back down to close to its 22 million bd production ceiling agreed in November.

Mr. Ginanjar however cautioned that prices should not go too far above the 18 dollar mark as this would encourage oil producers to increase their crude output again.

OPEC groups Algeria, Ecuador, Gabon, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, the United Arab Emirates and Venezuela.

#90141d7920 05/21/1990 ~French/German News Agency

TOKYO (MAY 21) - Japan's rapid rate of money supply growth is partly fuelled by financial liberalisation but is nevertheless sending alarm signals to the country's central bank, a senior Bank of Japan official said Moday.

The official told a news conference that money supply figures were becoming

increasingly difficult to read due to a shift in money from the non-bank sector, such as post-office savings accounts, towards banks.

"Money supply is sending us an alarm signal," the official said. "But we can't simply rely on one figure to formulate monetary policy."

Japan's broad measure of money supply growth - cash in circulation, demand and time deposits plus certificates of deposit - hit an annual growth rate of 13.2 percent in April, the sharpest increase in more than 14 years.

The announcement of the increase Friday drove stock and bond prices sharply lower amid fears of growing inflationary pressures.

The official said that about half the increase reflected money flowing towards banks as a result of recent deregulatory measures such as the gradual easing of controls on bank deposits and interest rates.

"But it also reflects very strong loan demand," he said.

The official noted that not all monetary aggregates were growing as fast as the broadest measure. "Overall liquidity hasn't increased very much and M-1 (notes and coins in circulation) has been decreasing a bit."

#90141d7930 05/21/1990 ~French/German News Agency

PORT MORESBY (MAY 21) - Papua New Guinea will receive about 700 million U.S. dollars in aid to help it cope with its economic woes, Prime Minister Rabbie Namaliu said.

Mr. Namaliu said at a news conference on Sunday the move followed a meeting of donor countries and organisations in Singapore last week chaired by the World Bank.

Papau New Guinea's export and government revenue was slashed when the giant copper mine on Bougainville shut down last May during a 16-month secessionist war there sparked by a compensation claim by landowners against the mine owners.

The latest project to come under pressure is the Lihir Island gold deposit, which is expected to be the world's biggest outside South Africa, one of the joint venture partners said.

Geoff Loudon, chairman of Niugini Mining, told shareholders at the annual general meeting that the Lihir project had been unable to attract the 950 million dollars needed to commence retrieving an estimated eight billion dollars worth of gold.

Mr. Loudon said a recent attempted government coup and the Bougainville crisis were two reasons why the world had gone "coy" on Papua New Guinea.

In March the then police commissioner Paul Tohian led an abortive ill-planned putsch to depose Mr. Namaliu as prime minister.

#90141d8290 05/21/1990 ~French/German News Agency

LONDON (MAY 21) - In the Atlantic loading zone, Panamax timecharter rates firmed up to 9,500 dollars per day from 9,000 the previous week, for round trips between Europe and the U.S. Gulf.

But on the same route vessels in the 25,000-40,000 ton range were obliged to accept 6,500 dollars per day against a former going rate of 9,250 dollars.

In the single voyage sector rates stabilised at between 21 and 21.50 dollars per ton for 52,000 ton grain carriers on the heavily weighted U.S. Gulf to Japan route.

Still in the grain sector a 52,000 tonner was paid 12.25 dollars per ton for a voyage from the North Pacific to Taiwan, against 12 dollars the previous week.

Among fertilizer fixings, rates for 20,000 tonners dropped to 42.50 dollars per ton against 45.50 for the last equivalent fixing at end March.

#90141d8450 05/21/1990 ~French/German News Agency

ABIDJAN (MAY 21) - Rebels control two-thirds of Liberia and are closing in on Buchanan, the main iron ore port terminal 100 kilometers (62 miles) south of the capital Monrovia, where President Samuel Doe appears increasingly isolated, eyewitnesses arriving here said Monday.

On Sunday, the rebel forces led by former senior civil servant Charles Taylor, were said to have take over most of the south eastern part of the country and to have reached the Atlantic at Greenville, a major timber port 600 kilometers (370 miles) down the coast from here.

Travellers questioned last Friday said government troops had apparently pulled back north of Buchanan. They said no government soldiers were in evidence beyond that point.

Some 300 kilometers (200 miles) north east of Monrovia, Gbarnga, the last main town on the road to the capital, is believed to have fallen Saturday after being partially evacuated by government forces at the end of last week.

President Doe appears to be in control only of the north-west region which borders Sierra Leone and of a fast shrinking area around the capital.

However Robertsfield international airport 55 kilometers (35 miles) south east of here remains open and traffic has been unaffected, barring a few alerts.

The rebels also claim to have captured Tchien, the provincial capital of Grand Gedeh county - President Doe's native region - despite a recent deployment of troop reinforcements there. Sources in Abidjan, Ivory Coast, said the loss of Tchien, if confirmed, would be a major blow to the Doe regime. Tchien has one of only six airport runways safe for use during the rainy season, which has just started.

President Doe claims the rebels are being aided militarily by Ivory Coast,

Burkina Faso and Libya. Over the past three weeks, he has vainly sought some signal of support from his African peers. He went to Nigeria and Togo but secured no public commitment of support. At the last minute, he called off a trip scheduled Monday to Sierra Leone after officials in Freetown made clear that they did not consider the Liberia rebellion to be any of their business.

#90141d8470 05/21/1990 ~French/German News Agency

MOSCOW (MAY 21) - Soviet President Mikhail Gorbachev was meeting here Monday with agricultural experts amid warnings that the country's finances could not cope with current levels of grain purchases from abroad.

Pravda, the communist party daily, warned Monday that "massive imports of grain are one of the main factors contributing to the dire financial situation" of the Soviet Union.

"The country cannot go on buying such quantities of grain. It cannot cope with it. It does not have the resources," Prime Minister Nikolai Ryzhkov said for his part in a recent television interview.

Last year, the country payed more than 6 billion U.S. dollars to import 38 million tonnes of grain, mainly from the United States, Pravda said.

In addition, it paid 409 million rubles in hard currency (654 million dollars) to charter foreign vessels to ship grain to the Soviet Union, up from 252 million hard rubles in 1988, Pravda said.

Bottlenecks in Soviet ports meant however that about two million tonnes of grain were currently awaiting unloading, and delays were costing the state half a million dollars per day in penalties, the paper said.

The cost of importing grain was soaking up one third of the country's export revenue - most of it generated by oil and gas, it added.

For the first time last year, the Soviet Union resorted to borrowing to finance grain imports, but it was now having increasing difficulty in making repayments on time.

The New Zealand Dairy Board said Monday that the Soviet Union had also fallen behind on payments of a 100 million New Zealand dollars (57 million U.S.) deal to buy 70,000 tons of butter. This followed Soviet default on 52.4 million dollars (29.9 million U.S.) for New Zealand wool exports.

In Japan, the Yomiuri Shimbun newspaper reported earlier this month that, according to the Ministry of International Trade and Industry, Moscow had at least 1.2 billion dollars in import debts to major western nations and Japanese firms. Soviet imports debts to Japanese companies came to some 200 million dollars, while those to Britain, France, West Germany and other western nations amounted to at least one billion dollars, the Tokyo-based MITI said.

-30- 2407
#90141d8690 05/21/1990 ~French/German News Agency

LONDON (MAY 21) - Precious metals prices rose sharply in London on Monday in the wake of platinum as a result of increased racial tension in South Africa.

Platinum was quoted at 497.75 dollars an ounce at the Monday morning fixing, 4.75 dollars above Friday's close, while gold was up 3.65 dollars an ounce at 373.4 and silver rose to 5.12 dollars an ounce against 5.07 dollars Friday.

"The most viable reason" for the price rises "is concern over increased tensions between whites and blacks in South Africa. This triggered off some buying in Japan," said Neil Buxton, an analyst with brokers Shearson Lehman Hutton.

There were also fears that annual wage negotiations in the mining industry were due to start soon, raising fears of strikes, said John Taylor of brokers James Capel.

Gold buying by Middle Eastern investors Monday morning had also contributed to the price rises, he added.

But Mr. Buxton said that the rise in the gold price would probably spark selling, and that the metal "will struggle to get through resistance at 375 dollars."

South Africa provides some 40 percent of Western world gold production, and 80 percent of platinum.

MADRID (MAY 21) - Italian airline Alitalia and Spanish national airline Iberia signed a cooperation agreement on Monday covering routes to Asia and Latin America.

The agreement will enable the two companies to improve the quantity and quality of their services and offer new destinations, Iberia said in a statement.

Under the agreement, which is to take effect July 1, Madrid and Rome will become the strategic focal points for services to Asia and Latin America.

From July, Alitalia will offer services to Mexico aboard Iberia flights on which it will be allocated a certain number of seats.

In the same way, Iberia will be able to offer its customers flights to Bangkok aboard the Italian airline.

The two companies are also to set up a frequent service between Rome and Madrid for passengers in transit to Asia and Latin America.

BRUSSELS (MAY 21) - European Economic Community ministers, meeting ahead of crucial GATT talks, have rejected U.S. plans for a global quota in textile trade which would be scrapped by 2002, a spokesman for the EEC Commission said Monday.

The proposals aim at the Multi-Fibre Arrangement (MFA), one of the most sensitive areas in the Uruguay Round of trade liberalisation talks among the 105 members of the General Agreement on Tariffs and Trade (GATT).

The MFA is the umbrella under which 45 importing and exporting nations have negotiated bilateral agreements in textiles and clothing since 1974.

Asia's low-cost exporters see the accord as a means of protecting the industrialised world's textile manufacturers and footwear plants from cheaper competition, and are eager to see it scrapped.

U.S. proposals, put forward at GATT on May 14, suggested setting a "global quota" for textiles during a 10-year transition period that would end on December 31, 2001.

During the transition period, textile exports would grow according to the sensitivity of the product, according to the U.S. proposal.

EEC trade ministers, meeting informally in Dublin on Friday and Saturday,

"noted the U.S. abandonment" of a goal, set at the start of the Uruguay

Round talks in 1986, to phase out the MFA and liberalise textile trade, a spokesman for the Community's executive said Monday.

"The approach chosen by the United States is not in the interest of developing countries and it is certainly not in the interest of the Community, either," the official said.

#90141d9070 05/21/1990 ~French/German News Agency

TOKYO (MAY 21) - Japan's TDK Corp., the world's biggest manufacturer of magnetic tapes, said Monday it posted a net consolidated profit of 23.2 billion yen (147 million dollars) in the year to March.

Sales amounted to 478 billion yen (3.02 billion dollars) with sales of recording media - including audio tape, video tape and floppy discs - totalling 165 billion yen (1.05 billion dollars).

Sales of electronic materials and parts came to a record 313 billion yen (1.98 billion dollars), it said.

The company said the performance of its recording media division represented a recovery from recently declining sales due to stable videotape prices, demand for video products and a weaker yen.

Record electronics sales were partly the result of strong demand for circuit components, with a major contribution from Silicon Systems Inc., a U.S.-based manufactuer of integrated circuits acquired by TDK last year.

Sales abroad came to 236 billion yen (1.49 billion dollars) during the year, accounting for 49.3 percent of total sales compared with 44 per cent in the previous fiscal year.

Other comparisons were unavailable due to a change in the company's fiscal year-end from November to March.

TDK expects its consolidated net profit to rise 10.1 percent in the current year to 24 billion yen (152 million dollars) with overall sales climbing 4.1 percent to 395 billion yen (2.5 billion dollars).

#90141d9090 05/21/1990 ~French/German News Agency

HAMBURG, West Germany (MAY 21) - West German group Beiersdorf said Monday it was planning another major acquisition before the end of the year following its recent purchase of Swiss cosmetics maker Juvena.

The cosmetics and adhesive group would be investing a total of 530 million

Deutsche marks (321 million dollars) in 1990, part of it for the Juvena acquisition, group president Hans-Otto Woebke told the group's annual press conference.

He would not give the price of the Juvena deal.

Beiersdorf, mainly known for its Nivea beauty products range, saw consolidated sales increase 3.8 percent in the first four months of this year over the same period of 1988 to 1.33 billion Deutsche marks (806 million dollars).

Beauty products division Cosmed, in which Nivea accounts for 60 percent of turnover, saw sales up 13.4 percent to 604.4 million Deutsche marks, largely due to the fact that Juvena results were included in the figures.

Mr. Woebke said he was expecting higher consolidated sales and net profit in 1990 after the 3.79 billion and 102.1 million Deutsche marks in 1989.

PARIS (MAY 21) - Jacques Attali is to step down as special advisor to French President Francois Mitterrand after being named at the weekend to head a new development bank for Eastern Europe, it was announced here Monday.

Mr. Attali is to finish working for Mr. Mitterrand on March 31 next year, the day before the European Bank for Reconstruction and Development (EBRD) is due to officially begin functioning.

The Frenchman was named president of the 42-member bank, and London was chosen as its headquarters, at a meeting of the founder members on Saturday in Paris.

Mr. Attali, 46, had made it clear that he would resign from his post as advisor to the French president, which he has held since Mr. Mitterrand came to office in May 1981, if he were chosen to head the new bank.

SEOUL (MAY 21) - South Korea's Finance Ministry on Monday announced a 25 percent reduction in income tax from July in a surprise move seen as a bid to undermine calls for higher wages and reverse the declining popularity of President Roh Tae-Woo.

According to a new income tax scale announced by the Finance Ministry, a worker earning 600,000 won (857 dollars) a month will pay a monthly tax of 10,000 won (14.28 dollars) starting July, down from the current 13,000 won (18.57 dollars).

An office worker making one million won (1,428 dollars) a month will see his monthly income tax reduced from 61,000 won (87 dollars) to 46,000 won (65.7 dollars).

Newspapers said that President Roh Tae-Woo's Democratic Liberal Party suggested the tax reduction to gain some popular support, after finding that his recently enlarged ruling party was unpopular.

Dissidents and radical students have staged violent street demonstrations calling for the ouster of Mr. Roh and his new ruling party.

PARIS (MAY 21) - French group Bouygues, the world's leading construction concern, is studying plans to set up in Britain and West Germany, group president Martin Bouygues said here Monday.

Mr. Bouygues, presenting the group's plans for the first time as its chief after taking over in September from his father, Francis, stressed that

Europe remained a priority for the company.

The group, which bought up 60 companies last year, is ready to take any opportunity in West Germany and Britain, where it is virtually absent, similar to that which enabled it to take a stake last year in Banco Central, Spain's second largest bank.

It has become the largest single shareholder with 4.5 percent but has no intention at the moment of breaching the five per cent level, a move which would require the approval of the Spanish authorities.

Mr. Bouygues said he did not think that Eastern Europe would take off as a major market in the next few months, but the group could become involved in the Soviet Union through its Spanish bank holding.

The group is expecting consolidated sales to total 53.5 billion francs (9.7 billion dollars) this year, up 14 percent on the 1989 figure, with consolidated profit also improved over 1989's 573 million francs, although it has not revealed a target level.

Mr. Bouygues also said that the group was no longer a likely takeover target following recent moves to strengthen the family's capital stake.

The Bouygues family along with companies considered its allies now hold 48.6 percent of capital and 54.2 percent of voting rights, he said.

JOHANNESBURG (MAY 21) - Major South African mining house Johannesburg Consolidated Investments (JCI) on Monday gave in to widespread pressure and reinstated 1,500 fired workers, averting possible strikes, analysts said.

JCI spokeswoman Ann Dones said that the miners, laid off two weeks ago, would be rehired to begin work Tuesday night at the Atok mine, in the northern nominally self-governing tribal homeland of Lebowa.

Last week the Johnson Matthey Platinum Review noted that supplies of newly-mined platinum had fallen short of Western demand in 1989 for the fifth year in a row.

South Africa produces 80 percent of the world's newly-mined platinum and has 88 percent of known reserves.

The rehiring at JCI "has in light of this saved the mine, JCI and others in the industry a whole lot of heartache and possibly widespread strikes," mining analyst Michael Doman said.

"Local miners don't just lie back in the face of such action," he added. "Mines could not allow profits to be threatened by drawn-out action, and subtle pressure was undoubtedly exerted on JCI to settle."

The firing was a "badly calculated" case of "money over politics," one platinum researcher said.

Ms. Dones declined to confirm speculation that strong pressure from the Lebowa authorities, which had demanded the reinstatement of the workers, had been decisive in forcing the about-turn.

A meeting on Monday between JCI and the black National Union of Mineworkers (NUM) "resolved the matter," she said.

The 1,500 were dismissed after a number of employees engaged in an illegal two-day strike and management was shouted down after trying to address the workforce, according to a JCI announcement at the time.

Platinum producers have over the past few years generally been reluctant to take on the NUM.

Primary supplies of the metal reached a new peak of 3,375 million ounces last year, according to the Johnson Matthey Review, still falling short of world demand by 90,000 ounces.

Autocatalyst demand for the automobile industry, the biggest consumer of platinum, was estimated at a record 1.45 million ounces, a rise of nine percent over 1988.

The prospect of substantial growth in European demand for platinum in car catalysts, because of uniform exhaust emission standards after 1992, has prompted several local producers to announce plans for increased output in the 1990's.

CHITTAGONG, BANGLADESH (MAY 21) - One student was shot dead and 10 others were wounded here Monday when police fired on students helping their friends to cheat in school final examinations, police and other sources said.

Clashes broke out at the Imam Gajjala College examination centre in this southeastern port city when police tried to stop students from passing answers to friends sitting exams, the sources said.

One of the students, Shymal Dutta, 18, died instantly after being hit by a police bullet.

Hospital sources said 10 people wounded in the clash were being treated.

Officials in Dhaka said that several thousand students had been expelled so far since the month-long tests began May 10.

The examinations are a student's first major test before facing stiff competition to enter college for two years and subsequently proceed to university.

BRUSSELS (MAY 21) - France on Monday issued its first European Currency Unit (ECU) coin, but only as a collector's item, not a fully-fledged example of a single European currency.

Some 37,000 of the coins, carrying a picture of the Emperor Charlemagne, are to be put on sale, said Patrice Cahart, the chief of the Paris mint, unveiling the new coin in Brussels.

The ECU is a unit of account whose value is based on a basket of European currencies and fluctuates around the one U.S. dollar level.

Belgium was the first country to issue an ECU coin in 1987, when it produced five and 50-ECU pieces which proved a great success.

The French ECU could in theory be used like a real currency, but nobody is likely to use it to pay for groceries: its commercial value will be some four times its face value.

PRETORIA (MAY 21) - South Africa's trade surplus dipped in April for the second consecutive month, figures received from Customs and Excise indicated Monday.

The monthly surplus was 971 million rands (367 million dollars) in April, 17 per cent down from the March surplus of 1.171 billion rands (450 million dollars), itself 33 percent down on February's peak surplus of 1.765 billion rands (690 million dollars).

Imports rose 9.3 percent or 310 million rands (117 million dollars) in April to 3.64 billion rands (1.37 billion dollars), while exports climbed from 4.498 billion rands (1.73 billion dollars) in March to 4.611 billion rands (1.746 billion dollars).

The cumulative surplus for the first four months has now topped five billion rands (1.89 billion dollars).

On an annualised basis this would give a 15 billion rand surplus for the year, leaving some six billion rand after servicing and cover for investment income, enough to meet repayments on South Africa's estimated 18 billion dollar foreign debt.

KABUL (MAY 21) - Afghanistan's new prime minister, Fazle Haq Khalikyar, on Monday named a 35-member cabinet leaving the key defence, foreign affairs and interior portfolios with President Najibullah's ruling party.

Mr. Khalikyar, who is not a member of the ruling People's Democratic Party of Afghanistan (PDPA), brought in 13 new faces but retained ministers holding the crucial defence, foreign affairs, interior, state security, information, culture and transportation portfolios.

These posts are all held by PDPA members, of whom three are also members of the PDPA politburo.

"Under the present war situation it would be difficult for non-PDPA members to hold these important positions," government spokesman Humayun Mukammel told reporters here.

The number of deputy prime ministers rose from four to six. In addition, there are 25 full ministers and four ministers without portfolio.

Mr. Mukammel said most of the new ministers were technocrats and experts in their respective fields.

Earlier in the day Mr. Khalikyar told the National Assembly his government would be a coalition. Senior PDPA members also said earlier they would have reduced roles in the new cabinet, which they wanted to be independent from the party.

Diplomats and political observers here said there were no major opposition figures in the cabinet.

A small but influential group that supports the return of former King Zaher Shah, now in exile in Italy, has turned down a government offer to join the cabinet, questioning the sincerity and credibility of the party.

AMMAN (MAY 21) - Thousands of demonstrators Monday massed in the streets of Amman calling for vengeance after the machine-gun murders of eight Palestinians in Israel.

Demonstrators from different sectors of the Jordanian capital swarmed into the center of the city, brandishing black flags.

They were protesting the killing Sunday in Rishon le Zion near Tel Aviv of eight Palestinian workers by a lone Israeli gunman, who according to Israeli police may be deranged.

The murders triggered an explosion of rage among Palestinians in the occupied West Bank and Gaza Strip, where Israeli troops killed 10 demonstrators and wounded more than 700 in clashes Sunday and Monday.

The demonstration came after a 35-year-old Palestinian shot and wounded nine French tourists and a Jordanian driver here Monday in an attack aimed at avenging the murder of the eight Palestinians, authoritative sources reported.

#90141d9570 05/21/1990 ~French/German News Agency

MOSCOW (MAY 21) - Prices will rocket in the Soviet Union next year, with many basic foodstuffs more than doubling in cost, according to a government report quoted by Interfax, a Moscow Radio news digest.

The report "on the economic situation in the country and the concept of transition to a controlled market economy" is expected to be discussed Tuesday by a joint meeting of the presidential council and the council of the federation, before being submitted to parliament Thursday.

A first stage of price reform to be introduced on January 1, will see meat prices increased 2.3 times, fish 2.5, milk 2, bread 3, sugar 1.8 and vegetable oil 1.8 times, Interfax said.

State subsidies have kept many retail prices at low levels for years.

Prices of furs will be increased by 20 percent, goods made of flax and silk by 50 percent, footwear by 35 percent.

Communal services in flats will go up by 70 percent, electricity for domestic use by 100 percent, gas by 40 percent and rail and air tickets by 50 percent.

The government will introduce subsidies for lower-income groups, Interfax said.

#90141d9600 05/21/1990 ~French/German News Agency
BONN (MAY 21) - The opposition Social Democrats (SPD) demanded Monday substantial improvements in the treaty on monetary, economic and social union signed Friday by East and West Germany, saying they could not accept the pact "in its present form".

The stand was taken at a meeting of the SPD Steering Committee, which approved a resolution read by party leader Hans-Jochen Vogel.

Meanwhile, in East Berlin, the East German governing coalition was united on Monday in defending the treaty in parliament, with the East German SPD backing the project -- unlike its counterpart in West Germany.

The West German document said that Chancellor Helmut Kohl (of the rival Christian Democratic Union, CDU) would bear sole responsibility for the risks involved in monetary union: unemployment in East Germany and higher interest rates in West Germany.

The SPD, the main opposition party here, is demanding four modifications or improvements, which it says should be incorporated in the treaty or in annexes to the treaty that is to be ratified by both parliaments:

1 - Measures to protect East German firms so as to facilitate converting them to operating in a market economy and ensure the existence of jobs for skilled workers.

2 - The institution of "environmental union" at the same time as economic union (due to go into effect on July 1).

3 - Seizure of property of the Stasi (the former East German secret police,

now disbanded), of the East German Communist Party (SED, now transformed into the PDS) and of its satellite organizations, as well as of the four parties that were allied with the SED for 40 years (including the East German Christian Democratic Union, sister party of Mr. Kohl's CDU).

4 - Establishment of a consensus among all political forces in both Germanies. "The road to German unity and the form it takes, particularly by way of the first joint German elections, cannot remain the chancellor's private domain", the resolution says.

#90141d9620 05/21/1990 ~French/German News Agency
WASHINGTON (MAY 21) - A controversial plant at Rabta in Libya is working at full capacity to produce chemical weapons, the Washington Times

reported on Monday, quoting U.S. officials who said that some of the weapons produced appeared to be intended for export.

In the past, Libya has denied allegations that the plant had been built to produce chemical weapons, saying that it was a factory for the manufacture of pharmaceutical products.

A fire was said to have devastated the plant in March, but U.S. satellite pictures later reportedly showed that the fire had been an elaborate hoax.

The newspaper said that U.S. officials had told it that big quantities of chemical weapons had been loaded onto lorries leaving Rabta recently.

Photographs available to intelligence services showed that there was continuous traffic of lorries loaded with chemical products which entered the perimeter of the factory, and left loaded with containers of chemical weapons. The containers were handled cautiously.

The perimetre fence is defended by ground-to-air missiles.

The sources told the paper that some of the stocks were exported and that others were stored outside Rabta.

The paper reported that China had supplied Libya with more than 12 chemical components which are used in the manufacture of weapons. For several months Chinese ships had been photographed while unloading these chemical products.

BRUSSELS (MAY 21) - The Soviet Union is demanding that the armed forces of the future united Germany be limited by treaty, U.S. officials told NATO ambassadors Monday, according to alliance diplomats.

Soviet leaders, in meetings in Moscow last week with U.S. Secretary of State James Baker, put forward "a clear and formal" demand that the size of the German army be decided by the Two-plus-Four talks on German unity, the diplomats said.

The cuts would then be included in an East-West treaty for conventional arms reductions in Europe, they said.

The United States, France and Britain have rejected the Soviet demand, they said.

PESHAWAR, PAKISTAN (MAY 21) - One person was killed and 15 people injured Monday when two blasts rocked this Pakistan provincial capital bordering Afghanistan, police said.

A bomb planted in a Toyota car went off at 4:00 p.m. (1100 GMT) in Soekarno Square, a crowded area in which the offices of Gulf Air and Saudi Airlines are located, wounding 15 people including two Arab nationals.

Within three hours, a second explosion took place in the suburban Taj market, known for smuggled household goods.

The blasts damaged vehicles and shattered windows.

Press reports said police here arrested a man carrying a seven-kilogram (15.4-pound) time bomb on Sunday. He was described as an agent of KHAD, Afghanistan's secret police.

The reports quoted a police official as saying KHAD agents had been sent to plant explosives at railway stations in the North-West Frontier provice, which borders Afghanistan.

KARACHI (MAY 21) - Pakistan test-fired two rockets here Monday that were described as different versions of scientific rockets, the official Associated Press of Pakistan (APP) said.

The test was conducted by the Pakistan Space and Upper Atmosphere Research Commission (SUPARCO) from its Maini Beach test flight range, 60 kilometers (36 miles) west of here, and proved valuable in collecting data for use in further research work, APP said.

Pakistan's first experimental satellite, Badr-A, produced domestically, has been transported to China for launch in June or early July, the agency said.

SUPARCO engineers are to visit China next week for a pre-launch check of the satellite, it said.

#90141d9850 05/21/1990 ~French/German News Agency
NEW YORK, UNITED NATIONS (MAY 21) - Arab states Monday demanded the presence of Palestine Liberation Organization (PLO) chief Yasser Arafat at a special U.N. Security Council debate on the escalating violence in Israel's occupied territories, diplomats said.

And, the Arab group at the United Nations warned, if the United States refuses to grant Mr. Arafat a visa to come to New York for the debate, the Security Council should meet instead in Geneva or Vienna.

The diplomats said the demands of the Arab group were made at a consultative meeting of the Security Council Monday.

They said the Arab group believed it would be impossible to hold a formal meeting on the situation in the occupied territories without Mr. Arafat.

However, it was not known whether a formal visa request had been made by Mr. Arafat nor the possible U.S. reaction to such a request.

The Security Council, meanwhile, decided to resume its deliberations on the situation in the occupied territories Tuesday.

Before Monday's informal meeting began, U.N. Secretary-General Javier Perez de Cuellar said he "strongly condemns" acts of violence "against innocent civilians" in Israel and Jordan, said U.N. spokesman Francois Giuliani.

The secretary-general expressed "grave concern" following Sunday's killings in Israel, the occupied territories and Jordan.

The killing of seven Palestinians and wounding of 10 others by a young Israeli, followed by rioting in the occupied Gaza Strip and West Bank which left more than 500 wounded, showed once again "the vulnerability...(of)... those living under Israeli occupation," Mr. Perez de Cuellar was quoted by the spokesman as saying.

He repeated his call for Israel to take measures "to enable the Palestinians to feel secure."

The attack in Amman against a busload of tourists early Monday "cannot be viewed in isolation from the events that occurred yesterday," he added.

Sunday's violence was the worst in the occupied territories since the start of an anti-Israeli uprising in December 1987.

#90141d9900 05/21/1990 ~French/German News Agency

MAPUTO (MAY 21) - Several hundred Mozambique National Resistance (Renamo) rebels killed three people and looted stores in a weekend attack against the town of Namaacha, military sources said Monday.

About 300 Renamo guerrillas took part in the raid Saturday against Namaacha, on the border with Swaziland about 70 kilometres (43 miles) west of Maputo, in which three people were killed, the military sources said.

They said that the rebels looted and destroyed about 10 shops in the town.

Meanwhile, the Mozambique news agency AIM said that Renamo rebels had attacked a Portuguese-owned agricultural company early Monday.

Armando Luis, one of the owners of the company, Alfredo Luis Herdeiros, one of the largest privately-owned cattle breeding concerns in southern Mozambique, told the news agency that the rebels stole 300 head of cattle, looted company warehouses, and destroyed an electricity generator.

He estimated the losses at about 130,000 U.S. dollars.

The rebels have raided the company on three previous occasions, the last of which was in March 1988.

#90141e0004 05/21/1990 ~Latin America New Agency

BOGOTA (MAY 21) EFE - Bolivian President Jaime Paz Zamora has said he is

planning a reshuffle in the Army prior to the military's participation in the war against coca cultivation.

Paz Zamora Friday ordered a battalion stationed in the southern region of Tolata to commence +dissuasive+ operations in the major coca-growing region of Chapare in central Bolivia despite previously ruling out the use of the Army in the fight against drug trafficking.

The Bolivian president denied that the move signaled a military ecalation in the drug war currently spearheaded by a 1,200 police unit lead by a former general.

Referring to the poor working conditions of the current anti-narcotics unit whose members earn dlrs 100 per month, Paz Zamora said, "it would be stupid to keep things as they are, generating corruption."

The Bolivian president Sunday said the restructuring of the Armed Forces and the areas and timing of their involvement in the fight against drugs would be decided once military aid pledged by the U.S. government arrived.

The United States agreed to provide the aid in a top-level visit earlier this month by Paz Zamora to Washington in which the Bolivian president denied his U.S. counterpart George Bush had pressurized him to allow his country's Army to participate in the fight against coca cultivation.

With an annual production of 150,000 tonnes, Bolivia, after Peru, is the world's second largest producer of coca leaf, the raw material from which cocaine is made.

The Bolivian economy, one of the poorest in Latin America, relies heavily on the cultivation of coca leaf which provides a livelihood to some 450,000 peasants.

Bolivia last year managed to eradicate some 3,000 hectares of coca under a U.S.-financed scheme supporting Paz Zamora's efforts to encourage Bolivian peasants to grow other cash crops.

But following Paz Zamora's decision to send in the Army, peasant leader Evo Morales said the Chapare area, +is turning into a social volcano that could erupt at any moment+.

Morales has claimed that U.S. Drug Enforcement Administration officials in the Chapare region as well as members of Bolivia's anti-drug police unit and the Army had "committed abuses" in the coca eradication program.

The peasant leader said the 60,000 peasants in the Chapare region were "living moments of anxiety and intimidation."

The Bolivian Roman Catholic Church has also come out against attempts by the government to bulldoze through eradication programs at the expense of the peasants.

Referring to the government's crop substitution plan, the Archbishop of La Paz, Luis Sainz, recently expressed his fear that, "the coca for development (plan) is degenerating into a mere slogan."

Sainz said Bolivian peasants were forced by "poverty and hunger" to grow coca.

#90141e0005 05/21/1990 ~Latin America New Agency

MADRID (MAY 21) EFE - State-controlled Spanish Television (TVE) is to continue broadcasting bullfights on its satellite channel despite protests from British viewers who slam the events as cruel to animals, station officials said Monday.

TVE's "Canal Internacional," which beams 18 hours of programs a day to Europe, the United States and Africa, received a letter from Britain's Cable Authority organization conveying protests by British viewers about the bullfights.

A spokesman for TVE said that his company had replied to Cable Authority that the bullfights were a "tradition which forms part of Spanish culture" and stressed that the broadcasts were aimed at Spaniards living abroad rather than foreign viewers.

Canal Internacional was formed in 1989.

Bullfighting remains a popular event in Spain and is defended by many Spaniards as an art and integral part of the country's culture, although some towns in the northeastern region of Catalonia have banned or limited the holding of bullfights.

#90141e0008 05/21/1990 ~Latin America New Agency

BUENOS AIRES (MAY 21) EFE - Around 1 million Argentine workers began strike action Monday to push for pay rises and to protest controversial economic austerity measures introduced by President Carlos Menem's cash-strapped government.

State workers and employees from the agricultural, mining and paper sectors were among those who walked off the job as part of a wave of protests organized by 11 trade unions calling for pay hikes and better working conditions.

The unions are also opposed to a government project to privatize a string of state-owned firms and lay off around 200,000 public sector workers as part of the austerity plan aimed at slashing inflation, which has reached 200 per cent so far this year, and public spending.

The average monthly wage of the striking workers is dlrs 110.

Union officials claim that a family of four needs around four times that amount to live.

Argentina's 23 state universities are also on a two-day strike, while primary school teachers are to march to the parliament building Wednesday to push their wage claims and call for an increased budget for the education sector.

Since introducing the austerity measures last year, Menem's Peronist government has met with widespread labor protests and strikes. However, the president has said he plans to stick by the plan.

Over the last five years, public sector workers and teachers have carried out more than 2,600 strikes and protests, according to a study carried out by the independent New Majority Study Center.

#90141e0024 05/21/1990 ~Latin America New Agency

BOGOTA (MAY 21) - Clashes between Colombian leftist rebels and the Armed Forces have left nine people dead, while two politicians have been assassinated in 24 hours as violence continued to rock the country six days before presidential elections, officials said.

On Sunday six suspected Maoist National Liberation Army (ELN) rebels died during a shootout with soldiers in the town of Riofrio, 300 km southwest of the capital, officials said.

Meanwhile in the northeast town of Tibu, near the Venezuelan border, ELN rebels ambushed an army patrol, killing an officer and a soldier. No guerrillas were killed in the attack, the ministry spokesman said.

Unidentified gunman shot dead a policeman Sunday between the towns of La Cacaguala and La Zulia in the northern department of Santander, 650 km northeast of Bogota, the spokesman said.

ELN is the only rebel group of Colombia's five leftist guerrilla organizations to refuse to initiate peace talks with the government of President Virgilio Barco.

Police in the city of Puerto Valdivia, 350 km northwest of the capital, said that Sunday unidentified gunman killed leftist Patriotic Union Party councillor Henry Montenegro, who had recently led a march to protest military abuses.

Also on Sunday, gunman killed Liberal Party councillor Flaminios Jaimes Bayona as he left a bar in the town of Fundacion, 800 km north of the capital.

On Monday, ruling Liberal Party Senator Fedrico Estrada Velez was killed by unidentified gunman in the cocaine capital of Medellin.

A wave of terrorism preceding elections on Sunday began May 12, when two car bombs in the capital of Bogota and a third in the southwestern city of Cali killed 27 people.

Police blamed Colombia's two powerful drug cartels, Medellin and Cali, for the bombings.

Since then, two more car bombs have rocked the cities of Bogota and Cartagena, 1,000 km north of the capital, injuring more than 40 people.

Some 560 people have died in clashes between security forces and leftist guerrillas or attacks by drug traffickers this year, while right-wing death squads have carried out more than 50 massacres, at a cost of 268 lives.

Among the victims this year were leftist presidential candidates Carlos Pizarro and Bernardo Jaramillo, both murdered by suspected rightist extremists.

Campaigning by the remaining candidates vying for support in the elections was carried out almost entirely on television.

#90141e0034 05/21/1990 ~Latin America New Agency

MANAGUA (MAY 22) EFE - Nicarguan Contra rebels set to meet Tuesday with representatives of the new Chamorro government were expected to press hard for a dlrs 47 million share of dlrs 300 million in still-undelivered U.S. aid, a Contra negotiator said.

"We will be meeting with three different task forces from the government of President Violeta Chamorro to talk about matters of security and health as well as requesting the dlrs 47 million," Contra political adviser Aristides Sanchez told EFE.

The amount in question corresponds to the portion earmarked by Washington

for the Contras who urgently need it to pay for food and medical suplies, Sanchez added.

But he confirmed that part would be set aside for the Contras, who fought a nine-year war financed by the United States against the leftist Sandinista government formerly in power, to regroup as a political party.

A member of a United Nations observer team who asked not to be identified said the arm-twisting maneuver was most likely the real reason behind the rebels' abrupt decision last Friday to temporarily call a halt to their ongoing demobilization.

The Contras refused to hand over more of their weapons to a UN peacekeeping force under a plan that went into effect May 8 unless the government took urgent measures to see that former U.S.-backed guerrillas were reincorporated into productive civilian life.

Chamorro, who took office barely a month ago, rejected a new rebel demand for the Contras to be given free run to settle on a 16,000 square km area along the San Juan River near the Costa Rican border.

Although the U.S. Congress has approved a dlrs 300 million aid package for cash-strapped Nicaragua, disbursement has been held up while legislators quibble over riders that have been attached to the bill as it made its way through the House and Senate.

According to the UN observers, 1,220 Contras have surrendered their weapons as of Monday, about ten per cent of the estimated 12,000-strong Contra forces believd to be in the country.

Under the accord, the disarmament is supposed to be completed by June 10 at the latest but the UN observer questioned by EFE said he doubted this deadline could be met.

#90141k0070 05/21/1990 ~Japanese News Agency

KOBE, MAY 21 KYODO - BANK OF JAPAN (BOJ) GOVERNOR YASUSHI MIENO WELCOMES THE RECENT DRAMATIC PICKUP OF THE YEN, WHICH HE SAYS PROPERLY REFLECTS THE HEALTHY FUNDAMENTALS OF THE JAPANESE ECONOMY, BOJ OFFICIALS SAID MONDAY.

THE BOJ CHIEF, WHO IS NOW ON A TOUR OF WESTERN JAPAN TO MEET POLITICAL AND BUSINESS LEADERS IN THE REGION, ALSO SAID HE EXPECTS THE FAVORABLE TREND TO CONTINUE FOR THE TIME BEING, THE OFFICIALS TOLD REPORTERS.

THE YEN IS BENEFITING FROM A COMMUNIQUE ADOPTED BY THE GROUP OF SEVEN (G-7) INDUSTRIAL NATIONS IN WASHINGTON IN MAY WHICH CLEARLY MENTIONED THAT THE YEN'S LOWER LEVELS HAVE ''UNDESIRABLE EFFECTS'' ON ADJUSTMENTS IN JAPAN'S EXTERNAL TRADE IMBALANCE, MIENO WAS QUOTED AS SAYING.

MIENO TOLD REGIONAL OFFICIALS, INCLUDING TOSHITAMI KAIHARA, GOVERNOR OF HYOGO PREFECTURE, THAT THE NARROWING INTEREST RATE GAP BETWEEN JAPAN AND ABROAD IS ALSO A DRIVING FORCE BEHIND THE YEN'S REAPPRECIATION, THE BOJ OFFICIALS SAID.

BUT THE UNSTABLE MOVEMENTS OF THE DOLLAR AND THE WEST GERMAN MARK AND THE SPEEDY RISE OF THE YEN ARE KEEPING MIENO FROM BEING TOO OPTIMISTIC, THEY SAID.

THE BOJ IS CLOSELY WATCHING FURTHER DEVELOPMENTS IN THE MARKET, HE WAS QUOTED AS SAYING.

ON JAPAN'S ECONOMIC CONDITIONS, MIENO WAS CONFIDENT OF STEADY BUSINESS

EXPANSION IN THE FUTURE, FUELED BY BRISK CAPITAL SPENDING AND PERSONAL CONSUMPTION, THE OFFICIALS SAID.

BUT HE CAUTIONED THAT PRICES NEED CONSTANT WATCHING, AS INCREASES IN IMPORT COSTS DUE TO THE YEN'S DOWNSLIDE HAVE YET TO STOP AND WAGES ARE STILL RISING DUE TO THE ACUTE LABOR SHORTAGE, THEY SAID.

MIENO IS TO VISIT KYOTO ON TUESDAY FOR FURTHER TALKS WITH LOCAL BUSINESS EXECUTIVES BEFORE RETURNING TO TOKYO ON WEDNESDAY AFTERNOON.

TOKYO (MAY 21) KYODO - A MATSUSHITA ELECTRIC INDUSTRIAL CO. RESEARCH TEAM HAS SUCCEEDED IN PHOTOGRAPHING SPECIAL DEFECTS ON THE SURFACE OF SILICON CRYSTAL FOR THE FIRST TIME IN THE WORLD, THE COMPANY ANNOUNCED MONDAY.

THE COMPANY SAID THE SUCCESS WAS ACHIEVED BY USING A NEWLY DEVELOPED SCANNING TUNNELING MICROSCOPE (STW) WITH WHAT IT CLAIMED ASTHE WORLD'S HIGHEST-CLASS RESOLUTION.

A COMPANY SPOKESMAN SAID THIS MARKS A STEP FORWARD TOWARD THE DEVELOPMENT OF 64-MEGABIT OR DENSER MEMORY CHIPS.

A SINGLE 64-MEGABIT DYNAMIC RANDOM ACCESS MEMORY (DRAM) CHIP CAN HOLD INFORMATION EQUIVALENT TO ABOUT 256 PAGES OF AN ENGLISH-LANGUAGE NEWSPAPER SUCH AS WALL STREET JOURNAL.

THE OFFICIAL SAID THE STM IS FITTED WITH AN IMPROVED FIELD ION MICROSCOPE (FIM) WHICH IS CAPABLE OF WATCHING AND REDUCING THE FLEXIBLE TIP OF THE STM'S SEARCH STYLUS TO ATOMIC SIZE.

THIS FIM, DEVELOPED BY TOHOKU UNIVERSITY PROF. TOSHIO SAKURAI, IS CREDITED WITH MAKING THE NEW ACHIEVEMENT POSSIBLE, HE SAID.

THE DETAILS OF THE ACHIEVEMENT WILL BE REPORTED AT A HUMAN ELECTRONICS SYMPOSIUM IN KAWASAKI ON MAY 25.

THE OFFICIAL SAID THE SPECIAL DEFECTS ARE A DISORDER IN THE SURFACE OF THE SILICON ATOMIC LATTICE. THE CONVENTIONAL STM CAN DETECT AND PHOTOGRAPH POINT DEFECTS ON THE SURFACE OF SILICON CRYSTAL AND THE UNEVENESS OF THE SURFACE SILICON CRYSTAL, BUT NOT A SPECIAL DISORDER, HE SAID.

STM IS AN INSTRUMENT FOR PRODUCING SURFACE IMAGES WITH ATOMIC-SCALE LATERAL RESOLUTION. FIM IS A MICROSCOPE IN WHICH ATOMS ARE IONIZED BY AN ELECTRIC FIELD NEAR A SHARP TIP THE FIELD THEN FORCES THE IRONS INTO A FLUORESCENT SCREEN, MAKING INDIVIDUAL ATOMS VISIBLE.

#90141k0081 05/21/1990 ~Japanese News Agency

TOKYO (MAY 21) KYODO - SUMITOMO HEAVY INDUSTRIES LTD. ANNOUNCED MONDAY IT HAS INTRODUCED A CYCLOTRON ABRASION MEASURING TECHNOLOGY FOR MACHINE PARTS FROM WEST GERMANY'S NUCLEAR RESEARCH INSTITUTE KFK.

UNDER THE AGREEMENT, SUMITOMO HAS ACQUIRED THE EXCLUSIVE LICENSE TO IMPORT AND DISTRIBUTE THE KFK ABRASION MEASURING SYSTEM IN JAPAN AND TO OFFER MEASURING SERVICES IN JAPAN USING THE SYSTEM.

SUMITOMO HAS ALSO WON THE EXCLUSIVE LICENSE TO MANUFACTURE AND MARKET EQUIPMENT FOR ACTIVATION, A PREPARATORY PROCESS FOR ABRASION MEASURING.

KFK IS A TOP MANUFACTURER OF CYCLOTRONS. SUMITOMO OFFICIALS SAID THE NEW SYSTEM SHORTENS THE MEASURING TIME OF TWO TO 10 DAYS, TAKEN SO FAR IN JAPAN, TO SEVERAL MINUTES.

#90141k0082 05/21/1990 ~Japanese News Agency

BANGKOK (MAY 21) KYODO - THAILAND ANNOUNCED ITS COMMITMENT MONDAY TO AN INTERNATIONAL MONETARY FUND (IMF) REGULATION THAT WILL EVENTUALLY ELEVATE THE COUNTRY'S INTERNATIONAL FINANCIAL POSITION TO THE LEVEL OF INDUSTRIALIZED NATIONS.

THE ANNOUNCEMENT, MADE IN THE PRESENCE OF THAI PRIME MINISTER CHATICHAI CHOONHAVAN, PLEDGED THAILAND'S ADHERENCE TO ARTICLE 8 OF THE IMF'S REGULATIONS REQUIRING MEMBER COUNTRIES TO AVOID FOREIGN EXCHANGE CONTROLS AND GUARANTEE CONVERTIBILITY OF ITS CURRENCY HELD ABROAD.

THE ANNOUNCEMENT MADE THAILAND THE 68TH AMONG THE 152 IMF-MEMBER COUNTRIES WHICH HAVE ACCEPTED THE TERMS OF THE ARTICLE, THAI FINANCE MINISTER PRAMUAL SABHAVASU SAID IN A REPORT TO THE PRIME MINISTER.

THE FINANCE MINISTER SAID THE IMF WAS NOTIFIED OF THAILAND'S DECISION EARLIER THIS MONTH AND WOULD MAKE ITS OFFICIAL ANNOUNCEMENT MONDAY.

THE POLICY ANNOUNCEMENT WAS ACCOMPANIED BY NEWS THAT THE BANK OF THAILAND WILL DEREGULATE ALL CURRENT ACCOUNT TRANSACTIONS, INCLUDING REMITTANCE OF FORIEGN CAPITAL, THE FINANCE MINISTER SAID.

HOWEVER, THE COUNTRY WILL MAINTAIN CERTAIN RESTRICTIONS ON MASSIVE CAPITAL ACCOUNT TRANSACTIONS, ACCORDING TO THE FINANCE MINISTER.

FURTHER FOREIGN EXCHANGE DEREGULATION, AIMING TO MAKE THE COUNTRY A CENTER OF INTERNTAIONAL FINANCE, WILL FOLLOW IN DUE TIME, THE FINANCE MINISTER SAID.

MEANWHILE, THE SECURITY EXCHANGE OF THAILAND (SET) ON MONDAY SOARED 33 POINTS TO AN INDEX RECORD OF 959 POINTS ON VOLUME OF 154 MILLION DOLLARS FOLLOWING THE POLICY STATEMENTS.

MARAUY PADOONGSITH, MANAGING DIRECTOR OF THE SET, SAID AFTER THE MARKET CLOSED THAT THE EXPECTED NEWS SPURRED THE SET'S RECENT BULLISHMENTS AFTER MORE THAN THREE MONTHS OF SLUGGISHNESS.

HE SAID FOREIGN CAPITAL INVESTMENT IN THE SET SINCE THE BEGINNING OF THIS MONTH SHOT UP TO AN AVERAGE 20 PERCENT OF DAILY TRADING VOLUME FROM THE PREVIOUS 10-14 PERCENT.

#90141k0085 05/21/1990 ~Japanese News Agency

TOKYO (MAY 21) KYODO - NIPPON FIRE AND MARINE INSURANCE CO. WILL OPEN OFFICES IN SIX EASTERN EUROPEAN COUNTRIES THIS MONTH TO STEP UP BUSINESS THERE, THE COMPANY SAID MONDAY.

THE FIRM'S SUBSIDIARY IN LONDON, NIPPON INSURANCE CO. OF EUROPE (NICE), WILL OPEN AN OFFICE IN THE EASTERN SECTOR OF BERLIN ON FRIDAY, COMPANY OFFICIALS SAID.

NICE WILL ALSO ESTABLISH OFFICES IN BUDAPEST, PRAGUE, SOFIA, BUCHAREST, AND WARSAW BY THE END OF THIS MONTH TO PREPARE FOR AN EXPECTED INCREASE OF BUSINESS IN THE REGION, PARTICULARLY WITH JAPANESE FIRMS ADVANCING INTO THOSE COUNTRIES.

-30- 739

#90141k0089 05/21/1990 ~Japanese News Agency

TOKYO (MAY 21) KYODO - THE SOVIET UNION HAS ASKED JAPANESE CREDITORS FOR A ONE-YEAR DEFERMENT IN ITS PAYMENTS FOR RECENTLY PURCHASED STEEL PIPES, INDUSTRY SOURCES SAID MONDAY.

THE SOVIETS, IN MAKING THE REQUEST, PROMISED TO PAY ABOUT 100 MILLION DOLLARS BY THE END OF JUNE FOR ABOUT 130,000 TONS OF PIPES FOR SHIPMENT IN FISCAL 1989 ENDED MARCH 31, THE SOURCES SAID.

MAJOR JAPANESE STEEL PIPE MILLS AND MAJOR TRADING COMPANIES, THROUGH WHICH THE PIPE EXPORT DEALS WITH THE SOVIETS WERE CLINCHED, REJECTED THE SOVIET REQUEST.

THEY SAID, HOWEVER, THEY WOULD BE WILLING TO GRANT AN UP TO 180-DAY DEFERMENT IN PAYMENT ON CONDITION THAT A LETTER OF GUARANTEE IS SENT.

BUT THE SOVIETS ARE RELUCTANT TO PROVIDE SUCH A LETTER, THE SOURCES SAID.

V.O. PROMSYRIOIMPORT, OR THE SOVIET CORPORATION WHICH IMPORTED THE PIPES, ASKED THE PIPE MILLS, INCLUDING NIPPON STEEL CORP. AND SUMITOMO METAL INDUSTRIES, LTD., TO SEND REPRESENTATIVES TO MOSCOW FOR TALKS, THE SOURCES SAID.

MILL OFFICIALS SAID THE MILLS HAVE NOT DECIDED WHETHER TO SEND REPRESENTATIVES TO THE SOVIET CAPITAL. THEY ADDED, HOWEVER, THAT THEIR REPRESENTATIVES WOULD HAVE NO CHOICE BUT TO VISIT MOSCOW IN VIEW OF THE IMPORTANCE OF THE TALKS.

#90141m0001 05/21/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (MAY 21) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY.

IN THE NEWS:

Some blame a weaker yen for a 249-point drop in Tokyo stocks as the Nikkei closes this morning at 31,765.05. ... Company sources confirm SHEARSON LEHMAN HUTTON will reorganize by splitting its investment banking business and large retail brokerage operations. ... CHRYSLER says it will have 200 copies of its new Dodge Viper sports car ready to go head-to-head with GENERAL MOTORS' Corvette by the 1992 model year. ... The pending merger of software giants LOTUS DEVELOPMENT CORP. and NOVELL INC., collapsed over the weekend.

WHAT'S AHEAD:

The TREASURY DEPARTMENT releases April deficit figures later today and COMMERCE SECRETARY ROBERT MOSBACHER keynotes a congressional conference on the developing U.S. economic and trade policy toward the Soviet Union and Europe. ... Other economic reports coming this week: durable goods figures on Wednesday; first-quarter gross national product revision and first-quarter corporate profits on Thursday from COMMERCE; and personal income and outlays on Friday. today with introduction of two new desk model computers. ... IVAN BOESKY takes the witness stand today or tomorrow in the trial of one of his old friends.

FROM THE BULLS:

"I'm not sure we were ever out of one [a bull market] ... but I think, yes, this one's for real," says JOHN DESSAUER. He predicts lower interest rates by the end of the year and says corporate profits are nearing a turnaround. ("Wall Street Week", 5/18)

FROM THE BEARS:

"Whether you're rich or poor, it's good to have lots of cash," says JAMES DINES, editor and publisher of "The Dines Letter." Dines is telling his readers to sell stocks and stay on the sidelines for buying opportunities. "What bothers me is that the market is very overpriced. By all classic measurements we are at the upper end of a trading range. I'm nervous about the market - it's also overbought - and I think next week we should have some selling coming in." (NBR, 5/18)

STOCK MARKET:

ROBERT FERRELL of MERRILL LYNCH is skeptical about the staying power of the current rally, even though he can see it continuing through June "or maybe to early summer." He sees to move possibly reaching 2950 on the Dow but "certainly not over 3000." Beyond that, he is looking for a 20% to 25% decline. "My expectation is that you might see a 3000-2000 market for an extended time. Or a 2900-2200 market for an extended time. But I think you are getting to the upper part of that range." ("Barron's" 5/21)

"I feel the market's consolidation may last a few more weeks," says PETER DaPUZZO of SHEARSON LEHMAN HUTTON. "My guess is the Dow will pull back perhaps 50 or 75 points and test the 2800 to 2750 areas.

After that, I look for it to turn and move up to the 2950 area in the summer." ("Investor's Daily", 5/21)

"It's hard for us to be convinced that this [latest rally] isn't a move to a top of a trading range in the stock market," says DAVID RAJALA of ONE ASSET MANAGEMENT. (WSJ, 5/21)

"Background conditions improve," says the current edition of "S&P Outlook." But while editor ARNOLD KAUFMAN says the recovery in stock prices may have further to go, he feels the overall market is on a shaky technical foundation. "Chances of a breakaway move to the upside appear to be small," says Kaufman, who advises that investors not shift to a more aggressive investment policy. He recommends 55% stocks, 35% bonds and 10% reserves. (CNBC "World Business" 5/21)

"We hit a new high in the Dow in October and then we sold off 300 points, a new high in January and we sold off 300 points, and the momentum of this particular move is not particularly strong," says BERNADETTE MURPHY, market strategist for M. KIMELMAN & CO. (CNBC's "Market Wrap-Up", 5/18)

"I still think we've got a slowdown ahead of us," says ELIZABETH DATER. "The question is how serious it will be. And if that's the case, the market may be beginning to look a little bit 'toppy' again and all of those people who were worried about inflation three weeks ago may soon be

worried about deflation again." However, she is enthusiastic about longer-term stock market strength. ("Wall Street Week", 5/18)

"I would say we could probably go to 3000 [on the Dow]," says trader VICTOR SPERANDEO. But on a technical basis, he maintains the market is overbought and stands as much chance of falling back to its April low as of reaching 3000 and is remaining on the sidelines as far as buying stocks. He fears a 30% sell-off. MORRY MARKOVITZ, president of MERCURY MANAGEMENT ASSOCIATES, also is not chasing the stock market. His reluctance stems from a bearish view of the bond market. "It's hard to see how [interest] rates can go much lower from these levels, when you can get a better deal in almost any other country's bond market," says Markovitz. ("Barron's", 5/21)

"If interest rates are coming down because we have moderate growth and low inflation, then the stock market has a right to rally," says DAVID JONES, chief economist at AUBREY G. LANSTON. "But if interest rates are coming down because there is [economic] trouble ahead, then the stock market had better watch out." ("The Washington Post", 5/20)

"The essential thing about the market and the essential thing about the economy right now is that everything is very much on track," says BILL WOLMAN, chief economist for "BusinessWeek" and "CNBC." "There's nothing that's happening that is terribly surprising. ... I don't see anything that is going to knock the market down substantially." 2 (CNBC's "Market Wrap-Up", 5/18)

Options specialist CHARLES CHEN of EAST WEST SECURITIES in San Francisco says he now believes the recession that most people have been looking for has already occurred and expects the current stock market rally to last until the first week of June, carrying the Dow to 2940. He says the Dow could reach 3500 to 3600 by the end of the year if his hunch is right that a recession has come and gone quietly. ("Barron's", 5/21)

"USA Today" columnist SUSAN ANTILLA writes this morning about a bull and bear living together at OPPENHEIMER & CO. "Market strategist" MICHAEL METZ is calling for a 3100 Dow, while "investment strategist" SURESH BHIRUD says stocks are 15% to 20% overvalued and that the Dow could slide to 2200. She reports that they two rarely talk to each other, and report to different bosses. ("USA Today", 5/21)

STOCK TIPS:

GEORGE SHAPIRO, analyst for SALOMON BROTHERS, rates most aerospace companies a "sell" because of a declining defense budget. But he remains positive on the "commercial aircraft cycle," listing as favorites BOEING, UNITED TECHNOLOGIES and subcontractor SUNSTRAND, which has almost 100% market share making constant speed drives that are attached to all the

engines on airplanes. ("Wall Street Week", 5/18)

Portfolio manager KATHERINE AVERY of NICHOLAS APPLEGATE INC. in San Diego says the fund is having no trouble staying fully invested in stocks. Among her favorites: STORAGE TECHNOLOGY CORP., LOWES COS., ROWAN COS., HOME DEPOT INC., SCITEX LTD, WILLIAMS SONOMA INC., HORNBECK OFFSHORE SERVICES INC. and SHOWBIZ PIZZA TIME INC. ("Investor's Daily", 5/21)

TEMPLE-INLAND made a new high last week and EUGENE PERONI JR. of JANNEY MONTGOMERY SCOTT says he has liked the stock for some time. "We feel it's just beginning a new move now since it's gotten above that major support level in the 30-33 area." He says the stock has a potential well over 45 in the next 12-18 months. Another Peroni favorite, QMS, also made a new high last week. "Here again we feel it's just beginning a new move which should push it into the 18-21 area over ... 3-6 months." (FNN "World Business Update", 5/21)

Short-selling specialist JOE FESHBACH, who runs $600 million of assets with his brothers in Palo Alto, Calif., tells DAN DORFMAN of "USA Today" that he sees trouble head for trucking giant CONSOLIDATED FREIGHTWAYS as a result of its $450 million acquisition of EMERY AIR FREIGHT last year. Feshbach is quoted as looking for the stock to be cut in half 12 months or sooner. It closed Friday at 17, down 1/8. ("USA Today", 5/21)

AT&T climbed 5/8 to 43 1/2 after PRUDENTIAL BACHE and GOLDMAN SACHS repeated buy recommendations. PAINEWEBBER, PRUDENTIAL BACHE and SMITH BARNEY extended buy recommendations for DEC, pushing the stock up 1 5/8 to 89. And RAYCHEM jumped 1 3/8 to 33 3/8, still benefiting from a repeated buy recommendation from MERRILL LYNCH. (NBR, 5/18)

WENDY BEALE NEEDHAM of SMITH BARNEY concludes that GENERAL MOTORS, selling at less than 50, is a stock to buy because the company is worth 59 a share if a value were placed on all of its units. On the other hand, JAMES ALEXANDRE of DONALDSON LUFKIN & JENRETTE says looking at breakup values is "the language of the '80s and not the language of the '90s." He has upgraded FORD to a "buy" based on actions the company has taken to save money. ("The Washington Post" 5/20)

Three firms that track distressed and bankrupt companies for investors have added some of DONALD TRUMP's assets to their watch lists. OPPENHEIMER & CO., R.D. SMITH CO. and the DELAWARE BAY CO., are watching several Trump properties, focusing on his Atlantic City casinos, according to "Turnarounds & Workouts," a Washington-based newsletter. "We look at anything that looks terrible," an analyst at one of the firms told an "Investor's Daily" reporter. ("Investor's Daily", 5/21)

Although viewing the market as ripe for a sell-off this week, JAMES DINES, editor and publisher of "The Dines Letter," likes BOEING, GENERAL ELECTRIC

and PROCTOR & GAMBLE. (NBR, 5/18)

Nearly 40% of the nation's 300 largest thrifts failed to meet minimum regulatory capital limits at the end of last year, according to an "American Banker" survey. "The rich will get richer and everyone is scheduled for euthanasia - with pain," says RICHARD PRATT, chairman of MERRILL LYNCH MORTGAGE CAPITAL and a former chairman of the FEDERAL HOME LOAN BANK BOARD. ("Investor's Daily", 5/21)

DAVID MILLS of the BOSTON CO. CAPITAL APPRECIATION FUND lists GREAT LAKES CHEMICAL as one of his favorite stocks. "It's one of the best managed companies in the country," he says. "I think you're going to get a multiple expansion combined with 20% growth for the next three to five years." ("Barron's", 5/21)

MICROSOFT CORP., up 55% since Jan. 1, climbed 3 1/2 to a new closing high of 68 1/4 on Friday in anticipation of introduction of a new version of its "Windows" computer software tomorrow. COWEN & CO. analyst MICHELE PRESTON has the stock rated an "aggressive buy." ("Investor's Daily", 5/21)

DILLON READ's RAY NEIDL says AMERICA WEST, NORTHWEST and AMERICAN are likely suitors of PAN AM's shuttle. "They [Pan Am] probably had to sell a major asset to get through the current fiscal year. The shuttle is the most marketable of the assets Pan Am has remaining, plus its sale would not affect the main airline." (CNN's "Moneyline", 5/18)

The "Heard on the Street" column in this morning's "Wall Street Journal" looks at talk among some Wall Street merger specialists that billionare WARREN E. BUFFETT may be exploring the possibility of selling his 44% stake in GEICO. The column says some executives familiar with Geico acknowledge "that something is up at the company" and that it could involve a change in Buffett's ownership position -- although not necessarily a decrease in his stake. (WSJ, 5/21)

CNN's DAN DORFMAN reports UPJOHN and AMERICAN CYANAMID took off on takeover rumors that named PROCTOR & GAMBLE the likely suitor. But a spokesman for American Cyanamid denied any validity to the speculation. (CNN's "Moneyline", 5/18)

#90141m0002 05/21/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (MAY 21) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"I would side with the view that even after the Fed sees the next set of monthly reports in June it will be cautious," says MICHAEL MORAN, chief economist at DAIWA SECURITIES AMERICA. "I can see them holding steady for some time." (NYT, 5/21)

Don't expect to see significant Fed easing, says ALBERT GROSS, chief economist at REFCO. "While the PPI was down, it was only one month. We have seen moderation, yet in the first quarter we saw the highest quarterly rate of inflation in over eight years -- 8 1/2 percent." Gross says the underlying inflation rate of just under 5% is not a basis for the Fed to aggressively ease credit or to respond to near- term weakness in the economy. (CNBC "World Business", 5/21)

"While [recent economic] data may have heightened the prospects for Fed policy easing later this year, they probably weren't enough to convince the Open Market Committee to change policy at its meeting last week," says JAMES KOCHAN of MERRILL LYNCH. "It would, therefore, be premature for the markets to begin anticipating such a Fed move. We must now await the early June economic releases to determine whether a near-term policy easing move is likely." ("Investor's Daily", 5/21)

"For the time being, rates should trade within a relatively tight 8 3/8 percent to 8 3/4 percent range that has characterized most of 1990," says MITCHELL HELD, chief financial economist at SMITH BARNEY, HARRIS UPHAM. (NYT, 5/21)

THE ECONOMY:

"We think the economy is growing at a 2 percent to 2.5 percent rate and that the core rate of inflation is at 4.5 percent," says ROBERT DEDERICK, chief economist at the NORTHERN TRUST COMPANY in Chicago. "But that is just a best guess." (NYT, 5/21)

IN WASHINGTON:

"You do have a summer ritual [on deficit reduction] going on in Washington it seems to be," says BILL WOLMAN, chief economist for "BusinessWeek" and "CNBC." "What irritates me, as a gray-haired member of the financial press, is how we allow them to play off these games and give them so much print, and so much air time." He compares the scenario to "a ballet dance that was invented 30 years 1 ago" and says "I get mad at us sometimes for taking this very seriously. It's a charade is what it is." (CNBC's "Market Wrap-Up", 5/18)

The GENERAL ACCOUNTING OFFICE reports that the average effective tax rate for 200 large companies rose from 18.6% in 1986 to 27.8% in 1987. ("USA Today", 5/21)

The "Wall Street Journal" reports that a draft report by the GENERAL ACCOUNTING OFFICE says the government is not providing enough protection to investors who buy and sell U.S. Treasury securities. (WSJ, 5/21)

#90141p0222 05/21/1990 ~PR Newswire

OREM, UT (MAY 21) PR NEWSWIRE - Wicat Systems Inc. (NASDAQ: WCAT), announced today that the Anthony Fokker Technical Training School has chosen Wicat Systems Ltd., a wholly owned subsidiary located in the United Kingdom, to provide a system to train students in aircraft technical subjects as part of pre-licensed engineer courses. The contract is initially valued at approximately $75,000.

KLM Royal Dutch Airlines, themselves a major user of Wicat computer-based training (CBT), is furnishing the equipment to the Fokker Training School to allow technology-based training to be introduced at an early stage in the technician training curriculum.

Initially, a file server and four WITS 2000 workstations will be used to deliver a variety of types of training courseware.

The Fokker School is located in The Hague and trains 16 to 20 year old students as aircraft technicians for employment in the aviation industry throughout The Netherlands.

This contact marks the first aviation technical training school in Europe to introduce technology-based training and illustrates the increasing trend in aircraft technician training towards CBT. Forecasts by major airlines show the need for more than 20,000 new licensed engineers by the turn of the century.

Wicat Systems is a world leader in technology-based training and education solutions, providing products and services to help clients achieve 30 to 50 percent learning improvement in schools, industry and government. Wicat's stock is traded in the NASDAQ market under the symbol WCAT.

CONTACT: Sally Jenkins of Wicat Systems Inc., 801-224-6400, ext. 304.

#90141p0252 05/21/1990 ~PR Newswire

TORRANCE, CA (MAY 21) PR NEWSWIRE - Ashton-Tate Corp. (NASDAQ: TATE) today announced that David R. Proctor, 49, has joined the company as vice president and general manager of the company's database division.

Based in Ashton-Tate's corporate headquarters in Torrance, Proctor is responsible for the development and marketing of the company's database

management system product line, including dBASE IV, advanced and connectivity products, and RapidFile. He also oversees the development of the division's long range strategic plans. Proctor reports directly to Ashton-Tate President and Chief Operating Officer William P. Lyons.

Proctor comes to Ashton-Tate with over 23 years of experience at IBM. For the past four years, he served as Asia Pacific Director for IBM's software products, living in Tokyo, Japan. In that position, Proctor worked with software vendors worldwide to modify their applications for operation on Japanese IBM systems, with emphasis on OS/2 and AIX products. His efforts produced significantly increased applications software revenue for the company.

During his tenure at IBM, Proctor served in a number of positions, including director of telecommunications and systems manager for Host Office Systems. From 1974 through 1977, he headed program development for IBM's FSD division, with responsibility for the space shuttle's on-board and simulation systems. Prior to joining IBM, Proctor worked for Rocketdyne, a division of Rockwell International.

As Proctor steps into the vice president and general manager of the database division position, Floyd Bradley will return to his position of vice president and general manager, Europe. Bradley was serving in the database division position on an interim basis since February of this year.

At the same time, Joseph F. Brilando, vice president of Corporate Market and Strategy, has resigned, effective immediately, to develop a technical marketing consulting practice in Silicon Valley. The company does not intend to replace Brilando; instead the corporate communications, business development, developer services and marketing services functions will be restructured into existing operations.

Headquartered in Torrance, Calif., Ashton-Tate Corp. develops and markets microcomputer business applications and advanced connectivity software. The company's major product categories include database management systems, word processing, integrated decision support, spreadsheets, graphics and software utilities. Ashton-Tate has international operations in most countries around the world, with products available in 20 languages in more than 50 countries. The company also offers a comprehensive line of training and support services for individuals, corporations and government agencies.

CONTACT: Linda Duttenhaver, 213-538-7011, or Brad Stevens, 213- 538-7348, both of Ashton Tate Corp.

#90141p0260 05/21/1990 ~PR Newswire

LONDON (MAY 21) PR NEWSWIRE - BTR plc announced today that its wholly owned subsidiary, Schlegel Corporation of Rochester, N.Y., has agreed to purchase United Technologies Corporation's (NYSE: UTX) (UTC) Global Automotive Sealing Systems Group for approximately $200 million cash. Schlegel produces a wide range of products, including hardware and sealing systems for home improvement and construction as well as automotive applications.

UTC's Global Automotive Sealing Systems Group is a supplier of automotive body seals and glass run sealing technology with total 1989 sales of $275 million and 4,100 employees. The group's manufacturing operations, six in total, are located in the United States and Europe.

John Cahill, managing director and chief executive officer of BTR plc, stated, "This transaction underscores BTR's strategy to build the presence and expand the operations, both globally and in the United States, of its subsidiaries such as Schlegel, which we purchased in January 1989. It is another example of BTR using its financial resources and management expertise to enhance its subsidiaries' long-term stability, growth and financial health."

In addition to the assets of the U.S. sealing systems operations in Keokuk Iowa; Montpelier, Ind.; and Hayward, Calif.; the acquisition includes the purchase of Mesnel S.A. in France and Permolca S.A. in Spain. Net assets acquired are approximately $95 million and 1989 pre- tax profit was approximately $20 million.

The purchase of the Global Automotive Sealing Systems Group will complement BTR's operations in this sector throughout the world.

Bob Faircloth, BTR plc executive director, said, "The acquisition enhances our product range and technology in the automotive weatherseal business. In particular, in Mesnel and Permolca, we will have two well regarded and growing businesses whose glass run technology, equipment and processes are very impressive. They will broaden our existing technologies and provide opportunities for good growth in sales and earnings. This is an excellent business combination that will serve the best interests of employees and customers."

BTR plc is a London-based global corporation that comprises more than 500 companies operating in five major business sectors: industrial, control systems and electrical, construction, transportation and consumer-related.

CONTACT: Richard Cendo of Kekst and Company, 212-593-2655, for BTR.

#90141p0262 05/21/1990 ~PR Newswire

HOUSTON (MAY 21) PR NEWSWIRE - Compaq Computer Corporation (NYSE: CPQ) today introduced two new personal computers with specific built-in features for network use, bolstering the Company's line of products providing key components for networking solutions. These new products are ideally suited for both connected and standalone PC applications.

The COMPAQ DESKPRO 386N Personal Computer is based on the high-performance 16-MHz 386SX microprocessor, and the COMPAQ DESKPRO 286N Personal Computer is based on the 12-MHz 286 microprocessor. Both systems come standard with one megabyte of memory and offer three model configurations. Prices for the COMPAQ DESKPRO 386N range from $2,299 to $3,199; prices for the COMPAQ DESKPRO 286N range from $1,699 to $2,599.

The COMPAQ DESKPRO 386N and COMPAQ DESKPRO 286N address the growing demand for networked PCs that allow PC users to share files, peripherals and other computer resources across a network.

As full-function PCs, the COMPAQ DESKPRO 386N and COMPAQ DESKPRO 286N can be networked with the COMPAQ SYSTEMPRO and COMPAQ DESKPRO products used as servers to provide a high-performance, PC networking solution for file sharing, database management, electronic mail, order entry and other PC-based local area network applications.

The COMPAQ DESKPRO 386N and COMPAQ DESKPRO 286N offer full PC functionality, making them ideal, affordable systems for standalone applications.

In addition, the COMPAQ DESKPRO 386N and COMPAQ DESKPRO 286N offer specific built-in features for networked-PC environments, including multi-level security controls, configuration flexibility and a compact, low-profile design.

The COMPAQ DESKPRO 386N and COMPAQ DESKPRO 286N are offered in three model configurations: the Model 40, which includes a 40-megabyte fixed disk drive and a 3 1/2-inch 1.44 megabyte diskette drive; the Model 1, which includes a 3 1/2-inch 1.44 megabyte diskette drive; and the diskless Model 0, which includes no fixed disk or diskette drive.

Suggested resale prices of the COMPAQ DESKPRO 386N Personal Computer Models 40, 1 and 0 are $3,199, $2,399 and $2,299, respectively. Suggested resale prices of the COMPAQ DESKPRO 286N Models 40, 1 and 0 are $2,599, $1,799 and $1,699, respectively. First shipments of the COMPAQ DESKPRO 386N and COMPAQ DESKPRO 286N have already been made to Authorized COMPAQ Computer Dealers worldwide.

Compaq Computer Corporation is a world leader in the manufacture of PC systems, and desktop, portable and laptop personal computers.

TORONTO (MAY 21) PR NEWSWIRE - Bayer AG, West Germany, announced today the acquisition of the Polysar Rubber Division of NOVA Corporation of Alberta, Canada. The agreement signed by the two companies is subject to the approval of the governmental authorities in Canada, the United States and Germany. The purchase price will be US $1.060 billion (Cdn. $1.250 billion).

The Polysar Rubber Division of NOVA Corporation is headquartered in Toronto and employs 3,500 people worldwide. It is one of the leading producers of synthetic rubber, primarily for the tire industry and technical rubber articles. The plants in Canada, the USA, Belgium and France have a capacity of about 530,000 tons per year. Last year the division's sales were about Cdn. $819 million. Sales of approximately Cdn. $900 million are expected in 1990.

With this acquisition, Bayer will supplement its existing range of rubber products, which have been produced primarily in Western Europe. Polysar's business will strengthen Bayer's position in North America and will access additional markets in Europe and the Far East.

In modern plants Polysar produces butyl rubber -- an essential material for inner liners of tires -- and polybutadiene, as well as a number of specialty rubbers with high aging and oil-resistant properties, such as nitrile rubber and EPDM. Bayer also produces an important assortment of synthetic rubbers. The company will in future be able to offer its customers an even wider range of high quality products together with expert service.

Bayer and the Polysar Rubber Division already cooperate closely in research, the expansion of which is expected to lead to interesting innovations. Furthermore, the Bayer product "Therban," a high performance elastomer used for high-tech parts, particularly for automotive vehicles, is already being produced under contract by Polysar at its Orange, Texas, plant.

Bayer AG is one of the world's most diversified companies with business in chemicals, health care and imaging technologies. Headquartered in Leverkusen, West Germany, Bayer had sales in 1989 of DM 43.3 billion and income after tax of DM 2.1 billion. Bayer employs more than 170,000 people in over 70 countries worldwide. The company's business is divided

into six sectors: Polymers, Organic Products, Industrial Products, Health Care, Agro-chemicals and Imaging Technologies.

WASHINGTON (MAY 21) PR NEWSWIRE - Washington Bancorporation (NASDAQ-NMS: WWBC) and Washington Mortgage Acquisition, Inc. (WMA) announced today that a definitive agreement had been reached for the sale of 100 percent of the outstanding stock of Washington Mortgage Group, Inc, (WMG), subject to applicable regulatory approvals.

WMG is currently a 100 percent owned subsidiary of Washington Bancorporation. Washington Mortgage Acquisition, Inc. is a private company consisting of existing management of WMG and a substantial unrelated private investor group. The acquisition is anticipated to be completed no later than June 30, 1990. WBC expects to realize cash in excess of $3 million from the transaction, and will be relieved of substantial funding requirements.

John M. Toups, chairman and CEO of WBC, said: "This sale is in keeping with the strategic plan for WBC, as outlined in our Annual Report. The company's focus will be on our core businesses: retail banking, lower- and middle-tier corporations, and commercial real estate. We believe that this sale furthers those objectives."

Shekar Narasimhan, president of WMG, said: "An independent WMG with a significant capital base will be well positioned to take advantage of the major secondary and foreign capital markets, in order to provide permanent income property and residential financing."

Both parties indicate that they expect a fruitful, ongoing relationship. Servicing of loans for NBW customers will be managed by WMG, with no interruption of service.

Washington Bancorporation is a multi-bank holding company operating in Washington, D.C., Northern Virginia and Maryland, with assets of $1.98 billion, total deposits of $1.6 billion and total loans of $1.48 billion at the end of the first quarter of 1990.

Washington Mortgage Group is headquartered in Vienna, Va., and has offices in New York City and Atlanta, with 1989 loan originations of $261 million and servicing of over $500 million.

#90141p0268 05/21/1990 ~PR Newswire

SAN DIEGO (MAY 21) PR NEWSWIRE - Supercomputing Solutions, Inc. (NASDAQ: SUPR), today announced the receipt of a contract from Textron Defense Systems, a division of Textron Inc. (NYSE: TXT).

Under the contract, the DYNA-3D software code will be ported (i.e. put) onto Supercomputing Solutions' CAPPS 9064 supercomputer. The objective of the contract is to demonstrate the enhanced operational and cost efficiency of the DYNA-3D code when employed on supercomputers, such as the CAPPS 9064, which function based on parallel processing.

The DYNA-3D software code is used by Textron Defense Systems as a simulation tool in the design of Textron's armor penetrating munitions which it supplies to the U.S. Department of Defense. The code is widely used throughout the aerospace and automotive industries.

Depending on customization, the CAPPS 9064 supercomputer costs from $350,000 to $1.5 million, a dramatically lower price than that offered by the major supercomputer suppliers. It is presently being marketed to aerospace, automotive and electronic companies, universities, and U.S. government agencies interested in applications such as large scale simulation, computational fluid dynamics, computational chemistry, electromagnetics, and impact mechanics.

"This contract, although small monetarily, is very significant to Supercomputing Solutions and represents a form of culmination of our research and development efforts on the CAPPS 9064 in which we port widely used application codes to this supercomputer," said Allan Simon, chairman and chief executive officer.

"Our immediate objective is to port a number of very significant software codes to the 9064. This porting process plays an important role in our overall marketing efforts," Simon said.

Supercomputing Solutions, Inc., is a developer, manufacturer and marketer of supercomputing systems including hardware and software that employ an advanced parallel operating architecture ("parallel processing"). This allows the company to offer superior price/ performance supercomputing capabilities across a broad spectrum of scientific applications.

CONTACT: Douglas Sherk, 415-243-8603, or Paul Steidler, 212-986-5900, both of Morgen-Walke Associates, for Supercomputing Solutions

SAN FRANCISCO (MAY 21) PR NEWSWIRE - The Pacific Stock Exchange (PSE) announced that it is implementing a "10-up Rule" on its options floor effective Monday, May 21. The rule requires trading crowds to provide collectively a minimum depth of 10 contracts for non-broker-dealer orders at disseminated market quotes.

The 10-up Rule, which was drafted by PSE market makers and floor brokers, is applicable to "in-, at-, and out-of-the money" series in the two near-term expiration months. (At-the-money is defined as within $1 for stocks over $25 and 50 cents for stocks under $25.) The rule was approved this past week by the Securities and Exchange Commission (SEC).

Lee Korins, president and chief executive officer of the Exchange, said, "10-up represents an additional commitment by the PSE to the quality and integrity of its markets, and is another step toward increasing investor confidence in the marketplace."

#90141p0272 05/21/1990 ~PR Newswire

TROY, MI (MAY 21) PR NEWSWIRE - K mart Corporation (NYSE: KM), the world's second-largest retailer, reported increased first-quarter sales and earnings, Chairman of the Board and Chief Executive Officer Joseph E. Antonini announced today.

Net income for the 13 weeks ended May 2, 1990, increased 6.4 percent to $100.1 million from $94.1 million for the 13 weeks ended April 26, 1989. Earnings per share were 50 cents, compared with 1989's 47 cents. First-quarter sales rose 16.1 percent to $7.04 billion from 1989's $6.07 billion for the same period. Sales on a comparable store basis -- those stores open at least one year -- were up 6.2 percent.

The gross margin for the quarter was lower than a year ago at 26.0 percent of sales versus 27.8 percent, reflecting K mart's strategy to lower everyday shelf prices and the inclusion of the lower-margined PACE Membership Warehouse operation in the first quarter of 1990. The decrease was partially offset by a reduced LIFO charge. The pretax LIFO charge for the 1990 period was $32.5 million, compared with $45.3 million in the prior year.

The selling, general and administrative (SGA) expense ratio was 1.9 percent lower at 23.3 percent of sales in the first quarter of 1990, versus 25.2 percent of sales for the comparable 1989 period, as a result of the strong sales gain and the inclusion of PACE.

Net interest expense on debt was $56.5 million, up 70.2 percent from $33.2 million in the 1989 first quarter. The increase was primarily due to greater short-term borrowings resulting from higher inventory levels in the 1990 period and from the acquisition of PACE.

K mart Corporation serves America with over 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada. K mart, currently operating 2,321 K mart stores, is also the parent company for Pay Less Drug Stores, Builders Square, Waldenbooks, PACE Membership Warehouse Clubs and The Sports Authority.

K mart Corporation stock is listed on the New York, Pacific, Midwest and Tokyo Stock Exchanges. Its trading symbol is KM.

#90141p0276 05/21/1990 ~PR Newswire

PONTIAC, MI (MAY 21) PR NEWSWIRE - Perry Drug Stores, Inc. (NYSE: PDS) announced today that it has signed an agreement to acquire 16 Detroit-area stores presently operated by Revco Drug Stores, Inc.

Perry's purchase is part of a larger transaction in which Revco is selling 221 stores in eight midwestern states to Reliable Drug Stores, Inc. The entire Revco/Reliable transaction is subject to a U.S. Bankruptcy Court approval which is anticipated at the end of June.

Jack A. Robinson, Perry chairman and chief executive officer, said the acquisition supports Perry's strategy of filling in existing markets and concentrating on Michigan.

"We are very excited about acquiring these 16 stores," said Robinson. "This acquisition, along with other major strategic policies we have implemented in the last few months, will be of tremendous assistance in contributing to the continued improving profitability of Perry.

"The stores will not require additional administrative expenditures since they fit into our existing advertising, distribution and supervision network," he said. "Thus, these stores will make significant profit contributions to Perry."

The stores, which average about 9,000 square feet, are all located in the Detroit metropolitan area. Three are in Detroit, three in Livonia and the rest are in Dearborn, Wayne, Bloomfield Township, Wyandotte, Clawson, Southfield, Farmington, Allen Park, Grosse Pointe and Redford Township.

Perry also in the last two months opened four new stores -- one in Grand

Rapids, one in Houghton Lake and two in Traverse City. In addition, the company has signed leases to open four other stores in the 1990 fiscal year which ends Oct. 31. Perry plans to open 20 new stores in fiscal 1991.

Perry also reported that it expects to close on divestiture of 14 A.L. Price deep discount stores the end of this month. The company is divesting of these stores to concentrate on conventional drugstore business and to improve profitability.

When the acquisition is completed, Perry will operate 186 conventional drugstores in Michigan and 23 in the Chicago area.

In addition to drugstores, Perry operates several health-care operations in Michigan under the name of Perry ComfortCare.

#90141p0283 05/21/1990 ~PR Newswire

SUNNYVALE, CA (MAY 21) PR NEWSWIRE - Weitek Corp. (NASDAQ: WWTK) today announced its new XL-8220 HyperScript-Processor, which will be supported with the PostScript language from Adobe Systems Inc. Designed specifically for printers in the 4 to 20 page per minute range, the single-chip XL-8220 provides the best price/performance solution available for PostScript-based page printer controllers. Cost-Effective High Performance

The expansion of the PostScript market is driven by the need for higher speed PostScript processing and lower cost printers. Hence, printer designers are moving from CISC (complex instruction set computer) processors, like the Motorola 68000, to higher performing RISC (reduced instruction set computer) processors. In addition, there is demand for compact, lower cost controller designs that can fit within the new, small footprint printers.

The XL-8220 is the newest member of the high-speed Weitek XL family of RISC-based page printer processors, featuring a 32-bit RISC (reduced instruction set computer) architecture that operates up to 25 MHz. The RISC core is extended with a 64-bit funnel shifter, bit and byte manipulation instructions, and an independent multiply-divide unit to speed PostScript processing. This extended core is surrounded with printer-specific integrated system functions that significantly reduce the number of components needed to create a page printer controller. The functions integrated onto the chip include a code cache, DRAM controller, interlock queues, printer FIFO and printer channel control logic.

The extended RISC core with the integrated system functions enables an

XL-8220-based printer controller to provide 4 to 7 times the performance of Apple's top-of-the-line LaserWriter II NTX controller, at much lower costs and one-third the board area. "We expect the new XL- 8220 to bring a much higher level of performance to the new wave of compact, personal PostScript printers that sell for under $3,000," said Arthur J. Collmeyer, president and CEO of Weitek Corp. Adobe Post Script Support

The XL HyperScript-Processors are supported by leading page printer application software, ensuring that printer manufacturers can get their products to market quickly. The PostScript language from Adobe is the standard page description language in the industry, with over 30 licensed OEMs shipping more than 60 PostScript products. Just as Adobe has supported its PostScript interpreter on the XL-8200, Weitek's first generation page printer processor, it will support the XL-8220 as part of its low to mid-range controller offerings. "It's been very easy to design and debug our controllers based on the XL-8220, due in part to the processor's highly integrated system architecture," said Dr. Carolyn Bell, director of engineering for Adobe Systems. "We're now demonstrating our XL-8220 PostScript interpreter to our OEMs and will start taking contracts today." Complete Controller Development Tools

Weitek's XL HyperScript-Processors are supported by a comprehensive set of controller development tools, including PC-based and in-printer- based printer controller board designs and in-circuit emulators. The software development tools are based on an advanced, optimizing C compiler and include a source-level debugger. This complete development tool support, coupled with Adobe PostScript support, cuts the time to market of an XL-8220-based controller in half compared to other page printer controllers. Pricing and Availability

The XL-8220 runs at clock rates of 16 and 25 MHz. It is available now in sample quantities with full development tool support. Production quantities will be available in the fourth quarter of 1990. The price of the XL-8220 in 10,000-unit quantities is $99 for the 16 MHz version and $149 for the 25 MHz version.

Weitek is the leading supplier of high-performance numeric processing solutions. The company's VLSI circuits and development tools power a broad range of computer systems from minisupercomputers and engineering workstations to desktop computers and page printers.

HyperScript-Processor is a trademark of Weitek Corp. PostScript is a registered trademark of Adobe Systems Corp. LaserWriter II NTX is a trademark of Apple Computer, Inc.

CHARLOTTE, NC (MAY 21) PR NEWSWIRE - Con-Way Southern Express (CSE) announced today it has completed the purchase of two Tennessee truck lines giving the company full intrastate operating authority to all points throughout Tennessee, and doubling the number of service centers CSE now operates in the state.

The transaction has received approval from the Interstate Commerce Commission, which confirmed transfer of operating certificates to CSE from Hohenwald Truck Lines and McMinnville Truck Lines, the two intra-Tennessee motor carriers purchased by CSE. These companies have been merged into CSE's service network, which in addition to Tennessee, provides regional next-day trucking among some 8,400 communities throughout seven southeastern states.

In conjunction with its new Tennessee operating authority, CSE has opened service centers in Cookeville, Jackson, Lewisburg, and Memphis, Tenn. These new centers join existing CSE Tennessee facilities in Chattanooga, Knoxville, Nashville, and the Tri-Cities (Bristol- Johnson City-Kingsport) which together provide full intrastate coverage and interstate service to most communities throughout Alabama, northern Florida, Georgia, North Carolina, South Carolina, Tennessee, and Virginia.

Con-Way Southern Express was founded in 1987 as a regional motor carrier specializing in next-day service for commercial and industrial shipments, serving the southeast market area. Since its opening, with 15 service centers, 100 trucks, 300 trailers and 150 employees, the company has more than tripled in size and has become the leading service carrier in its market. CSE today operates a network of 47 service centers and carries as much freight in a day as it moved in its first month of business.

CSE is one of five regional motor carriers founded by Con-Way Transportation Services, a $600 million regional trucking and intermodal services company based in Palo Alto, Calif.

In addition to CSE, Con-Way Transportation Services' other regional carriers are Con-Way Western Express, Santa Fe Springs, Calif.; Con-Way Central Express, Ann Arbor, Mich.; Con-Way Eastern Express, Rutherford, N.J.; and Con-Way Southwest Express, Dallas. Con-Way Transportation Services also operates CF Truckload Service, a rail piggyback and stack train company in Fort Worth, Texas; and CF Ocean Service, an international ocean container freight company based in Long Beach, Calif.

#90141p0294 05/21/1990 ~PR Newswire

WELLESLEY, MA (MAY 21) PR NEWSWIRE - Brooktrout Technology Inc. today announced it has received a U.S. patent for an information retrieval method that enables anyone with access to a touch-tone phone and facsimile machine to retrieve data from databases anywhere in the world.

Brooktrout President Eric R. Giler said the method, a combination of DTMF (touch-tone), facsimile and voice processing technologies, is of landmark significance to the industry.

Until now, Giler said, retrieving information from electronic databases has required computer expertise and equipment, such as a personal computer or a CRT terminal. "Brooktrout's method will expand use of electronic information systems by making the information stored in them more easily accessible to users," he said.

The Brooktrout method permits development of automated product literature request hotlines. A user can dial the information systems, choose from a menu of product data sheets and enter the phone number of a fax machine to get the information.

Also, the method makes possible the creation of integrated voice and facsimile messaging systems through which faxed information can be stored in user mailboxes and later retrieved through a fax-capable device, such as a fax machine or a personal computer equipped with a fax receiver and printer.

Giler, who co-invented the method with Brooktrout colleagues David W. Duehren and Stephen A. Ide, said Brooktrout management is deciding whether and under what circumstances it will license its retrieval method to other companies. The patent for the method is numbered 4,918,722.

Brooktrout, based in Wellesley, Mass., manufactures and markets electronic messaging systems based on real-time digital signal processing. Brooktrout products include hardware/software systems for voice and fax

messaging and are distributed primarily through original equipment manufacturers, dealers and under private label license.

CONTACT: Beth Mog, of Brooktrout Technology, 617-235-3026; or Ann Marie Downing, of Rourke & Company, 508-777-6006, for Brooktrout.

#90141p0295 05/21/1990 ~PR Newswire

WHITE PLAINS, NY (MAY 21) PR NEWSWIRE - KD German Rhine Line will launch cruises on the Elbe River in April 1991, with two new ships now under construction. The river flows through both West and East Germany -- forming part of the border between the two -- and into Czechoslovakia.

The seven-night cruises will operate in both directions between Hamburg, the sophisticated, stylish metropolis and North Sea port that is West Germany's largest city, and Dresden, cultural treasury of East Germany, with some 20 museums, an outstanding opera company and a symphony orchestra dating from 1548.

KD is building the two ships, expected to cost at least 15 million Deutschmarks each (about $9,000,000), specially for service on the Elbe, which averages a lower water level than the Rhine and therefore requires vessels of a lesser draught. The Elbe ships, as yet unnamed, will each have 64 twin-bedded cabins, all facing outward to the river and divided between the aft portion of two decks. The fore portions will contain the observation lounge on one deck, the dining room on the other. The ships will operate back-to-back cruises on the 600-km. stretch of the river between Hamburg and Dresden, spending each night in a different port and offering shore excursions at the most interesting. Somewhat more than a full day will be provided in Dresden, which is difficult to visit otherwise because of limited hotel capacity.

Other ports of call will include Meissen, famed for its porcelain; Wittenberg, where Martin Luther launched the Protestant Reformation and spent the last 25 years of his life; and Magdeburg, in the Harz Mountains, site of Germany's first Gothic cathedral and some beautiful baroque buildings. An excursion will go to Potsdam, where, in the 18th century, Frederick the Great built his Sans Souci palace. A tour of the palace takes in one splendid room after another, including the one occupied by the French philosopher Voltaire on his frequent visits and an art gallery filled with works by Rubens, Van Dyck and other masters.

The fare for the Elbe cruises is expected to be about $225 a day. KD hopes to operate them in partnership with VEB White Fleet Dresden, a 153-year-old company that runs day cruises on the upper Elbe around Dresden. KD, founded in 1826, has been thinking about Elbe cruises for a number of years, according to Peter Kluge, director of international sales

and has been researching the river from the technical side since early 1989. It is operating back-to-back trial cruises this June.

KD is represented in the United States by the Rhine Cruise Agency, 170 Hamilton Ave., White Plains, NY 10601, telephone 914-948-3600 or 800-346-6525 from the eastern U.S.; and 323 Geary St., San Francisco, CA 94102, telephone 415-392-8817 or 800-858-8587 from the west, including Alaska and Hawaii.

FREMONT, MI (MAY 21) PR NEWSWIRE - Gerber Products Company (NYSE: GEB) announced it has signed an agreement for the sale of its Gerber Children's Centers, Inc. subsidiary to an affiliate of KD Equities.

The child-care subsidiary operates 115 facilities in 12 states and manages four centers for other employers.

Fred Schomer, executive vice president, chief financial officer of Gerber Products Company, said, "We are confident the sale will be beneficial to the employees of Gerber Children's Centers and will provide the parents of the over 13,000 children presently served by our child-care subsidiary with a continuation of the quality service and caring staff they have come to know and to expect."

Marion H. Antonini, chairman of KD Operating Companies, said, "It is our intent to continue the methods, instructional program and the philosophy of the Gerber operations. We plan to retain the area management as well as the center directors and staff. Debe Ludwig, executive vice president and general manager of Gerber Children's Centers will continue in her present management position with the company."

"We are very pleased to acquire a company with the strengths and potential of the Gerber Children's Centers," Antonini continued, "and we believe we can provide tactical support to existing management's operating knowledge and experience to further enhance results."

KD is a private investment partnership involved in the acquisition of established, middle market companies. Security Pacific Business Credit Inc. has provided a commitment letter for the senior financing for the transaction, subject to normal conditions."

Terms of the transaction were not disclosed.

COLUMBUS, GA (MAY 21) PR NEWSWIRE - Synovus Financial Corp. (NYSE:SNV) today announced its acquistion of the Phenix City, Ala., and Opp, Ala., branches of Phenix Federal Savings and Loan Association, has been completed.

The Opp branch will operate as a branch of Fort Rucker National Bank, Synovus' banking affiliate located in Fort Rucker, Ala. The Phenix City branch will operate as a branch of CB&T Bank of Russell County, Synovus banking affiliate located in Phenix City, Ala.

CB&T Bank of Russell County will close its branch office operations at the Phenix Plaza on Friday, May 18, and move them to the former Phenix Federal office at 910 13th St. On Monday morning, May 21, the new branch location will provide CB&T customers with a spacious lobby and three lanes for drive-in banking. The new branch will be staffed with CB&T employees and former Phenix Federal employees.

"We are pleased to have the opportunity to serve the many fine customers of Phenix Federal, and our staff is committed to meeting their banking needs," commented Sammy Howard, president of CB&T Bank of Russell County. "The addition of Phenix Federal's building as a branch location will make banking with us more convenient for all of our customers."

SNV is a $2.6 billion asset, multi-financial services company based in Columbus, Ga. SNV is composed of 14 Georgia, four Florida and two Alabama banking affiliates, a majority-owned, publicly traded bankcard data processing company, Total System Services, Inc. (NYSE:TSS) and a broker/dealer company, Synovus Securities Inc.

TAMPA, FL (MAY 21) PR NEWSWIRE - Nutmeg Industries, Inc. (NASDAQ: NUTM) today announced that net sales for the first fiscal quarter ended April 28 1990, were $9,215,000 or 3.2 percent above the $8,928,000 reported in the comparable quarter a year ago.

In this year's first quarter, the company reported a $292,000 net loss or $.04 per share compared to net income of $431,000 or $.08 per share in the

first quarter of last year. Included in last year's results was income of $113,000 of $.02 per share from the cumulative effect of a change in accounting principle.

The company reported that the quarter's results were in line with its expectations. In making the announcement, Richard E. Jacobson, Nutmeg's chairman and chief executive officer, said, "We remain cautiously optimistic for the year as a whole. We have further strengthened our management team and our order flow has been more consistent. Additionally our focus on cost controls is expected to, over time, be reflected in our results. Shipments from our new Saturday's Hero joint venture, which were not significant in our first quarter, are also expected to accelerate. Our current backlog, including Saturday's Hero, stands at approximately $29 million as compared to approximately $20 million at this time last year."

Mr. Jacobson went on to say, "We also remain determined to improve our cash flow from Nutmeg Mills. In the first quarter, we eliminated all borrowings under our lines of credit which totaled nearly $3 million at year end. In the first quarter of last year we had increased our borrowings under our bank lines of credit by $4.2 million to $10.8 million. In last year's first quarter, we also increased our inventory by $5.3 million to $25.0 million. In this year's first quarter, we reduced our inventory by $261,000 to $23,004,000, despite the inclusion of $830,000 in inventory for Saturday's Hero."

Nutmeg Industries designs, manufactures and markets high-quality sportswear bearing the insignias, names, colors, cartoon characters or other identifying symbols that various organizations have authorized the company to use. The company distributes its products to department and sporting-goods stores and specialty retailers under the "Nutmeg Mills" label and, through a joint venture it controls, to mass merchants and chain stores under the "Saturday's Hero" label.

JFK INTERNATIONAL AIRPORT, NEW YORK (MAY 21) PR NEWSWIRE - Tower Air, a U.S. international scheduled and charter services operator, will become a full participant in System One, the airline computer reservations system and travel product distribution network on June 1.

Tower Air also has signed an agreement effective June 1 with Amadeus, the multi-carrier owned, European-based computer reservations system.

Until now, Tower Air (airline code "FF") has served its customers through its own international reservations system, although travel agents were able to access schedule information through Gabriel. Becoming a full participant in a global airline ticket distribution and reservations system will provide faster, more convenient booking, pricing and seat availability information for travel agents and passengers. System One, A Texas Air subsidiary, serves about 200 airline participants and almost 8,000 U.S. travel agency subscribers. Amadeus, founded by Lufthansa, Iberia, Air France and SAS, serves about 65 percent of the travel agencies

in its European market with about 19,000 CRS terminals installed.

Tower Air has operated scheduled airline service since Nov. 23, 1983. The company is headquartered at JFK International Airport in New York and provides scheduled Boeing 747 service to Copenhagen, Denmark; Oslo, Norway; Stockholm, Sweden; and Tel Aviv, Israel. The carrier also operates Boeing 747 charter services to France, Italy and Greece.

NEW YORK (MAY 21) PR NEWSWIRE - Buyers and sellers of Barclays Visa Travelers Cheques will be in the running during the next four months for over $200,000 in luxurious prizes, topped off by a two-week trip for two to Europe including passage on the Venice Simplon-Orient-Express from Venice to Paris and a seven-day cruise to Istanbul on the train's sea-going namesake, M.V. Orient-Express.

Aptly titled "Orient-Express Yourself," the promotion is being sponsored by Barclays Visa Travelers Cheques. The promotion is geared to provide both vacationing and business travelers with attractive incentives to use the bank's Visa travelers cheques during the prime summer month travel and vacation season.

In addition to the grand prizes being awarded in a random drawing after the close of the sweepstakes on Aug. 31, 1990, first prizes of a week's stay in Venice and Paris, including an overnight trip on the Venice Simplon-Orient-Express, will be awarded monthly. The more than 1,000 prizes also include Swiss watches, luggage and crystal from the Collection Venice Simplon-Orient-Express.

Although the current promotion effort was kicked off less than two weeks ago, several thousand financial institutions that sell Barclays Visa Travelers Cheques have already joined. Each purchase of a Visa travelers cheque issued by Barclays will constitute one entry in the sweepstakes for both the buyer and the seller.

Barclays has been the world's largest issuer of Visa Travelers Cheques since 1979.

FREMONT, CA (MAY 21) PR NEWSWIRE - Everex Systems Inc. (NASDAQ: EVRX) today announced the Everex STEP 486/33, a high-performance i486-based

microcomputer capable of delivering mainframe-class speed previously not available on a PC platform.

Operating at speeds up to 20 MIPS, the Everex STEP 486/33 runs compute-intensive applications at performance levels once restricted to high-end workstations, super minicomputers and mainframes. In selected benchmark tests, the Everex STEP 486/33 is actually faster than an IBM 3083 mainframe.

Early users of the Everex STEP 486/33 are expected to be individuals running applications such as financial modeling, computer-aided design and process simulation. Small businesses with demanding multiuser requirements are also expected to be among the initial purchasers.

With a fast processing speed and large memory capacity, the Everex STEP 486/33 is also a powerful file or database server. The Everex STEP 486/33 achieves its high level of performance by supplementing the 486's 8KB of internal cache with Everex's own external caching system based on field-proven Advanced Memory Management Architecture (AMMA). With an external cache of 128KB, this dual-level caching system achieves a cache hit rate of up to 99 percent. The Everex STEP 486/33 also fully supports the 486's burst mode to further increase the system's performance.

As in STEP 386 systems, the Everex STEP 486/33 includes Programmable Configuration Select (PCS), eliminating the need for users to change jumpers and dip switches when modifying standard configurations. The system also supports up to 64MB of 32-bit memory and includes a socket for the Weitek 4167 coprocessor to maximize floating point performance.

The Everex STEP 486/33 will be shown June 3 - June 6 at Spring Comdex in Atlanta. Available for $10,499, the Everex STEP 486/33 will begin shipping in July. A 25 MHz version of the Everex STEP 486 will also be available in late June for $8,999.

In addition to the Everex STEP 486/33, Everex Systems also manufactures a full line of award winning, high-performance personal computers. For further information regarding Everex STEP products, please contact a sales representative at 415-683-2246.

Everex Systems Inc., headquartered in Fremont, is a leading manufacturer of personal computers and peripherals. Founded in 1983, Everex Systems designs, manufactures, distributes and supports a complete family of industry-standard personal computers and peripherals through a worldwide dealer and VAR network. Everex stock is traded on the National Market System under the NASDAQ symbol EVRX.

STATE COLLEGE, PA (MAY 21) PR NEWSWIRE - C-Cor Electronics Inc. (NASDAQ-NMS: CCBL) has announced an agreement with the Scripps Howard Cable Co. of Cincinnati, Ohio, to provide distribution equipment and system design services for a 2,500-mile system rebuild in Knoxville, Tenn.

According to the $5 million agreement, C-COR will supply its 550 MHz Feedforward trunk amplifiers with passive failsafe housing and PhD bridger as well as power doubling line extenders to Scripps Howard for the rebuild/upgrade.

Scripps Howard's objectives for this project include greatly increased channel capacity and improved system performance. The rebuild will cover the City of Knoxville and portions of Knox County. Work will take place over the next three years with delivery of equipment for the first phase of the project scheduled for January of '91.

"This innovative rebuild illustrates Scripps Howard's commitment to their subscribers," stated Richard E. Perry, chairman, president and chief executive officer of C-COR Electronics Inc. "We are very pleased to have been selected as the supplier for this project, and look forward to providing the quality of product and service that Scripps Howard expects."

C-COR Electronics Inc. has been providing equipment for Scripps Howard's Leesburg, Fla., system, Lake County Cable, for the past five years, and for Scripps Howard in Waynesboro and Glennville, Ga., for the past three years.

C-COR's system design team and engineering support staff will be working closely with Doug McMillan, plant manager for the Knoxville system, and Dave Conkle, corporate director of rebuilds for Scripps Howard, to lay out the rebuild and to coordinate technical training of Scripps Howard employees.

C-COR, founded over 35 years ago, designs and manufactures high quality electronic equipment used in cable television and data communication systems. C-COR's headquarters is in State College, Pa., with production facilities in Altoona and State College, Pa. C-COR Electronics Canada Inc., a subsidiary of C-COR Electronics Inc. is located in Ontario, Canada and C-COR Europe B.V., C-COR's European marketing arm, is located in The Netherlands. C-COR's common stock is listed in the NASDAQ National Market System under the symbol CCBL.

WASHINGTON (MAY 21) PR NEWSWIRE - The World Environment Center (WEC) presented its 1990 Gold Medal for International Corporate Environmental Achievement to the International Business Machines Corporation. The award was presented at a ceremony held last Friday in the historic Departmental Auditorium, Hall of the Presidents.

Ambassador Vitthya Vejjajiva of Thailand presented WEC's sixth annual award to Jack D. Kuehler, president of IBM, before a capacity audience of more than 500 representatives of industry, government, the diplomatic corps, academia, and not-for-profit organizations.

External to company operations, IBM funds and conducts computer-based projects through its scientific centers worldwide. Global warming concerns have led IBM to declare its intention to eliminate all ozone-depleting chemicals from IBM processes and products by year-end 1993. sustainable development leadership is exemplified by IBM participation in UNEP's Global Research Information Database and Global Environmental Monitoring Systems.

IBM is a world leader in the area of information processing. It operates in 130 countries and employs 387,000 people worldwide.

The World Environment Center, headquartered in New York City, is a not-for-profit, non-advocacy organization whose mission is to contribute to sustainable development by strengthening the management of industry-related environmental, health and safety practices worldwide.

To achieve this mission, the center serves as a bridge for the exchange of expertise and information on environmental issues between industry, governments, non-governmental organizations and international organizations. It also enhances the institutional capacity of developing countries by providing them with technical assistance and volunteer experts from industry, governmental and non-governmental organizations, international agencies and the ranks of private citizenry.

STATE COLLEGE, PA (MAY 21) PR NEWSWIRE - C-COR Electronics Inc. (NASDAQ: CCBL) has announced an agreement with American Lightwave Systems to work together on the development and marketing of AM fiber optic equipment for the cable television market.

Designed to C-COR's specifications, the AM product family will include a

strand mount receiver in a C-COR trunk amplifier housing. These new products will be capable of delivering a 55 carrier-to-noise ratio with a 65 composite triple beat and composite second order performance.

Commenting on the agreement, C-COR Chairman, President and CEO Richard E. Perry stated, "I am very pleased with the new agreement. AM technology has an important role in building and upgrading CATV systems today. We believe that digital and AM technology work well together, and our relationships with COMLUX and ALS make C-COR the leader in fiber optic transmission equipment for the CATV industry."

The proposed product will include some unique packaging concepts that will provide superior flexibility and reliability. According to C-COR's vice president of sales and marketing, Jim Wonn, "C-COR's AM product has been specifically designed for ease of installation and operation by today's CATV technician."

Delivery of the new AM fiber product is scheduled to begin early this summer.

C-COR, founded over 35 years ago, designs and manufactures high quality electronic equipment used in cable television and data communication systems. C-COR's headquarters is in State College, Pa., with production facilities in Altoona and State College, Pa. AMSTERDAM, THE NETHERLANDS (MAY 21) PR NEWSWIRE - Wolters Kluwer, one of Holland's largest publishing companies, today announced that it has signed a definitive agreement to acquire Philadelphia-based J.B. Lippincott, one of the largest U.S. medical publishers, from Harper Collins, the book publishing affiliate of the News Corporation, Ltd. (ADS - NYSE: NWS). Lippincott has annual sales of approximately $100 million and 400 employees.

According to M. Ververs, chairman of Wolters Kluwer, "This acquisition makes Wolters Kluwer one of the largest medical publishers in the United States, with total sales volume of approximately $150 million in this business segment." Ververs continued, "The acquisition fits in with our strategy to expand in the United States and EC countries in our core activities of information, education and scientific publishing and

professional training. Furthermore, the acquisition also enables us to achieve one of our major objectives, which was to increase the geographical spread of our operations to over 50 percent of activities outside the Netherlands."

Wolters Kluwer is already active in the U.S. medical market through its Raven Press and Aspen Publishers subsidiaries. The transaction will be financed with cash surplus and existing credit facilities.

Lippincott, which was founded in 1792, is a publisher of information for the medical profession: physicians, nurses, pharmacists, other scientists and medical students. In addition to book publishing (e.g. the widely used Lippincott Manual of Nursing Practice), Lippincott also publishes journals and loose-leaf medical information. Also part of Lippincott are Facts and Comparisons (St. Louis), which is a market leader in information on drugs for qualified pharmacists, and Gower (New York/London), publisher of medical atlases.

Wolters Kluwer is a multinational publisher with operations spanning Europe and North America. Sales for 1989 were $1 billion, of which 10 percent was derived from U.S. operations. The Lippincott acquisition will raise U.S. generated sales to approximately 17 percent on an annual basis. Wolters Kluwer shares are available in the United States through a pink-sheet ADR program sponsored by the Morgan Guaranty Trust Company.

DANIA, FL (MAY 21) PR NEWSWIRE - Carnival Air Lines announced that it has leased two 737s, enlarging its fleet to five aircraft. The two 737s, each capable of holding 125 passengers, will be utilized for daily scheduled airline service and charter service.

Carnival Air Lines' summer schedule includes non-stop jet service from New Orleans, Nashville, Cincinnati, Cleveland and Baltimore, to Carnival's Crystal Palace Resort & Casino in Nassau, The Bahamas.

In addition to its scheduled service to Nassau, Carnival Air Lines maintains a busy charter service. "The airline was originally started to provide this service to Nassau," said Reuven Wertheim, chairman of the board of Carnival Air Lines. "But being in the airline business, we decided to take advantage of our capabilities and offer charter service."

During the remainder of 1990, two of Carnival Air Lines' jets will be utilized for the scheduled service while the three other jets will fly charters. In April, Carnival Air Lines earned over one million dollars in revenue from its charter service alone.

"Our charter contracts have included runs from Puerto Rico to Orlando, from Jamaica and Fort Lauderdale and from various cities in the Northeast to Freeport," Wertheim continued. "The Freeport route is chartered to the Lucayan Beach Resort & Casino, which is managed by the Carnicon Management Associates, a joint venture of Carnival Cruise Lines and The Continental Companies."

In addition to these charter routes, Carnival Air Lines has recently signed a six-month contract with Egypt Air to provide a 727 to that airline.

Carnival Air Lines currently offers a $59 round-trip "Play Day" package to Carnival's Crystal Palace Resort & Casino, the newest and most complete mega-resort on "The Bahamian Riviera." The special round-trip package is available to one-day vacationers departing from Fort Lauderdale or West Palm Beach airports.

For more information on Carnival Air Lines' charter service, contact Max Buck, director of marketing, at 800-222-7466.

MANHASSET, NY (MAY 21) PR NEWSWIRE - Oncogene Science, Inc. (NASDAQ: ONCS), today announced revenues of $1,325,164 for the second quarter ending March 31, 1990, an increase of 34 percent from the $992,196 reported for the second quarter last year. The company had a net loss of $534,288, or $(.06) per share, compared to a net loss of $832,712, or $(.09) per share, for the same period last year. For the six months ended March 31, 1990, the company had a net loss of $1,135,936 on operating revenues of $2,519,057 compared to a net loss of $1,085,286 on operating revenues of $2,273,674 for the same period a year ago.

Commenting on the second quarter results, Gary E. Frashier, said, "The increase in revenue is primarily a result of increased sales of our research and diagnostic products. These products sales were approximately $406,600, for the quarter representing an increase of 197 percent over the previous year. The net loss for the quarter is a result of our continuing investment in our GEMS(SM) therapeutic drug discovery technology and the expansion of internal efforts to develop and market products for research and diagnostic applications."

Oncogene Science, Inc. is committed to the application of oncogene technology to the development of products for the detection and treatment of human disease.

CINCINNATI, (MAY 21) PR NEWSWIRE - Great American Communications Company (NASDAQ: GACC) announced today that the public offering of its remaining 5.2 million shares of Chiquita Brands International, Inc. (NYSE: CQB) common stock has been completed. As previously announced, GACC sold 2 million additional shares to Chiquita in early April. From these two transactions, GACC will have received just over $135 million cash and will recognize a pre-tax gain of approximately $45 million in the second quarter of 1990. Most of the proceeds of these sales will be used to pay bank debt, with the remainder being added to working capital.

GACC and its subsidiaries own and operate five network affiliated television stations, and 12 FM and six AM radio stations in the top 50 markets. Through Hanna-Barbera, it is involved in animated film and video production, distribution and marketing worldwide. GACC owns approximately 46 percent (on a fully diluted basis) of Spelling Entertainmment Inc.

American Financial Corporation owns 65 percent of GACC's 35.2 million outstanding shares. GACC's common stock trades in the over-the- counter market under the symbol GACC.

WALTHAM, MA (MAY 21) PR NEWSWIRE - Thermo Instrument Systems Inc. (AMEX: THI) announced today that a nuclear instruments subsidiary has received two orders totaling $1.9 million for personnel radioactive-contamination monitors to be used at U.S. Navy facilities.

The company's National Nuclear Corporation subsidiary in Sunnyvale, Calif. received a $1.4 million order for "Friskall" whole-body contamination monitors, which will be used in the Navy's submarine program at multiple locations. Additional personnel contamination monitors, valued at more than $500,000, were ordered from National Nuclear for the Newport News Naval shipyard in Virginia.

The company has begun shipping the monitors and expects to fill both orders this year.

Thermo Instrument Systems develops, manufactures and markets analytical instruments used to detect and monitor air pollution, radioactivity, complex chemical compounds, and toxic metals and other elements in a broad range of liquids and solids. The company also provides environmental science and engineering services, laboratory-based testing, and nuclear health physics services. Thermo Instrument Systems is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

RIVIERA BEACH, FL (MAY 21) PRNEWSWIRE - Consulier Engineering, Inc. (NASDAQ: CSLR) (formerly Consulier Industries, Inc.) of Riviera Beach, Fla., announced that the results of operations were better than anticipated for April, 1990, the first month after its major restructuring. Effective April 1, 1990, the company sold its automobile operations, the major source of previous losses, and made a major investment in a West Palm Beach, Fla. bond broker/dealer.

The company's unaudited financial statements for the month ended April 30, 1990 showed net income of $82,820 after taxes. This profit compares with a loss of $230,469 in April, 1989, when the company was in the midst of its Consulier GTP research and development program.

While company management is optimistic about its prospects for the balance of 1990, there can be no guarantees that it will perform as well in the ensuing months as it did in April.

Consulier Engineering, Inc.'s common stock and warrants trade on the over-the-counter market under the NASDAQ symbols CSLR and CSLRW, respectively.

#90141p0326 05/21/1990 ~PR Newswire

GODDARD SPACE FLIGHT CENTER, MD (MAY 21) PR NEWSWIRE - With eight tiny silicon chips from Texas Instruments Incorporated (NYSE: TXN) serving as the "film" in the Hubble Space Telescope's camera, the world got a closer look at "Star Field NGC 3532."

The star field was the first light beamed to NASA engineers at the Goddard Space Flight Center as they began receiving test images from the telescope now orbiting the earth at 380 miles out. NGC 3532 is a 3-billion-year-old star cluster located 1,500 light years from Earth in the constellation Carina.

Eight CCD (charge coupled device) image sensors from TI are functioning as the electronic equivalent of extremely sensitive photographic plates in the telescope's Wide Field/Planetary Camera to record incoming light for transmission to earth.

The CCD image sensors were developed by TI scientists under contract to the Jet Propulsion Laboratory at California Institute of Technology in Pasadena, Calif., where the camera was manufactured.

Similar CCD chips from TI were used on the European Space Agency's Giotto mission to photograph Halley's Comet and others are presently on the JPL's Galileo mission to Jupiter. CCDs developed by TI since the 1970s have been used extensively by the military, medical and scientific community. Industrial vision systems manufactured by TI employ CCDs in advanced factory automation processes.

The Hubble Space Telescope's Wide Field/Planetary Camera and its eight TI CCDs will be the busiest and most versatile of the five scientific instruments in the telescope during its 15-year search of the heavens.

The camera will produce images and spectrographic, photometric, and polarimetric measurements, and obtain pictures of the universe on a wider and grander scale than any other instrument to date, according to NASA.

Each of the CCD semiconductor chips has an array of 800x800 individual, 15x15 micron, solid-state silicon detectors. Each element of the CCD chip converts incoming light into single electrons, then the total accumulated charge in each of the individual CCD elements is amplified electronically and telemetered to the astronomers on the ground.

The four CCD images from a Wide Field/Planetary Camera exposure will be reassembled in ground computers and combined to form a single picture of 1600x1600 (2.56 million) image elements or "pixels."

The powerful CCDs cover a wide spectral range and the signal, especially for faint objects, is uncluttered by background noise from heat and electronic interference. Each chip is coated with a phosphor that converts ultraviolet photons to visible photons. The great number of signals -- 640,000 from each CCD -- add to a single image when processed.

#90141p0333 05/21/1990 ~PR Newswire
WASHINGTON (MAY 21) PR NEWSWIRE - MCI Communications Corporation (NASDAQ-NMS: MCIC) today announced the signing of a new three-year contract with the American Red Cross to provide an emergency response

telecommunications network for its domestic operations.

Under the new agreement, MCI will supply the Red Cross with MCI's virtual private network (Vnet), advanced 800 services and Prism I. MCI will also provide the Red Cross with an emergency network routing capability in the event of a disaster.

This contract is the first between MCI and the American Red Cross' national headquarters. MCI currently provides long-distance service to 149 of the more than 2,700 local Red Cross' chapters.

"We are pleased that, through MCI, the American Red Cross will have an emergency response long-distance telephone network that will supplement our regular communications," said Stephen H. Richards, senior vice president for the American Red Cross.

During the October 1989 earthquake in San Francisco, MCI provided emergency access to the American Red Cross through the use of the MCI Card. As a result, the Red Cross was able to connect its Bay Area operations with the Disaster Operations Center in Washington, D.C., the source for coordinating relief efforts.

"At the time of the San Francisco earthquake, MCI's network and customer service capabilities were made available to the Red Cross. Luckily, we were able to assist them in setting up communications which provided a crucial link between the Red Cross and their staff and volunteers. Our timely response and our flexibility led, in part, to this new, three-year relationship with the American Red Cross," said Bert C. Roberts Jr., MCI president and chief operating officer.

"The American Red Cross is unique because it needs to 'set up shop' in the middle of a crisis," Roberts added. "In answering this most important call, MCI was able to help the Red Cross make a difference."

The new agreement between MCI and the Red Cross includes Vnet, MCI's virtual prviate network service and inward 800 services for the following Red Cross locations: National Headquarters in Washington, D.C.; Alexandria, Va.; Midwestern Operations Headquarters in St. Louis, Mo.; and Western Headquarters in Burlingame, Calif.

The American Red Cross is the nation's foremost volunteer human services organization with more than one million volunteers and approximately 25,000 employees. For more than 109 years, the Red Cross has helped to prevent, prepare for and cope with national emergencies. The Red Cross, which has more than 2,700 chapters throughout the United States, is responsible for collecting, testing and distributing more than 6 million units of blood, half of the nation's blood supply.

MCI is the world's second largest long-distance provider, supplying a full range of voice and data telecommunications services to business and residential customers, as well as a growing number of government agencies.

MCI's long-distance services enable customers to call throughout the United States and dial direct to 165 countries representing 99 percent of overseas calling from the United States.

#90141p0336 05/21/1990 ~PR Newswire

DETROIT (MAY 21) PR NEWSWIRE - General Motors (NYSE: GM) today announced it will build a satellite communications network to help the 9,700 General Motors car and truck dealers in the U.S. increase their operating efficiency and better serve GM customers.

GM Executive Vice President Lloyd E. Reuss said the system -- named the "GM Pulsat Network" -- will place a satellite dish on each GM dealership for rapid information exchange with GM divisions.

"We are creating the world's largest private satellite network to strengthen the sales and service effectiveness of GM dealers," he said. "GM will fund the installation of the network."

"This is a dramatic stride toward the 21st Century for GM, our dealers and our customers," Reuss continued. "It will employ the reliability of the latest communications technology to help dealers provide a faster, more accurate response to customer sales and service needs. It will also be a platform for expanding future electronic communications with our dealers."

"The network will provide two-way data transmission between GM and dealers plus video transmission from GM to all its dealers on many subjects from product information to sales and service skills training. Test installations will begin this summer and the target for completing the system is late 1992."

Reuss said the GM Pulsat Network has been designed with extensive input from GM dealers who have worked for more than a year with systems managers from GM and its marketing divisions. He said GM's Saturn Corporation and its dealers -- who are currently building dealerships -- will be a part of the new network.

"The network combines the technical expertise of two GM subsidiaries -- EDS (Electronic Data Systems) and GM Hughes Electronics -- into an advanced network which will set a new standard for the auto industry," he said. "It underscores the value to our dealers and customers of having

EDS and Hughes as active members of the GM team."

Reuss said that GM decided to go to a dealer satellite network because the existing land-based dealer communications system, which uses public telephone lines and dates back to the 1970s, will not fully meet future needs of GM dealers. GM projects that data exchange between GM and its dealers will increase substantially over the next decade, he added.

He said GM will pay for the installation of the satellite network and that dealers' overall communications rates will be consistent with their current land-based system.

"With the GM Pulsat Network, we'll be able to exchange information in a few seconds on vehicle ordering, warranty and service data, and dozens of other subjects which often require an overnight message on the current system," he said.

Another reason for the new system is that the existing network cannot accommodate new data-intensive applications GM plans to implement, Reuss said. These could include electronic shop manuals, electronic vehicle invoicing and the next generation of vehicle diagnostics.

Hughes Network Systems (HNS), a unit of Hughes Aircraft, will provide the satellite technology needed in the new network. That includes installation of an HNS "Personal Earth Station" at each GM dealership -- the six-foot-diameter satellite dish plus the required electronic support equipment.

CARTHAGE, MO (MAY 21) PR NEWSWIRE - Leggett & Platt Inc. (NYSE: LEG) announced today that the expiration date of its cash tender offer to purchase all of the common stock of Dresher Inc. (NYSE: DSR) has been extended to 5 p.m. EDT, Monday, June 4, 1990. The tender offer is being extended because less than 90 percent of all outstanding Dresher common stock had been delivered to the Depositary for the offer as of the previous expiration date, 5 p.m., May 18.

On June 4, no condition to the tender offer will limit Leggett & Platt's obligation to purchase shares tendered pursuant to the offer except the condition that on June 4 there are validly tendered and not withdrawn more than 50 percent of Dresher's outstanding common stock. Leggett & Platt has declared that all remaining conditions to its obligation to purchase shares tendered have been satisfied or waived. The tender offer will not

be extended beyond June 4.

As of 5 p.m. EDT on Friday, May 18, 3,898,547 shares (or approximately 86 percent) of Dresher's common stock had been delivered to the Depositary. Guaranteed delivery forms concerning 199,698 shares (or approximately 4 percent) of Dresher's common stock to be delivered to the Depositary had been received by the Depositary.

Leggett & Platt and Dresher are both New York Stock Exchange listed companies.

#90141p0340 05/21/1990 ~PR Newswire

PONTIAC, MI (MAY 21) PR NEWSWIRE - It was business as usual today for sponsoring dealers who sold an estimated $12.5 million worth of new cars and trucks during the 11th annual GM Dealers Tent Sale at the Silverdome here.

Despite bone-chilling temperatures, daily rain and gale-force winds, a total of 831 vehicles, including 529 cars and 302 trucks, were sold during the four-day sale that ended Saturday. As a percentage of sales, according to sale Chairman Al Dittrich, trucks accounted for 36 percent of the total, the highest ever for the sale, which is considered the world's largest public sale of new GM cars and trucks.

Dittrich, of Al Dittrich Oldsmobile-GMC Truck in suburban Waterford, Mich. said he and his fellow dealers consider the sale a success despite the weather and will start laying plans for 1991 in the next few days. "While at least one rainy day is practically a tradition at these sales, odds are in our favor that we won't encounter four consecutive days of bad weather again in the next 10 or 11 years," he said. "That's why we'll start planning for next year at a dealer meeting later this week."

The 831 sales total this year was off 22 percent from a year ago, when 1,066 units were sold, including 733 cars and 333 trucks, and ranks the sale in units sold as the seventh best since the first sale in 1980.

Since the sale's inception, the 12 sponsoring GM dealers have sold a total of 11,534 vehicles, including 8,508 cars and 2,846 trucks.

#90141p0350 05/21/1990 ~PR Newswire

CAMBRIDGE, MASS. (MAY 21) PR NEWSWIRE - Genetics Institute, Inc. (NASDAQ: GENI) and Yamanouchi Pharmaceutical Co., Ltd. of Tokyo, Japan announced today that they have agreed to enter into a joint venture for the commercialization and marketing in Japan of Genetics Institute's bone growth factors (BMPs) and potential other future products. They will also form a partnership to fund the development and commercialization of BMPs worldwide.

BMPs, proteins that stimulate the growth of cartilage and bone, are expected to be useful in the treatment of a variety of orthopedic, dental and bone metabolic indications. Industry analysts have projected the market for BMP products to be in excess of $2 billion worldwide.

Both parties will participate on a 50/50 basis in the profits obtained from the sale of BMPs and the sale of potential future Genetics Institute products in Japan. In addition, Genetics Institute will:

-- Establish a direct pharmaceutical operating presence in Japan;
-- Receive from the partnership substantial financial support for the development of its BMP products;
-- Retain exclusive worldwide manufacturing rights for its BMP products;
-- Retain exclusive North American marketing rights for its BMP

products. "This relationship provides a tremendous opportunity for us to accelerate our development of bone growth factor products and to participate significantly in profits from potential future sales of such products on a worldwide basis," said Gabriel Schmergel, president and chief executive officer of Genetics Institute.

"The structure of this business arrangement is unique in the biotechnology industry and plays to the strengths of both Genetics Institute and Yamanouchi," Schmergel continued. "We stand to benefit by gaining direct access to the Japanese pharmaceutical market while retaining all North American product rights."

Shigeo Morioka, chairman of the board, president and chief executive officer of Yamanouchi commented, "Yamanouchi will benefit from participation in the commercialization of one of the pharmaceutical industry's next major growth fields as well as potential future products coming out of Genetics Institute's research pipeline." He continued, "We believe that Genetics Institute is the industry leader in bone growth factor discovery research and we expect that our partnership and resulting Japanese pharmaceutical business will add value to both our companies."

Under the agreement, the companies will enter into two separate business arrangements: a Japan joint venture and a U.S. development partnership.

JAPAN JOINT VENTURE

The Japan joint venture (JJV) between Genetics Institute and Yamanouchi will be established as an equally owned corporation. The JJV will be responsible for clinical development and marketing of Genetics Institute's BMP products in Japan. It will also have a right of first refusal to develop and commercialize in Japan certain other future products developed by Genetics Institute.

While the companies plan to build an independent product development organization, the JJV may utilize Yamanouchi's clinical and regulatory capabilities in its early years. Initially, Yamanouchi will also undertake sales and marketing activities. Over time, the JJV may field an independent sales force for products it commercializes.

"This joint venture with Yamanouchi will greatly enhance Genetics Institute's ability to build an operational presence in Japan. We see entry into the $37 billion Japanese pharmaceutical market as a key objective in our global business strategy and believe we are the first U.S. biotechnology company to establish a vehicle such as this for direct market presence in Japan," said Tuan Ha-Ngoc, executive vice president of Genetics Institute. He continued, "This venture will also allow us to develop a long-term relationship with one of Japan's most successful, forward-thinking pharmaceutical companies."

DEVELOPMENT PARTNERSHIP

Genetics Institute and Yamanouchi are also forming a U.S. partnership for funding the worldwide development of pharmaceutical compounds derived from genetically engineered BMPs.

Genetics Institute and Yamanouchi will each own 50 percent of the partnership. Genetics Institute will grant the partnership a worldwide exclusive license to commercialize products developed in the course of its BMP discovery research program. Through this vehicle, Genetics Institute will obtain significant financial support for its bone research and development program.

The partnership will exclusively sublicense Genetics Institute to market BMP products in North America. Marketing rights for BMP products in Japan will be licensed to the JJV to be formed between Genetics Institute and Yamanouchi. BMP product marketing rights for the rest of the world will be retained by the partnership and may be sublicensed to third parties in the future.

The partnership will reimburse Genetics Institute for substantially all of its future development costs for BMP products and will also make specified payments to Genetics Institute. Research and development activities associated with the BMP program will continue to be performed by Genetics Institute. BONE MORPHOGENETIC PROTEINS

The term BMP, or bone morphogenetic protein, refers to a family of novel proteins that are capable of inducing new cartilage and bone formation. This complex process is believed to involve the recruitment of bone-forming cells, the initial production of cartilage, and further development and mineralization of this tissue to form bone. BMP products may be useful in fracture healing as a substitute for existing bone graft materials, and in treating the bone loss associated with periodontal disease and certain cancers.

Genetics Institute, a recognized leader in the field of bone growth factor research, has published several papers on the purification and cloning of BMPs in scientific journals, and has an issued U.S. patent and several other pending patents on BMPs. Several of the company's BMP products are currently in preclinical testing in a number of model systems. THE COMPANIES

Genetics Institute is a leading biotechnology firm engaged in the discovery and development of human pharmaceuticals through recombinant DNA technology. The company has a diversified portfolio of licensed and proprietary pharmaceutical products.

Yamanouchi Pharmaceutical Co. Ltd. is a leading Japanese pharmaceutical company, ranking second in Japan in terms of net income, and fifth in terms of ethical pharmaceutical sales in fiscal 1989. Yamanouchi has an

experienced product development organization and one of Japan's strongest pharmaceutical sales forces.

#90141p0353 05/21/1990 ~PR Newswire

LIMERICK, PA (MAY 21) PR NEWSWIRE - Sermatech Technical Services received a purchase order from Florida Power & Light Company, for Sermatech coating services covering 11 General Electric Frame 7 gas turbine engines.

The three-year contract, valued in excess of $1 million, includes coating of compressor rotors and stators, turbine rotors, and/or turbine disks, and coating of first stage turbine blades. Most of the work will be performed on site, using one of Sermatech's unique mobile field service center coating units.

All compressor section components will be coated with Sermetel(R) corrosion-resistant, ultra smooth aluminum-ceramic coatings. The turbine blades will be coated with Sermaloy(R) J coating to prevent hot corrosion and hot oxidation.

Florida Power and Light's decision to coat its entire inventory of Frame 7 turbines was based on the restoration of lost power, corrosion protection of compressor components, and corrosion/erosion protection of turbine disk blade root areas. After coating the compressor section airfoils on a Florida Power & Light unit in the autumn of 1989, Florida Power & Light was able to document an improvement in lost performance of approximately three megawatts. No other work was done on the unit which would have affected performance.

Sermatech Technical Services, a division of Sermatech International, is a world leader in the application of coatings to gas turbine engines. The division operates 10 coating facilities in Europe and North America, as well as several mobile field service center coating units.

Sermatech International is a subsidiary of Teleflex Incorporated (AMEX: TFX).

WEST ORANGE, NJ (MAY 21) PR NEWSWIRE - Micro Healthsystems, Inc. (NASDAQ: MCHS) today announced that it signed a marketing agreement with IBM to act as an application specialist for the recently announced IBM 7690 Clinical Workstation(TM), according to James A. Pesce, Micro Healthsystems' president.

Micro Healthsystems is the first company in the country to supply a fully functional software package for this IBM Clinical Workstation by transporting its MedTake(TM) Bedside Nursing Patient Care System to this hardware.

This workstation has been designed especially for installation in the patient rooms in hospitals for the specific purpose of charting nurse activities, it was explained at the American Organization of Nurse Executives Annual Convention in Baltimore.

This offering of the MedTake software on the IBM Clinical Workstation is intended to fulfill the desire of hospitals that want automation at the bedside and that wish to maintain primarily IBM "shops," according to Pesce.

Micro Healthsystems already markets its MedTake Bedside Nursing System on its proprietary computer hardware, and with more that 4,000 beds installed or contracted for, is clearly established as the dominant factor in this new technology.

Bedside charting and patient care systems was judged to be the new growth areas for the 1990s in hospital automation by 87 percent of the managers of the Managers of Information Systems at the recent HIMSS convention in New Orleans.

OKLAHOMA CITY (MAY 21) PR NEWSWIRE - American Drug Screens, Inc. (NASDAQ: ADSI), the only publicly owned company devoted exclusively to drug testing announced today that it has entered into a letter of intent to acquire Massey Analytical Laboratories, Inc.

Based in Bridgeport, Conn., Massey Analytical is the only N.I.D.A. (National Institute on Drug Abuse) certified drug testing laboratory in New England. For the last twelve months, Massey had sales of approximately $1 million.

"The acquisition of Massey Analytical will provide American Drug Screens expansion into the heavily populated Northeast region of the United States a previously untouched market for the company. Once completed, the company will be operating laboratories in Los Angeles, New Orleans and Connecticut, with all three having N.I.D.A. certification required to service the drug testing needs of government agencies as well as government regulated industries," stated John Simonelli, American Drug Screens' chairman and chief executive officer.

Simonelli noted that in a recent study conducted by The Conference Board, it was found that 55 percent of 681 human resource directors surveyed have implemented or are about to implement a drug testing program. This is up from only 3 percent in 1986. "This indicates the growing demand for a national drug testing organization such as American Drug Screens," Simonelli said.

Daniel Massey, president of Massey Analytical Laboratories stated, "Drug testing is fast becoming an integral part of corporate America and by joining American Drug Screens we can participate in the rapid growth of a national organization. With the addition of Massey Analytical, American Drug Screens will be one of only three companies in the industry with more than two N.I.D.A. certified laboratories."

American Drug Screens, Inc. also announced today that it has entered into a preliminary underwriting agreement with Malone & Associates, Inc., in Denver, to raise $2.5 million in additional capital through a public offering of American Drug Screens common stock. The company intends to

use the net proceeds of this offering to continue with its aggressive acquisition program of purchasing strategically located drug testing laboratories throughout the United States.

TULSA, OKLA. (MAY 21) PR NEWSWIRE - Vantage Point Energy, Inc. (NASDAQ: VPEI) (formerly ZG Energy Corporation) today reported net income of $115,770 ($.02 per share) for the first quarter of 1990 compared with a net loss of $313,929 ($.07 per share) for the same quarter a year ago.

Total revenues for the first quarter were $1,228,817 compared with $1,082,190 for the same period last year.

S. Lee Crawley, president, attributed the positive results of the quarter primarily to improved profitability of producing properties. The company now has three consecutive profitable quarters.

Subsequent to the end of the quarter, the company completed the acquisition of the U.S. oil and gas properties of Sceptre Resources Ltd., Calgary, and changed its corporate name to Vantage Point Energy, Inc.

Vantage Point's common stock began trading on NASDAQ on May 3.

WASHINGTON (MAY 21) PR NEWSWIRE - NeoRx Corporation (NASDAQ: NERX) announced today results of its Phase III clinical trials for small cell lung cancer (SCLC) at the American Society of Clinical Oncology (ASCO) annual convention in Washington. The study was selected for special press coverage by the ASCO review committee.

This is the first comprehensive study of a monoclonal antibody in small cell lung cancer and the first to demonstrate the use of a monoclonal antibody as the primary tool for staging patients with a major malignancy. It is also the first antibody to show a low enough allergic response to permit routine follow-up imaging in the same patients.

NeoRx's cancer detection product, OncoTrac(R) imaging kit, contains a monoclonal antibody fragment that is labeled with the radionuclide technetium-99m. A product license application (PLA) was filed with the FDA in December 1989.

OncoTrac imaging kits are used to evaluate the extent (or stage) of disease in patients with SCLC. "Approximately 88 percent of the patients were accurately staged with this one test alone. No other single test was as sensitive or as accurate," said Paul G. Abrams, M.D., president and chief executive officer of NeoRx. "In fact, the entire standard battery of tests -- CT-head, CT-abdomen, bone scan, CT-chest and physical examination -- was required to equal the sensitivity and accuracy of OncoTrac imaging kits," said Dr. Abrams. An accurate, single test can reduce the costs and inconvenience to patients who otherwise might undergo multiple tests. OncoTrac imaging kits are safe, only rarely provoking a mild allergic reaction, even in over 50 patients who have received a second dose. The HAMA response was only 6 percent.

Knowing the extent (stage) of the disease helps determine the choice of treatment and a patient's chance of long-term survival. There were approximately 40,000 cases of SCLC diagnosed last year in the United States.

NeoRx Corporation, incorporated in May 1984, is developing monoclonal antibody-based pharmaceutical products for in vivo detection and treatment of certain types of cancer. The company has five cancer clinical trials in progress and has filed for marketing approval with the FDA for two OncoTrac imaging products to detect metastatic melanoma and small cell lung cancer.

NEW ORLEANS (MAY 21) PR NEWSWIRE - AT&T (NYSE: T) today reduced charges for its Enhanced Fax service, and announced that the service will be available for the first time to businesses within Canada.

The price decrease has several elements:

-- Lower per page charges, by up to 33 percent, for broadcasting a fax message to many recipients;

-- A 50 percent increase in the amount of information that can be sent within the AT&T definition of a standard fax page.

-- A 20 percent discount on prices for faxes sent to the United Kingdom and to Japan.

-- A quantity discount, based on the total dollars of fax service per month, that can be up to 10 percent. This discount is in addition to the lower broadcast per page charges.

AT&T announced the changes here at the annual meeting of the International Communications Association.

"The new price cuts are based on what we learned when we looked at some typical customer patterns of sending facsimile messages," said Richard Famulare, AT&T product manager. "By choosing AT&T -- a single source, with single billing and end-to-end service -- businesses can obtain competitive fax rates and improve their office efficiency," he said.

Businesses in Canada will soon be able to subscribe to Enhanced Fax service by accessing a Global Messaging node in the United States via an International 800 number. A node will be deployed within Canada later this year.

Global Messaging nodes, which include AT&T data switches and AT&T computers, process and direct the electronic messages.

AT&T Enhanced Fax is also available via Global Messaging nodes within the United Kingdom from AT&T ISTEL, and within Japan from AT&T Jens. AT&T will establish additional nodes in other countries later this year.

One of the key features of AT&T Enhanced Fax is an individual mailbox for each subscriber, through which fax messages are sent, stored and forwarded. This allows more secure exchange of confidential material.

NEW YORK (MAY 21) PR NEWSWIRE - Castle Harlan Inc., a New York merchant bank, announced today that Long John Silver's Holdings, Inc., in which Castle Harlan has the controlling interest, had completed the merger of its wholly owned subsidiary, Pisces, Inc., into Jerrico, Inc., the operator of the Long John Silver's Seafood Shoppes restaurant chain.

In a tender offer completed last September, Pisces acquired 98.5 percent of the outstanding shares of Jerrico.

Castle Harlan said that since the completion of the tender offer, Jerrico has experienced a marked improvement in operating results. Jerrico's cash flow from operations for the three months ended March 28, 1990, increased by 19 percent over the comparable period of 1989.

Castle Harlan, through its limited partnership, Legend Capital Group, L.P. has the controlling interest in Jerrico. Other companies it has acquired and controls include Ethan Allen, the furniture company, Delaware Management Company, a Philadelphia investment adviser with $23 billion under management, Morton's of Chicago, a national chain of steakhouses, and Atlanta-based Peasant Restaurants.

Long John Silver's Seafood Shoppes make up the largest chain of quick-service seafood restaurants in the country. Jerrico owns approximately 1,000 of the 1,500 Long John Silver's and franchises the other 500.

The chain operates in 34 states, Canada and Singapore.

#90141p0379 05/21/1990 ~PR Newswire

BEDMINSTER, NJ (MAY 21) PR NEWSWIRE - Beginning this month (May 1990) Bell Atlantic Mobile Systems customers who travel up and down the busy northeast corridor from Washington to central New Jersey will find it quicker and easier to stay in touch thanks to the introduction of a new free feature called Follow Me Roaming(SM).

When activated by Bell Atlantic customers, Follow Me Roaming automatically forwards all incoming calls to their cellular telephones when they are

traveling, or "roaming," in other cellular areas.

Follow Me Roaming allows callers to dial the standard seven- or ten-digit phone number to reach a cellular user traveling in any participating cellular city. Current roaming methods require callers to first know the city or cellular system where the cellular customer is traveling, then dial a "roamer access" number for that area before dialing the regular cellular phone number.

"The northeast corridor is one of the nation's busiest cellular territories," said A. Robert Handell, Bell Atlantic Mobile Systems vice president of sales and marketing. "Bell Atlantic customers traveling between Washington-Baltimore and Greater Philadelphia have requested more convenient ways to be reached when using their cellular service while outside their home areas. With Follow Me Roaming they can be reached as easily and quickly as they can at home."

In addition to the northeast corridor, Bell Atlantic customers can use Follow Me Roaming in some 250 cities across the U.S. and in Canada. The service is also being extended to Bell Atlantic customers in the Pittsburgh area. Follow Me Roaming is not yet available in northern New Jersey and New York City.

Bell Atlantic Mobile Systems, based in Bedminster, N.J., is a subsidiary of Philadelphia-based Bell Atlantic Corporation and provides cellular equipment and service in New Jersey, Pennsylvania, Delaware, Maryland, Virginia and Washington.

NEW YORK (MAY 21) PR NEWSWIRE - The First Australia Prime Income Fund, Inc. (AMEX: FAX), a closed-end bond fund, today declared a regular monthly dividend of $0.09 per share, payable on June 15, 1990, to all shareholders of record on June 4.

This dividend is consistent with the policy adopted by the fund's board of directors on Oct. 24, 1988, of declaring a regular monthly dividend of $0.09 per share, which commenced in February 1989. Qualifying U.S. taxpayers are additionally entitled to a foreign withholding tax credit on this dividend, and will be informed as to the amount at a later date.

At the time of its offering in April 1986, the First Australia Prime Income Fund was the largest-ever initial public offering on the American Stock Exchange. The fund has net assets in excess of $1 billion. The fund's policy is to invest at least 65 percent of its portfolio in Australian issuers or debt securities rated "AA" or better. The First Australia Prime Income Fund trades on the American Stock Exchange and the Pacific Stock Exchange. The fund is advised by EquitiLink Australia Limited, the largest independent mutual fund manager in Australia. Devoting itself only to the business of fund management, the EquitiLink Group manages over than $1.8 billion on behalf of more than 240,000 investors worldwide.

#90141p0402 05/21/1990 ~PR Newswire

NEWARK, CA (MAY 21) PR NEWSWIRE - Ross Stores Inc. (NASDAQ: ROST) today reported first quarter earnings declined to $1.6 million, or 7 cents per share, for the 13 weeks ended May 5, 1990, as compared to net earnings of $3.4 million, or 14 cents per share, for the prior year's like quarter. Current year first quarter sales were $171 million, up from sales of $155 million for the 13 weeks ended April 29, 1989.

As previously reported, on a day-for-day basis, total sales during the first quarter in 1990 increased 6 percent over the $161 million in sales for the 13 weeks ended May 6, 1989. Comparable store sales for the like period were down 5 percent.

In commenting on these results, Norman A. Ferber, president and chief executive officer, stated, "We are disappointed with our performance in the first quarter. Our business was affected by our efforts to control inventory levels as we ended the fourth quarter. We cut back on receipts of early spring and basic merchandise, which created imbalances in the apparel mix in our stores. In addition, our marketing strategy was not as effective as we expected." Ferber continued, "The merchandise mix in our stores has returned to normal seasonal proportions, and we are currently implementing programs to strengthen our marketing."

During the first quarter, Ross opened five new stores, all in existing markets. These are the first of approximately 30 stores that the off-price retailer anticipates opening during 1990. Two new stores were opened in the San Francisco Bay Area, and one store each in the company's Seattle, Dallas and Washington D.C. markets.

Ross Stores Inc. operates a national chain of off-price retail stores offering first quality, in-season, branded apparel and apparel- related merchandise for the entire family. The company had 161 stores in operation at May 5, 1990, compared to 143 stores at the end of the like period last year.

BALTIMORE (MAY 21) PR NEWSWIRE - Atlanfed Bancorp, Inc., (NASDAQ-NMS: AFED) Baltimore, announced that its board of directors declared a 10 percent stock dividend to be paid on June 15, 1990, to stockholders of record as of the close of business on May 31, 1990.

This stock dividend will give each stockholder 10 percent more shares of Atlanfed Bancorp common stock. It is the intention of the board of directors to continue to pay regular quarterly cash dividends of 10 cents per share, which with the additional shares issued with the stock dividend will automatically increase the cash dividend by 10 percent.

Atlanfed Bancorp's primary subsidiary, Atlantic Federal Savings Bank, was founded in 1897 and currently operates 10 branch offices throughout the state of Maryland. Atlantic Home Mortgage Corporation, the bank's mortgage banking subsidiary, operates loan production offices in Towson, Columbia and Pasadena, Md., and in Newark, Del.

#90141p0412 05/21/1990 ~PR Newswire

MORRISTOWN, NJ (MAY 21) PR NEWSWIRE - AT&T Computer Systems today announced a new software tool that lets computer users run non-graphic applications in the OPEN LOOK(TM) Graphical User Interface (GUI) environment.

ALEX (A Language Extension to X) transforms character-based -- or non-graphic -- applications into OPEN LOOK applications without changing the source code or binary code of the existing application. OPEN LOOK GUI is an easy-to-use interface to the UNIX(R) operating system based on the industry-standard X Window System.

"Customers who want to use the OPEN LOOK graphical user interface often have significant investments in character-based applications," said Roy Eberle, director of systems marketing. "ALEX is the first product that enables customers to easily convert those applications to the consistent look and feel of OPEN LOOK without losing any features or functionality."

Because ALEX provides a consistent graphical interface across applications end-users intuitively know how to use both character-based and OPEN LOOK GUI-based applications, Eberle said. ALEX also can run multiple applications simultaneously, which allows for the integration of several programs onto one display.

When a character-based application performs an action, ALEX "detects" it and creates a graphical OPEN LOOK representation of the input or output. The user then interacts with this graphical version. ALEX detects the user's actions and sends the character application the appropriate instructions to carry out the user's request.

Designed by System Strategies Ltd. of London, ALEX runs on the AT&T 6386 WorkGroup System family of networked computers. Software applications can reside anywhere on a computer network, including mainframes.

"ALEX enables corporate information departments to leverage their existing applications investment and phase the introduction of OPEN LOOK computing without disrupting their current development schedules," said Mike Karliner, director of System Strategies Ltd. "With ALEX, users can avoid the complexities of an application and concentrate instead on using it to their advantage."

Developers can continue to design and develop applications for character-based devices using tools such as ETIP and C++. After the character-based application is developed, the developer can quickly provide a second version for the OPEN LOOK GUI by using ALEX. Programming in ALEX requires no knowledge of the X Toolkit.

"The OPEN LOOK GUI gives users a simple, intuitive way of using the power of UNIX System V to solve business problems," Eberle said. "Now, in keeping with our commitment to protect customers' investments, AT&T Computer Systems is making it easier for customers to move to the OPEN LOOK GUI without giving up their investments in existing applications, expertise and data."

MOSCOW (MAY 21) PR NEWSWIRE - McDonnell Douglas Corp. (NYSE: MD), one of America's largest aircraft producers, today announced that it has agreed to participate in the Soviet Union's second International Exhibition of Airline and Airport Equipment in Moscow this September.

"Our decision to be part of the 'Technika Aeroporta Moscow 90' signals the company's intent to aggressively pursue business opportunities in the Soviet Union," said Ves Zommers, commercial marketing regional vice president of the corporation's Douglas Aircraft division.

During a meeting of the U.S.-U.S.S.R. Trade and Economic Council in Moscow Zommers acknowledged that the company earlier this month held preliminary talks with Aeroflot about the McDonnell Douglas MD-11, the world's newest wide-body passenger jet.

"We are very pleased with the opportunity to introduce the MD-11 and other McDonnell Douglas commercial jets to the people of the Soviet Union," he said.

As of May 1, 1990, McDonnell Douglas had received 346 MD-11 orders and other commitments from 31 customers in 24 countries. The powerful, high-technology jet can carry 323 passengers up to 8,039 statute miles (12,938km), or easily from Moscow to Los Angeles or New York nonstop.

Advances in aerodynamics, propulsion, aircraft systems, cockpit avionics and interior amenities have been designed into the MD-11, providing for flexibility, economical operation and ease of maintenance.

The three-engine aircraft is available in three models -- passenger, all-freighter and an arrangement in which passengers and freight are carried on the main deck.

McDonnell Douglas is headquartered in St. Louis, Mo. Its Douglas Aircraft division, producer of the MD-11 and other commercial transport aircraft, is based in Long Beach, Calif.

#90141p0420 05/21/1990 ~PR Newswire

NEW YORK (MAY 21) PR NEWSWIRE - Rupert Murdoch is sounding out prospective buyers for TV Guide. The news comes less than two years after he rocked the magazine industry by paying $3 billion to acquire its parent, Triangle Publications, according to an exclusive report in the May 21 issue of Advertising Age.

Sources told Ad Age that top Murdoch executives have met with a number of major publishers in recent weeks to gauge their interest in the weekly, which has been in an ad page and circulation slump since being acquired by Murdoch's News Corp. in 1988. The asking price is an estimated $2.6 billion.

"There's no question about it...they're selling it," one publishing industry source who said he recently met with Murdoch executives told Ad Age. Says another source close to the company, "It's been shown around to carefully selected people." Murdoch executives and News America Publishing have both denied the report.

Murdoch has been under pressure to reduce News Corp.'s heavy debt load, estimated by analysts at about $6.5 billion. While selling TV Guide would alleviate the debt, it would also mar Murdoch's near- perfect record and would likely be viewed as a sign of deepening problems at News Corp., which is why sale discussions are being kept under tight wraps, according to Ad Age sources.

Finding a buyer for the magazine may not be easy. Ad Age was informed that informal bids have been in the $1.5 billion-$2 billion range, far below the record $3 billion-plus Murdoch paid to acquire Triangle from founder Walter Annenberg, a purchase that included Seventeen and the Daily Racing Form.

DETROIT (MAY 21) PR NEWSWIRE - The Detroit Edison Company (NYSE: DTE) board of directors today elected William S. Orser, 45, senior vice president, responsible for Nuclear Generation, and Douglas R. Gipson, 42, assistant vice president and manager, Nuclear Production.

Orser had been vice president, Nuclear Generation, since 1987, and last week was named to succeed B. Ralph Sylvia, who resigned to join the Niagara Mohawk Power Co. in Syracuse, N.Y.

Gipson had been plant manager, Nuclear Production, since joining Detroit Edison in 1987. Gipson's responsibilities include the operation, maintenance, management, security and administration of Detroit Edison's Fermi 2 nuclear plant.

In Orser, Detroit Edison promotes to its top nuclear post an executive who had three years of significant operating responsibility for Fermi's improvement, preceded by 11 years of operating and managerial experience with the Portland General Electric Company's Trojan nuclear plant in Oregon.

A 1966 graduate of the U.S. Naval Academy, Orser served on three nuclear-powered submarines before leaving the Navy in 1975. He received a master of science degree in computer systems management from the Naval Postgraduate School in 1971 and later qualified as a senior nuclear reactor operator. He worked as a nuclear engineer for Southern California Edison Co. for two years immediately following his naval service.

Orser and his wife, Linda, live in Ann Arbor, Mich. They have three

daughters.

IRVINE, CA (MAY 21) PR NEWSWIRE - Fluor Daniel announced today two contracts with South Carolina Electric & Gas Company, a fully owned subsidiary of SCANA Corp. (NYSE: SCG). The value of the contracts was not disclosed.

Fluor Daniel's Power Sector will supply services for the 900-megawatt V.C. Summer nuclear power station located in Jenkinsville, S.C. The first contract is for maintenance and modification services and is a one-year extension to an existing contract which includes a one-year renewal option. The second contract provides for housekeeping and decontamination services for two years, and is the first of its kind for Fluor Daniel at the site.

Manpower levels will range between 130 and 450 personnel depending on program needs.

Fluor Daniel has been performing maintenance and modification services at the station since it went commercial in January 1984. SCANA Corp. is a diversified holding company with interests in traditional electric and gas utilities, fiber optics, construction and real estate development.

Fluor Daniel Inc., Fluor Corp.'s (NYSE: FLR) principal subsidiary, is an international engineering, construction and technical services company with more than 50 offices around the world.

#90141p0436 05/21/1990 ~PR Newswire

SAN JOSE, CA (MAY 21) PR NEWSWIRE - Radius Inc., the leading manufacturer of high resolution graphics display systems and graphics engines for personal workstations, today announced QuickCAD "Birds Eye" featured in the latest QuickCAD Software Version 1.1.

The QuickCAD Birds Eye, which dramatically speeds up on-screen CAD manipulations, represents a major breakthrough for the user interface and CAD applications for the Mac.

"QuickCAD was designed to provide a continuous stream of increasingly powerful feature sets," said Steve Holtzman, Radius vice president of marketing. "The new Birds Eye feature is the latest innovation from Radius which gives more power to the CAD user."

The first application to take advantage of this new feature is VersaCAD's Macintosh Edition 2.2. Easily accessed from the VersaCAD "Settings" Menu, the QuickCAD Birds Eye automatically calls up the current view of a drawing in a window located in the upper left-hand corner of the primary display. Within Birds Eye, on-screen pan and zoom commands are used to change the magnification and location of the drawing in real time, and then update the working area to the view selected in the Birds Eye.

"The instantaneous feedback supplied by the Radius QuickCAD Birds Eye feature allows the VersaCAD 2.2 user to magnify and locate a precise area of the drawing in real time," said Michael Hara, Radius product marketing manager. "It is the fastest CAD graphics interface that is currently available on the Mac."

The Radius QuickCAD Graphics Engine combines a RISC processor, display-list software and proprietary multi-task operating system software to accelerate CAD application commands such as screen redraws, pans and zooms up to 30 times faster. QuickCAD Software Version 1.1 broadens functionality of QuickCAD and offers a speed increase for VersaCAD's Macintosh Edition 2.2.

QuickCAD Version 1.1 supports other new features. New AutoCAD features include support for Show Version and for multiple international versions that require lockbox protection. QuickCAD Software Version 1.1 also adds new display features which include support for 1, 2, 4, 8, 16 and 24-bit modes.

The Radius QuickCAD Graphics Engine is a single slot NuBus card. It adheres strictly to Apple's 32-Bit QuickDraw standard, allowing all software programs to operate normally. QuickCAD is fully compatible with the Radius 8-bit Gray Scale/Color Interface, Radius DirectColor Series of 8, 16 and 24-bit interfaces, Radius Color Display, Apple 13- inch RGB Color Monitor and Apple Macintosh II 8-bit Video Card. A single QuickCAD Graphics Engine will support multiple displays, an important consideration for engineers working in multiple display environments. Price and Availability

QuickCAD Software Version 1.1 is included with every QuickCAD Graphics Engine shipped after April 15, 1990. Current QuickCAD owners may obtain QuickCAD Software Version 1.1 from any Radius Authorized Reseller. It does not carry a suggested list price.

HOUSTON (MAY 21) PR NEWSWIRE - Cooper Industries, Inc. (NYSE: CBE) announced today that it has acquired the assets of Rockwell Industrial Tools, an operating unit of Allen-Bradley Company, Inc. Terms of the agreement were not disclosed.

Rockwell Industrial Tools is a supplier of a broad range of industrial air tools for the airframe, automotive, shipbuilding, power plant construction and other industries. Founded 70 years ago in Dayton, Ohio, as Buckeye Tools Corp., the business was acquired by Rockwell International in 1962 and was moved to Columbia, S.C., in 1967. It became part of Allen-Bradley after Allen-Bradley was acquired by Rockwell in 1985. Approximately 200 people are employed at its manufacturing facility in Columbia.

Rockwell Industrial Tools will become part of the Cooper Power Tools division, formerly known as Cooper Air Tools. The division has been renamed to more accurately reflect its broadened thrust into D.C. electric tools, engineered systems and consumable products. Cooper Power Tools is part of Cooper's Tools & Hardware business segment.

Headquartered in Lexington, S.C., the Cooper Power Tools division manufactures pneumatic and D.C. electric tools, screwdriver bits, impact sockets, universal joints, hoists and assembly machinery under the Apex, Gardner-Denver, Dotco, and Deutsche Gardner-Denver names. It has approximately 1,500 employees worldwide in four domestic facilities and one foreign location.

Houston-based Cooper Industries, with 1989 revenues of $5.1 billion, is a diversified, worldwide manufacturer of electrical products, electrical power equipment, tools and hardware, automotive products, and petroleum and industrial equipment.

#90141p0443 05/21/1990 ~PR Newswire
ANCHORAGE, ALASKA (MAY 21) PR NEWSWIRE - The bioremediation of designated sites on shorelines in Prince William Sound and the Gulf of Alaska has begun, according to Exxon.

"A trained team moved ashore at Herring Bay on Knight Island to apply specially formulated liquid and granular fertilizers to a lightly oiled beach to stimulate native, oil-eating microbes," Bob Mastracchio, Exxon technical manager in Anchorage, said.

"Biodegradation is a natural process that is occurring everywhere, everyday," he said. "By adding fertilizers containing nitrogen and phosphorous, the populations of naturally occurring oil degrading microbes are increased. Through biodegradation, a well-understood process, oil is converted to carbon dioxide, water and more microbes."

Laboratory tests and field observations show that both nutrients and oxygen can penetrate deeply enough into sites affected by the Valdez oil spill to allow the microbes to biodegrade subsurface oil, he said.

"Subsurface areas are good candidates for bioremediation treatment," he said. "The application of measured amounts of fertilizer to promote the natural biodegradation is the least intrusive cleanup technique available for subsurface oil. Our key objective is to achieve the appropriate level of cleanup with the least amount of stress on the environment."

Mastracchio said the Knight Island site is one of about 400 relatively small sites in the Sound and Gulf scheduled for bioremediation under a plan developed jointly by federal and state agencies and Exxon, and approved by Coast Guard Admiral D.E. Ciancaglini, Federal On-Scene Coordinator.

In compliance with a Federal On-Scene Coordinator request, a special program to acquire additional data on bioremediation is scheduled to begin today with the application of fertilizer to a location at Bay of Isles on Knight Island, according to Mastracchio.

NEW YORK (MAY 21) PR NEWSWIRE - Allen E. Murray, chairman and chief executive officer of the Mobil Corporation (NYSE: MOB), today announced the following executive changes, effective Sept. 1:

Jack E. Crawford, vice president, Mobil Chemical Company, and general

manager, petrochemicals division, is being proposed for election as a vice president of Mobil Oil Corporation. He will succeed Joseph V. D'Ambrisi as vice president, research, engineering, and environmental affairs, Mobil Oil Corporation, and as president, Mobil Research and Development Corporation.

D'Ambrisi has elected to retire on Nov. 1 after 40 years of service. He will be on special assignment beginning Sept. 1, reporting to Richard F. Tucker, president of Mobil Oil Corporation.

Jerry G. Griffith, vice president, engineering, Mobil Research and Development Corporation, will be named a vice president of Mobil Chemical Company and will succeed Crawford as general manager, petrochemicals division.

Edward F. Kondis, vice president, natural gas, exploration and producing division, is being proposed for election as vice president, engineering, Mobil Research and Development Corporation, to succeed Griffith.

D'Ambrisi, 62, joined Mobil in 1950 as a process engineer and advanced through a series of engineering positions, primarily in manufacturing. In 1974, he joined the Middle East department as manager, services and coordination, Saudi Arabia, becoming general manager, projects coordination, in 1977. In 1980, he was named general manager of the Middle East department and, in 1983, Marine Transportation was added to his responsibilities. He assumed his current position in 1985.

Crawford, 58, joined Mobil in 1958 as a process engineer. He moved to Mobil Chemical Company's research and development division in 1960, and became manager, research and development operations, in 1966. In 1968, he was appointed manager, engineering-chemical. In 1970 he moved to Mobil Chemical's plastics division as vice president, planning and operating services. In 1972 he was named a Mobil Chemical Company vice president and general manager of its films division. In 1977 he moved to the petrochemicals division as assistant general manager and assumed his current responsibilities in 1980.

Griffith joined Mobil in 1954 as a process engineer and advanced through a series of positions in Mobil Chemical's petrochemicals division. In 1975 he transferred to Naples, Italy, as general manager, Mobil Chimica Italiana. He returned to the U.S. in 1978 as vice president, planning, of Mobil Chemical's petrochemicals division and the following year was named venture manager of the Saudi Arabia petrochemicals project. In 1983, he moved to Saudi Arabia as president, Saudi Yanbu Petrochemical Company. He was appointed to his present position in 1986. From July 1989 to March 1990 he was on temporary assignment with the Petroleum Industry Response Organization (PIRO) in Washington.

CHICAGO (MAY 21) PR NEWSWIRE - Amoco Production Company today announced a significant natural gas discovery in the Ouachita Thrust area of the Arkoma Basin in Southeastern Oklahoma.

According to W.S. Davis, Denver region exploration manager, the Amoco Retherford No. 1-A tested at a natural flow rate of 49.3 million cubic feet of natural gas daily through perforations in the Pennsylvanian Spiro Sandstone between 12,142 and 12,170 feet. The test was conducted with a flowing tubing pressure of 1,825 pounds per square inch. The well is six and one-half miles southeast of Hartshorne in Latimer County.

Amoco Production Company is the operator of the No. 1-A Retherford with a 42 percent working interest. Exxon Company, U.S.A. has a 57 percent working interest.

Since late 1988, Amoco has drilled or participated in 17 natural gas wells in the Ouachita Thrust area. The company's net sales from the wells now total about 95 million cubic feet of gas per day.

Amoco Production Company is the worldwide petroleum exploration and production subsidiary of Amoco Corporation (NYSE: AN).

FORT WORTH, TX (MAY 21) PR NEWSWIRE - Sunbelt Nursery Group Inc. (AMEX: SBN) today reported earnings for the three months ended April 30, 1990 and 1989.

Sunbelt previously announced a change in its fiscal year end from Aug. 31 to Jan. 31. This report is for the first quarter of the fiscal year ending January 1991.

Sunbelt's results for the three months ended April 30, 1990, were sales of $48.5 million and net income of $7.0 million, or primary net income of $1.83 per share, including extraordinary credits for tax loss carryforwards, compared to sales of $52.5 million and net income of $5.1 million, or primary net income of $1.36 per share, for the same period last year.

Because current trading prices of Sunbelt's common stock are above the conversion price of its Convertible Preferred Stock and the exercise price of most stock options held by Sunbelt employees, fully diluted net income per common share is reported as $1.52 for the three months ended April 30, 1990. No fully diluted figure was reported for last year's earnings for the comparable period because of a lower stock price.

Commenting on the results, Donald W. Davis, president and chief executive officer, said that gross margins improved and general, administrative and selling expenses decreased. Weather was extremely favorable for the quarter compared to last year.

"We have fewer stores to operate, which accounts for the fact that overall sales were down 7.5 percent, or $3.9 million, for the period," Davis said. "But comparable store sales increased 14.7 percent for the quarter and all the other numbers are moving in the right direction, including our profit before income tax. It was up 39 percent, or $2.0 million. Our balance sheet is stronger, too."

Sunbelt Nursery Group Inc. is the dominant nursery enterprise in six of the 11 largest lawn and garden markets in the United States with 97 stores that feature nursery stock and lawn and garden supplies.

#90141p0461 05/21/1990 ~PR Newswire

LAWRENCEVILLE, GA (MAY 21) PR NEWSWIRE - Power Plus of America, Inc. has introduced a new, heavy-duty battery line that contains no mercury -- the battery element considered most toxic by the Environmental Protection Agency -- and provides up to 50 percent more power than other heavy-duty batteries.

The 100 percent mercury-free Powerplus(R) Super Heavy Duty ES batteries include non-toxic materials such as inorganic carbon, cellulose and starch as mercury substitutes. Mercury has traditionally been used to control certain energy-producing electrochemical reactions within batteries.

Heavy-duty batteries are ideal for low-drain applications, such as flashlights and smoke detectors, where required energy levels are constant. However, these batteries can also be used in high-drain applications, such as radios and portable cassette players.

"The Powerplus line of heavy-duty batteries provides an environmentally safer energy source," says Greg Keller, Power Plus of America vice president for sales and marketing. "These mercury-free batteries help to reduce the hazardous, toxic threat that mercury- containing products present to the environment, especially when deposited into improperly functioning landfills where mercury can contaminate nearby water tables."

The absence of mercury eliminates the potential dangers and health risks associated with mercury contamination, which most often occurs in two ways. Dangerous levels of mercury gas can be released into the atmosphere during the incineration of mercury-containing products, and mercury can leach into groundwater tables after disposal in non-hazardous-waste landfills.

In addition, these new batteries contain significantly reduced amounts of another toxic ingredient; cadmium. Specifically, the Powerplus Super Heavy Duty batteries average 95 percent less cadmium than other heavy-duty batteries. For example, a C-size Powerplus heavy- duty battery includes five parts per million of cadmium, while other commercially available, C-size, heavy-duty batteries average 105 parts per million.

Based in Lawrenceville, Power Plus of America, Inc. manufactures and supplies a complete range of high-performance, Powerplus heavy-duty and alkaline batteries. In addition, the company also produces private-label alkaline batteries.

DETROIT (MAY 21) PR NEWSWIRE - Stockholders of NBD Bancorp (NYSE: NBD) elected seven directors to the board and Charles T. Fisher III, chairman and president, reviewed recent developments at the corporation's 18th annual meeting.

Those re-elected to the board for a three-year term expiring in 1993 are Maureen A. Fay, O.P., Fisher, Joseph L. Hudson Jr., William T. McCormick Jr., Irving Rose, Ormand J. Wade and Charles F. Whitten, M.D. Shareholders also approved the selection of Deloitte & Touche as NBD's principal independent auditors.

During the meeting, Fisher also said that business loan demand domestically has been relatively flat thus far in 1990. Residential mortgage loans outstanding are slightly above a year ago, while total consumer loans are 10 percent higher.

"We continue to seek good lending opportunities, both in the business and consumer sectors," he said. "Funds are ample from core deposit growth and retained earnings to meet all legitimate loan demands."

Outstanding domestic business loans have increased approximately 7 percent compared to 1989. Total consumer loans are 10 percent higher than in 1989, while outstanding residential mortgage loans also increased slightly.

Fisher noted that net income during this year's first quarter amounted to $.90 a share on a fully diluted basis, which was nearly 6 percent above first-quarter 1989 results. The annualized rate of return on average shareholders' equity has exceeded 15 percent in each of the last 11 quarters.

The final phases of the corporation's consolidation program are currently under way. By the end of 1990, all the separate banks in Michigan will be consolidated under one name, NBD Bank, N.A.

Included in the consolidation are eight offices of the former New Guaranty Federal Savings & Loan Association. Approximately $167 million of deposits and certain assets of the savings and loan, principally residential mortgages, were acquired.

Fisher commented that the consolidation process will greatly benefit the bank by centralizing its operations.

To further increase operating efficiency, NBD is currently building a new $40 million technology center. The new center will allow the corporation to upgrade its telecommunications and computer operations, which will improve customer service.

Fisher concluded the annual meeting with brief remarks about the economy of the United States.

"While there is some weakness in the automotive and certain construction markets, the unemployment rate has remained relatively low," he said.

"Consumer confidence is holding at a reasonably good level, inventories are in balanced positions relative to sales and capital spending appears to be holding firm."

MT. HOLLY, NJ (MAY 21) PR NEWSWIRE - Franklin Electronic Publishers Inc. (NASDAQ-NMS: FPUB) today announced a loss for the year ended March 31, 1990 of $2,874,000 or $.46 per share, as compared to income of $8,871,000 or $1.38 per share for the prior year.

Sales for the fiscal year were $69,869,000 compared to prior year's sales of $67,692,000.

For the quarter ended March 31, 1990, the company experienced a loss of $2,035,000 or $.31 per share as compared with earnings of $1,117,000 or $.18 per share for the quarter one year earlier. Sales were $14,088,000 compared to $13,634,000 for the same quarter last year.

Morton E. David, Franklin's chairman, stated: "Sales of electronic reference products increased even though economic conditions at retail were soft. We see this increase as confirming expansion of the market for hand-held reference products, especially those that offer speech capabilities.

"That expansion helped reduce inventories by 30 percent from the unacceptably high level of last summer. Sales were nevertheless under projections, which necessitated pricing and promotions which reduced gross margins. We are optimistic that inventories will be in excellent shape by August 1990.

"Until then, margins will continue under pressure as inventories are reduced. The company is financially strong with a current ratio of 2.4 to 1. Consolidation of four of our facilities into one is expected to be complete this summer, with attendant reductions in expenses.

"With lower expenses, improving market conditions and higher gross margins expected, we foresee profitability in the second half of fiscal year 1990 with year to year improvements in revenues and earnings."

MIAMI (MAY 21) PR NEWSWIRE - Burger King is offering its customers something new to dress up its salads: Star-quality salad dressing by film legend Paul Newman himself. The celebrated actor, in association with Burger King, has developed five varieties of Newman's Own (R) salad dressings available exclusively at Burger King (R) restaurants nationwide. The all-natural dressings include: Light Italian, Bleu Cheese, French, Thousand Island and Ranch. The original Newman's Own (R) Oil & Vinegar will also be available.

Burger King (R) customers will be able to use the dressings on four varieties of Burger King (R) salads, including: Chunky chicken, chef, garden and side salads. All profits from Newman's Salad King, Inc. will be donated to charitable and educational organizations.

"This all-natural product will help 'shake up' awareness of our salad line and bring customers what we believe is the best tasting dressing on the market," says Gary Langstaff, executive vice president of marketing for Burger King Corporation. "We were looking for a way to distinguish our salad offerings to customers. The line of Newman's Own (R) dressing, especially the all-natural benefit, does exactly that."

A national TV ad campaign uses a fresh approach to introduce the line of Newman's Own (R) salad dressings at Burger King (R) restaurants. The 30 and 15 second ads, which begin airing May 21, feature vignettes of Paul Newman undressing in a sequence of film clips from such movies as "The Sting," "The Prize" and "Cat on a Hot Tin Roof." A subtle voice in the background says, "For years you've seen Paul Newman undressing. Now you can see Paul Newman dressing. Burger King (R) introduces Newman's Own (R) salad dressing." TV and radio advertising is supported by in-store merchandising.

Burger King Corporation was acquired by Grand Metropolitan in January 1989. One of the United Kingdom's largest international companies, Grand Metropolitan is a world leader in the food, drinks and retailing businesses.

TAMPA, FL (MAY 21) PR NEWSWIRE - Musselman Steel Corporation ("Musselman"), a wholly owned subsidiary of Ivory Coast, Inc. (OTC) announced its unaudited sales and earnings for the six month period and

the quarter ended March 31, 1990.

Sales were $4,391,357 for the quarter ending March 31, 1990 and $8,038,294 for the six months ended March 31, 1990. This compares with sales of $2,819,735 and $4,885,355 for the quarter and six months ended March 31, 1989.

Chairman and president of Musselman, Frank R. Esposito Sr. further announced that unaudited earnings for the first six months and the quarter ending March 31, 1990 were $172,125 and $27,158.

This compared with losses of ($380,903) and ($244,023) for the similar periods in 1989. Commenting on the six month results, Esposito said: "The positive results were due to the company's continued emphasis on aggressive sales and manufacturing efficiencies."

Esposito expects the company to continue its improved performance and achieve the $16,000,000 sales goal for fiscal 1990.

Esposito also announced that the company filed a Post-Effective Amendment to its Registration Statement on Form S-18. This amendment, if approved, will permit the company to issue up to 95,000,000 shares of its common stock, if its outstanding warrants are exercised.

Ivory Coast has also applied to have its stock listed on the National Association of Securities Dealers Automated Quotation System (NASDAQ).

WHITE PLAINS, NY (MAY 21) PR NEWSWIRE - The United Kingdom Cable Authority has awarded cable franchises for Oldham, Tameside, Bury and Rochdale to Comment Cablevision, a company whose application was backed by NYNEX Corporation (NYSE: NYN) and US Cable Corporation. Part of the greater Manchester area in the north of England, the Oldham and Tameside franchise area contains 180,000 households; the Bury and Rochdale area contains 150,000 households. The announcement was made May 17.

In separate decisions by the Cable Authority, NYNEX has previously been awarded cable franchises in the United Kingdom for the London borough of Bromley, the borough of Bournemouth and four towns in Dorset County -- Poole, Christchurch, Corfe Mullen and Upton.

"We are very pleased to have been awarded these franchises," said Gregory McLean, director - United Kingdom CATV. "This not only provides new business opportunities for NYNEX, but also an occasion for NYNEX to show its commitment to offer high standards of service and value to the communities that Comment Cablevision serves."

NYNEX Corporation, based in New York, is the fourth largest telecommunications company in the United States ranking in sales. The company provides information products and systems to a diverse base of customers from offices in 13 countries and across the United States. Through New England Telephone and New York Telephone, NYNEX delivers

quality telecommunications services to the Northeastern United States.

US Cable, based in Montvale, N.J., currently serves 175,000 cable television subscribers in over 100 communities in the United States.

WASHINGTON (MAY 21) PR NEWSWIRE - The Student Loan Marketing Association (Sallie Mae) (NYSE: SLM) has tapped Timothy G. Greene, a Dallas attorney and the corporation's first general counsel, to succeed Ronald F. Hunt as executive vice president and general counsel of the corporation. Hunt's resignation to begin a law practice in North Carolina was announced a week ago.

At its meeting late last week, Sallie Mae's board also accepted the resignation, announced last week, of Edward A. Fox, president and chief executive officer. The board and its executive committee are now engaged in the selection process for naming Fox's successor.

Greene, who will assume his new post in July, returns to Sallie Mae from Eggers & Greene, a Dallas-based law firm. That firm, of which he is a principal, represents domestic and international clients in all facets of business, including governmental and regulatory matters, mergers and acquisitions.

Greene began his career at the Securities and Exchange Commission, in Washington, where he served from 1965 through 1971 in a number of positions, including that of executive assistant to the chairman. He also served as secretary to the U.S. Emergency Loan Guaranty Board and as a special assistant to the general counsel of the U.S. Department of the Treasury.

Following his years with the government, Greene was a senior member of Sallie Mae's formative management team, joining the corporation in 1973 as its first vice president, general counsel and secretary.

Sallie Mae, a federally chartered, stockholder-owned corporation, is the major financial intermediary serving the education finance market. By buying insured student loans and providing other financial services to financial and educational institutions, Sallie Mae replenishes local supplies of student credit. The corporation owns nearly 30 percent of all guaranteed student loans outstanding today.

#90141p0493 05/21/1990 ~PR Newswire
ARLINGTON, VA (MAY 21) PR NEWSWIRE - The board of directors of Gannett Co., Inc. (NYSE: GCI) today declared a dividend distribution of one preferred share purchase right on each outstanding share of Gannett's common stock. The distribution of rights will be made on June 8, 1990, to stockholders of record on that date.

John J. Curley, chairman, president and chief executive officer of Gannett stated: "The rights contain provisions to protect stockholders in the event of an unsolicited attempt to acquire the company through abusive takeover tactics which the board believes are not in the best interest of stockholders. In declaring the rights dividend, we have expressed our confidence in the future and our determination that our stockholders be given every opportunity to participate fully in that future."

Curley noted that the rights "are not being distributed in response to any specific effort to acquire control of the company and the board is not aware of any such effort."

Each right will entitle stockholders to buy one two-hundredth of a share of a new series of junior participating preferred stock at an exercise price of $150. Each two-hundredth of a share of the new preferred stock would entitle the holder to participate in dividends and to have essentially the same voting rights as though holding one whole share of Gannett common stock. Until the rights are exercised, however, the holder receives no dividend or voting rights in addition to the common stock already held.

The rights will be exercisable only if a person or group acquires 15 percent or more of Gannett's common stock or announces a tender offer that would result in ownership of 15 percent or more of the common stock.

If a person or group were to acquire 15 percent or more of Gannett's outstanding common stock, each right would entitle its holder (other than the acquiror or members of its group) to purchase, at the right's exercise price, a number of Gannett's common shares having a market value of twice the exercise price. In addition, if Gannett were to be acquired in a merger or other business combination transaction, each right would entitle its holder to purchase, at the right's exercise price, shares of the acquiring company's common stock having a market value of twice the exercise price.

Prior to the acquisition by a person or group of beneficial ownership of 15 percent or more of Gannett's common stock, the rights are redeemable

for one cent per right at the option of the board of directors.

Gannett is a nationwide news and information company that publishes 83 daily newspapers, including USA Today, and 52 non-daily publications, including USA Weekend, a newspaper magazine. It operates 10 television stations, 16 radio stations, Gannett News Services and the largest outdoor advertising company in North America.

GLENVIEW, IL (MAY 21) PR NEWSWIRE - Kraft General Foods today announced that Richard D. Badler has been named director, public affairs, responsible for the company's internal communications and its programs relating to food-industry issues. He reports to Thomas D. Ricke, senior vice president, corporate affairs.

Badler, 39, was most recently director, public affairs, for Kraft General Foods International, a position he held since 1988. KGF International is an operating unit of Kraft General Foods.

Prior to that, he was with Philip Morris, from 1982 to 1988, in a variety of communications positions, including manager of communications and manager of European communications, both for PM International; and manager public relations, and manager, community relations, both for PM USA.

Prior to Philip Morris, Badler served in communications and media relations positions at J. Walter Thompson Advertising, WCBS-TV News and Rockefeller Center Inc.

Badler has a B.A. degree in English literature from Case Western University.

Kraft General Foods, based in Glenview, is the multinational food business of Philip Morris Companies Inc. (NYSE: MO).

SAN JOSE, CA (MAY 21) PR NEWSWIRE - Cadence Design Systems Inc. (NASDAQ: CDNC), a worldwide leader in electronic design automation (EDA), today announced the Amadeus(TM) System Design Series, an EDA solution that addresses the needs of systems design engineers who are designing today's most advanced electronics products.

Based upon Design Framework II(TM), Cadence's second generation framework, Amadeus supports the design of very high performance systems from the initial specification in a hardware description language all the way to printed circuit board layout, and release to manufacture.

Electronics systems are reaching unprecedented levels of complexity and performance. High gate count ASICs are rapidly displacing standards components. Clock speeds, even for CMOS designs, are exceeding 50 MHz. Board densities have reached 400 to 800 equivalent ICs with 12 to 24 layers.

As these systems complexities grow, more and more designers are redefining their CAD environments to support top-down combined with bottom-up design, supported by PCB layout systems which have the capabilities to address very dense boards running at very high clock speeds.

Cadence has built Amadeus to support these design trends. Amadeus ensures that top-down design techniques can be used throughout the design cycle so final gate level implementations match original specifications, and tightly links these advanced design techniques into PCB layout tools which address the same level of system complexity.

With Amadeus, engineers can take a design all the way from an HDL, architectural description to final PCB layout and manufacturing information.

Using top-down or bottom-up design techniques, engineers can describe their ASIC and systems. These are then automatically transferred to

layout both intitially, and incrementally for engineering changes orders (ECOs).

In addition, to ensure that Amadeus addresses the engineering problems of today, and that it will meet the challenges of tomorrow, it has been designed with the cooperation of Cadence systems technology partners, Harris Semiconductor and LM Ericsson.

"Amadeus has been tailored to the needs of systems designers, who have been forced to use today's tools and techniques that are more appropriate for small, lower density and performance designs, and then retrofit them to large, high performance system design," said Michael Lack, president and general manager of Cadence's Systems Division. "Those engineers designing systems with very large ASICs of more than 50,000 gates, and million gate plus systems, and high density boards, have simply not been provided with a complete set of tools to handle their complex systems designs."

Prabhu Goel, president of Cadence's Advanced Computer Aided Engineering Division added, "Proven tools such as Verilog(R) have been filling the demand for strong simulation tools, yet the market was still void of a complete set of tools that embodied the HDL, design methodology with tight links to PCB layout tools that fit the same level of system complexity. Amadeus represents a breakthrough in-depth solution, that addresses the top-down design challenges of these complex system designs, incorporating HDL technology, and advanced PCB layout within a proven framework-based system. It is the direction the EDA applications market will follow in the 1990s."

WHITE PLAINS, NY (MAY 21) PR NEWSWIRE - NYNEX Business Information Systems Company and Image Business Systems Corporation (IBS) today announced a marketing agreement whereby NYNEX will be the preferred supplier of computer equipment and support services for IBS' image management software line, ImageSystem(TM).

NYNEX Business Centers, through its 77 branches nationwide, will offer IBM PS/2 equipment, local area networks and associated non-IBM equipment, such as scanners, optical character recognition servers, printers, optical storage devices and image-capable monitors, to customers who purchase IBS ImageSystem software. NYNEX will also provide installation, training and hardware maintenance.

"The image management arena is making dynamic strides toward the automation and elimination of paper-intensive operations," said Doug Mello president, NYNEX Business Information Systems, which owns the NYNEX Business Centers. "The marketing agreement with IBS supports our commitment to becoming a leader in the image management marketplace."

ImageSystem is IBS' product line for comprehensive document image management systems. ImageSystem also provides a software platform for the creation of customized and vertical market applications.

"This agreement is an integral part of IBS' strategy to provide an all-inclusive image management software package to our customers," said David E.Y. Sarna, president and chief executive officer, IBS. "NYNEX has the national presence essential in meeting the rapidly-expanding needs of the image management marketplace."

With 77 branches in 30 states, the NYNEX Business Centers offer micro-computers, software, peripheral equipment and specialized services -- including the design and installation of local area networks -- to business customers throughout the country.

IBS is an IBM Business Partner-Cooperative Software Program Supplier for ImageSystem and related software. Headquartered in New York, IBS is owned by its employees and private investors, including IBM and Warburg, Pincus Capital Co. L.P. It also has offices in Austin, Texas; Wilmington Del.; Westport, Conn.; and Stillwater, Okla.

NEWMARKET, NH (MAY 21) PR NEWSWIRE - Vitronics Corporation (AMEX: VTC) today announced the appointment of Albert J. Chanasyk to the vice president of engineering position.

James J. Manfield, Jr., president and CEO of Vitronics Corporation said, "We are pleased to add Mr. Chanasyk to our management team as he brings a broad range of hands-on engineering management in all the key areas of our technology."

Prior to joining Vitronics Corporation, Chanasyk was previously the engineering manager at automation software at Eaton Corporation in Beverly Mass., and the engineering manager at Schlumberger in Clifton Park, Latham, N.Y. and the manager - product management at NCR Corporation in Ohio. Chanasyk has received BSc and MSc Degrees from the University of Alberta Canada and MSc and MBA Degrees from the Ohio University.

Vitronics Corporation is a rapidly growing supplier of state-of- the-art thermal processing and associated equipment, with an established reputation as an innovator and leader in the surface mount industry. VITRONICS(R)'equipment is primarily aimed at the huge electronics industry and has achieved considerable technical recognition in the production of printed circuit boards. The company also supplies equipment to the medical, chemical, pharmaceutical, plastics, graphics and textile industries. VITRONICS' customer list includes all 20 of the largest electronics companies with IBM, AT&T, Hewlett Packard, Delco Electronics, Chrysler, Compaq Computer and Motorola among the grouping.

HARLEYSVILLE, PA. (MAY 21) PR NEWSWIRE - The Harleysville Mutual Insurance Co. today announced that an agreement has been reached with the Insurance Department of Pennsylvania that will enable the insurer to continue to provide personal auto insurance to its 65,000 policyholders in the state.

Non-renewal notices that had been sent to some insureds will be rescinded.

"Our objective from the very beginning has been to achieve approval for a rate filing that would make it financially feasible for us to continue serving our Pennsylvania personal auto policyholders," commented Harleysville Chairman of the Board and Chief Executive Officer Bradford W. Mitchell. "And I am truly pleased that we have been able to negotiate an agreement that will allow us to provide an uninterrupted market for our customers."

Under the terms of the agreement, the Insurance Department will act by May 30, 1990, on a rate filing submitted by Harleysville on March 30 under the "extraordinary circumstances" provision of the new Pennsylvania Auto

Insurance Law (Act 6 of 1990). In turn, the company has agreed to submit a second filing that will discount its rates from Dec. 1, 1989, levels. The Insurance Department has also agreed to consider Harleysville's proposal to form a separate company that would write Pennsylvania auto business exclusively and has agreed to assign personnel to jointly explore the proposal with the company.

At the same time, the Insurance Department agreed to dismiss all legal and administrative actions against the company and will dismiss Harleysville from the lawsuit filed last week, alleging that Harleysville and six other insurance companies acted in concert to block implementation of the new law.

The Harleysville Insurance network, headquartered in Harleysville, has operations in 19 states, providing a variety of insurance-related products and services, including property, casualty and life insurance, and other financial services. Property and casualty insurance coverages for businesses and individuals are marketed through more than 7,500 independent insurance agents.

TROY, MI (MAY 21) PR NEWSWIRE - K mart Corporation (NYSE: KM) today announced the promotion of Charles R. Cumello, 45, to president of its Reader's Market Division.

Cumello, who has an accounting degree from Hunter College, is presently executive vice president of K mart's Waldenbooks subsidiary and general

manager of its Reader's Market division which has Reader's Market departments in over 275 K mart stores and services some 400 additional K marts.

Richard S. Miller, executive vice president, K mart Stores, in discussing the promotion, stated that "This is the first step in Reader's Market taking full responsibility for all K mart book departments nationwide. This should be completed by Jan. 31, 1991. Charlie has done an outstanding job in both the Reader's Market Departments and those departments serviced by Reader's Market. We want to make full use of his expertise and leadership abilities in all K mart stores."

"The expansion of this division and giving it the full responsibility for the purchasing and distribution for all books in K mart stores is another step in making K mart the store of the '90s," commented Joseph E. Antonini chairman and chief executive officer of K mart Corporation.

K mart Corporation serves America with over 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada. K mart, currently operating 2,318 K mart stores, is also the parent company for Pay Less Drug Stores, Builders Square, Waldenbooks, PACE Membership Clubs and The Sports Authority.

HOUSTON (MAY 21) PR NEWSWIRE - Eastern Airlines today said it will introduce three new daily roundtrips from Houston's Hobby Airport to Atlanta on July 5.

The airline said its return to Hobby reflects Eastern's commitment to further expand the Atlanta hub.

Eastern is offering a $198 roundtrip introductory fare from Houston to Atlanta and 66 other cities east of the Mississippi -- including New York, Washington, Boston, Orlando and Miami -- and St. Louis and Kansas City. Tickets must be purchased between May 18 and June 15 for travel originating July 5 through 22.

The airline also has its money-back guaranteed "Y-Not" fare for business travelers at $299 each way to Atlanta, for a confirmed first class seat, compared to $361 for an unrestricted coach seat at other airlines.

"Our Hartsfield operations will continue to grow," said George Brennan, vice president - marketing. "During the summer we will add two dozen flights to our current level of 289 in Atlanta, including service to

several new cities."

Brennan said Hobby Airport -- with its close proximity to downtown Houston -- offers convenient access from the metropolitan area and shorter ground transportation times.

Houston customers can make connections in Atlanta to more than 70 U.S. cities.

Service from Hobby to Atlanta will be operated with 99-passenger DC-9s. Eastern currently serves 84 cities in the U.S., Canada and Latin America with about 800 daily flights.

#90141p0534 05/21/1990 ~PR Newswire

BALTIMORE (MAY 21) PR NEWSWIRE - In an application filed today with the Maryland Public Service Commission, the Baltimore Gas and Electric Co. (NYSE: BGE) has requested an annual increase in electric base rates of 12.1 percent.

The majority of the $198 million base rate increase is needed to cover higher operating and maintenance expenses, and new capital investments, not reflected in the utility's present tariffs. BG&E also is seeking to implement the first of a three part phase-in of revenues required in association with the commercial operation of a second generating unit at its Brandon Shores Power Plant. That unit is scheduled for completion in June 1991.

In written testimony accompanying the filing, BG&E President of Utility Operations Edward A. Crooke said that the company has experienced significant attrition since its present rates were authorized. "The company's unadjusted earned rate of return for the year ended December 31, 1989, was 9.43 percent," he said. "That return is 48 basis points below the 10.01 percent which the commission authorized the company to earn just 18 days earlier. For the 12 months ended March 31, 1990, the unadjusted earned return for electric operations had fallen another 40 basis points, to 9.03 percent." He projected that by the end of July, the return would fall even further.

The decline in the company's financial performance was attributed to increased operating expenses from recent expansions to the electric distribution and transmission system to meet growing energy demands; cost increases at the Calvert Cliffs Nuclear Power Plant; and general inflation.

Crooke pointed out that while higher rates are needed to overcome the effects of this attrition, the company is not seeking any increase in its presently authorized rate of return.

Also reflected in today's request is a proposed $45 million first phase of revenues associated with Brandon Shores Unit Two. The remaining two rate phases would be implemented in June 1991 and January 1992. BG&E is proposing the phase-in as a means of gradually implementing the rates associated with inclusion of the new Unit in the utility's rate base. The phased approach has been designed so that customers will pay no more during 1991 than they would have under the more traditional single increase approach.

NEW YORK (MAY 21) PR NEWSWIRE - Norstar Brokerage Corp., the discount brokerage subsidiary of Fleet/Norstar Financial Group, (NYSE: FNG), Providence, R.I., has acquired the business of Heartland Securities, Inc., a Chicago-based discount broker, it was announced today by Frieda Lewis, executive vice president and chief operating officer, Norstar Brokerage. The purchase price was not disclosed.

Headquartered at 67 Wall St., New York, Norstar Brokerage operates a nationawide network of 12 offices, including two in Chicago which will service the 8,000 accounts of Heartland Securities. The Chicago offices are located at Northwestern Atrium Center and Two North Riverside Plaza.

"Heartland's customers will benefit from several enhanced services, including access to Norstar's 24-hour-a-day, 7-days-a-week automated quote and order entry service, the ability to purchase more than 275 mutual funds, and the convenience of Norstar's 12-branch nationwide network while dealing with the same registered representatives in Chicago," Lewis said.

Charles Guptil, president, Heartland Securities, expressed pleasure in keeping the business in Chicago. The Chicago office is Norstar's largest branch location. "In fact, we would like to continue to grow in Chicago, and we are continuing to look at other possible acquisition candidates as they become available," Lewis said.

James A. Mukoyama, formerly vice president of Heartland Securities, became Norstar's Chicago branch manager. Mukoyama, 45, joined Heartland in 1976 after six years as an executive in the import-export and securities industries and six years in the U.S. Army. Currently, a division commander in the U.S. Army Reserves, he is the youngest major general in

the U.S. Army.

A graduate of the University of Illinois, Mukoyama also holds a master's degree from that institution. Mukoyama and his family live in Glenview, Ill.

Fleet/Norstar Financial Group is a diversified national financial services company listed on the New York Stock Exchange (NYSE: FNG). Fleet/Norstar has approximately 1,000 offices in 40 states. Its lines of business include commercial and consumer banking, trust banking, mortgage banking, consumer finance, asset-based lending, student loan processing, and investment banking.

DAYTON, OH (MAY 21) PR NEWSWIRE - Delco Products Division of General Motors (NYSE: GM), Inorganic Recycling, Inc., and U.S. Environmental Protection Agency (U.S. EPA) today cut the ribbon to officially launch Delco's latest recycling project.

The project, the first of its kind in the world, recycles hazardous electroplating wastes into an environmentally safe ceramic known as "Moonrock." The "Moonrock Project" utilizes the technology of Delco's supplier/partner, Inorganic Recycling, Inc. of Columbus, Ohio, that was developed by Leonard Sarko and Harold Greenberg. The facility, which is the first of its kind to process this type of waste stream, is also the first in the nation to receive the acknowledgement of the U.S. EPA that it is a true recycling process for this type of waste.

Brian Westfall, representing U.S. EPA Region V's pollution prevention research branch in Cincinnati, stated, "The American public and the U.S. EPA look to industries who create hazardous wastes to be creative also in finding methods to recycle these materials rather than returning them to the environment. Delco Products and Inorganic Recycling are to be congratulated for their proactive efforts and their outstanding accomplishments."

In remarks prepared for delivery at the ribbon cutting, Greenberg of IR, said, "The importance of a strong, positive government commitment to private-sector partnership must be recognized by all who want a cleaner environment. American industries and technology, generating problem solvers like Inorganic Recycling, Inc., can solve these problems for the United States and the rest of the world."

Delco Products General Manager Gerald A. Collins stated: "General Motors, as an environmentally responsive community partner, is an industry leader in waste minimization. The Moonrock Project is just one of many examples of our efforts to protect the environment. The success of the Moonrock Project opens a new chapter in GM's ongoing efforts to eliminate inorganic wastes. This technology is broadly applicable to heavy-metal wastes and can, therefore, provide benefits to many other industries and communities throughout America."

DALLAS (MAY 21) PR NEWSWIRE - Dallas based Publishers Equipment Corp. today announced a net loss of $1,158,000, or 24 cents per share, on revenues of $17,454,000 for the first quarter of 1990. These results compare to net income of $332,000, or 8 cents per share for the first quarter of 1989.

In announcing the first quarter results, Evans Kostas, chairman and chief executive officer, cited the adverse effect on financial performance of continued softness in the domestic large press business. All equipment suppliers have been negatively impacted as a drop off in newspaper advertising revenues caused prospective customers to defer or reevaluate capital expenditure progams. The company's first quarter 1990 profitability was further affected by costs in excess of original estimates on certain double-width equipment contracts.

Revenues for the first quarter 1990 increased principally as a result of the acquisition of the Solna Web single-width operations effective September 1989.

PUBLISHERS EQUIPMENT CORPORATION

	Three Months Ending March 31,	
	1990	1989
	(Unaudited; in thousands)

#90141p0547 05/21/1990 ~PR Newswire

WASHINGTON (MAY 21) PR NEWSWIRE - Peter H. Monroe today was appointed as president of the Oversight Board, effective June 11.

Monroe comes to the Oversight Board from the Department of Housing and Urban Development (HUD), where he was the general deputy assistant secretary for housing/deputy FHA commissioner since May 1989.

"Peter Monroe's extensive experience in real estate and finance make him an excellent choice to assume this critical leadership role at the Oversight Board," said Secretary of the Treasury Nicholas Brady, chairman of the Oversight Board. "Monroe's expertise will be a great asset as the Resolution Trust Corporation faces the challenge of disposing of its inventory."

Secretary of HUD Jack Kemp noted: "During his service at HUD, Peter Monroe has been the chief operating officer of HUD's housing programs, and has had a key role in implementing the much needed reforms of HUD's insured and assisted housing programs. He will provide leadership and experience to the Oversight Board."

Monroe will replace William Taylor, staff director of the Division of Banking Supervision and Regulation at the Board of Governors of the Federal Reserve System, who has been acting president of the Oversight Board since early February 1990.

Before joining HUD last year, Monroe was president of Rutenberg Commercial Developers in Clearwater, Fla. Monroe served with Rutenberg since 1978, where he held various positions, including independent consultant, executive vice president and vice president.

From 1973 to 1978, Monroe worked for U.S. Home Corporation in Clearwater, Fla., as assistant to the chairman, Charles Rutenberg, and later as corporate counsel.

Monroe's related business experience includes serving as a director of Republic Bank in Clearwater, Fla., for nine years. He is a member of the Florida and Michigan bars as well as a certified general contractor and registered real estate broker in Florida.

The Oversight Board formulates the policy, approves the funding, and provides the general oversight of the Resolution Trust Corporation (RTC), the agency responsible for resolving the nation's failed thrifts.

MOUNT CLEMENS, MI (MAY 21) PR NEWSWIRE - Richard P. Kughn, chairman of the board and chief executive officer of Lionel Trains, Inc., today announced the appointment of Nicholas J. De Grazia as president and chief operating officer of the 90-year-old toy company.

De Grazia has served as vice president and treasurer of the University of Detroit since 1981. He also served as president of the university's two for-profit subsidiaries, Polymer Technologies, Inc. and the Florence Development Company.

He succeeds Arthur L. Peisner, who resigned as president from Lionel Trains last week, but remains as a consultant.

"We are extremely pleased that Nick is joining us," Kughn said. "He will be a tremendous asset to the future of Lionel."

Kughn purchased Lionel Trains, Inc., the nation's largest manufacturer of electric toy trains, in 1986.

De Grazia is a 1965 graduate of St. Mary's College, Winona, Minn. He earned a master's degree in economics from the University of Detroit in 1967, and Ph.D. in the same subject from Michigan State University in 1974.

#90141p0552 05/21/1990 ~PR Newswire

ST. LOUIS (MAY 21) PR NEWSWIRE - Engineered Support Systems, Inc. (NASDAQ: EASI), today reported financial results for the second quarter and the six months ended April 30, 1990.

The manufacturer of military ground support equipment reported consolidated revenues for the three months ended April 30, 1990, were $15.4 million, compared with $13.5 million for the second quarter of fiscal 1989. The consolidated net income was $112,000, or 3 cents per share, for the second quarter of fiscal 1990. This compares with net income of $406,000, or 12 cents per share, for the second quarter of 1989.

Michael F. Shanahan, Sr., chairman and chief executive officer, commented, "While revenues for the second quarter of 1990 were higher than the prior

year, results for the quarter were lower due primarily to a lower overall gross margin on the mix of products produced. In addition, the second quarter was negatively impacted by delays in production start-up on several key programs and a delay by the government in exercising options for additional units on a current contract. We have produced over 6,000 of these units without interruption of production and had anticipated producing several thousand more units this year."

Consolidated net revenues for the six months ended April 30, 1990, were $27.9 million, compared with $23.2 million for the comparable period of 1989. The consolidated net income for the six months was $244,000, or 7 cents per share compared with earnings of $70,000, or 2 cents per share reported for the same period of 1989.

"We continue to believe that the ground support market is an attractive segment of the overall defense industry, and we are aggressively marketing our products to all branches of the military. Our backlog as of April 30, 1990 was $111 million," Shanahan said. "In addition, we continue to seek business opportunities in the commercial market place."

Engineered Support Systems, Inc., produces a broad range of ground support equipment for the military. Products include heaters and air conditioners; water and petroleum distribution systems; nuclear, biological and chemical defense systems; and other support equipment.

DALLAS (MAY 21) PR NEWSWIRE - Southmark Corp. (NYSE: SM) today reported results for the third fiscal quarter and nine months ended March 31, 1990.

For the three months ended March 31, 1990, Southmark reported net loss of $59 million, versus net loss of $1.0 billion in the comparable period of fiscal 1989. Revenues for the fiscal 1990 quarter totalled $268 million, compared with $406 million during the like period a year earlier.

For the nine months, the company reported net loss of $207 million, compared with net loss of $1.1 billion for the nine months ended March 31, 1989. Revenues for the first nine months were $791 million, versus $1.5 billion in the first nine months of fiscal 1989.

The loss in the third quarter is attributable to a combination of factors, including greatly reduced real estate sales. Additionally, the company received reduced revenues from management fees and lease payments from rental properties, as well as reduced interest income. These revenue reductions were partially offset by reductions in general and

administrative expenses due to the sale of businesses and further reductions in staff, as well as the benefit derived from the non-accrual of $100 million of interest on Southmark's unsecured indebtedness during the bankruptcy proceeding. The company also incurred costs associated with its reorganization activities including increased financial advisory, accounting and legal expenses arising out of the bankruptcy proceeding.

Southmark is continuing its business operations under Bankruptcy Court supervision as it attempts to obtain confirmation of a plan of reorganization. The plan calls for reorganized Southmark to liquidate most of the company's assets, with the exception of its wholly owned thrift subsidiary, San Jacinto Savings Association.

As previously reported, Southmark has entered into a Settlement Agreement with the Office of Trift Supervision which provides for the company to contribute $100 million in assets to San Jacinto, subject to certain conditions including confirmation of Southmark's plan of reorganization. As of March 31, San Jacinto reported negative shareholders' equity of $50.8 million and regulatory capital below minimums required by law. San Jacinto is in the process of implementing a business plan designed to improve the institution's financial position through selected asset sales and a renewed emphasis on its core thrift operations.

Southmark, headquartered in Dallas, is a real estate and financial services company operating under Chapter 11 of the U.S. Bankruptcy Code.

BOCA RATON, FLA. (MAY 21) PR NEWSWIRE - Patrick Sessions, president of Arvida's Weston Division, has resigned his position to pursue personal interests, effective in June.

The announcement was made by Ernest M. (Bud) Miller Jr., president of Arvida Company. Miller also announced that James Motta, currently president of Arvida's Palm Beach Division, will assume responsibility for the Weston Division.

"Pat has been an important part of Arvida for more than nine years and a significant factor in the remarkable success enjoyed at our Weston community," said Miller. "The company wishes him success in the future."

Sessions joined Arvida in February, 1981 and has held a number of management positions in the company. In 1987, he assumed responsibility for development of the company's 10,000 acre Weston community in Broward County.

Arvida, founded in 1958 and headquartered in Boca Raton, is a national developer of more than 50 successful communities throughout the country. The company currently has major communities in Florida, Georgia, North Carolina, Texas and California.

CHARLESTON, W.VA. (MAY 21) PR NEWSWIRE - The board of directors of Key Centurion Bancshares Inc. (OTC: KEYC), West Virginia's largest bank holding company, at the May 21, 1990, monthly meeting, declared a quarterly dividend of 15 cents per share.

The dividend will be paid on July 2, 1990, to shareholders of record on June 12, 1990.

Key Centurion recently announced definitive merger agreements with the boards of Southern Bankshares Inc. and Spectrum Financial Corp. Southern is a $300 million asset, two-bank holding company located in Beckley, Raleigh County and Oak Hill, in adjacent Fayette County, W.Va. Spectrum is also a two-bank holding company located in Wheeling, Ohio County, and New Martinsville, Wetzel County, W.Va. with $264 million in assets. Southern and Spectrum are West Virginia's 12th and 14th largest bank holding companies based on year-end 1989 results. On a combined pro forma basis, Key Centurion would close on $3 billion in commercial bank assets and $1.3 billion in discretionary trust assets and almost $2 billion in total trust assets with the completion of these two proposed mergers.

Key Centurion has banking subsidiaries with 45 offices in West Virginia and Kentucky, operating as: Cardinal State Bank, NA, Beckley; The Central National Bank of Buckhannon, Buckhannon; Charleston National Bank, Charleston; Union National Bank of West Virginia, Clarksburg; The First Huntington National Bank, Huntington; The Lincoln National Bank of Hamlin, Hamlin; The National Bank of Logan, Logan; Boone National Bank, Madison; First National Bank in Philippi, Philippi; Citizens National of Point Pleasant, Point Pleasant; Citizens National Bank of St. Albans, St. Albans; Nicholas County Bank, Summersville; Wayne County Bank, Wayne; The National Bank of Commerce of Williamson, Williamson, all in West Virginia and First National Bank of Pikeville, Pikeville, Ky.; and Reliable Mortgage Co. with 11 offices in West Virginia, Maryland, and Ohio.

GARLAND, TX (MAY 21) PR NEWSWIRE - Old Spaghetti Warehouse's (AMEX: OSW) 18-year track record of consecutive sales growth is one of the major selling points as the casual Italian restaurant chain embarks on its franchising program.

"We're offering a concept that has shown it can sustain long term profitable growth," said Robert R. Hawk, founder and president. He pointed out that company-owned stores over 15 years old continue to enjoy traffic and sales increases. Presently, the company operates 15 stores in eight states, with average annual unit sales volumes exceeding $2.5 million. All the 400-plus seat restaurants, except one, operate in renovated buildings in center city areas.

The company plans to franchise center city locations in markets with a minimum population of 300,000. "Because most food service operations have gone to the suburbs, downtown provides an untapped market segment with little or no competition," he said. The "destination" concept has shown that customers can be attracted back downtown. There is an initial franchising fee of $35,000, and continuing royalities of 3-1/2 percent of sales.

Hawk cautioned that a Spaghetti Warehouse is not for just any entreprenuer. Two important criteria the company will look for are a strong financial statement and a minimum two-years active involvement in foodservice as an owner or operator. "Our high-volume concept and operational standards require a professional with extensive foodservice experience and knowledge," he said.

The family-type "destination and special event" concept features classic Italian food, moderate prices, and a nostalgic decor package of authentic antique furnishings and memorabilia.

In addition to growth through franchising, the $34 million publicly- held chain will continue to open company stores. A store in Little Rock, Ark. will open this fall followed by three or four additional openings in other cities during the following 12 months.

NEW YORK (MAY 21) PR NEWSWIRE - Building upon Microsoft's Windows environment, Zenith Data Systems (ZDS) today announced that it is factory-installing Asymetrix Corp.'s ToolBook 1.0 on the hard disk drives of its '386-based desktop personal computers (PCs). ToolBook is a software construction set that allows users to build custom applications quickly, without traditional programming languages.

"We're advancing the definition of the PC by providing a complete graphical computing environment, not merely hardware," said John P. Frank, ZDS president and chief executive officer. "Toolbook will allow our customers from business and academia to get the most out of the Windows environment and gain more control over applications the moment they turn on their PC.''

According to Stephen C. Wood, Asymetrix vice president, ''ZDS has always been a pioneer in providing graphical user interfaces to its customers. By providing ToolBook across its high-end desktop systems, ZDS will have access to new markets and its users will have more application customization capabilities.''

As part of its graphical user interface platform, ZDS also will preload Microsoft Windows 3.0 and MS-DOS 4.0, plus bundle a Microsoft Mouse, with all '286- and '386-based desktop systems. ZDS is offering these GUI products at no additional charge. Their combined suggested retail price exceeds $700.

ZDS, a Groupe Bull company, is a leading manufacturer and marketer of portable and desktop microcomputers and monitors for single- and multi-user applications. With headquarters in Mount Prospect, Ill., and principal final assembly operations in St. Joseph, Mich., ZDS has manufacturing and sales facilities in more than 20 countries.

#90141p0585 05/21/1990 ~PR Newswire

PHILADELPHIA (MAY 21) PR NEWSWIRE - On May 18, 1990, the U.S. Environmental Protection Agency (EPA) issued a unilateral order to the Colonial Salvage & Scrap Co. Inc. of Philadelphia to restrict company access to a property at 30th Street and Penrose Avenue in Philadelphia owned by the Philadelphia Electric Co. (NYSE: PE) and leased to Colonial.

The order was issued under the authority of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (also known as "CERCLA" or "Superfund") and the Resource Conservation and Recovery Act ("RCRA") as amended and takes effect immediately.

The order requires that Colonial and its agents refrain from entering the site except upon receipt of permission from EPA. Removal of any trucks, trailers or other equipment by Colonial must also be approved by the agency.

EPA ordered the access restriction to prevent interference with the ongoing cleanup, to protect the health of workers who are not appropriately trained to Occupational Safety and Health Administration (OSHA) standards and to provide Colonial an opportunity to remove vehicles and other equipment from the site in a way that does not threaten the public health and welfare or the environment. EPA additionally seeks to prevent the movement of any hazardous waste that may not be properly packaged, transported or disposed of off-site.

EPA was called to the site Saturday, May 5, 1990, by the Philadelphia Fire Department whose Hazardous Materials Unit discovered more than 60 drums of suspected hazardous wastes. The property owner, Philadelphia Electric Co., which leased the site to Colonial, responded to a May 8 EPA order concerning the cleanup of the site by hiring an EPA-registered environmental contractor. The site work plan for the cleanup is now under review by EPA.

Failure to comply with the provisions of the access order will subject Colonial Salvage & Scrap to civil penalties of up to $25,000 per day and up to three times the amount of money spent by EPA to respond to any incident occurring on-site due to violation of the order.

FAIRFAX, VA (MAY 21) PR NEWSWIRE - CACI Marketing Systems, a division of CACI International Inc. (NASDAQ: CACIA), today announced it has released its 1990 marketing and demographic diskettes and magtapes. This year's product line -- a vast increase over previous years' -- includes 11 different file folders, 70 different files and nearly 500 individual data items.

For the first time, users will have the option to work with either individual data items, files or complete file folders from CACI's exhaustive demographic and marketing databases. Folders, files and data items range from standard demographic information like age, sex and income data to 20 different consumer product potential indices.

CACI's diskette product line gives business professionals the flexibility to manipulate marketing data in a spreadsheet or database environment. Users simply order folders, files or data items by ZIP Codes, counties, tracts, MSAs, ADIs, DMAs or radii. The selected data are then imported into a variety of software packages. In addition, all data are available on magnetic tape.

"Once again, CACI Marketing Systems has introduced a number of industry firsts with our 1990 diskette products," states Gregory Bradford, executive vice president. "No longer will clients have to be pigeon-holed into standardized diskette products. Instead our customers can choose from among 500 demographic data items to design a custom product at off-the-shelf savings."

CACI, in its 28th year, is an international high-technology and professional services corporation. CACI is a leader in advanced information systems, engineering, logistics, proprietary software and market analysis. CACI provides worldwide services in support of national defense agencies, civil government and commercial enterprises.

#90141p0599 05/21/1990 ~PR Newswire
CALHOUN, GA (MAY 21) PR NEWSWIRE - Horizon Industries Inc. (NASDAQ: HRZN) announced today that its Board of Directors has adopted a Shareholder Rights Plan in which common stock purchase rights will be distributed as a dividend at the rate of one Right for each common share held as of the close of business on June 1, 1990.

The Rights Plan is designed to deter coercive takeover tactics and to prevent an acquiror from gaining control of the Company without offering a fair price to all of the Company's shareholders. The Rights will expire on May 21, 2000.

In making the announcement, Peter R. Spirer, Chairman of the Board and Chief Executive Officer, said the Plan is intended to protect the interests of the Company's shareholders in the event the Company is confronted with unilateral, coercive or unfair takeover tactics which the Board believes are not in the best immediate and long-term interests of the Company's shareholders, employees and customers."

Spirer stressed, however, that the Plan "is not intended to prevent an acquisition of the Company on terms that are favorable and fair to all shareholders, and will not do so. The Plan is designed to deal with the very serious problem of unilateral actions by hostile acquirors which are calculated to deprive the Company's Board of Directors and its shareholders of their ability to determine the destiny of the Company."

In this regard Spirer noted that the Board of Directors of Horizon believes that the best interests of the shareholders of Horizon will be served by Horizon's continuing as an independent public company. Spirer also noted that he, members of the Board of Directors, and the management and his family own shares and options equal to approximately 35 percent of those outstanding.

Each Right will entitle shareholders, in certain circumstances, to purchase shares of Common Stock of the Company. The Rights will be exercisable only if a person (1) becomes an "Acquiring Person" as defined in the Agreement by acquiring beneficial ownership of 20 percent or more of the Company's Common Stock or (2) commences a tender or exchange offer upon consummation of which such person would become an "Acquiring Person".

If any person becomes an "Acquiring Person", then each Right not owned by such person or certain related parties will entitle its holder to purchase $70.00 worth of Common Stock for $35.00. However, the Rights will not become exercisable if Common Stock is acquired pursuant to an offer for all shares at a price and on terms determined by at least a majority of the directors, (other than those who are associated with the Acquiring Person), to be fair to the shareholders and otherwise in the best interests of the Company and its shareholders. In addition, if, during the time that there exists an "Acquiring Person", the Company is involved in a merger or other business combination transaction with another person in which its Common Stock is changed or converted, or sells 50 percent or more of its assets to another person, each Right will entitle its holder to purchase, at the Right's then current exercise price, shares of common stock of such other person having a value of twice the Right's exercise price.

The Company will generally be entitled to redeem the Rights at $.01 per Right at any time until the tenth business day (subject to extension) following public announcement that a person has become the beneficial owner of 20 percent or more of the Company's Common Stock.

Details of the Shareholder Rights Plan are outlined in a summary of the Plan which will be mailed to all shareholders.

#90141p0602 05/21/1990 ~PR Newswire

WAUKESHA, WI (MAY 21) PR NEWSWIRE - Reddi-wip(R) Non-Dairy, the brand of whipped aerosol topping, is now healthier, creamier and thicker than ever before, thanks in part to the use of cottonseed and soybean oils in place of tropical oils.

Palm kernel oil, the tropical oil removed from Reddi-wip Non-Dairy, is a highly saturated fat. Saturated fats may contribute to high serum cholesterol levels and, because of that, are associated with an increased incidence of coronary heart disease.

"We reformulated the brand because of increased consumer interest in healthier non-dairy toppings," said Tom Hickey, Reddi-wip product manager. "An unexpected side benefit was the fact that the new non- tropical oil blends we used permitted use of a new group of stabilizers that makes the new Reddi-wip Non-Dairy thicker and more creamy -- in addition to being more healthful."

The "new" Reddi-wip contains the same amount of calories as the previous formulation. The new formulation contains zero levels of cholesterol.

Beatrice Cheese, Inc., a subsidiary of Beatrice Companies, Inc., and makers of Reddi-wip, have replaced palm kernel oil with cottonseed and soybean oils, both of which contain unsaturated and polyunsaturated fats. Diets high in polyunsaturated and low in saturated fats have been shown to contribute to low serum cholesterol levels and a corresponding decrease in

the incidence of coronary heart disease.

Nationally distributed Reddi-wip is available in the refrigerated dairy case section of the supermarket.

ARLINGTON HEIGHTS, IL (MAY 21) PR NEWSWIRE - Motorola Inc.'s (NYSE: MOT) Radio-Telephone Systems Group announced today that Telefonica's TACS 900 MHz analog cellular system for the city of Madrid is now in commercial service.

This is the first phase of the nationwide cellular network commissioned to Telcel last year and it is part of Telefonica's mobile communications investment plan valued at more than $600 million.

Telcel is a Spanish joint venture between Motorola and Amper, the leading industrial electronic company in Spain. The second phase, to be completed by year end, will cover Madrid's greater metropolitan area and other major urban areas throughout Spain, to reach 40 percent of the population.

"Some of the advantages of the new system are increased quality, access to portability and a greater offering of phones at competitive prices," said Enrique Used, general director of Telefonica.

Spain currently has about 34,000 cellular subscribers and expects this figure to reach 80,000 at year end, when the new system's second phase will be completed.

"Motorola's TACS 900 MHz systems are used in several other countries, among which are Hong Kong and the United Kingdom, where additional features, increasing hand-held portability and fast growing demand confirm the flexibility and capability of this technology," said Bernard R. Smedley, senior vice president of Motorola Inc. and general manager of the Radio-Telephone Systems Group.

Motorola has been awarded several cellular system contracts in Europe, including the GSM or Pan-European Digital Cellular validation systems for Denmark, Finland, Norway, Sweden, Spain, the United Kingdom and West Germany; GSM pre-operational systems in Spain and the U.K.; GSM first phase operational system in Sweden and the U.K.; and TACS analog systems in Austria and the U.K.

Motorola is the world's leading designer, manufacturer and supplier of cellular systems, infrastructure equipment and subscriber products.

SALT LAKE CITY (MAY 21) PR NEWSWIRE - Phillips 66 Company announced plans today to discontinue the sale of leaded regular gasoline at the end of May from its refinery terminal (distribution point) here.

Jim Branch, Phillips 66 Wood Cross (Utah) Refinery manager, said, "This is a voluntary action taken by Phillips 66 which supports the direction and goals of Governor Bangerter's Clean Air Commission -- better air quality for Utah citizens living in the Wasatch Front."

By discontinuing the sale of leaded fuels in the Salt Lake City area, Phillips 66 will further reduce lead in the atmosphere. More than four tons of lead compounds per year will be removed from Phillips 66 fuel, based on its 1989 sales in this area. Recent air quality data from the Environmental Protection Agency shows emissions of lead pollutants are down more than 90 percent nationwide since 1978.

"I am extremely pleased with this announcement," said Governor Norman Bangerter. "This is a significant step toward cleaner air for Utah and indicates Phillips 66 commitment to an improved environment."

Phillips 66 will supply three unleaded grades of gasoline at its Salt Lake City terminal after the discontinuance of leaded regular. They are SuperClean Premium Unleaded at 90 octane, SuperClean Unleaded Plus at 87 octane and SuperClean Unleaded regular at 85 octane.

Phillips 66 recognizes a need to provide a variety of fuels in different octane ranges to match specific engine and driving needs, the company reported. Altitude, temperature, load and acceleration can make a difference in a car's performance and octane requirements.

#90141p0620 05/21/1990 ~PR Newswire

FITCHBURG, MA (MAY 21) PR NEWSWIRE - ChemDesign Corporation (NASDAQ: CDCC), today announced that, following a mid-quarter review of operations, the outlook for this year's second quarter net sales appears relatively

level when compared with the $10.0 million reported for the prior year's second quarter and therefore below the $10.4 million reported for the first quarter of 1990.

Excluding sales from the discontinued Sulfur Dioxide product line, revenues are expected to be up approximately 10 percent over the prior year. The Sulfur Dioxide line was sold in the second quarter of 1989, at a pre-tax gain of $1.8 million, and manufacturing and sales were discontinued at Dec. 31, 1989.

The lack of revenue growth over the first quarter of 1990 is due primarily to a temporary slow-down, scheduled during the second quarter, in the AG product, partially offset by an increase in sales of Advanced Materials. Reprographic sales are expected to be about level with the first quarter, while electronic group sales continue to be strong and slightly up from the first quarter of 1990. The AG production slow-down parallels the customer's multi-week shutdown of its feedstock production plant for maintenance and capacity expansion. Production rates are forecasted to be higher than orignally planned during the second half of 1990, as well as for the year overall.

Richard E.T. Brooks, CEO of ChemDesign explained that basically: "Our efforts over the past year to increase manufacturing through-put, improve yields and backward integrate into key raw materials have been very successful and, as a result, we've seen much improved results at the gross profit line. In both the first and second quarters, our manufacturing rates for some products exceeded our sales rates. This will offer us the opportunity, beginning late in the second quarter, to make strategic changes in production as well as introduce new products, emerging from our laboratories, into commercial manufacture." Brooks also stated that "Overall, custom manufacturing inquiries and opportunities, both from existing and new customers, remain surprisingly strong in spite of the general slow-down in the chemical industry segment."

Jay R. LaMarche, CFO, cautioned analysts that: "The nearly 39 percent gross margin rate in the first quarter was a result of very high utilization of manufacturing resources coupled with a very favorable product mix, including a larger percentage of sales of toll manufactured products. We're not expecting to continue the 39 percent rate into the second quarter, although we continue to expect margin rates to remain at levels in 1990 generally higher than the prior year."

#90141p0621 05/21/1990 ~PR Newswire

GREENWICH, CT (MAY 21) PR NEWSWIRE - The following release on first-quarter sales for the Pechiney Group and Pechiney International is being issued today by Pechiney in Paris:

Pechiney Group

Consolidated sales for the Pechiney Group for the first three months of 1990 were FF 19,100 million, compared with FF 21,546 million for the same period a year ago.

The breakdown of consolidated sales by sector of activity is as follows (in millions of French francs):

	First Quarter	
	1990	1989
Packaging	6,857	7,187
Aluminum	5,321	5,951
Engineered Products	2,504	2,534
Other industrial activities	1,731	1,987
International trade	2,687	3,887
Total	19,100	21,546

Of the quarter-to-quarter decrease, FF 938 million was due to the decline in the average rate of exchange used for translating the results of group companies which report financial results in U.S. dollars. The first quarter 1990 rate of exchange was FF 5.74 to the dollar, versus FF 6.29 in the first quarter of 1989. With an identical exchange rate, the group's manufacturing sales in the 1990 first quarter would have been FF 17,184 million, compared with FF 17,659 million for the same period in 1989; total sales, including the International Trade sector, would have been FF 20,038 million, versus FF 21,546 million in the year- earlier period.

Pechiney International

Pechiney International's consolidated sales for the three months ended March 31, 1990, amounted to FF 10,399 million, compared with FF 11,509 million for the first three months of 1989. The breakdown of consolidated sales by sectors of activity is as follows (in millions of French francs):

	First Quarter	
	1990	1989
Packaging	6,862	7,188
Aerospace Components	1,511	1,601
Aluminum and Intl. Trade	2,026	2,720
Total	10,399	11,509

Of the quarter-to-quarter decrease, FF 833 million was due to the decline in the average rate of exchange used for translating the results of companies which report financial results in U.S. dollars. The first quarter 1990 rate of exchange was FF 5.74 to the dollar, versus FF 6.29 in

the first quarter of 1989. With an identical exchange rate, Pechiney International's consolidated sales in the 1990 first quarter would have totaled FF 11,232 million, compared with FF 11,509 million for the same 1989 period.

#90141p0625 05/21/1990 ~PR Newswire

WASHINGTON (MAY 21) PR NEWSWIRE - AT&T (NYSE: T) customers will receive special long-distance discounts this Friday to kick off the Memorial Day weekend as part of the company's "Talk About a Summer Time" promotion.

AT&T said today its customers can make direct-dialed out-of-state calls for just 11 cents per minute between 5 and 11 p.m. Friday.

During that time, a 10-minute direct-dialed call, to any other state in the country regardless of distance, will cost only $1.10. The special prices will be an average 28 percent lower than AT&T's already reduced evening prices.

AT&T said customers of its Reach Out(R) America calling plans who get discounts on evening calls will receive those discounts off the 11-cents-per-minute between 5 and 10 p.m. Friday. For Reach Out America customers, the nighttime calling period always begins at 10 p.m. instead of 11 p.m.

Customers of the Reach Out America plan with the evening discount receive 15 percent off AT&T's evening prices. Customers of the Reach Out America 24-Hour Plan receive a 25 percent discount off evening prices.

The reduced prices are the first in a series of long-distance specials that are part of AT&T's "Talk About a Summer Time" program. The promotion will include other discount calling days as well as sweepstakes and other summer-related activities. The company said it's offering the promotions as a special "thank you" to its customers.

AT&T noted that long-distance prices throughout the industry have dropped approximately 40 percent in the last six years. On average, the price difference among the major long-distance companies is about 5 percent, which amounts to pennies per call for an average long-distance customer.

"We hope Friday's special prices focus attention on how little it costs to use AT&T long-distance," said Margaret Barrett, division manager, Consumer Communications Services. "Even on a normal Friday, between the hours of 5 p.m. and 11 p.m., a direct-dialed coast-to-coast call costs less than 16 cents per minute."

The company noted that Friday will kick off a holiday weekend that will give consumers several opportunities to save on long-distance. AT&T's night/weekend rates will be in effect from 11 p.m. on Friday until 5 p.m. on Sunday. Direct-dialed, out-of-state calls in the continental United States during this period will cost less than 14 cents per minute.

Calls place during the evening, from 5 to 11 p.m., on Sunday will cost less than 16 cents per minute. Night/weekend prices will begin again at 11 p.m. Sunday.

AT&T's holiday prices will be in effect on Monday, Memorial Day. On holidays, AT&T's evening prices are in effect during normal daytime hours (8 a.m. to 5 p.m.) and stay in effect until 11 p.m.

The 11-cents-per-minute special on Friday evening does not apply to in-state or international calls.

#90141p0630 05/21/1990 ~PR Newswire

PORT HURON, MI (MAY 21) PR NEWSWIRE - Southeastern Michigan Gas Enterprises, Inc. (NASDAQ: SMGS) reported that its Southeastern Michigan Gas Company subsidiary received unexpected negative results from the Michigan Public Service Commission (MPSC) in two Gas Cost Recovery Reconciliation cases.

On Friday, May 18, 1990, the Michigan Public Service Commission (MPSC) issued orders in Case Nos. U-8632-R and U-8953-R which did not follow the recommendations of the two administrative law judges who presided over those cases. The order in Case No. U-8632-R requires Southeastern Michigan Gas Company to refund the principal amount $859,978 plus interest from Feb. 28, 1988 at 14 percent. This amount was determined by including natural gas transportation revenue in the company's 90/10 rule which requires a refund to customers above certain levels of revenue. The order in Case No. U-8953-R requires a reopening of the record for the apparent purpose of determining whether a refund under the company's 90/10 rule is required for the period ending February 28, 1989. The same issue of including transportation revenue in the 90/10 rule is likely to arise in the Gas Cost Recovery Reconciliation case for the period ending Feb. 28 1990.

The company and its attorneys are currently reviewing these orders to determine the course of action to be taken. The company expects to pursue an appeal of these orders either to the commission itself or to the

courts.

These unfavorable commission orders were not expected by the company and therefore no liabilities have been recorded for these refunds.

Southeastern Michigan Gas Company serves natural gas to approximately 79,000 customers in Michigan.

Enterprises is the parent company of six wholly owned subsidiaries: Southeastern Michigan Gas Company (Port Huron); Battle Creek Gas Company (Battle Creek, Mich.); Michigan Gas Company (Three Rivers, Mich.); Southeastern Development Company (Port Huron); Southeastern Financial Services, Inc. (Port Huron); and SEMCO Energy Services, Inc. (Port Huron).

BEAUMONT, TEXAS (MAY 21) PR NEWSWIRE - A Gulf States Utilities Co. (NYSE: GSU) official said the company is disappointed but not discouraged by today's U.S. Supreme Court ruling denying GSU's petition for a writ of certiorari in its ongoing legal battle with the Southern Co.

Texas-based GSU had sought a hearing before the court in its effort to modify a purchased power agreement with the Atlanta, Ga., utility company. A company official gave the following response to today's action:

"Our main legal avenue continues to be the breach of contract suit pending in U.S. District Court in Beaumont. The suit, filed in July 1986, contends that the Southern Co. voided the power purchase contracts by refusing to negotiate in good faith when we requested modifications to take into account changed circumstances.

"The discovery process has been going on for many months in that case, but a hearing date has not been set. In the earlier FERC decision that led us to request the writ of certiorari, the FERC acknowledged that the breach of contract matters were beyond their scope of authority."

The contracts between GSU and the Southern Co. were scheduled to expire in 1992.

#90141p0647 05/21/1990 ~PR Newswire
MURRAY HILL, NJ (MAY 21) PR NEWSWIRE - BOC Health Care today announced the formation of a joint venture company between its medical equipment division, Ohmeda, and NEC San-ei Instruments, Ltd., a subsidiary of the NEC Corporation.

Headquartered in Tokyo, the new company, Ohmeda & NEC San-ei Ltd., will

leverage NEC San-ei's current market leadership in Japan with Ohmeda's worldwide critical care expertise and extensive medical equipment product line to strengthen its market position in Japan.

The joint venture was capitalized 55 percent by The BOC Group and 45 percent by NEC San-ei Instruments, Ltd.

M. Watanabe, director of NEC San-ei, will be appointed president and representative director and K. Awoki, Manager of Ohmeda Japan, will be appointed vice president and representative director.

NEC San-ei Instruments, Ltd., is responsible for the medical equipment business of NEC Group. Its products are mainly multi- parameter patient monitors, and its product line is completely complementary to Ohmeda's. The company has four factories where R&D and production activities take place, and its products are marketed throughout Japan by eighteen regional sales offices.

Ohmeda's product line includes anesthesia systems, such as the Modulus II Plus and Excel systems; respiratory care products, such as the CPU-1 and Advent ventilators; and non-invasive patient monitoring systems.

BOC Health Care, Inc., through its group of companies, manufactures and markets a variety of critical care products and services worldwide. Its equipment, therapies, and pharmaceuticals are used in operating and recovery rooms, intensive care units, and private homes. Each of its four health care businesses -- Ohmeda, Anaquest, Glasrock Home Health Care and Viggo-Spectramed -- is a market leader, and they collectively generate revenues of a billion dollars annually.

The BOC Group -- based in Windlesham, U.K., and Murray Hill, New Jersey -- is an international corporation with operations in more than fifty countries around the world. Its principal businesses are industrial gases, health care products and services, and high vacuum technology.

MURRAY HILL, NJ (MAY 21) PR NEWSWIRE - The carbon dioxide division of Airco Gases has completed the divestment of its dry ice business with the sale of its Southwest dry ice operations to Carbonic Reserves of Amarillo, Texas. Last month, Airco Carbon Dioxide sold its Midwest dry ice business to Pain Enterprises.

The sale to Carbonic Reserves includes the operations at Cortez, Colo.; Phoenix, Ariz.; Enid, Okla.; and Corpus Christi, Texas. The transaction

provides for Airco Carbon Dioxide to continue to supply these dry ice producing locations with its liquid CO2 requirements. Financial details were not disclosed.

With this acquisition, Carbonic Reserves becomes the largest distributor of dry ice in the Southwest. Employees associated with the divested operations are expected to join the Carbonic Reserves organization.

Glenn Fischer, president of Airco Carbon Dioxide commented "that both Airco and our customers will benefit from the sale. The customers will have the opportunity to be served by a highly capable, experienced dry ice distributor while Airco, having divested the remaining dry ice assets acquired as part of the Amerigas acquisition, can now focus all of its efforts on the continued growth and development of its liquid carbon dioxide business."

Airco Gases is a leading manufacturer and supplier of industrial gases and gas handling technology in the United States. The company's primary gas products include liquid and gaseous nitrogen, oxygen, argon and carbon dioxide, helium, hydrogen, medical gases and a variety of rare and special gases.

Airco is a member of the multinational BOC Group, which operates in more than 50 countries and had sales of nearly $5 billion last year.

MINNEAPOLIS (MAY 21) PR NEWSWIRE - FSI International Inc. (NASDAQ: FSII), a supplier of capital equipment for the semiconductor industry, today announced that it expects a loss for the third quarter of fiscal 1990, ending May 26.

Richard Jackson, FSI president and chief executive officer, stated, "The cyclical slowdown in the semiconductor equipment market has continued to affect FSI's revenues in the third quarter. At this point, we anticipate sales of approximately $14 million, versus $15 million in the fiscal 1989 third quarter. Profits will be affected primarily by the lower sales volume, a change in product mix and additional costs for the previously announced discontinuance of the Convac photoresist product line." Last year, FSI reported third-quarter net income of $811,000, or $.20 per share.

Jackson pointed out that FSI is continuing efforts to improve performance through consolidation of some positions and operating expense reductions. However, funding remains in place for essential new product developments. Also, strong efforts are continuing in sales and marketing to increase

incoming orders.

"Industry analysts," Jackson indicated, "expect the present slowdown to be short-lived. The order outlook for semiconductor equipment companies in calendar 1991 and 1992 remains strong, with a projected rebound in sales volume of approximately 20 percent per year."

FSI International, Inc., is a leader in producing automated surface conditioning equipment for processing silicon wafers. The company develops, manufactures, markets and services centrifugal spray processing systems, photoresist processing equipment, gas processing systems, and chemical management and delivery systems for use in the fabrication of advanced semiconductor integrated circuits. FSI's customers include semiconductor manufacturers located throughout North America, Europe, Japan and the Far East.

ORLANDO, FL (MAY 21) PR NEWSWIRE - A 10-year multi-million-dollar agreement was announced today by AT&T, Universal Studios Hollywood, and Universal Studios Florida. The agreement includes AT&T sponsorship of the spectacularly innovative three-dimensional, "E.T. Adventure" attractions based on the most successful film of all time, and AT&T's "Coming Attractions," futuristic home entertainment centers at both movie-themed entertainment facilities.

The "E.T. Adventure" debuts next month at Universal Studios Florida and will open at Universal Studios Hollywood in June 1991. The attraction will utilize state-of-the-art cinemations and interactive techniques immersing guests in the dramatic climax of the film "E.T. -- The Extra-Terrestrial," sending them soaring through space on an inter-galactic bike ride to E.T.'s endangered home planet.

The multi-million-dollar package includes sponsorship of "E.T.'s Adventure" and the creation of AT&T's "Coming Attractions" centers at both studios. At these centers, an estimated 12 million visitors annually will be exposed to AT&T's innovations in entertainment technology, interact with exciting new AT&T network services like video teleconferencing, and peer into the future of in-home entertainment.

Steven Spielberg and MCA/Universal initially worked with AT&T Bell Laboratories to construct, from common household items, the interstellar communicator E.T. used in the film.

"By teaming with MCA/Universal and Steven Spielberg, we have the opportunity to showcase our past, present and future commitment to technologies that entertain and help people to communicate," said AT&T chairman Robert E. Allen.

Sid Sheinberg, president of MCA (Universal's parent company) said, "We are delighted to be in business again with AT&T, and we look forward to a long and productive relationship."

The E.T. attraction will mark the only time the public has seen E.T. "live " with the exception of his 1986 appearance with John Williams at the Hollywood Bowl. The Academy Award-winning Williams, who scored the film's music, has developed an original score for the attraction.

"It is exciting for me to personally take part and see to it that the warm and joyous qualities of E.T. be brought to life in such an innovative and special attraction," said Spielberg, who originally brought E.T. to the screen and is creative consultant to Universal Studios Florida.

Universal Studios Florida is $640 million joint venture between MCA, Inc. and the Rank Organisation and is the largest working motion picture and television studio outside Hollywood.

MURFREESBORO, TN (MAY 21) PR NEWSWIRE - Hubert L. McCullough, Chairman and Chief Executive Officer of Pricor Incorporated (NASDAQ: PRCO), today announced that Amy S. Harrison, Executive Vice President and founder of the firm's Advocate Schools subsidiary, has been elevated to Vice Chairman and that former Tennessee Commissioner of Corrections Stephen H. Norris has been named President and Chief Operating Officer of the company, replacing Gil R. Walker who has resigned.

The company also named a new Treasurer and Chief Financial Officer, with William J. Ballard, former Executive Vice President of Rodgers Business Interests, Ltd. in Nashville, joining the company to fill a position that has been vacant since January.

McCullough said Walker's resignation was a mutual decision. "Gil Walker has made numerous contributions to our company during a critical time in its growth," McCullough said, "and we appreciate his efforts and leadership during this time.

"We are excited at the potential of our new leadership alignment," McCullough said. "Amy Harrison is a founder of our Advocate Schools operation and has been the driving force in our successful growth in California. We will benefit greatly from expansion of her corporate

responsibilities as Vice Chairman, bringing her abilities to bear on a broader level."

For the past two years Norris has been Executive Director of the Tennessee Business Roundtable, a business alliance of 150 of the state's top companies.

A 14-year veteran of state government, he was appointed Commissioner of the Tennessee Department of Corrections in 1985 and was reappointed to the cabinet position in January 1987 by Governor Ned McWherter.

Pricor Incorporated is the nation's leading for-profit private provider of special educational and treatment services for youth. The company is also one of the oldest and largest private adult correctional services companies. Pricor has contacts in Alabama, California, Tennessee, Texas and Virginia and business interests in the United Kingdom.

EL PASO, TX (MAY 21) PR NEWSWIRE - Continental Airlines today announced it intends to begin the only airline service between El Paso and Mexico. The daily nonstop service between El Paso and Mexico City will begin July 1.

Flight 6033 will depart El Paso at 8:30 p.m. and arrive in Mexico City at 10:50 p.m. On the return, flight 6602 will depart Mexico City at 5:38 a.m. and arrive in El Paso at 8:00 a.m.

"Continental is committed to develop this growing market," said Luis Del Rio, Continental's commercial director for Mexico and Central America. "These flights are timed to accommodate the business traveler and give them a full day in either city."

Continental offers more flights to Mexico than any other U.S. airline with 168 weekly flights between the two countries. It offers nonstop flights to nine cities in Mexico from the United States.

El Paso is the fourth U.S. gateway to Mexico for Continental in Texas, and the seventh in the United States.

Continental offers daily nonstop service from El Paso to Albuquerque, N.M. Denver, Houston and Tucson, Ariz.

Continental will operate the daily service to Mexico City with Boeing 737-300 aircraft.

The new service is pending routine approval from the Mexican government.

BRANFORD, CT (MAY 21) PR NEWSWIRE - Neurogen Corporation (NASDAQ: NRGN) today reported financial results for its first quarter ended March 31, 1990.

Income was $188,936 compared with income of $58,149 for the same quarter a year ago. Net loss for the period was $639,927, or $.11 per share, compared with a net loss of $195,953, or $.04 per share, a year ago. The larger net loss was in-line with expectations and reflects planned increases in expenses as Neurogen continues to assemble a critical mass of scientists and completes construction of its new research and development facility.

Neurogen Corporation is a development stage biopharmaceutical company which is engaged in the development of novel and innovative therapeutic products in the field of neuroscience based on advances in molecular biology, medicinal chemistry and neurobiology in order to treat problems of anxiety, depression, psychosis, sedation and various neurodegenerative disorders. The company, located in Branford, commenced operations in July 1988.

DOMINGUEZ, CA (MAY 21) PR NEWSWIRE - Pic 'N' Save Corporation (NASDAQ: PICN) today announced that it has commenced the auction process to sell the company and is extending the deadline for submission of bids to July 15, 1990 from June 20, 1990. Pic 'N' Save said that it took this action to provide potential bidders additional time to review materials and arrange financing.

The company stated its financial advisors, Merrill Lynch and Goldman Sachs had compiled a list of more than 100 companies, individuals and other entities domestically and overseas and intends to contact potential buyers starting today.

"Data books on the company, containing both public and certain non-public information -- including projections -- have been completed and are ready to be sent to interested parties upon receipt of a signed confidentiality

agreement. Our focus until July 15 will be concentrated on actively seeking a buyer willing and able to pay a full and fair price for the company, the company said."

Pic 'N Save said that if such a buyer emerges, the board has indicated that it will sell the company.

In response to Girard's announcement today, the company stated that Pic N' Save's financial advisors had several conversations with Girard Partners over the weekend attempting to resolve issues in the confidentiality agreement. In those conversations, the company offered to make significant concessions to Girard Partners on the confidentiality agreement in order to induce them to participate in the bidding process, including a shortened standstill period and a waiver of its provisions to permit solicitations if no bids are received, as well as direct access to the company's board of directors and advisors to give Girard an opportunity to view the auction process personally. Thus far Girard has declined to sign the confidentiality agreement even with these modifications.

"It is our belief that if Girard Partners obtains control of the company the bidding process could be severely hampered. For example, other potential bidders may decline to participate in the bidding process because they will fear that Girard has the ability to review the precise terms of their proposals before having to decide whether to make a proposal of its own," Pic 'N' Save said.

Pic 'N' Save currently operates a chain of 190 retail stores in the Western and Southern United States and the New York metropolitan area. These stores specialize in new, close-out, variety general merchandise which is sold at substantial reductions from original retail prices.

NEW YORK (MAY 21) PR NEWSWIRE - An incensed Rupert Murdoch has a million dollars that says T.V. Guide is not for sale.

Murdoch today issued a million dollar challenge to Advertising Age magazine to back up a front-page story in its current issue that claimed Murdoch was sounding out prospective buyers for T.V. Guide.

In a conversation today with Rance Crain, editor-in-chief and publishing director of Advertising Age, Murdoch offered to pay Crain Publications $1 million if the story could be verified and if Crain's could bring forth anyone with whom News Corp. has had discussions. If support for the story could not be provided, Murdoch told Crain, he would expect Crain Publications to write News Corp. a check for a similar amount. Crain declined the offer.

Murdoch indicated that he was not surprised that Advertising Age would not accept the challenge, and that the story had no basis in fact. Murdoch also noted that there have been no discussions of a sale between either he or any News Corp. executives with anyone -- either in the publishing or financial community.

WASHINGTON (MAY 21) PR NEWSWIRE - The president and vice president of Anchor Savings & Loan Association, LaPorte, Ind., have been removed from their posts by the Office of Thrift Supervision (OTS) and prohibited from ever working for federally insured financial institutions without prior approval of the appropriate regulatory agency.

Joseph Plis, president and a director, and Richard Kowalczyk, vice president and a director, agreed to consent orders while denying any wrongdoing. OTS launched an examination of the thrift on May 15, based

on evidence indicating that the association's management had unsuccessfully attempted to bribe an OTS representative to improperly assist them in an attempt to merge the association.

The OTS representative immediately reported the attempted bribe, which led to the removal and prohibition of the Anchor executives. When confronted with the allegations, both decided to consent to the OTS orders of removal and prohibition.

At the suggestion of OTS, Anchor's board of directors has retained Citizens Federal Savings and Loan Association, Hammond, Ind., to provide interim management for Anchor. Anchor remains open for business as usual and deposits remain insured to the $100,000 legal limit.

As of Dec. 31, 1989, Anchor had assets of $9.4 million. These are the 33rd and 34th orders of removal and prohibition executed by OTS this year.

CHICAGO (MAY 21) PR NEWSWIRE - Selfix, Inc. (NASDAQ-NMS: SLFX) today reported that it has agreed in principle to acquire the assets of Independent Products Co., Inc. (IPC) of West Point, Pa., with sales of approximately $7 million.

The purchase is subject to a due diligence review of IPC by Selfix. IPC is a manufacturer of plastic houseware organizational products that it markets through channels of distribution similar to Selfix.

Meyer Ragir, chairman and CEO of Selfix, stated: "We believe that their products not only complement Selfix's existing product lines, but will benefit from our expertise in plastic manufacturing. This acquisition fits Selfix's strategy by enhancing our position in this category."

Selfix, Inc., based in Chicago, designs, manufactures and markets a broad range of consumer home products, including more than 300 housewares products and a line of plastic exterior shutters.

CINCINNATI (MAY 21) PR NEWSWIRE - Roto-Rooter, Inc. (NASDAQ: ROTO) today announced that a slate of 21 directors was elected at the company's annual meeting of stockholders. The slate included Richard L. Arquilla and

James A. Cunningham as new members. Arquilla is a vice president of Roto-Rooter Services Company, a subsidiary, and has responsibility for its Central Region. Cunningham is a director of The First Boston Corporation. Stockholders also approved a new stock option plan and ratified the continuation of Price Waterhouse as the company's independent accountants for 1990.

Addressing stockholders at the meeting, Edward L. Hutton, chairman of Roto-Rooter, reported that 1989 was a year marked with record revenues and earnings and closed a decade of excellent results. Among Roto-Rooter's highlights since it was acquired from the founding family in 1980 was a public stock offering in June of 1985.

Also addressing stockholders at the meeting was William R. Griffin, president of Roto-Rooter. Griffin emphasized that Roto-Rooter will continue to increase manpower and to invest in the development of its newer sources of business, the largest of which is plumbing repair and maintenance services.

Hutton concluded the meeting by stating that Roto-Rooter's operations are well positioned for long-term growth and that 1990 should be a year of continued good performance.

Following the meeting, Roto-Rooter's board of directors declared a quarterly cash dividend of ten cents per share on the company's common stock payable on June 11, 1990 to stockholders of record on June 1, 1990.

Roto-Rooter, Inc., through its 48 company-owned operations and approximately 650 independent franchises, is the largest nationally recognized provider of sewer and drain cleaning services in the United States. The company, headquartered in Cincinnati, also offers plumbing repair services, industrial and municipal pipe cleaning services, and consumer products.

CLEVELAND (MAY 21) PR NEWSWIRE - Globe Metallurgical Inc. has announced an 8.5 cents per pound alloy reduction in the list price of their Glomag (lump magnesium ferrosilicon) line of products, F.O.B. Beverly, Ohio.

The new base price for Glomag containing magnesium levels of less than 5 percent, 6.25 percent and less than 8 percent will be 42.5 cents, 43.5 cents and 45.5 cents per pound of alloy, respectively. Glomag with rare earth/cerium content of 0.30 percent, 0.60 percent and less than 1.50 percent will be 0.5 cents, 1.0 cents and 1.5 cents above the respective base price.

The price for Glomag with rare earth/cerium content above 1.5 percent will be 51 cents per pound of alloy. The base price for Glomag with above 8 percent magnesium will be 79 cents per pound of alloy and will have the same respective premiums for rare earth/cerium content. Special sized 3 percent magnesium will be 54 cents per pound. The new price reflects the current market conditions.

Headquartered in Cleveland, Globe is the world's largest producer of magnesium ferrosilicon and the largest domestic producer of silicon metal. The firm has plants in Beverly, Ohio, Selma, Ala.; and Reigate, England. Globe has been recognized for its high product quality as the only small business winner of the Malcolm Baldrige National Quality Award. Other awards include the Ford Motor Total Quality Excellence (TQE), General Motors' Mark of Excellence and the Shingo Prize for Manufacturing Excellence.

CHICAGO (MAY 22) PR NEWSWIRE - United Airlines (NYSE: UAL) announced

today it plans to place more emphasis on leisure sales by strengthening and relocating the sales and marketing functions of its United Vacations, Inc., subsidiary within United's sales organization at the airline's Chicago headquarters.

The marketing and sales functions of United Vacations (UVI), located in Culver City, Calif., will be assimilated into the airline, a process which will be accomplished in several phases over the next six months in order to ensure a smooth transition.

John C. Pope, executive vice president - marketing and planning, said that the move was prompted by a need for greater emphasis on leisure sales and that the action represents a positive commitment by United Airlines to the leisure market. The move will allow United to capitalize on the investment made in creating its recognized brand name and leisure distribution system -- United Vacations -- as well as to operate in a more cost effective manner.

Pope specified that United would continue to develop and market United branded products.

''Combining the sales and marketing functions for United's leisure product within its sales organization will enable United to compete even more effectively in the expanding leisure market,'' said Pope. ''This move will allow United to respond more effectively to the needs of the leisure market and will strengthen United's competitiveness in an environment characterized by unprecedented growth in the Pacific and Hawaiian markets as well as by rapidly changing technology.''

Pope also said that United continues to recognize the importance of the wholesale distribution channel. ''We remain committed to our wholesale partners, who will continue to be an integral part of our overall distribution strategy of leisure products,'' said Pope.

United will select a subcontractor who will assume the functions of reservations, ticketing, customer billing and collection, vendor verification and payment, and miscellaneous reporting.

NEW YORK (MAY 21) PR NEWSWIRE - The fastest-growing businesses in New York will be honored by AT&T (NYSE: T) and Price Waterhouse at a reception Wednesday, May 23.

Wilson L. Harrell, one of America's leading entrepreneurs and publisher emeritus of Inc. magazine, will speak, and awards will be presented.

AT&T and Price Waterhouse will recognize 19 New York City-area companies named to the 1989 Inc. 500 list, as well as past Inc. 500 winners.

To land a spot on the current Inc. 500 list, a business must be independent and privately held; have shown at least $100,000 but less than $25 million in 1984 sales; and have registered sales growth from 1987 to 1988.

Scheduled to receive awards at the May 23 event are:

From New York City:
-- Albert Lynn, MEDLINC, Inc., provider of home health care services
-- Stephen G. Perry, Revelation Technologies, Inc., supplier of database management systems

-- David F. Schwartz, CitiCam Video Services, provider of TV video production services

-- Mark Lavender, Colter Bay International, apparel manufacturer
-- Julie C. Wang, Wang Associates Public Relations, public relations firm

-- John Katzman, The Princeton Review, Inc., provider of scholastic test preparation services

-- Mario Berritto, Lincoln Scenic Studios, scenery provider for TV shows
-- Richard T. Baumer, Venture Communications International, Inc., provider of direct mail advertising services

-- Karen J. Kirsch, Best Mailing Lists, Inc., provider of direct- mail and marketing services

-- Susan D. McClanahan, McClanahan & Co. Inc., textbook packager
-- Gary Newman, Computer Managers, Inc., provider of data processing services

-- Mark F. Myers, Myers-Holum, Inc., provider of accounting and consulting services

-- Gerald Galison, Galison Books, publisher of address books, journals and posters.

From Long Island:
-- Morrier Liu, Liuski International Inc., Melville, distributor of computers and accessories

-- John H. Spielburger, Syscomm International Corporation, Hauppauge, marketer of computer hardware and software

-- Henry Roberts, U.S. Landscape, Sea Cliff, landscape contractor
-- Stuart Herskovitz, Qosina Corporation, Farmingdale, manufacturer and distributor of medical and cosmetic products

From Newburgh:
-- Si Spiegel, Hudson Valley Tree, Inc., manufacturer of artificial Christmas trees

From Poughkeepsie:
-- Allan Kersch, Financial Supermarkets, Inc., provider of financial services.

KANSAS CITY, MO (MAY 21) PR NEWSWIRE - DST Systems Inc. (NASDAQ: DSTS) today announced that certain individuals claiming to be shareholders of DST Systems, filed suit, purportedly on behalf of all DST shareholders as a class, in the Circuit Court of Jackson County, Mo., on May 17, 1990, against DST, its directors and Kansas City Southern Industries Inc. (NYSE: KSU) seeking injunctive relief, damages and costs in connection with KCSI's intended cash tender offer for any and all shares of DST common stock at $14 per share, which had been announced earlier on that same day.

The suit alleges, among other things, that the tender offer and related transactions amount to an attempt to unfairly eliminate plaintiff's interests in DST in violation of the defendants' fiduciary duties. DST and its directors deny these allegations and intend to vigorously defend against the claims.

Although KCSI and its board of directors have previously approved the transaction, DST has not made a recommendation on the transaction. However DST has authorized a special committee of independent directors to consider and make a recommendation on the proposed transaction, which will be announced in accordance with applicable law.

CONTACT: Thomas A. McDonnell, 816-435-8660 or Kenneth V. Hager, 816-435-6535; both of DST Systems Inc.

CHICAGO (MAY 21) PR NEWSWIRE - Talman Home Federal Savings and Loan Association (NASDAQ: TLMN) announced today it has accepted a purchase offer from a group of Chicago-area investors headed by Harrison I. Steans.

Under the terms of a preliminary agreement, Talman would become a wholly owned subsidiary of Talman Bancorp, Inc., a new holding company being formed by the acquiring group. Talman stockholders would receive for each share of Talman common stock -- $5 in cash and a senior subordinated debenture of Talman Bancorp, Inc. in the principal amount of $5. Assuming consummation of the merger at Dec. 31, 1990, the securities would bear a coupon rate (payable semi-annually in arrears) of 8.75 percent during 1991 10 percent during 1992, 12.75 percent during 1993 and 1994, 14 percent during 1995, 15 percent during 1996 and 15.50 percent from 1997 through 2000; the final maturity would be Dec. 31, 2000. Immediately following the acquisition, the new holding company would invest $300,000,000 cash in Talman common stock, bringing Talman into substantial compliance with the new capital standards imposed by federal legislation enacted last August.

Theodore H. Roberts, chairman and chief executive officer, said, "We are pleased with the prospect of fully recapitalizing Talman, particularly since the new capital is being provided by a local group with extensive banking experience which has expressed an intention to maintain Talman as an independent financial institution under current management.''

"Their total investment of almost $400,000,000 represents a tremendous vote of confidence in Talman's franchise and future. Harrison Steans, whom I have known and regarded highly for many years, Brings Talman not only necessary capital but a wealth of successful banking experience which will be invaluable in properly positioning Talman for the increasingly competitive environment and consolidation of financial institutions which we foresee developing over the next few years. Talman has been the people's bank for many years. Now we look forward to expanding our scope to encompass business banking as well."

Steans commented: "We are delighted to be joining Ted Roberts and his management team. We share their belief in Talman's tradition of community service and believe we can add a strong commercial banking presence throughout the Chicago area as well as in the downstate communities Talman serves."

The proposed acquisition is subject to appropriate due diligence, finalizing financing arrangements, agreement on a definitive plan of merger and approval by stockholders and regulators.

CONTACT: Jim Sherman or Tom Gobby of Talman Home, 312-726-8915.

#90141p3678 05/21/1990 ~PR Newswire

BALTIMORE (MAY 21) P RNEWSWIRE -- Following is a letter from Harry L. Robinson, chairman of the board of Baltimore Bancorp (NYSE: BBB), to the

company's shareholders:

Last Wednesday, your Board of Directors voted unanimously to reject an unsolicited, conditional proposal by Allied Irish Bank and its wholly owned subsidiary, First Maryland Bancorp, to purchase Baltimore Bancorp. I'm writing you to explain the reasoning behind our decision.

To place this decision in context, the board is fully committed to maximizing long-term shareholder value. Our strategy for achieving maximum value involves the continued growth of our company in the Baltimore region and, particularly, reaping the eventual benefits of our recent entry into the suburban Washington market. These are excellent regions economically, and we are confident that an independent, community-focused bank can expand and prosper here. Our plan did not, and does not, consider the sale of the company, in the near term, as desirable or necessary in order to maximize long-term shareholder value.

When the Allied Irish proposal arrived, we asked our advisors, the investment banking firm of Alex. Brown & Sons, Incorporated and the law firm of Sullivan & Cromwell, to review all aspects of the proposal. They presented their reports at a lengthy board meeting on Wednesday, May 16, following the annual meeting of stockholders.

At the meeting, Alex. Brown informed the board that, in their opinion, the proposed price of $17 per Baltimore Bancorp share was inadequate. That figure represented just 90 percent of the book value of our shares on March 31, while most bank transactions involve a significant multiple of book value. As a cash transaction, the proceeds would have been fully taxable to you, our shareholders, and you would have been deprived of the opportunity to participate in the future growth of our company or the benefits of a combination with Allied Irish.

Even if we believed that it was necessary to sell the company in order to maximize long-term shareholder value, we think this would have been a extremely poor time to do so, given the current depressed market for bank stocks.

In addition, the board was advised by Sullivan & Cromwell that the acquisition of Baltimore Bancorp by Allied Irish could face serious regulatory difficulties under the Community Reinvestment Act. In each of the last two years, Allied Irish's New York branch had received a low community reinvestment rating from the New York State Banking Department. In recent months, applications to the Federal Reserve Board for bank acquisitions and mergers have been denied, withdrawn, conditioned and seriously delayed as a result of the applicant's inadequate CRA performance.

The board was concerned as well that this proposal was highly conditional.

Specifically, it was conditioned on Allied Irish completing to its satisfaction a "due diligence" investigation which would have required us to open our books and records to one of our major competitors. If Allied Irish found anything it did not like, it would not have been obligated to go forward with a transaction.

Taking all these factors into account, we determined that the Allied Irish proposal simply was not in the best interests of our shareholders. We have communicated this decision, and the reasons for it, to the chairman of Allied Irish and First Maryland. We have heard nothing further from either of these gentlemen. But Allied Irish was several times quoted in the press as saying that it would not pursue a hostile takeover, and we rely on the accuracy of those statements.

I have been quoted recently as saying that "the bank is not for sale." That is true in the following sense: the board's plans for maximizing long-term shareholder value do not involve putting our company up for sale or seeking a buyer. But the board continues to recognize its duty to consider seriously any legitimate merger or acquisition proposal, and to determine if such a proposal might maximize long-term shareholder value.

We have a lot of respect for First Maryland. They've been worthy competitors for a good many years. We expect they will continue to be. Our intent now is to go back to running the company, and to increasing the value of your investment.

CONTACT: Gerry Kracke, senior vp of Baltimore Bancorp, 301-244-3456, or at home, 301-321-0561.

(MAY 21) UPI - President Bush says the relationship between Washington and Moscow is ''far better'' than it has been, but still NOT as good as he would like. He made the comment Sunday while en route from Houston to Portland, Oregon, on a political trip. Bush and Soviet President Gorbachev meet next week in Washington for a superpower summit.

Palestinian and Arab groups in the United States plan a hunger strike Monday at the Israeli Embassy in Washington to protest Sunday's attack on Palestinian workers near Tel Aviv. The protesters also plan a rally at the U-S State Department. Seven people were killed Sunday when an Israeli man opened fire on the workers.

Police in Colombia say six people were slightly wounded Sunday night when a car bomb exploded in northeast Bogota. Homes and businesses were also damaged in the bombing that came hours after Colombia's bloody presidential campaign ended. Three of the candidates were killed during the campaign for the May 27th elections, and the others are under threat of assassination.

First lady Barbara Bush lit candles in the windows of the White House Sunday night to mark the start of the Seventh Annual International AIDS Candlelight Memorial. A service was also held on the steps of the Lincoln Memorial. Similar vigils were staged around the world to honor the more than 200-thousand people believed to have died from AIDS.

#90141u0227 05/21/1990 ~United Press International
(MAY 21) UPI - Chris Bosio went back to the basics and earned himself an 'A' by hurling a four-hitter Sunday in the Milwaukee Brewers 5-2 victory over the Oakland Athletics.

''I really concentrated the last time I threw on the side working on my mechanics,'' said Bosio, 4-2, who notched his third complete game. ''I think it really paid off for me today.

''As far as being comfortable, that's probably the best I've felt all year with the exception of the Texas game with an 11-run lead (Bosio shutout Texas 11-0 on April 19). But as far as mechanics, grading your pitches and overall performance, I'm not going to give myself straight As, but I really felt good today and I really felt comfortable. There's a lot of room for improvement, but I'm really pleased with the way I threw.''

Bosio was 3-0 in five April starts with a 1.39 ERA, but entered Sunday's game with a 0-2 record in May and a 4.09 ERA in three starts.

The only hits off Bosio were Carney Lansford's single in the first inning, Walt Weiss's single in the sixth, Dave Henderson's RBI double in the eighth and Mike Gallego's leadoff single in the ninth.

Oakland starter Scott Sanderson, 4-2, allowed five runs and six hits over six innings, tying his career high with six walks.

Tony La Russa was ejected for the first time this season in the fourth inning. La Russa was tossed by home plate umpire Jim Joyce for arguing ball and strike calls.

--- AROUND THE AL ---

In other AL games, Milwaukee defeated Oakland 5-2; Minnesota edged Chicago

5-4; Baltimore blanked Texas 4-0; Toronto topped California 5-1; Seattle nipped Cleveland 8-7 in 10 innings; Detroit shaded Chicago 3-2 in 10 innings; and Kansas City nipped New York 4-3.

Twins 5, Red Sox 4

In Boston, Kent Hrbek belted a two-run homer and added an RBI single, lifting Minnesota. Roy Smith, 2-4, worked 5 1-3 innings for the victory. Rick Aguilera worked 1 1-3 innings for his 11th save. Eric Hetzel suffered the loss and fell to 1-3.

Orioles 4, Texas 0

In Baltimore, Pete Harnisch and Greg Olson combined on a three-hitter and Mickey Tettleton belted a three-run homer for the Orioles. Harnisch, 4-1, yielded two hits over seven innings before Olson worked the final two innings for his ninth save. Kevin Brown, 5-3, was the loser.

Toronto 5, California 1

In Toronto, George Bell drove in two runs, including the go-ahead run in a three-run seventh inning, helping Toronto snap a five-game losing streak. Frank Wills, 3-1, relieved Willie Blair, making his first major league start, and picked up the win. Tom Henke earned his fourth save. Mark Langston was perfect for 5 1-3 innings, but dropped to 3-4.

Mariners 8, Cleveland 7, 10 innings

In Cleveland, Edgar Martinez belted a two-run homer in the 10th inning, his second homer of the game, to lift Seattle. Mike Schooler, 1-0, the fifth Seattle pitcher, earned the victory, working the final three innings. Jesse Orosco, 2-2, took the loss.

Tigers 3, White Sox 2, 10 innings

In Chicago, Lloyd Moseby singled home Dave Bergman with two out in the 10th inning to lift Detroit to its sixth straight win. Edwin Nunez, 1-0, pitched two perfect innings in relief for the win. Mike Henneman got the final three outs for his 10th save. Wayne Edwards, 0-2, suffered the loss.

Royals 4, Yankees 3, 10 innings

In New York, Kevin Seitzer's two-out single scored Jim Eisenreich in the 10th to lift the Royals. Don Mattingly's two-run homer in the ninth had tied the game for New York. Jeff Montgomery squandered his fourth save opportunity of the season when he allowed Mattingly's blow, but improved to 4-2. Jeff Robinson surrendered the run in the 10th and fell to 0-2. Kansas City starter Storm Davis yielded only one hit in 7 1-3 innings and

retired 21 straight.

-30- 4026
#90141u0247 05/21/1990 ~United Press International
(MAY 21) UPI - Ron Darling thought he had hit rock bottom, until Sunday.

Roberto Alomar's bad-hop, two-run single in the seventh inning broke a tie to give the San Diego Padres a 3-1 victory over the New York Mets.

The loss added more frustration to Darling, a former starter, who has not faired well this season as a reliever.

''I said last week that I'd reached the bottom of the barrel, but this one hurts because I hurt the team,'' said Darling.

''We had just tied it up and then I gave up the runs in the next inning,'' said Darling. ''I hate to do that to the team.''

Darling, who fell to 1-4, pitched just 2-3 of an inning, allowing one run on one hit and three walks.

Greg Harris, 3-0, got the win and Craig Lefferts got the final five outs for his fifth save.

Mike Pagliarulo led off the seventh with a walk and advanced to second on Garry Templeton's sacrifice. Phil Stephenson walked and both runners moved over on Darrin Jackson ground out to third. Darling then intentionally walked Tony Gwynn.

Alomar then followed with a grounder that bounced over first baseman Mike Marshall's glove as Pagliarulo and Stephenson scored.

Mets manager Davey Johnson said he didn't know what was the matter with Darling.

''He can't throw strikes lately, or he won't,'' Johnson said. ''He got in his workday (in the bullpen), so he should have had a lot going for him. It was a chance for him to prove me wrong.''

Johnson said that Darling has been a pitcher who thrives in situations like the one he faced in the fateful seventh.

The Mets had tied the game in the seventh on Gregg Jefferies RBI single which scored Kevin Elster.

San Diego took a 1-0 lead in the second inning when Templeton drove home Shawn Abner with a single to left. Abner got on base when his grounder was

booted by Howard Johnson's two-base error. He moved to third when Shortstop Elster kicked Pagliarulo's grounder for an error.

--- AROUND THE NL ---

In other NL games, St. Louis ripped Cincinnati 6-2, Chicago bested Houston 5-1, Montreal edged San Francisco 6-5 in 11 innings; Los Angeles beat Philadelphia 6-3 and Atlanta outscored Pittsburgh 13-11.

Reds 6, Cardinals 2

At Cincinnati, Joe Magrane won his second straight game and Tom Pagnozzi's single broke a 2-2 tie in the seventh to help St. Louis. Magrane, who started the seaosn 0-6, allowed five hits struck out six and walked one in seven innings to raise his record to 2-6. Danny Jackson, 0-1, suffered the loss. Pedro Guerrero drove in two runs for St. Louis

Cubs 5, Astros 1

At Houston, Shawn Boskie pitched a five-hitter in his major-legue debut and Andre Dawson homered and drove in three runs to lead Chicago. Boskie, 1-0, the Cubs first-round draft pick in 1986, who came up this week from Iowa, struck out six and walked one in pitching a complete game. Mike Scott, 1-5, took the loss. Dawson's homer was his National League-leading 13th.

Expos 6, Giants 5

At San Francisco, Pinch-hitter Wallace Johnson delivered a two-run home run to highlight a three-run 11th inning to power Montreal. Johnson's first home run of the season came off loser Atlee Hammaker, 3-3. Bill Sampen, 2-0, worked 1 1-3 innings for the win. Johnson's homer came on only his 16th at-bat of the season.

Dodgers 6, Phillies 3

At Los Angeles, Ramon Martinez scattered six hits over seven innings to send Los Angeles to their fifth win in the last six games. Martinez, 4-2, struck out eight and walked four to post the win. Mike Hartley earned his first major-league save pitching two scoreless innings. Pat Combs, 2-4, got the loss. Alfredo Griffin's two run single broke a 1-1 tie in the fourth inning.

Braves 13, Pirates 11

At Atlanta, Dale Murphy and Ron Gant belted two home runs apiece, lifting Atlanta to victory. The Braves tied the game 4-4 in the first and erupted for a six-run second off Pittsburgh starter Bob Kipper, 0-1, to blow the

game open. Murphy had five RBI. Bobby Bonilla pounded two homers for the Pirates and went 4-for-5. Pete Smith, 3-3, won despite allowing six earned runs.

#90141u0274 05/21/1990 ~United Press International

(MAY 21) UPI - More violence in Colombia. Police say a car bomb exploded in northeast Bogota Sunday night, slightly injuring six people and damaging homes and businesses. The blast came shortly after the presidential front-runner and two other rival candidates staged rallies ending Colombia's presidential campaign. Three other candidates were killed during the campaign for the May 27th elections that will pick a successor to President Barco. The surviving candidates have been threatened with assassination.

The payoff from the Hubble Space Telescope mission began Sunday when the orbiting telescope snapped its first photos and relayed them back to Earth. Scientists say the two black-and-white pictures of a Milky Way star cluster are two to three times sharper than expected. Astronomer James Westphal says he's ''tickled pink,'' and says the pictures are much clearer than pictures obtained from the ground. The Hubble telescope was put into orbit last month.

Authorities in Arkansas are warning people in 15 counties to get ready for a record flood. The warnings come after more than a foot of rain fell Sunday, drenching already flood-soaked areas and sending at least seven feet of water surging along roads in Hot Springs. Bridges were washed out, and cars floated down streets, smashing into storefronts. In north-central Texas, a sinking dam threatened to collapse and send more water into the Trinity River system.

A few firefighters suffered minor injuries while battling a wildfire in New Mexico that has burned at least 14-thousand acres in the Lincoln National Forest. Winds gusted to 30 miles an hour Sunday and weather conditions remained dry, hampering efforts to battle the blaze. Officials say the forecast calls for diminished winds overnight.

-30- 1948

#90141u0285 05/21/1990 ~United Press International

PORTLAND, Ore. (MAY 21) UPI - While lauding progress on arms control, President Bush headed into a final day of politicking Monday saying the superpowers have more work to do to bridge their differences and enhance the results of next week's summit with Mikhail Gorbachev.

''We're talking to the Soviets at a time that is far better - the relationship between the United States and the Soviet Union - than some

times in the past,'' Bush said Sunday on the next-to-last leg of a cross-country trip, ''but less good than I wish it were.''

Speaking to reporters after the weekend's developments, Bush said sharp differences - from arms control to German unification - ''will be on the agenda'' when he and Gorbachev open talks in Washington on May 31.

Despite gains made late last week during four days of talks in Moscow, he said East-West relations remain complicated because ''we've had differences with the Soviets for a long, long time on a wide array of subjects.''

Secretary of State James Baker announced Saturday that his pre-summit meetings in Moscow had cleared the way for accords on the destruction of chemical weapons, limits on nuclear testing and the substantive framework of a dramatic cut in strategic nuclear arms.

Sounding the same themes he did Saturday night at commencement exercises in Austin, Texas, Bush said after conferring by telephone that Baker ''sounded generally upbeat'' about the outcome of the trip and repeated his own initial reaction that ''there's clearly been some progress'' on arms control, but ''there still remain some other problems.''

In the Strategic Arms Reduction Talks, known as START, compromise language on how to limit and count air- and sea-launched cruise missiles removed perhaps the thorniest obstacle to a formal treaty and left lesser technical problems to lower-level negotiations.

An East-West accord on conventional force reductions in Europe has been thwarted in recent weeks by what national security adviser Brent Scowcroft bluntly described as Soviet ''stonewalling.''

But with a START agreement within grasp and the conventional force talks still under way, contentious political issues such as Lithuanian independence and German unification could rise on the summit agenda.

Bush acknowledged only that ''we've got a wide variety of agenda items, and frankly they're all important.'' The differences, he said, are clear and the summit outcome difficult to predict.

''Nobody thought it would be easy,'' he said, ''so we're just plugging away on a wide array of agenda items. I'm satisfied from the progress made in Moscow that we'll have a good summit.''

Bush, declining to criticize the Soviets directly for the lack of progress on cuts in troops, tanks and artillery, predicted that an agreement still is possible this year and said, ''We've got to get that done.''

''It is very, very important,'' he said, ''not just to us, but to all of Europe and everyplace else.''

The issue with the most potential for conflict at the summit may be the attempt by Lithuania and the two other Baltic republics, Estonia and Latvia, to secede from the Soviet Union, which annexed them by force 50 years ago.

The diplomatic sensitivity of that standoff was dramatized in one 24-hour period over the weekend that saw members of Baker's entourage scramble to deny reports he had urged Lithuania to suspend its declaration of independence.

The United States, eager to avoid having the crisis escalate into a confrontation between Washington and Moscow, has urged moderation by both sides to encourage dialogue. Bush refused to specifically say whether that should include having the Lithuanians place their independence drive on hold, as suggested last month by the leaders of France and West Germany, and denied ''any confusion'' had arisen from Baker's private statements in Moscow to Gorbachev and Lithuanian Prime Minister Kazimiera Prunskiene.

Bush flew to Portland from Texas, where he spent the weekend, to attend a Monday morning fund-raiser for Dave Frohnmayer, the Republican candidate for governor. He was to head later in the day to Los Angeles for a pair of events before flying back to Washington.

On the eve of Senate debate on anti-crime legislation, Bush also used the dedication of a police memorial in Portland to accuse Congress of not fighting crime in the streets with laws to win convictions and stiff sentences in court.

-30- 4682

#90141u0289 05/21/1990 ~United Press International

(MAY 21) UPI - In Atlantic City, New Jersey, five bodies were found Sunday night in an apartment building where carbon monoxide had leaked one day earlier. Officials say it's NOT immediately known what caused the five deaths. The bodies were discovered at the Cordova Apartments in a run-down section of the gambling resort town... NOT far from some casinos.

Andy Koffman says he's disappointed, and it's NO wonder. His giant African frogs were soundly defeated Sunday by a homegrown California bullfrog in the championships of the 62nd Annual Calaveras County Fair and Jumping Frog Jubilee. The winner of this year's contest at Angels Camp is a frog named ''Help Mr. Wizard'' that jumped 19 feet, three inches. Koffman blamed cloudy skies and cool temperatures for his frogs' poor showing.

-30- 944

#90141u0308 05/21/1990 ~United Press International

BOGOTA, Colombia (MAY 21) UPI - Colombia's bloody presidential campaign ended with final political rallies that were subject to tight security but sparsely attended by citizens scared off by a wave of violence related to the government's anti-drug effort.

A car bomb exploded Sunday night in northeastern Bogota hours after the rallies wrapped up the presidential campaign for the May 27 election that will pick a successor to President Virgilio Barco of the Liberal Party.

National Police Inspector Gen. Octavio Vargas Silva said six people, including two children, were slightly wounded in the explosion and homes and businesses were damaged. The Fire Department was called to put out the blaze and several tanks were also stationed at the scene, radio reports said.

''The zone affected in direct form is approximately (330 feet),'' Vargas Silva told a Bogota radio station. ''It is estimated there were (110 pounds) of dynamite.''

Three of the four major candidates held their final rallies in the capital Bogota, to sparse crowds and under extraordinary security. Three candidates have been killed during presidential campaigning.

Front-running contender Cesar Gaviria of the ruling Liberal Party held his final rally in an indoor sports arena that had thousands of empty seats. A campaign official said voters were afraid to attend, fearing car bomb attacks like those that have rocked the nation in recent weeks.

Hundreds of police and soldiers surrounded the arena, backed by two tanks and soldiers in jeeps mounted with machine guns. Each person entering underwent a body search.

Gaviria, probably the most threatened man in Colombia because of his tough no-negotiations position against the cocaine cartels, wore a bright red jacket that covered an obvious bulletproof vest.

About a dozen bodyguards, some with submachine guns bulging beneath their jackets, crowded around the 43-year-old economist so closely that he had little space to move during his speech. ''Never like now has violence knocked at the doors of each home in Colombia,'' said Gaviria, standing under a large portrait of his patron, slain Liberal Party candidate Sen. Luis Galan.

''We have arrived to end this electoral debate in the middle of difficulties that have been put before us by the violent people of Colombia. And up to this point, we have arrived to defend our democracy.''

Gaviria stopped all appearances in open public places after the April 26 assassination of M-19 candidate Carlos Pizarro. Pizarro, a former guerrilla leader, was shot 13 times by a gunman aboard an Avianca airlines jet while in flight.

Gaviria became a candidate after the Aug. 18, 1989, assassination by cocaine gunmen of Galan, the leading Liberal Party candidate and staunch foe of Medellin Cartel cocaine czar Pablo Escobar.

The latest internal campaign polls show Gaviria with 55 percent of the vote, three times that of his nearest competitor, National Salvation candidate Alvaro Gomez, according to campaign officials.

Gomez also ended public campaigning Sunday with two rallies at controlled sites in Bogota. At one point, Gomez, the 71-year-old son of a former president, and Gaviria were almost neck and neck, with 15 percent and 18 precent of voters favoring each, respectively.

The Conservative vote, one of the two traditional political powerhouses, is split between Gomez and Social Conservative candidate Rodrigo Lloreda.

Lloreda, a comparatively colorless 47-year-old lawyer, held a final rally with rock bands to attract young voters. The polls had shown him in third place with about a 10 percent approval rating.

The fourth major candidate, former M-19 guerrilla Antonio Navarro Wolf, closed his campaign Saturday by speaking to a crowd gathered in a park by a television hook-up in which his image was projected on a giant screen. The Gaviria polling shows Navarro Wolf could end up in third with Lloreda in fourth.

Navarro Wolf, who became the M-19 candidate after Pizarro's assassination, has not made a campaign appearance in an open setting since replacing Pizarro.

Navarro Wolf is the only significant leftist candidate on the ballot. Patriotic Union candidate Bernardo Jaramillo was assassinated March 22 in the Bogota airport and the leftist coalition chose not to replace him.

Medellin is the headquarters city for the powerful Medellin cocaine cartel that has offered a reward of some $4,200 for the death of police officers. In the last two weeks, 23 police officers have been slain.

#90141u0332 05/21/1990 ~United Press International

MANILA, Philippines (MAY 21) UPI - Adm. Huntington Hardisty, commander of

U.S. Pacific forces, met Monday with President Corazon Aquino and expressed optimism over the future of U.S. military bases in the Philippines following last week's exploratory talks.

''I think our government feels very comfortable with the recent exploratory talks,'' Hardisty said after a call on Aquino one day before Tuesday's annual meeting of the Mutual Defense Board. ''I think both (sides) agreed that our future depends on a new relationship, a new strategic relationship. I think that goes well for the future of both our countries.''

The one-day meeting of the Mutual Defense Board reviews security relations and U.S. military assistance programs. A statement is expected at the close of the meeting.

The Philippines and U.S. panels met for five days last week on the renewal of American basing rights expiring in 1991. The two sides settled a compensation dispute and then recessed indefinitely.

Philippine spokesman Rafael Alunan said Monday he expected the talks to resume next month in Manila, but gave no specific date.

Hardisty was accompanied by U.S. Ambassador Nicholas Platt and Philippine Defense Secretary Fidel Ramos during the call on Aquino.

The Philippines hosts Clark Air Base, Subic Naval Complex and four smaller facilities.

The Mutual Defense Board meeting is expected to discuss increased threats against U.S. servicemen, an American Embassy spokesman said.

The communist New People's Army has taken responsibility for killing Airmen John H. Raven, 19, and James C. Green, 20, May 13 in Angeles city outside Clark, 50 miles north of Manila. U.S. troops have been restricted to the bases following the May 13 slayings.

The 19,000-strong rebel army, which has been battling the Manila government for 21 years, at the same time vowed to continue killing Americans until the United States withdraws from the Philippines.

Eleven Americans have been killed in the country in three years in politically motivated attacks.

-30- 2266

#90141u0390 05/21/1990 ~United Press International

(MAY 21) UPI - New waves of thunderstorms and heavy rain Monday swept through flood-soaked Arkansas, where earlier downpours washed out bridges

and forced hundreds of evacuations.

In southeast Texas, meanwhile, rising floodwaters covered houses in two counties as five times more water than normal surged through Lake Livingston Dam into the engorged Trinity River.

The Arkansas storms were centered across the northern border between Gravette and Mountain Home, in the northeast near Walnut Ridge, and in the southwest section of the state between Mena and De Queen.

Scattered thunderstorms with heavy rain also passed through parts of central and southern Arkansas within a 50-mile-wide area near Searcy, across the Little Rock area to Prescott.

''We can take about four or five more drops (of rain),'' said Ray Briggler a spokesman for the Arkansas Office of Emergency Services. ''Everything is saturated.''

More rain was moving toward the area, and the National Weather Service said more thunderstorms were possible.

On Sunday, more than a foot of rain caused widespread damage and forced hundreds of evacuations in central Arkansas. At the resort town of Hot Springs, about 400 homes were evacuated after heavy overnight rain. Damage was heavy in the downtown area of the city and in rural areas.

There were no reports of deaths or injuries, authorities said.

In southeast Texas, officials said floodwater coursing through Lake Livingston Dam's 12 floodgates was 100,800 cubic feet per second - far above the normal amount of 20,000 cubic feet per second or less - and some homes in Polk and San Jacinto counties were under water.

The Lake Livingston Dam creates the largest lake in the state for water supply in southeast Texas. It supplies water to Houston, located about 90 miles the south.

Thunderstorms in south-central Texas pounded Laredo with large hail and occasional damaging winds, along with frequent lightning and brief but heavy rain, the weather service said.

A half-mile section on the earthen Lost Creek Resevoir, 60 miles northwest of Fort Worth, sunk at least 20 feet over the weekend, raising concerns of a possible collapse and some flooding downstream on the Trinity River tributary.

''The dam is still holding, and I'd be the first to know with people calling,'' a dispatcher with the Jack County Sheriff's Office at Jacksboro

said Monday.

Officials said even if the dam breaks, it will not cause serious problems to communities downstream, which are already waterlogged by record spring rains and flooding.

In event of a break, Lake Bridgeport, the next lake south, will rise about 1 foot, officials said. Few people live in that area along the Trinity River tributary.

Texas and Arkansas were not the only state's to suffer inclement weather. In Oklahoma, heavy rain and hail fell Monday along the southeast. At Antlers, hail the size of of a dime was reported, while pea- to marble-size hail fell at Muse.

Scattered thunderstorms were moving towards the southern half of Louisiana.

Thunderstorms and heavy rain pounded southeast Missouri early Monday and the threat of flooding worsened, the NWS reported.

The thunderstorms were moving to the east at 20 mph. Officials were on the lookout for flash flooding from the Ozarks in eastern Missouri and the bootheel, including Cape Giaradeau and Poplar Bluff.

Thunderstorms were also spread over much of South early Monday. Heavy rain strong gusty winds, dangerous lightning and hail had caused some damage in northeast Georgia earlier, and a flash flood watch was posted in northern Alabama.

Showers and thunderstorms were reported overnight in the mid-Atlantic region, with some flooding in western Pennsylvania. Five western Pennsylvania counties were placed under a flash-flood watch.

Overnight lows across the region ranged from the upper 40s in the northern Pennsylvania to the low 60s in Maryland.

Skies cleared in the Midwest, with some precipitation reported in southern Illinois. Wisconsin had partly cloudy skies and temperatures in the 40s and 50s. Michigan reported mostly cloudy conditions with temperatures in the 40s and 50s.

A high-pressure system over eastern Canada forced temperatures below average in New England overnight as scattered rainstorms pounded parts of the region.

Cape Cod in Massachusetts and Rhode Island experienced the heaviest rainstorms and temperatures in the low 40s. Northern Maine had cloudy skies, with readings of 39 degrees reported early Monday along the

Canadian border.

A low-pressure system brought light rain and drizzle to the Pacific Northwest and Northern California late Sunday. Light snow fell in the Sierra Nevada Mountains in the Lake Tahoe area above the 6,000-foot level.

The rain in San Francisco was the first this month in the drought-stricken Bay Area, but it was not enough to ease drought conditions. Water rationing remained in effect in San Francisco and Santa Clara counties. San Francisco got about one-fifth of an inch of rain.

#90141u0410 05/21/1990 ~United Press International

HONG KONG (MAY 21) UPI - China's former top official in Hong Kong, currently in the United States, fled after learning of a Chinese government investigation of his political conduct and financial dealings, Chinese and Western sources said Monday.

The sources confirmed the U.S. government's public statements that Xu Jiatun, the former director of the official Chinese news agency's Hong Kong branch, had not defected, but said his abrupt and mysterious departure earlier this month was prompted by fears of what faced him in Beijing.

''Someone called Xu from the mainland and tipped him he was about to be ordered back to Beijing,'' one source said. ''He thought he was in trouble.''

Xu, 74, served for nearly seven years as head of the Xinhua news agency's Hong Kong office, which acts as Beijing's unofficial consulate to the British colony and represents the Chinese Foreign Ministry. As such, he was China's top representative to Hong Kong until his retirement in February.

He had also served as Beijing's chief voice of reassurance to the colony's nearly 6 million people over worries about their future after Britain returns sovereignty to China in 1997.

''It took a couple of days for this to sink in,'' said a senior official of the British Hong Kong government. ''But it has galvanized people. It's all people are talking about.''

The Chinese government has said only that Xu went to the United States for ''travel and rest.'' But a Chinese source said an internal government document had characterized Xu's departure as ''somewhere between an unauthorized trip and a defection.''

Other sources, including Western diplomats and Chinese with ties to Xinhua said Xu contacted senior officials at the U.S. Consulate in Hong Kong this month after learning Beijing was investigating him and the Xinhua branch's conduct during the pro-democracy movement last year in China.

The investigation had been expanded to touch also on possible financial misdealings, including real estate transactions, the sources said.

Staff members at the Xinhua Hong Kong branch expressed public support last spring for the pro-democracy protests. Some even joined Hong Kong citizens who took to the colony's streets last May in sympathy demonstrations with the student-led protests on the mainland.

''The investigation was stunning, because Xu had been a confidant of Deng Xiaoping,'' the Chinese senior leader, an informed Western source said. ''Now they are questioning his political reliability.''

The sources said the circumstances of Xu's departure had been tightly held both to avoid another embarrassing incident in U.S.-China relations - poor since the Chinese crackdown last June on the protests - and because other members of the Xinhua branch might also seek refuge abroad.

Newspapers in Hong Kong have reported at least four associates of Xu had been recalled to Beijing.

Xu is now at a Buddhist retreat in southern California. He has not made any public statement since news of his departure broke May 11, but the retreat's leader said Sunday Xu would not seek asylum and hoped to return to China.

Western diplomats, however, said Xu would not have to seek asylum to remain in the United States. He traveled on a tourist visa and could apply for a change in visa status, they said.

After taking over in Hong Kong in 1983, Xu became China's point man to calm fears after Britain and China signed the agreement in 1984 under which the colony will return to Chinese rule in 1997. He evolved into a popular and sympathetic figure in Hong Kong political and business circles.

The relative confidence Xu had helped build, however, was shattered by last year's crackdown in Beijing. Xu's successor as Xinhua chief in Hong Kong, Zhou Nan, is a former deputy foreign minister regarded as a hard-liner.

Several of Xu's relatives reportedly accompanied him to the United States. His wife remains at the couple's home in Nanjing in eastern China.

(MAY 21) UPI - Around the world... around the clock... the latest news from U-P-I.

President Bush says the outcome of his summit conference with Soviet President Gorbachev late this month is difficult to predict. But he says this is a good time to be talking because the relationship between the super-powers is far better than it has been. However, Bush says the relationship is NOT as good as he wishes it were.

Bush is in Portland, Oregon, on the final day of a road trip helping Republican candidates and giving commencement addresses. Bush says Secretary of State Baker clearly made some progress on arms control during his visit to Moscow. But the president says some other problems remain.

European Community foreign ministers are trying to lay the groundwork for a June summit. At a meeting in Ireland yesterday, most indicated they don't want a closer political union by either increasing the powers of the European Parliament or the European Commission, the administrative arm of the E-C.

Police in New York City say a minor explosion occurred at a hotel two hours before Vice President Quayle spoke to a Jewish group. The small incendiary device exploded in the lobby of the Sheraton Centre Hotel. NO one was hurt and damage was slight. The explosion did NOT interfere with Quayle's speech.

Five people were found dead in an apartment building in Atlantic City, New Jersey, last night. What caused their deaths is NOT known yet. But... on Saturday, four other people were taken to a hospital for treatment of carbon monoxide poisoning. Officials say a hot water heater was NOT vented properly.

A gang fight broke out at the Stateville Correctional Center near Joliet, Illinois, last night. By the time guards had stopped the fight, two inmates were dead and three others were injured. Officials say several inmates brandished make-shift knives before guards responded with gunfire.

#90141u0452 05/21/1990 ~United Press International
(MAY 21) UPI - 15 people exposed to toxic chemicals in a fire last night are hospitalized in Dallas. The fire was in a laboratory at the University of Texas Southwestern Medical Center. A dozen firefighters and three people from the lab were exposed to the chemical... hydrazine... and are hospitalized for observation.

Residents of Panama who lost homes and relatives during the American invasion marched to the U-S Embassy in Panama City yesterday. The 300 marchers demanded housing and compensation for their losses. A guard accepted a letter the demonstrators wrote to President Bush. Embassy officials gave NO response.

A single-engine plane crashed into a house in Willougby Hills, Ohio, last night... killing the pilot. The owner of the house jumped out a window as the plane went down. Residents of the community east of Cleveland say the plane was headed toward the Cuyahoga County Airport, about one-quarter-mile away.

A memorial service for Muppet creator Jim Henson is scheduled today in New York City. He was 53. The service will be in the Cathedral of St. John the Divine, the five-thousand capacity church on Manhattan's Upper West Side. Henson died Wednesday from pneumonia.

A national commission mandated by Congress to determine the status of children in America will meet today at Yale University. The commission will visit a school in New Haven, Connecticut, where a model program has helped educators make education work for students once thought to be beyond hope.

#90141u0645 05/21/1990 ~United Press International
(MAY 21) UPI - The latest news from around the world and across the nation... details and developments from the wires of United Press International.

President Bush yesterday said Washington and Moscow still need to iron out a few snags, but added that arms negotiations are taking place during a positive era in U-S-Soviet relations.

Bush said he would like relations to further improve and praised this weekend's agreement on limiting air- and sea-launched cruise missiles. That particular issue provided perhaps the biggest obstacle during Strategic Arms Reduction Talks in Moscow.

Negotiators remain divided about conventional forces in Europe, but the president appears optimistic agreement can be reached by the end of the year.

Quoting now- ''It's very important, NOT just to us, but to all of Europe and every place else.

The president predicted a successful summit and said everything from arms control to German reunification ''will be on the agenda'' when he and

President Gorbachev open talks in Washington May 31st.

Israeli Arabs are on strike today to protest the slaying of seven Palestinian workers by an Israeli man who officials say was mentally unstable.

Israeli Arab leaders called for a general strike. Within hours of the shooting yesterday, riots in the occupied territories left six other Arabs dead.

The death toll from the shooting outside the Israeli town of Rishon Le Zion, combined with the number of casualties in the occupied territories made yesterday one of the bloodiest days of the 29-month-old Palestinian uprising.

Israeli security sources say the attack probably will escalate violence after months of relative calm.

Police investigating the shooting say the 21-year-old Israeli suspect told them he committed the attack for personal reasons. He gave two versions... distress over breaking up with his girlfriend and an alleged sexual assault eight years ago by an Arab.

He is an expelled soldier, who was dressed in a military uniform and used an automatic rifle to kill his victims.

The suspect was discharged from the army 18 months ago after serving half of his three-year tour for ''unsuitablity'' and spent eight months of his service in prison for disciplinary problems.

#90141u0675 05/21/1990 ~United Press International

(MAY 21) UPI - The estimated 200-thousand-plus people around the world who have died from AIDS are being remembered with vigils and other demonstrations.

Memorial services and rallies from San Francisco to Santiago yesterday marked the beginning of the Seventh Annual International AIDS Candlelight Memorial. Barbara Bush placed a candle in every window of the White House that faces Pennsylvania Avenue and lit them at dusk... when a memorial service was held on the steps of the Lincoln Memorial.

About 15 members of the militant AIDS advocacy group ACT-UP held a counter-demonstration. They say the Bush administration is NOT doing enough research and drug therapy. They lit candles but turned their backs on the 200 other vigil-holders, shouting, ''Money for AIDS!''

This morning, AIDS activists hope to gather two-thousand demonstrators outside the headquarters of the National Institutes of Health. One organizer says the country's premier biomedical research facility is acting as if it is trying to cure the common cold... rather than treat a deadly disease.

A West German polling firm says Romanian Interim President Ion Iliescu overwhelmingly won that country's first free elections in more than 50 years.

The Bonn-based firm- which predicted the East German elections two months ago to within five-tenths of one percent accuracy- says Iliescu captured a whopping 83 percent of the vote in yesterday's balloting. That figure is based on exit polls of 16-thousand people at 252 of more than 12-thousand polling stations.

Official results will NOT be available until tomorrow. Voter turnout was huge with Romanians flocking to polling stations by car, bus, and even horse-drawn carts.

The polling firm says the Liberal Party candidate trailed Iliescu with 11 percent of the ballots cast and the Peasant Party representative garnered six percent of the vote.

#90141u0718 05/21/1990 ~United Press International

(MAY 21) UPI - Prices on the Tokyo Stock Exchange closed lower Monday in light trading as the Japanese yen's weakness discouraged buying interest.

The blue-chip Nikkei Stock Average of 225 selected issues, which fell 47.88 points Friday, lost another 248.67 points to 31,765.05.

The broader-based Tokyo Stock Exchange Price Index, which fell 10.97 points Friday, lost another 17.44 points to 2,370.82.

An estimated 350 million shares changed hands, compared with 482 million shares Friday.

Declines led advances 656 to 270, with 187 issues unchanged.

Elsewhere in Asia, stock prices closed slightly higher in lackluster trading on the Hong Kong Stock Exchange.

The key Hang Seng Index, which gained 8.26 points Friday, added 4.94 points to 2,930.83. Utilities rose 38.88 points, financials added 2.93, industrials gained 3.37 while properties eased 32.33 points.

An estimated 731.2 million shares changed hands, compared with 1.3 billion shares Friday.

In Singapore, stock prices on the Singapore Stock Exchange closed sharply higher in moderate trading.

The blue-chip Straits Times Industrial Index, which climbed 10.41 points Friday, rose 18.11 points to 1,570.99. The narrower All Singapore Index, which added 4.21 points Friday, gained 5.49 points to 437.71.

An estimated 71.8 million shares chnaged hands, compared with 39.6 million shares Friday.

In Australia, stock prices closed sharply lower on the Sydney Sharemarket against a background of disappointing banking results.

The blue-chip All Ordinaries Index, which eased 4.7 points Friday, plummeted 20.1 points to 1,438.0. The All Industrials Index fell 32.5 points to 2,275.1 and the All Resources Index fell 10.8 points to 835.0.

An estimated 133.3 million shares chnaged hands, compared with 70.5 million shares Friday.

Declines overpowered advances 215 to 92.

#90141u0743 05/21/1990 ~United Press International

BANGKOK, Thailand (MAY 21) UPI - Economic growth in the developing countries of the Asia-Pacific region continued to decline this year, but still remained the highest in the world, a senior U.N. official said Monday.

S.A.M.S. Kibria, Executive Secretary of the United Nations Economic and Social Commission for Asia and the Pacific (ESCAP), said most developing countries of the Asian and Pacific region showed an unusually robust record of economic expansion in the 1980s.

But the region's economic growth declined sharply from its average 9 percent in 1988 to 6 percent last year, he said.

''Despite the slowdown, the growth rates of the region are higher than in any other parts of the world,'' he said.

''The developing ESCAP region achieved significant industrial progress by the end of the 1980s,'' Kibria said.

He noted in his survey that the growth rate in the ESCAP region was

expected to decline steadily this year, even though at a lower rate, due to the woreld economic slowdown and a sharp drop in the region's agricultural production.

Kibria said the deceleration was effected by an increasing protectionist measures against the newly industrialized countries (NIEs) - South Korea, Singapore, Taiwan and Hong Kong - which reduced their rate of export growth to about half of that in 1988.

He said a sharp fall in the growth rate of China in a bid to curb inflation from its average of more than 10.5 percent in the first nine years of the decade to around 4 percent last year, caused a serious setback to the region's growth rate.

Kibria said countries in East and South Asia showed declines in their growth rate last year while the growth rate of nations of Southeast Asia was expected to remain at high levels, with Thailand in the lead showing double-digit growth.

He said developing countries in the Association of Southeast Asian Nations - Thailand, Malaysia, Singapore, the Philippines, Brunei and Indonesia - benefited from the large inflow of investment from Japan and the newly industrialized economies of the region, such as South Korea's and Taiwan's.

#90141u0758 05/21/1990 ~United Press International

FORT WORTH, TX (MAY 21) UPI - Two brothers arrested in the shooting deaths of five men during a high-stakes dice game in the Glass Key Cafe have been freed by police who said they have little evidence against the suspects.

Paul Miller, 22, and Timothy Miller, 19, were freed Sunday and $100,000 bonds for capital murder were dismissed, said police spokesman Doug Clarke.

''We don't have sufficient evidence to charge them at this time,'' Clarke said. ''We've got five dead from it. There's still a lot of investigative work to be done.''

Four masked men with high-powered weapons stormed into the Glass Key May 14, breaking up a dice game involving betweem $90,000 to $400,000. Five people were killed and four wounded. The fifth victim died Saturday.

Paul Miller, who works at a transmission shop, and Timothy Miller, a part-time title installer, were arrested Thursday.

''Hey, fine, they (police) took me down there (police department), but they know I didn't do it,'' Paul Miller told a Dallas television station

while standing outside his house. ''I was inside asleep.''

However, witnesses told police that Timothy Miller had been in the lounge's restaurant earlier Monday morning.

A 16-year-old boy was questioned on Thursday, but he, too, was released for lack of evidence, police said. A fourth suspect, a 23-year-old Fort Worth man, has eluded police since the day of the shootings.

#90141u0761 05/21/1990 ~United Press International

HOUSTON (MAY 21) UPI - Domestic drilling increased last week, while offshore drilling declined, industry monitors reported.

A total of 972 rotary rigs were working in the United States last week, compared with 941 the week before and 737 the same week a year ago, Baker Hughes Inc. reported Sunday.

Offshore activity declined, with two less rigs working in the Gulf of Mexico last week. Offshore Data Services reported 151 mobile rigs working in the Gulf out of a fleet of 213, for a utilization rate of 70.9 percent.

There also was one less rig working in European waters, dropping the utilization rate there to 91 percent, with 121 rigs working out of a fleet of 133.

The declines pushed the utilization rate down to 81.4 percent among mobile offshore rigs worldwide, with 544 rigs working out of a total fleet of 668. There were 337 rotary rigs working in Texas last week, compared with 340 the week before and 224 the same week a year ago.

Other relevant rig counts included Louisiana, 158 last week, 149 the week before and 128 the same week a year ago; Oklahoma, 117, 108 and 118; New Mexico, 47, 47 and 32; and Canada, 78, 64 and 69.

#90141u0790 05/21/1990 ~United Press International

(MAY 21) UPI - President Bush yesterday said he's pleased with the outcome of this weekend's arms negotiations in Moscow. The president said he spoke with Secretary of State Baker who had just returned from Moscow. Bush said he's encouraged by Baker's report and upbeat about the upcoming summit with President Gorbachev. But Bush tempered his remarks by acknowledging that work remains to be completed in order to prepare a formal treaty for signing.

There is concern today that more violence will erupt in the

Israeli-occupied territories as a result of yesterday's attack by a former Israeli soldier that left seven Arabs dead. Subsequent rioting in the territories left another six Arabs dead and hundreds of others injured. Israeli Arabs are calling for a general strike today and Palestinians around the world are blaming the incident on Israeli policies.

An Iranian newspaper is quoting President Rafsanjani as saying the United States could facilitate the release of the 16 remaining Western hostages in Lebanon. The report says that, during a meeting with a United Nations representative, Rafsanjani said Washington should make a goodwill gesture following the release of two American hostages last month.

The Hubble Space Telescope transmitted its first photographic images to Earth yesterday and NASA astronomers say they're ''tickled pink'' by the historic event. Scientists say the photos of a three-BILLION-year-old star cluster were two to three times sharper than expected. Officials say yesterday's picture was just the first of as many as 30-thousand that will be snapped during the next 15 years.

#90141u0802 05/21/1990 ~United Press International

(MAY 21) UPI - The more than 200-thousand people who are thought to have died of AIDS worldwide were remembered yesterday. Thousands of people around the world held a candlelight vigil to mark the beginning of the Seventh Annual International AIDS Candlelight Memorial. Rallies and memorials were held in cities around the world from the South African black township of Soweto to Seattle, to Milan, Italy.

A flotilla of Cuban exiles sailed within 21 miles of their native homeland yesterday in a show of support for their countrymen who remain under the dictatorship of Fidel Castro. About 120 exiles in 19 small pleasure boats made the six-hour, 70-mile trip from Key West, Florida, despite choppy six- to eight-foot seas. One exile said- ''This is our Berlin Wall.''

A new study conducted by researchers at the Mayo Clinic shows it's the number of years cigarette smokers puff away rather than the number of puffs that pose the greatest health risks. The researchers say the duration of smoking ''overwhelmed'' the effect of pack-years or cigarettes per day. The study found that a 60-year-old man who smoked for 40 years is three-and-a-half times more likely than non-smokers to develop an artery-clogging disease that leads to stroke.

Officials of the National Commission on Children, which was mandated by Congress, go to Yale University today to view first-hand the work of an innovative child-psychology professor. The panel is taking a close look at the critical middle childhood years and will observe Professor James Comer's approach to helping children once thought to be beyond hope. His

acclaimed intervention approach to imposing discipline and imparting values has helped educators in dozens of schools and is in place in all of New Haven's public schools.

-30- 1954

#90141u0874 05/21/1990 ~United Press International

(MAY 21) UPI - Much of the South has thunderstorms this morning. More heavy rain is falling on flood-stricken Texas and Arkansas. Heavy rain also fell this morning on Oklahoma, which is drying out from earlier flooding. The National Weather Service also reports threats of flooding in Pennsylvania, Alabama and Missouri.

Officials report heavy damage in Hot Springs, Arkansas, from more than one foot of rain yesterday. About 400 homes were evacuated. Cars floated down some streets and smashed into store windows. But... there are NO reports of deaths or injuries.

The dam on Lost Creek in Texas is still holding... even though a half-mile section of the earthworks sank at least 20 feet during the weekend. Officials say even if the dam breaks, soggy communities downstream won't be damaged much more than they already are.

President Bush says he's sure he and Soviet President Gorbachev will have a good summit. But he's NOT sure how good. Bush says despite major progress on arms control, some issues have to be resolved yet.

Israeli Arabs are asking the United Nations to send international supervisers into the Israeli-occupied territories. The appeal came today as the Israeli Arabs held a general strike to protest the slayings of seven Arabs by a man expelled from the Israeli army.

The chief Islamic priest in Kashmir was murdered today. Police blame Moslem separatists... although NO one has claimed responsibility. Three gunmen entered the priest's office, and shot him 15 times... three times in the head.

The number-two man on the National Security Council, Robert Gates, is meeting with military officials in India today. He was in Pakistan yesterday. Gates is trying to reduce the threat of a war between India and Pakistan over Kashmir.

The commander of the U-S forces in the Pacific... admiral Huntington Hardisty... met with Philippine President Aquino today. Hardisty says he believes U-S military bases will remain in the Philippines.

#90141u1031 05/21/1990 ~United Press International

SCRANTON, PA (MAY 21) UPI - Scranton's oldest newspaper, the Scrantonian Tribune, was purchased by longtime rival The Scranton Times and ceased publication Monday.

Employees arriving for work at the newspaper were told Monday's edition would be the last. In the Tribune newsroom, someone scrawled ''30'' - the symbol used by reporters at the end of a story - on a locker.

MediaOne Inc., which bought the Scrantonian Publishing Co. from the Goodman family of Scranton in 1987, announced the newspaper's demise in a brief release.

''The deteriorating economic condition affecting the Northeast no longer made it economically viable to publish a second newspaper in the Scranton market,'' MediaOne said.

A spokeswoman at The Scranton Times said its publishers would make an announcement later in the day.

The Scranton Times, which published an afternoon newspaper for many years, launched a morning edition, The Morning Times, in 1988 to compete directly with the Tribune.

''I can't believe it. This is terrible,'' said Tribune correspondent Jennifer Irving, who returned to the newspaper just last month after being laid off in January.

Some employees greeted the news with tears, others with anger.

Social editor Gene Brislin, who joined the Tribune as a correspondent in the early 1940s and whose late husband, Harold, won the newspaper's only Pulitzer Prize, said, ''The one thing I'm glad for is he is not around to see this.''

Founded in 1856, the Tribune published six mornings a week, with a circulation of 37,000. Its Sunday edition, the Scrantonian, was established in 1896 and had a circulation of 51,000.

The newspapers were published for over 85 years by the Goodman family until MediaOne, headed by John Buzzetta, purchased the publications in September 1987. MediaOne also owns The Dallas Times Herald.

MediaOne said Tribune employees would receive 60 days pay and all other benefits to which they were entitled.

#90141u1035 05/21/1990 ~United Press International

WASHINGTON (MAY 21) UPI - The Supreme Court let stand Monday a ruling that ordered ''Operation Rescue'' to pay nearly $70,000 for ignoring court orders limiting its demonstrations against abortions in New York.

The court refused to hear the case brought by Operation Rescue and a number of individuals seeking review of a ruling by the 2nd U.S. Circuit Court of Appeals that upheld the fines.

The case stems from demonstrations in the New York City area in April and May of 1988. Operation Rescue ignored federal and state court orders that allowed demonstrations but barred demonstrators from blocking the clinics. The demonstrations resulted in hundreds of arrests.

As a result, courts ordered the group to pay the city of New York $19,141 for the cost of handling the demonstrations and fined it $50,000, payable to the United States, for ignoring the court orders.

Demonstrators, who typically harass and intimidate women and staff at abortion clinics and block access to the clinics, have been the target of a variety of legal action in recent years as they have become more aggressive and organized.

As a result, courts have imposed sanctions and large fines against the demonstrators, particularly those involved with Randall Terry's Operation Rescue, which has organized mass demonstrations across the country intended to close clinics and ''rescue'' the unborn.

Terry, the founder of the group, was sentenced to two-years in prison in Atlanta when he refused to pay a $1,000 fine. He was eventually freed when an anonymous donor paid the fine.

Last week, the court refused to hear a similar case from Georgia and last year the court refused to hear a case involving federal racketeering charges against anti-abortion protesters in Philadelphia. That case resulted in fines and costs of more than $100,000 being levied against the protesters.

Seeking high court review in Monday's case, Operation Rescue challeged the court rulings on a variety of grounds, including that its First Amendment rights of free speech were abridged.

The city of New York argued against review.

89-1408 Randall Terry et al. vs. New York State National Organization for Women, et al.

WASHINGTON (MAY 21) UPI - The Supreme Court refused Monday to disturb a ruling that an Indian tribal council claims deprives it of the federal right to be informed when a private adoption agency places an Indian child in a non-Indian home.

The court rejected arguments in the case brought by the Cook Inlet Tribal Council, a tribal Indian mother and her child seeking review of a ruling by the Alaska Supreme Court.

At issue in the case was whether the tribe was guaranteed by law the right to be notified when an Indian child, given up voluntarily by the mother, is placed in a non-Indian home by a private adoption agency.

The Tribal Council, the mother and her child, who were unnamed in the suit challenged Catholic Social Services for conducting proceedings terminating the woman's parental rights to her child without notifying the council.

The suit contended the termination of parental rights was invalid due to the agency's failure to provide notice to the child's tribe, violating the Indian Child Welfare Act that provides such tribes with the right to notice prior to such termination hearings.

The Superior Court ruled that the failure to provide notice of the termination proceedings violated the Indian Child Welfare Act and vacated the termination decree.

But on appeal, the Alaska Supreme Court reversed the lower court's ruling and held that tribes have no right to notice of voluntary termination proceedings involving tribal children. The court said those rights are only covered for involuntary termination proceedings.

Alaska's Department of Social Services filed a petition supporting the tribe's request for a review, arguing that failure to require notice creates situations ''where there is no check'' on an agency's placements with non-Indian families, depriving the children of critical tribal or cultural ties.

(MAY 21) UPI - A New York state Supreme Court judge is scheduled to set a trial date today for three teens accused of the gang rape and beating of a Wall Street investment banker in Central Park. Six youths have been indicted of rape and attempted murder in connection with a two-hour

''wilding'' rampage through the park a year ago.

Police in Atlantic City, New Jersey, say autopsies will be performed today on two adults and three children found dead in their apartment yesterday night. Authorities are NOT sure what happened to the victims, but carbon monoxide fumes in the run-down apartment made tenants ill on Saturday.

A broadcast report says Coast Guardsmen in the Florida Keys have worked for cocaine smugglers. The report, quoting unidentified federal authorities, says raids on several smugglers' homes turned up secret radio frequencies, patrol schedules, and radio transmission codes for every law enforcement agency in Florida.

Chinese and Western sources say China's former top official in Hong Kong currently is in the United States. The sources confirm the U-S government's statement that the official has NOT defected. But it's known he fled China because of a government investigation into his financial dealings and political conduct.

Funeral services are scheduled today for muppet creator Jim Henson. The ceremony will take place at the Cathedral of St. John the Divine on Manhattan's Upper West Side. A spokeswoman for Henson Productions says Henson's ''expressed wish'' was that NO one at his funeral mourn him by wearing black.

WASHINGTON (MAY 21) UPI - The Supreme Court ruled unanimously Monday that families cannot deduct from their federal taxes money sent to children who are on religious missions.

The court's ruling came in a case brought by Harold and Enid Davis of Idaho, the parents of two Mormon missionaries. At issue was whether, for tax purposes, such money falls under the definition of charitable contributions. If it does, it can be deducted from federal taxes.

The court, in a ruling by Justice Sandra Day O'Connor, said the money does not fit that definition and cannot be deducted, rejecting the argument that the money was merely held in trust for the church by the upaid missionaries.

She also said that because the person holding the money need not have any legal relationship with the church, such an arrangement could create ''insurmountable administrative difficulties'' for the Internal Revenue Service.

''Although there is no suggestion whatsoever in this case that the transferred funds were used for an improper purpose, it is clear that (the family's) interpretation would create an opportunity for tax evasion that others might be eager to exploit.''

In other action, the court:

-Upheld a federal law that requires criminals to make payments ranging from $25 to $200 into the Crime Victims Fund.

-Let stand a ruling that ordered ''Operation Rescue'' to pay nearly $70,000 for ignoring court orders limiting its demonstrations against abortions in New York.

-Refused to disturb a ruling that an Indian tribal council claims deprives it of the federal right to be informed when a private adoption agency places an Indian child in a non-Indian home.

The tax case stems from the missionary service of Benjamin and Cecil Davis in 1980 and 1981. While serving as missionaries for the Mormon church, they worked as unpaid full-time volunteers. Currently, there are some 36,000 Mormon missionaries serving worldwide.

If the missionaries are unable to pay their expenses, the church encourages their families to provide the money. If they are unable or unwilling to do so, the church will give support.

During the years in question, the Davises sent their sons some $9,000. The family tried to deduct the money from their income taxes, but the deductions were disallowed by the IRS. Federal courts upheld the ruling.

Seeking high court review, the family said the court's decision ''creates a substantial impediment to the efficient and effective operation of the church's missionary activities and imposes a serious burden upon millions of its American members.''

BETHESDA, MD (MAY 21) UPI - At least 30 AIDS activists were arrested Monday as hundreds of protesters besieged the National Institutes of Health to protest the government's ''failure'' to produce treatments for the deadly disease.

Park Police said between 800 and 1,000 protesters gathered at the NIH headquarters in the Washington, D.C., suburb, and at least 30 were arrested for blocking police vehicles or attempting to enter buildings. Most were charged with trespassing, police said.

Most of the demonstrators, who came from as far away as New York, California, Ohio and Louisiana and erected cardboard tombstones on the NIH campus, were kept away from buildings by mounted Park Police and NIH police, preventing disruption of most routine activities.

''The NIH is acting as if they were trying to cure the common cold rather

than treating a deadly disease,'' said Charles Franchino, a member of New York's AIDS Coalition to Unleash Power, or ACT-UP, which is leading the protest.

Organizers said ''hundreds'' of protesters were willing to be arrested for civil disobedience.

Demonstrator Phyllis Sharpe, 39, Bronx, N.Y., a black former drug user infected with the AIDS virus, accused NIH researchers of not doing their best to include minorities, women and drug abusers in tests of potential AIDS treatments.

''They do not want to save me or my child,'' said Sharpe, whose 3-year-old daughter is infected with the virus.

Tom Keenan, 30, a non-AIDS-infected heterosexual English teacher at Princeton University, said it is a shame the government has not done more to solve the acquired immune deficiency syndrome crisis.

''People shouldn't die from neglect. People are dying and are dying regularly,'' Keenan said.

Protest placards read, ''NIH - Negligence, Incompetence and Horror'' and ''Nobody Is Home.'' Demonstrators chanted, ''NIH, you can't hide. We charge you with genocide.''

Some 76,000 Americans have died of AIDS and the protesters claim that although the federal government has spent $1 billion and 10 years of testing AIDS drugs, only one drug - AZT - has received approval by the Food and Drug Administration.

But Dr. Anthony Fauci, director of the National Institute of Allergy and Infectious Diseases, which leads NIH's AIDS research effort, disputed the activists' claims that people infected with AIDS virus have received little help from such tests.

''Trials of virtually all anti-retroviral (anti-AIDS) drugs with significant promise have been or will be conducted by the AIDS Clinical Trial Group,'' Fauci said.

William Raub, acting NIH director, issued a statement that said, ''The tragedy of AIDS is keenly felt by scientists at NIH, and the frustrations of people who are infected by the AIDS virus and their advocates is understandable. ... NIH is wholeheartedly committed in the search ... to identify and discover the therapies and vaccines that will eventually defeat this disease.''

Fauci said although AIDS protesters have accused the government of taking

a business-as-usual approach ''nothing could be further from the truth.'' Fauci said in a statement that drugs tested in government-sponsored trials ''have made a dramatic impact on the lives of people who are infected with the AIDS virus.''

Jim Jensen, 30, of Los Angeles, who is taking part in AZT tests and interlukin-2, said he supports the protesters' efforts.

Appearing in pajamas and attached to an intravenous supply of drugs, Jensen called on Health and Human Services Secretary Louis Sullivan to take ''a more bold role and become a stronger advocate for AIDS research.''

The AIDS activists want NIH to expand the number of potential AIDS-fighting compounds tested for safety and preliminary effectiveness, testing at least 30 new compounds each year.

''NIH's research priorities, set by a closed committee, result in their failure to test promising drugs against AIDS,'' ACT-UP said in a statement.

Fauci countered that NIH-sponsored tests have looked at or are planning to examine ''virtually every promising AIDS or AIDS-related therapy.''

''Setting an arbitrary quota for drugs to be studied ... is scientifically indefensible as well as highly wasteful of resources,'' he said.

NEW YORK (MAY 21) UPI - Recycled newsprint production will increase threefold by 1995 - to about 38 percent of the total from 14 percent last year - as paper manufacturers react to recycling legislation and public pressure, said a survey released Monday.

In a study commissioned by Black Clawson Co., a recycling machinery maker, paper industry executives in the United States and Canada predicted that newsprint-to-newsprint recycling will increase to about 41 percent by the turn of the century, then level off because of supply limitations.

While only 11 percent of all newsprint in North America, or 1.5 million tons, is currently recycled into newsprint, another 25 percent, or 3.4 million tons, is made into products such as corrugated boxes, paperboard, egg carton, and home insulation.

The paper industry, already troubled by overcapacity and low profits, is somewhat resistant to increasing recycled newsprint production because of the associated costs, the survey showed.

De-inking facilities to process old newsprint ranges from about $60 million

to $80 million. However, 69 percent of the 26 companies surveyed said they were planning to purchase de-inking units in the near future, which could involve total capital expenditures of about $1.5 billion to $2 billion.

#90141u1187 05/21/1990 ~United Press International

WASHINGTON (MAY 21) UPI - El Salvador's military leaders share a tolerance of human rights abuses and a penchant for corruption, suggesting efforts to reform the country's armed forces have failed, a congressional report showed Monday.

The staff of the bipartisan Arms Control and Foreign Policy Caucus examined the records of the top 15 Salvadoran military officials and found that 14 of them had led troops with documented records of repeated human

rights abuses.

The caucus report did not try to determine whether the commanders took part in the abuses, but said the fact that they rose to their current posts shows there is ''little accountability'' in the military and sends ''an unmistakable message to soldiers that misbehavior is tolerated.''

The findings were released as the House was set this week to consider a Democratic proposal opposed by President Bush that would cut in half U.S. military aid to El Salvador in 1990 and 1991.

''We in Congress are hearing that the United States should keep the money flowing to the Salvadoran army lest we cause unimaginable suffering in that country,'' said Sen. Mark Hatfield, R-Ore., vice chairman of the caucus, made up of Democrats and mostly moderate Republicans.

''This report reveals the complete failure of U.S. attempts to reform and restructure the Salvadoran military. The truth is, things keep getting uglier down there and it is time to change our policy.''

Of the 14 officers whose troops committed human rights abuses, 11 had received U.S. training, which the report said raises doubts ''about the relevance of U.S. training.''

Under 13 of the officers, killings of civilians occurred. Under 12, prisoners were tortured - sometimes for days. Under 10, either the commanders or their subordinates falsified facts to absolve the military of abuses.

The study said ''widespread corruption'' poses a ''significant barrier'' to preventing human rights abuses because ''many officers have detailed knowledge of each others' questionable business practices.''

The report said U.S. Embassy officials are particularly concerned that officers - who only earn up to $500 a month - are listing ''ghost soldiers'' on the military payroll and collecting their paychecks.

An embassy official told the caucus ''ghost soldiers'' account for 5 percent to 15 percent of the armed forces. The report said in one case a unit called into action during a rebel offensive did not show up and possibly did not exist.

The report said another barrier to cleaning up the military is its lack of a clear command structure. Instead, the armed forces are dominated by the ''Tandona,'' or big class, members of the 1966 class at the nation's military academy who hold 12 of the top 15 posts in the armed forces and rule by consensus.

At the hub of the ''Tandona'' is Col. Rene Emilio Ponce Torres, army chief of staff and leader of a more shadowy group of eight to 10 key officers called the ''Compadres,'' or the godfathers, who mediate disputes between officers.

Advocates of cuttting U.S. military aid - about $85 million a year - say they are hoping to encourage peace talks under way between the government of the Central American country and leftist rebels, and to protest the killings of six Jesuit priests last year by government soldiers.

House Democrats reported last month that the Salvadoran investigation of the killings is at a virtual standstill and that no effort has been made to find out whether top military commanders were involved.

However, administration officials worry that deep cuts would discourage the military from negotiating. Many Republicans also say the Jesuit killings were the acts of renegade soldiers and not part of a pattern.

The caucus study was based on abuses documented by the Roman Catholic Church, America's Watch, Amnesty International, the State Department and members of Congress.

#90141u1206 05/21/1990 ~United Press International

(MAY 21) UPI - Rain fell in San Francisco during the night for the first time this month. But the rain was NOT enough to ease the drought that has forced water rationing in the Bay Area. It measured only about one-fifth of an inch. Southerners wish they had so little. Heavy rain is adding to the high water from earlier spring storms. And the National Weather Service says more thunderstorms are possible.

A gunman opened fire on a group of French tourists in Jordan today... an attack officials say may be retaliation for the slaying of seven Arab workers in Israel yesterday. The gunman wounded at least nine people in downtown Amman as they viewed a Roman amphitheater. A Palestinian group in Lebanon today vowed revenge for the slayings in Israel. And scattered violence has recurred in Israel today.

The Coast Guard says it has almost NO drug corruption in its ranks. But a report says Coast Guardsmen in the Florida Keys have worked for, or with, cocaine smugglers. The report says at least 15 guardsmen assigned to the Islamorada station are corrupt. The report attributes the information to federal authorities conducting an investigation. Admiral Paul Yost says he is NOT aware of any federal probe.

The former top Chinese official in Hong Kong is in the United States. Chinese and Western sources expect him to stay until he finds out the

results of a Chinese government investigation of his political conduct and financial dealings. The government has said only that he came to the United States for ''travel and rest.'' He retired in February as the head of the Chinese news agency's Hong Kong office... which acts as an unofficial consulate.

#90141u1224 05/21/1990 ~United Press International
JOLIET, IL (MAY 21) UPI - Guards quelling an internal gang fight at Stateville Correctional Center shot and killed two inmates and corrections officials Monday a lockdown Monday while they tried to determine what touched off the melee.

Three inmates were injured.

The Sunday night disturbance was brought under control quickly after the guards opened fire and the maximum-security prison, which houses more than 2,000 inmates, was locked down, said Nic Howell, spokesman for the Illinois Department of Corrections.

Howell said officials initiated two investigations - one into what started the fight and the other into the use of force.

''It was an internal gang fight,'' Howell said. ''What they were attempting to accomplish, I don't know. It appeared to be a premeditated attack based on the weapons recovered.''

Howell said about 10 inmates - all members of a Chicago street gang - were involved in the incident at the outset. He said all were armed with homemade knives.

The dead inmates were identified as Eddie Carpenter, 42, who was serving a 60-to 100-year sentence for a 1976 murder, and Leroy Carter, 27, Chicago, who was serving 40 years for a 1982 murder and a concurrent 30-year term for armed robbery.

One of th injured prisoners was in serious condition with a puncture wound and a gunshot wound at Silver Cross Hospital in Joliet and a second was in fair condition with gunshot wounds to his leg. The third injured inmate was confined to the prison infirmary with stab wounds in his hand.

No corrections officers were injured in the fight at Stateville, located about 40 miles southwest of Chicago, authorities said.

Howell said the prison will remain on lockdown until officials determine no further violence is likely.

Howell said several of the brawling inmates brandished makeshift knives before guards responded with gunfire. The guards warned the inmates to put down their weapons before shots were fired, he said.

''The guards saw weapons brandished,'' Howell said. ''That gave the guards the opportunity to save lives. It's not unusual in a maximum-security prison for security staff to fire gunshots.''

The disturbance, which began about 8 p.m., included 10 inmates, officials said. ''We understand they are all from one gang,'' Howell said.

Stateville, built in 1920, has been the scene of violent and sometimes deadly confrontations during the last three years between inmates and staff, and among gang members in the prison population.

On July 1, Lawrence Kush Jr., a 24-year-old corrections officer, was fatally beaten by inmates on the prison grounds. Kush was the eighth guard to die in eight years at Stateville.

#90141u1250 05/21/1990 ~United Press International

WASHINGTON (MAY 21) UPI - The Supreme Court upheld Monday a law requiring those convicted of a federal crime make a payment into a crime victims fund.

The court's ruling turned on a technical point of constitutional law - whether the law was originated in the proper house of Congress.

The 9th U.S. Circuit Court of Appeals had ruled the assessments were unconstitutional because they violated the origination clause of the Constitution, which states all revenue raising bills must originate in the House of Representatives.

The lower court found the main purpose of the special assessment law was to raise federal revenue, and it found that the legislation originated in the Senate, not the House.

The Supreme Court, however, in a ruling by Justice Thurgood Marshall, rejected that reasoning. Marshall said the bill was intended to aid victims of crimes, not raise general revenue.

''Because the bill at issue was not one for raising revenue, it could not have been passed in violation of the origination clause,'' he said.

The case stems from a $50 ''special assessment'' imposed on a man convicted of helping illegal aliens enter the country in the San Diego area of the U.S.-Mexican border.

The assessment was imposed under a federal law drafted as a result of the Victims of Crime Act of 1984. The section stipulates that anyone convicted of a federal crime must pay a ''special assessment'' ranging from $25 to $200 into the Crime Victims Fund for distribution to victims of crime.

The payment was struck down by the appeals court.

Seeking high court review, the government disputed the December 1988 decision, saying the assessments were set up ''as one part of an integrated program to provide assistance to victims of crime.''

They added that the money collected from the criminals is deposited into the Crime Victims Fund, not in the U.S. Treasury.

#90141u1269 05/21/1990 ~United Press International

SRINAGAR, INDIA (MAY 21) UPI - Three gunmen Monday assassinated the chief

Islamic cleric of strife-torn Kashmir and security forces fired on thousands of mourners who seized the priest's body from a hospital, killing at least 25 people, authorities said.

More than 250 people were wounded in that clash and three other confrontations between residents and security forces that were provoked by the slaying of Moulvi Farooq, the sources said.

The violence prompted authorities to impose an indefinite curfew on Srinagar, the summer capital of Jammu and Kashmir state, and deploy hundreds of combat-ready troops across the mountain-ringed city with orders to shoot curfew violators on sight.

There were no immediate claims of responsibility for the slaying of cleric Moulvi Farooq, 45, although police blamed Moslem separatists engineering a popular uprising against Indian rule of Kashmir that has claimed more than 300 lives since it erupted in mid-January.

Police said three men asking to see the cleric were admitted to his residential compound and escorted by Farooq's servant to his office. Police said the servant left and about one minute later, the three pulled out pistols, fired at the cleric and fled.

Hundreds of the cleric's enraged followers broke into the hospital and seized the body, carrying it on a stretcher through the streets toward the Jama Masjid mosque shouting ''Indian dogs go back,'' ''We want independence'' and ''Death to Jagmohan.''

The procession swelled to an estimated 12,000 people and thousands of others watched from the sidewalks as it moved 3 miles before hundreds of security personnel blocked the way in the city's Hawal district.

The protesters were informed they were violating curfew and ordered to disperse. Demonstrators tried to forge ahead but security personnel moved in and seized Farooq's body.

The protesters were again ordered to disperse, but refused, prompting the security forces to open fire, killing at least 25 people, police and hospital sources said.

The firing provoked a massive stampede by the fleeing crowd. Troops were then rushed to the area in dozens of trucks.

Farooq's body was later handed over to his followers.

More than 250 people were injured by bullets and baton blows in that incident and three other confrontations between security forces and residents who defied the curfew to protest Farooq's killing, the sources

said.

Farooq was known to have been on a militant ''hit list'' for condemning as ''un-Islamic'' the abduction by separatists last December of the daughter of federal Home Minister Mufti Mohammad Sayeed. The woman was released in return for freedom for five jailed extremists.

However, the Jammu and Kashmir Liberation Front, the group that committed the kidnapping, issued a statement condemning the killing of Farooq.

Members of Farooq's family, his followers and thousands of protesters blamed the slaying on Jammu and Kashmir State Gov. Jagmohan, who has deployed tens of thousands of troops and police and used harsh measures to try to quell the anti-India uprising, which is supported by Kashmir's 4 million-strong Moslem majority.

Farooq had dropped a relatively ambiguous stand on the independence question after the insurrection was sparked by the killing of unarmed demonstrators by security forces. He then strongly endorsed the movement for Kashmiri self-determination.

''You go and tell Jagmohan to relax now. He has achieved what he wanted,'' 15-year-old Naila Farooq, the priest's daughter, cried to journalists outside her father's home.

''They came to his office at about 11:15 a.m. and shot him from point-blank range and ran away immediately,'' said a sobbing Umar Farooq, the priest's son.

WASHINGTON (MAY 21) UPI - The executive who helped double annual revenues for the Allstate Insurance Group may soon join the board of directors at First Executive Corporation, the Los Angeles insurance holding company. Donald F. Craib, Jr., the retired chairman of the board and chief executive officer of Allstate, has been nominated for the First Executive board.

Mark Hobbs, president of Rosewood Financial Inc., which owns ten percent of First Executive's common stock outstanding, made the nomination and suggested that First Executive create an additional board seat for him.

A letter from Hobbs, contained in an amendment to a Schedule 13D filed Monday with the Securities and Exchange Commission, said Craib is "not only willing to serve but feels that he can make a substantial contribution."

As Allstate's CEO from 1982 to 1986, Craib restructured the company, doubled its sales locations, streamlined its cost structure, and nearly doubled revenues, the letter says.

In the year prior to Craib's retirement, Allstate earned $605 million. The company's life insurance in force during his tenure grew from $40 billion to almost $80 billion.

This contrasted sharply with First Executive's current status. In the fourth quarter of 1989, the company lowered the value of its junk-bond portfolio by $859 million.

In first quarter 1990, customers worried over the company's financial health surrendered $1.33 billion in insurance policies and annuities, saddling First Executive with a large cash outflow.

A Schedule 13D must be filed with the SEC by investors who have acquired more than five percent of a company's outstanding stock. The filing includes information on the size of the purchase and the investor's intent in acquiring the stock. Investors must amend a schedule when change the size of their ownership or otherwise take actions that affect the company.

#90141u1287 05/21/1990 ~United Press International

WASHINGTON (MAY 21) UPI - The Supreme Court ruled unanimously Monday that the federal government, not the states, controls water usage at federally licensed power plants.

The court's ruling in a case from California is a blow to the states that had argued they should be allowed to set water use standards.

California was supported by 49 other states. Only the District of Columbia failed to join California in urging Supreme Court review.

In a friend of the court brief, the states said the appeals court decision threatened their entire water regulatory system and said if allowed to stand it would ''create a chaotic situation in state water law.''

Nonetheless, Justice Sandra Day O'Connor said a state measure ''is pre-empted to the extent it actually conflicts with federal law.''

O'Connor said allowing California to ''impose significantly higher minimum stream flow requirements'' would give the states veto power over such projects.

The case was brought to the high court by the state of California seeking review of a ruling by the 9th U.S. Circuit Court of Appeals.

In seeking high court review, California said the case ''presents a significant and unresolved national question concerning the scope of state water rights authority over federally licensed projects.''

The case stems from a hydropower project on Rock Creek, a tributary of the South Fork of the American River near Placerville, Calif.

The project, operated by the Rock Creek Limited Partnership, diverts water from a dam located on Rock Creek to a power plant for generation of hydroelectric power. The water is returned to the South Fork of the American River about 1 mile below the original diversion point.

The project diverts some water for the project and allows the remainder to flow in its natural course in Rock Creek. The minimum amount of water flow that must be left in Rock Creek is called the flow rate.

The flow rate is at the center of the dispute. The state wanted a much higher flow rate than approved by the government to protect a ''trout resource'' in the Rock Creek-American River system.

However, the Federal Energy Regulatory Commission declared it has exclusive power to set minimum flows and the state sued. The appeals court sided with FERC.

89-333 State of California vs. Federal Energy Regulatory Commission, et al.

NEW DELHI, INDIA (MAY 21) UPI - A U.S. diplomatic mission to encourage an Indo-Pakistan dialogue on reducing the threat of war over disputed Kashmir appeared to founder Monday, with New Delhi repeating that Islamabad must first halt its support of ''terrorism and subversion.''

Fears of a fourth Indo-Pakistan conflict have escalated since the rise in frictions concerning Kashmir, over which the two sides went to war in 1948 and 1965. Battles were also fought there in the 1971 conflict that led to the creation of Bangladesh.

The two sides have accused each other of making war-like preparations but foreign analysts have played down the threat of conflict. They warn that a misunderstanding on the tense border could ignite a war.

Some believe both sides have the capability of nuclear attack and that a conventional war could escalate into a nuclear exchange.

The American initiative was led by special presidential envoy Robert Gates the deputy national security adviser, and also included John Kelly, assistant secretary of state for Near Eastern and South Asian affairs, and Dr. Richard Haass, the special adviser to President Bush on Near East and South Asian Affairs.

The delegation, which arrived late Sunday from Islamabad following talks on the Kashmir crisis with Pakistani leaders, held a series of meetings with Indian officials that culminated with a 35-minute session with Prime Minister V.P. Singh.

Gates presented Singh with a letter from Bush, the contents of which were not disclosed, officials said.

The U.S. Embassy said the trio departed for Washington late Monday afternoon.

A U.S. statement said the American team was sent to determine actions Washington could take to soothe tensions that arose between New Delhi and Islamabad after the eruption in mid-January of a popular uprising for independence on India's side of predominantly Moslem Kashmir.

India accuses Pakistan of fomenting the insurrection, in which more than 300 people have died, and arming and training Moslem militants who are guiding the movement. It claims Islamabad is trying to realize its claim to all of Kashmir, which has remained divided between the neighboring rivals since they fought their first of three wars in 1948.

Pakistan rejects the charges, but has openly called for Kashmiri self-determination and is raising funds for the cause.

The U.S. statement said that in his meeting with Singh, Gates ''reiterated the president's call that both sides take steps to reduce military confrontation and to restore the calm essential to work out all their differences through dialogue and negotiations.''

But, a Foreign Ministry spokesman said Singh repeated India's position that no dialogue is possible until Pakistan halts its alleged support for outlawed Kashmiri separatist groups and Sikh militants fighting for independence in the Indian state of Punjab.

''In responding to the special envoy, the prime minister reiterated India's concerns regarding Pakistan's continuing support to terrorism and subversion in Punjab and Jammu and Kashmir,'' he said.

''These activities are the root cause of the present situation and their elimination is essential for restoring confidence and thereby de-escalating the present situation,'' said the spokesman.

Both statements quoted Gates as saying the United States, which has built strong ties with India in recent years despite being Pakistan's main economic and weapons provider, was not seeking a role as a mediator.

''Rather, the United States as a friend of both India and Pakistan, hopes to contribute to a reduction in tensions,'' the American Embassy statement said.

Before meeting Singh, the U.S. team held discussions with Foreign Minister I.K. Gujral, Minister of State for Defense Dr. Raja Ramanna and Army Chief of Staff V.N. Sharma, officials said.

#90141u1361 05/21/1990 ~United Press International

JERUSALEM (MAY 21) UPI - A former Nazi S.S. guard's identification of John

Demjanjuk as the sadistic death camp guard ''Ivan the Terrible'' was flawed and carried no legal weight, Demjanjuk's defense lawyer told Israel's Supreme Court Monday.

Attorney Yoram Sheftel spent most of the fifth day of his client's appeal disputing the testimony of Otto Horn, whose identification of Demjanjuk as ''Ivan the Terrible'' was a key factor in the Ukrainian native's 1988 conviction by a three-judge District Court panel.

Demjanjuk was sentenced to death in 1988 for herding thousands of Jews into gas chambers at the Treblinka death camp in Nazi-occupied Poland and then operating the engine that produced the gas.

Sheftel told the five-judge Supreme Court hearing the automatic appeal that Horn, 83 at the time of the trial, failed to identify Demjanjuk as Ivan when first presented with a group of eight photos by investigators. Only after more than one viewing and prodding by investigators was Horn able to identify Demjanjuk, and then based solely on his ''round face,'' Sheftel said.

''There are hundreds of millions of people with round faces on this earth '' Sheftel told the justices.

Horn, an S.S. guard at Treblinka, also told investigators that ''Ivan the Terrible'' had black hair, while Demjanjuk had light hair, the defense lawyer said in contending Horn's testimony carried no legal weight.

For the most part, the justices listened impassively during Sheftel's arguments Monday, in contrast to the previous session Thursday when they questioned Sheftel for using sarcasm when referring to the dreams of death camp survivors.

Despite inconsistencies in witnesses' testimony during the trial, Sheftel said Monday, the lower court failed to give his client the benefit of the doubt when witness accounts conflicted. Rather, the court disregarded inconsistencies when it would have been to the defendant's advantage, he argued.

''It was in this manner that the fate of (Demjanjuk) was sealed,'' Sheftel said. ''When a witness identification was in doubt or even 50-50, the defendant was not given the benefit of the doubt. This is a motif that runs through the entire verdict.''

Demjanjuk claims he is a victim of mistaken identity and was a prisoner of war at Chelm, Poland, during the period the prosecution said he was at Treblinka. Five survivors testified at the previous trial that they had identified him in photo lineups. An additional five, who did not testify, also picked him out.

Sheftel has charged photo lineups were presented to survivors in biased ways to implicate Demjanjuk. He also has asserted at least one survivor was senileat the time of his identification of Demjanjuk, a naturalized U.S. citizen living in a suburb of Cleveland, Ohio, when he was stripped of his citizenship in 1981 and extradited to Israel five years later.

In April 1988, Demjanjuk was convicted of four counts of war crimes under Israel's 1950 Nazi and Nazi collaborator's law. Adolf Eichmann, mastermind of the Nazi's ''Final Solution,'' is the only other person convicted, and subsequently executed, under the law.

Beginning Tuesday and in upcoming days of the appeal Sheftel will dispute a key piece of evidence, a Nazi identification card that says Demjanjuk trained at another camp. Demjanjuk maintains the card was forged by the Soviet Union to frame him for serving in an anti-Soviet militia toward the end of the war.

The appeal is expected to last another three weeks.

(MAY 21) UPI - Flood-ravaged Arkansas got socked with a new wave of thunderstorms and heavy rain today, after earlier downpours forced hundreds of evacuations. Yesterday, more than one foot of rain caused widespread damage and forced hundreds of evacuations in central Arkansas. In southeast Texas today, rising floodwaters covered houses in two counties as five times more water than normal surged through Lake Livingston Dam into the swollen Trinity River.

In India's Kashmir state today, the chief Islamic cleric was killed in an attack by three gunmen. Security forces then fired on thousands of mourners who took the priest's body from a hospital. At least 18 people were killed and more than 40 others wounded. Police blamed Moslem separatists for the cleric's death.

Police say as many as one-thousand people demonstrated today outside the National Institutes of Health in Bethesda, Maryland, to protest the lack of a cure for AIDS. The protesters were kept away from the building and there were NO arrests. The AIDS activists want the government to expand the number of potential AIDS-fighting compounds tested for safety and preliminary effectiveness.

An Arab gunman opened fire at the Roman ampitheater in Amman, Jordan, today... wounding at least nine French tourist and a Jordanian. Officials at one hospital in Amman say five French tourists were treated and released and five other wounded people were transferred to another

hospital. The P-L-O says the attack on the tourists was in response to the slaying yesterday of seven Palestinians in Israel by a gunman Israeli officials described as ''deranged.''

Police in Fort Worth, Texas, say they have freed two brothers arrested in the shooting deaths of five men at a cafe last Monday. Police say they had little evidence against Paul and Timothy Miller. Four masked men with high-powered weapons burst into the Glass Key Cafe, breaking up a high stakes dice game. Five people were killed and four were wounded.

(MAY 21) UPI - A broadcast report says at least 15 members of the Coast Guard at a station on the Florida Keys worked for cocaine smugglers. The report says federal agents raided the homes of smugglers and found records of secret radio frequencies, patrol schedules and codes used in radio transmissions for every law enforcement agency in the Florida Keys.

Western sources say that China's former top official in Hong Kong fled after learning of a Chinese government probe of his political and financial affairs. The sources say that the offical, now in the UNited States, has NOT defected, but his departure earlier this month was prompted by fears of the investigation. Until he retired last February, the official headed the Chinese news agency's Hong Kong office.

#90141u1386 05/21/1990 ~United Press International

WASHINGTON (MAY 21) UPI - Human rights and scientific groups, joined by American academics and prominent Soviet dissidents Monday launched a campaign to free Chinese physicist Fang Lizhi, currently taking refuge in the U.S. Embassy in Beijing.

And one of the Soviet Union's most prominent dissidents, Yuri Orlov, in a stinging rebuke of U.S. policy toward China, said the Bush administration ''is not ready for democracy'' in the rest of the world.

Fang is a world-renowned scholar and astrophysicist who has been the intellectual leader of efforts at democratic reform in China since the late 1950s and is frequently compared with Soviet dissident Andrei Sakharov.

Last June, following the violent crackdown on student pro-democracy demonstrators in Tiananmen Square, Fang and his wife, Li Shuxian, were placed on the Chinese government's ''most wanted list'' and found refuge in the U.S. Embassy where they have been for nearly a year.

''Scientists have moral and professional obligations to defend their colleague Professor Fang Lizhi and any other scientists and future scientists, the students, who are being persecuted for their free opinions '' said Orlov, one of the Soviet Union's most prominent dissidents until he was forcibily deported to the United States in 1986.

Orlov, also a physicist and a founder of Amnesty International, told a news conference it is important to ''try to push the opportunistic and insensitive U.S. administration in the right direction.''

''The problem of this administration is that it is not ready for democracy - in Russia, in China, and elsewhere far from the United States,'' Orlov said. ''They can't understand that people there are more ready for democracy than their leaders.''

The campaign comes at a time when the United States is considering renewing Most Favored Nation trading status with China. Bush must decide by June 3 - the day before the first anniversary of the violent crushing of the pro-democracy movement - whether to renew that trading status.

Bush has resisted efforts to diplomatically or economically punish the Chinese leadership for the repression of the student movement but at a news conference last week said he was undecided, saying he didn't want ''to send a signal that we are happy with the human rights record'' but that, ''I am still of a mind that having contact ... in an area where there has been progress - on the economic side - with China is important.''

The new campaign, bringing together the Robert F. Kennedy Memorial Center for Human Rights, Human Rights Watch, the American Physical Society and the American Astronomical Society, is to begin with appeals to the Chinese Academy of Sciences and Secretary of State James Baker for increased pressure on the Chinese government to allow Fang to leave China.

Over 200 scientists from the United States and abroad signed the appeals and said they would boycott any international scientific meetings or conferences in China until Fang is freed.

Aryeh Neier, executive director of Human Rights Watch, said there were currently 11 such conferences planned in China between now and December.

''We now call upon the U.S. government to use every means at its disposal to ensure that (safe passage for Fang and his wife) be secured without conditions or concessions,'' the scientists said in their appeal to Baker. They urged the government to ''publicly and privately ... press the Chinese authorities to release the names of all scientists and students of science arrested since last June and to grant amnesty to those accused of non-violent 'counter-revolutionary' offenses.''

#90141u1430 05/21/1990 ~United Press International
WASHINGTON (MAY 21) UPI - The Food and Drug Administration approved using weakened bacteria Monday to treat a type of bladder cancer.

More than 45,000 cases of bladder cancer are reported in the United States each year and about 9,700 deaths are caused by the disease.

The bacteria product, called Bacillus Calmette Guerin Live, or BCG Live, has been approved to treat a form of the cancer known as ''in situ,'' which accounts for about 20 percent to 30 percent of bladder cancer cases, the FDA said.

Made by using live, but weakened, bacteria, BCG Live is manufactured by Connaught Laboratories Ltd. of Willowdale, Ontario.

The live bacteria, administered at a high dosage directly into the bladder

through a tube, causes an inflammatory reaction that eliminates many cancer cells, the FDA said.

The patient holds the vaccine in the bladder for about two hours before urinating. The procedure is repeated once a week for six weeks and then monthly for six to 12 months. The treatment may be used alone or after surgical scraping to remove visible tumor growth.

Although there are BCG vaccines currently licensed in the United States, the new product is the first approved for the treatment of this type of cancer. The Connaught product has not been approved as a vaccine, the FDA said.

In studies sponsored by the National Cancer Institute, 74 percent of patients with the cancer responded to the treatment. Patients treated with BCG had a median time for cancer recurrence of four years.

For people who do not respond to treatment with BCG, other treatment such as removal of the bladder may be recommended.

Flu-like symptoms such as fever, chills and nausea, and discomfort related to inflammation of the bladder are the most common side effects following BCG Live therapy, the FDA said.

However, the FDA-approved labeling also warns physicians to watch for and treat any spread of BCG organism throughout the body, which has been associated with two deaths.

BCG Live will be distributed by Connaught Laboratories Inc., of Swiftwater Pa., under the trade name Theracys.

#90141u1454 05/21/1990 ~United Press International

LONDON (MAY 21) UPI - Stock prices closed higher in thin trading on the London International stock exchange Monday, supported by market hopes that Britain will enter the European Monetary System.

The blue-chip Financial Times 100-stock index, which fell 15.3 points Friday, closed up 13.0 points at 2,282.1. The narrower top 30 industrial average gained 17.5 points to 1,810.8.

An estimated 316 million shares changed hands, compared with 595 million shares Friday.

Analysts, noting the low volume, said most large institutional investors remained sidelined to await Wednesday's key report on Britain's balance of trade data for April.

Traders said stores and buildings stocks were boosted by optimism over interest rates, which are expected to move lower once the pound is brought into the exchange rate mechanism of the EMS.

Market enthusiasm about the EMS has remained high after hints by Chancellor of the Exchequer John Major that Britain will join the system sent shares up sharply Thursday, analysts said.

On the economic front, investors largely ignored news from the Bank of England that Britain's narrow money supply M-0 rose a provisionally estimated 7.3 percent in April from year-ago levels on a seasonally adjusted basis.

Market forecasters were expecting the report to show an 6.9 percent rise.

Among the most widely traded stocks, Carlton Communication tumbled 40 cents to $8.24 after reporting its latest half-year pretax profits climbed 54 percent. Analysts noted the earnings were uninspiring and expressed concern over the company's short-term outlook.

British Airways PLC gained 6 cents to $3.43. The airline was expected to report higher earnings Tuesday.

Rolls-Royce gained 14 cents to $3.42 as the company awaited approval from U.S. authorities to start trading in the American Depositary Receipts.

Thorn EMI gained 22 cents to $11.55 following a broker's recommendation and in advance of the company's financial results expected to be released early next week.

Elsewhere in Europe, prices closed broadly lower in moderate trading on the Frankfurt Stock Exchange.

The closely watched German Stock Index, which gained 2.01 points Friday, lost 32.41 or 1.76 percent to 1,811.18.

Traders said prices dropped on continuingg investor worries about the planned monetary and economic union of the two German states.

#90141u1468 05/21/1990 ~United Press International

WASHINGTON (MAY 21) UPI - A survey of economists Monday predicted no U.S. recession through 1991, which would set a postwar record for an economic expansion, but warned of slowing growth and a worsening federal budget deficit.

The poll of 68 professional forecasters, conducted by the National Association of Business Economists, said despite a surge in food and energy costs after the December cold snap inflation will finish the year at 4.7 percent and fall to 4.3 percent in 1991.

''Four out of five forecasters (82 percent) predict that there will be no recession through 1991,'' the group said. ''That would be a postwar record for a business expansion (109 months), exceeding the previous longest cyclical upturnof 106 months (from 1961 to 1969).''

The current expansion started in November 1982, in the wake of the worst economic downturn since the Great Depression.

Interest rates are expected to remain at current levels through the end of the year and decline slightly in 1991, while unemployment should hover in the 5.4 percent range during both years, the economists predicted.

Inflation-adjusted growth is expected to run at 2.1 percent in 1990 and 2.5 percent in 1991, following a gain of 2.6 percent last year.

''By sector, relative strength is forecast to persist in business investments and trade, as corporate profits (after tax) rebound with a 6.6 percent gain,'' the survey said. ''Housing starts and auto sales remain in the doldrums.''

But the economists cautioned the federal budget deficit will reach $154 billion in fiscal 1990 and $135 billion in fiscal 1991, vs. the $100 billion and $64 billion targets set by the Gramm-Rudman-Hollings deficit reduction law.

''There is bad news in the NABE forecast for the White House and congressional negotiators as they meet on the fiscal year 1991 federal budget,'' according to the economists' association, headquartered in Cleveland.

''The NABE forecasters estimate the budget deficit is deteriorating and, by fiscal year 1991, will come in about $70 million more than the Gramm-Rudman-Hollings target,'' the group said.

''Much of the difference between the NABE forecasts and the administration deficit forecast in the president's 1991 budget results from differing economic outlooks,'' the group added. ''The NABE panel is significantly less optimistic about growth and interest rates.''

#90141u1486 05/21/1990 ~United Press International

SAN ANTONIO (MAY 21) UPI - Valero Natural Gas Partners L.P. Monday

announced a 10-year agreement to supply up to 33 million cubic feet of gas per day to Washington Gas Light Co. at market prices.

Washington Gas Light serves customers in the District of Columbia, Maryland and Virgina.

Valero said the agreement is part of its strategy of increasing its term contract sales to a higher percentage of total sales. Currently, it said, about 45 percent of the sales are under longer term conrtacts, up from 40 percent last year. The company wants to increase that to 70 percent in the next three years.

Valero said this year it also commenced sales under term agreements to provide more than 30 million cubic feet of gas per day to two major Texas utilities.

Valero owns a 7,100-mile intrastate network of natural gas transmission and gathering lines in Texas and Oklahoma. It also produces natural gas liquids from 11 gas processing facilities in the two states.

PASADENA, CA (MAY 21) UPI - It was the seniors vs. the ''wimps'' again Monday at Caltech, the science-oriented campus where everything - including the traditional college prank - is just a little bit different.

It was Ditch Day, and any seniors found on campus between 8 a.m. and 5 p.m. were to be tied to trees by their underclass colleagues, dubbed ''wimps,'' Caltech spokesman Robert Finn said.

But that was only the beginning of the Ditch Day craziness.

The wimps spent the day trying to break into the seniors' rooms, a task that at Caltech calls for the brains of an Einstein as well as the wiles

of a cat burglar.

''All the seniors leave their dorm rooms locked in various inventive ways '' Finn said. The locks, he said, are called stacks, for some reason no one remembers.

''The first type of stack, and the historically earliest, is called 'brute force stacks,''' he said. A senior secures his room with bricks, steel bars, cement or whatever it takes to prevent physical entrance.

Wimps use whatever means are necessary to circumvent a brute force stack, up to, including and even beyond jackhammers and tunnels.

Where brute force will not do, finesse or honor stacks are employed.

''In a finesse stack, the room tends to be locked with some type of Rube Goldberg-type device,'' Finn said.

Once a senior stuck a tube through his door and, out in the hallway, left a disassembled '64 Chevy engine.

The task for the wimps: scrounge a few of the critical missing engine parts, put the motor together, get it running and direct the exhaust into the tube to trip the lock.

Another legendary finesse stack was a computer and a challenge: Figure out what the computer wanted to hear and it would let you into the room.

''It turned out the computer was programmed so that, if anyone left it alone for five minutes, it would have automatically opened the door,'' Finn said. Of course, the wimps were so busy tapping possible passwords into the keyboard that the door remained locked.

In an honor stack, a key is left handy or the room is unlocked, but wimps are honor-bound not to enter until a complex task - such as concocting a religion or completing a scavenger hunt - is completed.

''The whole point is to break into the room before 5 p.m.,'' Finn said.

Seniors leave ''bribes'' inside their rooms to entice the wimps to leave the space untouched once they are inside.

''If the bribe is satisfactory, that's the end of it. If not, the wimps can counterstack the room so the senior has to break into his own room when he gets back,'' Finn said.

NEW YORK (MAY 21) UPI - Latest metal market prices as quoted Monday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 73.00-74.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-$1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 133.60 c-lb.

Lead, common, U.S. primary producers 45.00 c-lb.; U.S. non-primary (secondary) producers 49.00-52.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $280.00-$290.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.01-$4.17 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $118.00-121.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $490.25-$494.00; dealer-approx., $480.00-$490.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $110.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $111.17 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 307.75 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 87.00-87.75 c-lb.

#90141u1519 05/21/1990 ~United Press International
BROOKSVILLE, FL (MAY 21) UPI - Extra deputies patrolled the hallways of Hernando County high schools Monday in the wake of the weekend beating

death of a white teenager by a group of black youths.

''I can't put my finger on it,'' said Brooksville Police Chief Ed Tincher about the attitude of Brooksville residents. ''It's kind of like the eye of the hurricane is passing over us now. We just hope that what comes next isn't as devastating as what we just went through.''

Black community leaders, police and school officials gathered at a special Hernando County School Board meeting Sunday and urged residents to remain calm. The board rejected a motion to impose a curfew for school-aged youths.

Russell Coats, 19, was beaten to death early Saturday morning with clubs, boards and tire irons in a fight between about 20 black youths and about 20 white youths, police said. Tincher said Coats apparently was trying to break up the fight when he was killed.

Four adults and two juveniles, all black, were arrested Saturday on first-degree murder charges.

''Reports we're getting is that (Coats) was telling people, 'Hey, we shouldn't be doing this. We're friends,''' Tincher said. ''The entire incident is tragic.''

Tincher said the incident ''originated as a fight between two people.''

''It had no racial overtones to it,'' he said.

Sheriff's spokesman Sgt. Frank Bierwiler said deputies and Brooksville police would accompany Coats' funeral procession at 10 a.m. Tuesday to prevent any violence.

Two extra deputies were assigned Monday to three of the county's high schools, including Hernando High School, where Coats attended school, Bierwiler said. One deputy is normally assigned to each school. The other schools were Springstead and Central high schools.

None of the people arrested attended high school in Hernando County.

The trouble began shortly after midnight Saturday in a mall parking lot where youngsters gathered.

Tincher said the problem stemmed from an argument between two whites. A black youth identified as John W. Smith, 18, made a remark to one of the men, a friend of his, which the other mistakenly believed was directed at him. He fought with Smith, who left the area vowing revenge.

Police arrived after Smith left and chased the two white youths and others

away, but they gathered again with other whites in another parking lot nearby. Shortly afterward, Smith returned with about 20 black friends armed with bludgeons and a gun, police said. Shots were fired during the fight and the whites scattered.

The suspects were identified as Bobby Owens, 19; Sammy Lee, 21; Jonathan Mathis, 18, and John W. Smith, 18, all of Brooksville. The others, aged 15 and 16, were not identified because of their ages.

Bierwiler said the adults were being held without bond in the Hernando County Jail, while the juveniles were taken to a state Department of Health and Rehabilitative Services detention center in Ocala.

#90141u1527 05/21/1990 ~United Press International

WARSAW, POLAND (MAY 21) UPI - Polish Prime Prime Minister Tadeusz Mazowiecki has vowed not to give into wildcat railway strikers who have paralyzed rail traffic in the biggest labor dispute of Solidarity's nine-month rule, a newspaper reported Monday.

The government newspaper Rzeczpospolita said Mazowiecki telephoned the strike headquarters Sunday in the northern city of Slupsk, urging railway employees to return to work. The strikers rejected the demand, the newspaper said.

''The protest is harmful to Poland,'' Mazowiecki was quoted as saying. ''The government does not have enough funds to increase the wages of the railroad workers.''

The striking employees, demanding an 85 percent wage hike to $67 a month, currently earn $37 a month compared with the national average of $80 monthly.

Mazowiecki also rejected a demand by the strikers to send a government negotiating team to Slupsk.

''No represenative of the government will go to Slupsk,'' he said.

The protest began 13 days ago in Slupsk when 45 railwaymen from various regions of Poland began a hunger strike to press for higher wages.

The strike committee, pointing to a failure of talks with transportation officials, launched a full strike Sunday, stopping 69 commuter trains, 22 long-distance passenger trains and one international train from Berlin to the seaport of Gdynia.

Angry passengers from the international train vandalized the railway

station of Koszalin when the train was stopped, officials said.

Janusz Wojsznis, the leader of the strike committe, told United Press International Monday that the health condition of five hunger strikers had deteriorated.

''They are still alive,'' he said, but indicated their condition was worsening.

Still hoping for negotiations with the government, Wojsznis said the committee had withdrawn a demand that talks be held only with a government delegation. He asked authorities to send any ''competent delegation'' able to sign an agreement dealing with wage increases.

''We all respect Mazowiecki, we love him, we are ready for negotiations but we don't see any good will,'' the strike leader said.

Wojsznis also criticized a television address to the strikers Sunday by Labor Minister Jacek Kuron, which condemned the protest.

''We were shocked by his statement,'' he said.

Wojsznis said he did not know the exact number of workers taking part in the strike.

''The protest is spreading and transport does not operate in 90 percent of Pomerania (northeastern Poland),'' he said.

He said freight trains running to and from the seaport of Szczecin were stopped. ''Only trains with grains can go,'' he said.

Wojsznis said the protest was spreading to other areas of the country, with hunger strikes underway in the city of Poznan in western Poland and in Torun in the north.

#90141u1534 05/21/1990 ~United Press International

PORTLAND, OR (MAY 21) UPI - President Bush said Monday the federal government should consider economic consequences of reducing logging in Northwest forests before listing the northern spotted owl as a threatened or endangered species.

''I reject those who would ignore - totally ignore - the economic consequences on the spotted owl decision,'' Bush told about 800 people at a fund-raising breakfast for Oregon Republican gubernatorial candidate Dave Frohnmayer.

''It's a human equation,'' the president said. ''The jobs of many thousands of Oregonians and whole communities are at stake.''

Outside the hotel where Bush was speaking, a few hundred protesters, many protesting the administration's environmental policies, burned American flags and spat on people arriving for the presidential breakfast. Police said at least 27 people were arrested.

Bush said the federal government needs to find a balance for protecting both logging jobs and spotted owls.

''Common sense tells us to find a needed balance,'' he said. ''Together, I am convinced that we can work to find that balance.''

Bush did not specify how the government should achieve that balance, but his remarks appeared similar to statements recently made by Interior Secretary Manuel Lujan, who called for changes in the federal Endangered Species Act to accommodate economic concerns.

Lujan questioned the need to protect all endangered animals and said the endangered species law should be changed to permit consideration of job losses in deciding on protection for certain animals.

The U.S. Fish and Wildlife Service, which Lujan supervises, is deciding whether to list the spotted owl as a threatened or endangered species, which would sharply restrict logging in the centuries-old forests where the small animals live.

A federal study estimated that protecting the owl by setting aside large areas of forest would cost 28,000 jobs by the year 2000, both in the timber industry and related segments of the economy.

Recent surveys have placed the northern spotted owl population at about 1,500 pairs from Northern California to southern British Columbia.

Frohnmayer, Oregon's attorney general, said he raised the issue with the president.

''I think he is very aware of the dilemma that we face,'' Frohnmayer said. ''We did not discuss specifics about what the administration is going to do.''

#90141u1565 05/21/1990 ~United Press International

SALAMANCA, NY (MAY 21) UPI - The Seneca Nation of Indians Monday proposed a lease agreement in which the nation would receive a $60 million payment from the state and federal governments plus an $800,000 annual rental fee

for property it owns.

Dennis Lay, president of the Seneca Nation, said the annual rental fee ''is less than many Senecas feel we should receive.''

Salamanca Mayor Antonio Carbone said the deal, which has been in the works for 2 1/2 years, was ''fair,'' but that he ''still doesn't know where all the money will come from.''

Carbone said he did not know what the new lease agreement would cost the average homeowner, although cost ''would be based on land value.''

The Seneca Nation owns about 90 percent of the city, and currently receives about $57,000 for some 2,700 leases. The new agreement would cover 40 years with an option to renew for another 40 years.

The current 99-year lease expires Feb. 19, 1991.

Under terms of the agreement, the Senecas would receive a one-time payment of $35 million from the federal government and $25 million from New York State as compensation for minimal payments it has received for nearly 100 years.

Lay said he will recommend the Tribal Council approve the agreement. The Salamanca City Council is expected to take up the matter sometime next week.

The current lease, signed in 1892, required tenants to pay an average of less than $5 per year for a parcel of land, with some rents as low as 25-cents.

Rep. Amory Houghton Jr., R-N.Y., whose district includes Salamanca, has said he will sponsor legislation to approve the agreement. Indian officials hope the legislation will be introduced by June 1, so it can be acted on before Congress adjourns in July.

''The Tribal Council will make the decision on how the money we receive is spent,'' Lay said, ''but it is my understanding that the annual lease payment will go into our general fund.''

#90141u1573 05/21/1990 ~United Press International

LONDON (MAY 21) UPI - The Iraqi Embassy handed over to British authorities Monday electronic devices marked as ''nuclear triggers'' that it claimed to have received through the mail.

The embassy, whose government recently denied involvement in an alleged

plot to smuggle nuclear bomb triggers, labeled the latest incident part of a campaign of ''Zionist aggression against Iraq.''

The Foreign Office said it forwarded the items to the Defense Ministry for experts to judge their authenticity.

British authorities in March confiscated 40 components that could be used to trigger nuclear devices at Heathrow Airport. The devices were bound for Baghdad. One Iraqi was deported, and three people are awaiting trial on charges of violating export laws.

Iraqi President Saddam Hussein has denied any link to the event and said his nation has no ambitions to build an atomic arsenal. He claimed last month, however, his technicians had developed components with a similar capability to those that were seized.

An anonymous package arrived at the embassy by regular mail Friday containing about 20 electronic devices labeled as ''nuclear triggers,'' Iraqi charge d'affaires Zuhair Abrahaim said.

''I an not an electrician, but it looked very strange, and certainly we felt it was one of the plans to put Iraq in a very difficult situation,'' he said. ''That is why we have handed it over to the Foreign Office.''

An Iraqi statement said the embassy was ''fully aware of the intention of certain circles to involve Iraq and harm its reputation in order to create circumstances suitable for a further cover for Zionist aggression against Iraq.''

The diplomat said he had ''no doubts'' that the Israeli government was linked to the purported slander campaign.

Jerusalem and Baghdad are arch foes. Israeli warplanes nine years ago destroyed the Osiraq nuclear reactor plant near Baghdad, a facility the Israelis believed was being used to produce material needed for atomic weapons.

Abrahaim said the embassy could not get an appointment with British officials during the weekend, so they delivered the devices Monday.

''Of course, they were astonished,'' he said. ''I am sure that they will investigate the matter, and we just wanted to inform the public.''

A Foreign Office spokesman said the package had been delivered by Abrahaim who has been Baghdad's senior envoy in London since both nations withdrew their ambassadors in March after Iraq executed a British-based journalist for alleged spying. London's ambassador returned to Baghdad last week.

Abrahaim spent 30 minutes with Roger Tomkys, the deputy undersecretary, he said.

''We just don't know (what the items are),'' the official said. ''It is being sent off to people who would know in the Ministry of Defense. We will have to look at them and see what they are.''

#90141u1576 05/21/1990 ~United Press International

(MAY 21) UPI - New violence in India's troubled Kashmir state today. Police opened fire on a funeral procession of 12-thousand people, killing at least 18 people. 40 people were hurt. Police say three gunmen assassinated a top Islamic cleric, whose enraged followers seized his body from a hospital and carried it through the streets of Srinagar.

''Operation Rescue'' will have to pay a heavy fine after the Supreme Court today refused to hear the group's request for a review. The court let stand a ruling ordering the anti-abortion group to pay 70-thousand dollars for ignoring court orders limiting its protests in New York. The fines were imposed after protests in April and May of 1988, when Operation Rescue ignored state court orders barring demonstrators from blocking abortion clinics.

In other action, the Supreme Court ruled unanimously that families canNOT deduct from their federal taxes money sent to children who are on religious missions. The ruling came in the case of an Idaho couple whose two children were Mormon missionaries. At issue was whether such money falls under charitable contributions for tax purposes.

Funeral services are scheduled today in Manhattan for Muppets creator Jim Henson. The 53-year-old Henson died last Wednesday from bacterial pnuemonia. Henson created the gallery of Muppet creatures that populated the widely acclaimed television program for children, ''Sesame Street.'' He provided the voice for several, including Kermit the Frog.

The world's first heart-liver transplant recipient faces medical tests in Pittsburgh today to determine if her body is rejecting a second tranplanted liver. Stormie Jones received the landmark surgery six years ago and had another liver transplant last February. The 12-year-old wants to be out of the hospital before May 31st to celebrate her birthday at her Texas home.

#90141u1577 05/21/1990 ~United Press International

BONN, WEST GERMANY (MAY 21) UPI - South African President Frederik de Klerk said Monday he has received backing and encouragement from

government leaders during his European tour and urged German businessmen to invest in his country amid political reforms there.

Addressing a news conference after meeting with leading West German government officials, he also stressed he had not come to Europe with the specific intention of lobbying against sanctions imposed on South Africa to protest its apartheid policy of race discrimination.

''The purpose of my visit to Europe is not to come with a shopping list and I did not put any specific requests to the German government with regard to sanctions,'' he said.

De Klerk, who was flanked by his Foreign Minister Roelof ''Pik'' Botha, said the problems faced by his administration ''as the South African government and as a regional government within southern Africa'' went far beyond the difficulties caused by economic sanctions.

''We face the challenges of poverty, of hunger, of growing unemployment and of the need for upgrading the quality of life for large sections of our communities,'' he said.

He said although he did not specifically ask for an end to sanctions, including those imposed by the European Community, he did ask the officials he met in Paris, London and Bonn for ''a total reevaluation with regard to attitudes and policies toward South Africa.''

Asked whether European governments had expressed support for his political reform program, he said, ''Here and elsewhere I found acceptance for the irreversibility of what is happening in South Africa and appreciation for the speed in which we are tackling our problems.''

The South African leader appeared relaxed and confident after his talks with his counterpart Richard von Weizsaecker, Chancellor Helmut Kohl and Foreign Minister Hans Dietrich Genscher.

Monday evening he was to meet with leading West German businessmen and industrialists.

De Klerk said he was confident West Germany ''has a role to play'' economically in South Africa.

''Profits are to be made and I'm sure that German industrialists and businessmen will grasp the opportunities - obviously, that is how the German economy has attained the heights it has attained,'' he said.

Kohl said there was ''tremendous excitement'' within the German business community about ''what everybody expects will be dramatic developments in South Africa.''

On internal developments in South Africa, he reiterated his view that the country will have a new constitution which will enshrine the right for ''majority participation in government,'' while protecting against ''the domination of minorities.''

He is scheduled to leave Bonn for the Swiss capital of Berne Tuesday.

-30- 3017

#90141u1580 05/21/1990 ~United Press International

WASHINGTON (MAY 21) UPI - Health and Human Services Secretary Louis Sullivan proposed Monday that every laboratory, including those in doctors' offices and health screening sites, be subject to federal quality standards.

The proposed regulation, to ensure the quality and accuracy of clinical lab tests, would affect more than 300,000 laboratories. The labs would have to apply for certification, valid for two years, from the Health Care Financing Administration.

Currently, about 12,000 labs - mostly those that seek Medicare and Medicaid reimbursement - are subject to federal rules.

''The problem has been too many mistakes,'' said Health Care Financing Administration spokesman Bob Hardy. He said a typical problem has been undertrained, overworked lab assistants misreading Pap smears that detect uterine cancer.

''Under our plan, every laboratory, regardless of its location, must be federally certified as meeting quality standards. Labs must prove they can perform their tests correctly,'' Sullivan said.

However, an American Medical Association spokesman expressed concerns over the rules' implications for the more routine lab tests.

''The rules hold the specter of forcing some doctors to close their office labs,'' said an AMA spokesman who declined to be identified.

''The proposed regulations require that some labs be run by a Ph.D.-level scientist or pathologist. This would force some office labs to shut down '' he said. ''Our goal is to keep office labs open where it is clearly safe and helpful to do so.''

The rules would implement a 1988 law that directs the health secretary to enact regulations involving laboratory certification based on test complexity and risk factors, rather than on the lab's location, as under previous law.

Under the proposal, simplier tests with some risk, such as cholesterol screening - called Level I tests - and complex, high-risk tests, such as Pap smears - called Level II tests - would be subject to federal quality and proficiency standards.

However, 28 simple, low-risk tests, such as dipstick urinalysis, would be placed on a waiver list. Labs that prove during their certification process that they only perform those tests would be exempt from regulation.

The Health Care Financing Admnistration would inspect all certified labs performing Level I and II tests beginning July 1, 1991. All labs not waived, including those accredited by state agencies or approved accrediting bodies, would be inspected at least every two years.

Certification would be revoked, suspended or limited and subject to civil penalties for failing to comply with uniform federal requirements for quality control, personnel qualifications and successful participation in a proficiency testing program.

#90141u1589 05/21/1990 ~United Press International

AMMAN, JORDAN (MAY 21) UPI - A Palestinian gunman Monday fired on a group of tourists in downtown Amman, wounding at least nine French citizens and a Jordanian a day after an Israeli's rampage killed seven Palestinians in Israel, witnesses and officials said.

A Jordanian government spokesman said the gunman fired shots at a bus carrying the tourists, but some witnesses and French Ambassador to Amman Dennis Bouchard said the attack occurred after the tourists got out of the bus and began touring Amman's Roman amphitheater.

After the attack, police tightened security at tourist sites. Police cars followed 34 tourist buses to their destinations Monday to prevent further attacks, a police statement said.

The Jordanian government spokesman, whose statement was carried by the official Petra news agency, said the gunman used a dagger when he ran out of ammunition.

''When the pistol he was using ran out of ammunition, he used a dagger to continue his attack. The incident resulted in injuries to 10 people aboard the bus, including a Jordanian citizen,'' the spokesman said.

Jordanian authorities identified the gunman as Ahmad Badwan, a 28-year-old Palestinian originally from the Gaza Strip, who lives in Amman and carried a temporary Jordanian passport.

Five of the tourists were admitted to hospital, at least one and possibly two in serious condition. Four others were treated and discharged, the Jordanian statement said.

''The French consul is in (the) hospital with them currently,'' Bouchard said. ''The Jordanian security officials have been contacted by the embassy. ... They were very helpful.'' He said women and children were among the wounded.

The injured were transferred from Bashir Hospital to Hussein Medical Center at King Hussein's request.

Bouchard said the group had been attacked by a man with a pistol but other reports said he used a rifle.

French President Francois Mitterrand telephoned the Amman hospital to express his sorrow at the attack, a French Embassy spokesman said.

Egypt's official Middle East News Agency reported that two people died in the attack, but French Embassy officials and hospital sources said that none of the wounded had died.

A Palestine Liberation Movement official in Amman condemned the attack but described it as revenge for Sunday's slaying of seven Palestinian workers in Israel by a gunman.

Eyewitnesses said Badwan put his gun and dagger on the dashboard of the bus after the attack and waited to be arrested. Petra reported that Jordianian police pledged he would be severely punished.

''Security officials immediately began an investigation to uncover the motive behind the assault,'' said the statement carried by Petra. ''The Interior Ministry expresses deep sorrow and denounces this criminal incident, and affirms that justice will take its course.''

PLO spokesman and executive committee member Yasser Abed Rabo, while denouncing the attack, called it a ''suspicious act aimed at covering up the Israeli ugly crimes against the Palestinians in the occupied teritories.''

He said it is ''an individual reaction'' to the slaying of Palestinian workers in Israel Sunday, and added there should be ''unified'' Arab pressure on the international community to protect Palestinians in the occupied territories.

Some 25,000 Palestinians in Jordan demonstrated Monday to protest the slayings of the Palestinian workers in Israel. Residents of the Baqaa

Palestinian refugee camp, located some 17 miles northwest of Amman, hoisted black flags as a sign of mourning. Police closed the camp, allowing no one to come in or go out.

#90141u1598 05/21/1990 ~United Press International

CAPE CANAVERAL, FL (MAY 21) UPI - Engineers made final checks Monday to make sure the shuttle Columbia's repaired cooling system is ready for flight, with blastoff on a Spacelab astronomy flight still on track for around May 30.

An official launch date will not be set until after a flight readiness review Thursday, but internal planning schedules at the Kennedy Space Center show work to ready Columbia for flight will be finished in time for a sky-lighting May 30 liftoff at 12:38 a.m. EDT.

''We're looking good. We've seen no problems to this point,'' said Forrest McCartney, director of the Kennedy Space Center. ''I think we can support the 30th.''

Columbia originally was scheduled for liftoff May 17, but launch processing was put on hold after engineers discovered a faulty valve in one of the shuttle's two cooling systems.

In a complex repair job conducted inside the vertical shuttle's 60-foot-long cargo bay, technicians cut the valve out and welded in a replacement last week.

Engineers applied a vacuum to the ''coolant loop'' Monday to make sure the repaired system is leak free before proceeding with plans to repressurize the lines overnight with Freon-like refrigerant.

Assuming the May 30 target date holds up, Columbia's countdown would begin at 1 a.m. EDT Sunday. The shuttle's seven-member crew would arrive later in the day for final preparations.

Columbia's takeoff will trigger a flurry of Florida launches, including the second flight of a powerful Air Force Titan 4 rocket and the launch of a Delta 2 booster carrying a West German X-ray satellite called ROSAT.

ROSAT's launch currently is on the books for May 31, but if Columbia ends up scheduled for May 30, the Delta flight would be delayed because it takes two days for the Air Force to reset the tracking equipment used to monitor all rocket launches from Florida.

Details about the Titan 4 flight, including the launch date and time, are classified, but the flight is believed to be on tap for a few days after

Columbia's launch. It is not clear what would happen to the flight schedule in the event of another shuttle delay.

Columbia's crew plans to spend at least nine days in orbit operating four telescopes built to study X-ray and ultraviolet radiation from deep space that is blocked by Earth's atmosphere.

By studying such high-energy ''light,'' which cannot be seen by the human eye, astronomers hope to learn more about the structure and evolution of stars, galaxies and other objects such a energetic quasars and as-yet-unseen black holes.

Commander Vance Brand, 59, co-pilot Guy Gardner, 42, John ''Mike'' Lounge, 43, Robert Parker, 53, Jeffrey Hoffman, 45, and civilian astronomers Ronald Parise, 39, and Samuel Durrance, 46, plan to close out the 36th shuttle flight with a landing at Edwards Air Force Base, Calif.

Kohl said there was "tremendous excitement" within the German business community about "what everybody expects will be dramatic developments in South Africa."

On internal developments in South Africa, he reiterated his view that the country will have a new constitution which will enshrine the right for "majority participation in government," while protecting against "the domination of minorities." He is scheduled to leave Bonn for the Swiss capital of Berne Tuesday.

(MAY 21) UPI - The Soviet news agency Tass reports that for the first time in Soviet history, the Soviet Parliament has voted to pay the president. Lawmakers voted to pay President Gorbachev the equivalent of 64-hundred dollars a month and provide him with an apartment in Moscow and country homes.

Heavy rain and thunderstorms hit parts of flood-ravaged Arkansas, where earlier rain washed out bridges. The storms were centered across Arkansas' northern border, in the northeast near Walnut Ridge and in the southwest. Scattered thunderstorms also hit parts of central and southern Arkansas.

In Joliet, Illinois, The Stateville Correctional Center is under lockdown today after prison guards put down an internal gang fight that left two inmates dead and three others injured last night. Corrections officials are trying to determine what touched off the melee at the maximum-security prison.

DETROIT (MAY 21) UPI - The European Commission is investigating charges that the Austrian government may have provided excessive support to Chrysler's minivan venture in Austria, Automotive News said Monday.

The weekly trade publication said in its latest issue that a commission spokeswoman in Brussels confirmed an inquiry is under way. But she declined to confirm reports that French carmaker Renault may have sought the probe.

Renault now makes a minivan that would compete with the models to be built in Graz, Austria, starting in June 1991 under a company called Eurostar, Chrysler's joint venture with Steyr-Daimler-Puch.

The EC has the authority to block government aid packages it judges to be anti-competitive. While Austria is not a member of the European Community, the commission said it believes it has jursidiction, since about 95 percent of the Austrian minivan production will be exported to community nations.

Although the joint venture is a 50-50 partership between Chrysler and Steyr, company Chairman Lee Iacocca has called the project a three-way partnership between Steyr, Chrysler, and the Austrian government.

A project director for Eurostar told the publication the matter is between the EC and Austrian government, and that Chrysler has not been contacted. Chrysler had no immediate comment from its Highland Park, Mich., headquarters. The EC could not say when the investigation will be concluded.

#90141u1619 05/21/1990 ~United Press International
COLUMBIA, MO (MAY 21) UPI - A newly proposed national farm program that would increase crop loan rates and export subsidies would help barley and oat producers but reduce beef producers' profits and raise meat prices, economists said Monday.

The program, analyzed by the Food and Agricultural Policy Research Institute, is designed to increase farm income and lower government spending by raising crop prices and support levels. It would also maintain export levels by using increased export subsidies.

This would create higher crop prices for the U.S. market and lower prices for the export market, the FAPRI economists said, noting that all their comparisons are based on an extension of current farm policy through 1996.

"Our analysis of the program shows it does afford more protection for crop producers, and it would lower government spending," said Jon Brandt

co-director of FAPRI at the University of Missouri-Columbia.

"We'd see budget savings of $740 million per year. The government would be spending less money, because market prices would be higher and there would be less participation in the government programs.

The savings on deficiency payments would more than offset the increased spending on export subsidies and commodity loan programs, Brandt said.

"Under the program, net farm income would increase an average of $900 million per year," said Abner Womack, the other Missouri FAPRI director. "But increased crop net returns of $1.4 billion per year would be offset by lower livestock returns and other factors."

Proponents of the proposal pointed out that net returns of such feed grains as barley and oats had suffered relative to corn returns in recent years.

"The largest beneficiaries of those participating in the program would be oat and barley producers," Womack said. Higher target prices for oats would result in a 35.7 percent increase in net returns per acre over what growers would receive if current law were extended. Barley net returns would go up 18 percent.

Rising crop prices would mean higher input costs to livestock producers, the economists said. That would result in liquidation of herds and higher beef production in the early years of the program and lower net farm income in 1992 and 1993.

Brandt said consumer expenditures for meat are estimated to increase an average of $3.3 billion a year, or 3.4 percent, under the proposed program. Meat expenditures by 1996 will increase by 8.4 percent, reflecting an $8.3 billion cost increase, or $31.31 per person.

The broiler industry will benefit modestly with higher prices, but consumption will be one percent lower under the proposed program, the economists said.

#90141u1627 05/21/1990 ~United Press International

NEW YORK (MAY 21) UPI - Standard & Poor's Monday downgraded Grumman Corp. to its lowest investment rating because of the poor outlook for the nation's tenth largest military contractor in a declining defense industry.

S&P lowered its rating on Grumman's senior debt to triple B minus from triple B and its subordinated debt and preferred stock to double B plus from triple B minus.

S&P analyst David Sotnick said the debt rating is the lowest assigned within the investment grade category. The next lowest grade would move the company's rating into what is is called speculative grade, Sotnick said.

"The downgrade reflects Grumman's weakening competitive position and continued fairly aggressive debt usage within the context of deteriorating overall defense industry demand prospects," the S&P statement said. With 1989 sales of $2.3 billion, the Defense Department lists Grumman as the tenth largest U.S. defense contractor.

Sotnick said the downgrade was the continuation of a trend. Grummans' debt rating was downgraded last year from a triple plus rating to triple B, he said.

"The failure to win significant new business, or inability to improve cash flow and reduce debt would weaken Grumman's financial profile (further)," the S&P statement said.

Grumman lost out in a December 1987 competition to develop and build a replacement for the Navy's A-6 all-weather light bomber. The carrier-based A-6 was designed and built by Grumman. Grumman production of other aircraft such as the Navy's F-14 fighter also is winding down.

"As a result, there is increasing pressure on Grumman to secure new defense electronics and aircraft remanufacturing business to bolster future performance. This will become increasingly difficult in a period of declining military procurement," S&P said.

CANNES, France (MAY 21) UPI - U.S. director David Lynch's ''Wild at Heart,'' a tale of violence and lustful romance in the American South, won the coveted Golden Palm award for best picture at the 43rd International Cannes Film Festival Monday.

''I've been trying to get to the Cannes Film Festival for years,'' a delighted Lynch said.

French superstar Gerard Depardieu won the prize for best actor for his role in Jean-Paul Rappeneau's cinematic production of the classic French play ''Cyrano de Bergerac.''

''Hidden Agenda,'' a controversial political drama about Northern Ireland directed by leftist British director Ken Loach, won the runner up Jury Prize, organizers said.

Soviet director Gleb Panfilov won the festival Jury Prize for best artistic contribution with his movie ''The Mother.''

NEW YORK (MAY 21) UPI - ''Twin Peaks'' will return in September, ''America's Funniest Home Videos'' gets a twin and ABC will air a new Steve Bochco show described as part opera, part rock concert and part cop show, the network announced Monday.

ABC, the first of the networks to announce its fall schedule for the 1990-91 television season, has added six new show, canceled four old ones and kept two in the wings. It also has reshuffled some old shows into new nights and time periods.

The shows to get the ax were ''Saturday Mystery Movie,'' ''Anything But Love,'' ''Just The 10 of Us'' and ''Mission Impossible.''

Continuing in production but not on the schedule are ''Equal Justice'' and ''Head of the Class.''

The network solved its dilemma about what show to program after ''America's Funniest Home Videos'' by programming a second half hour, ''America's Funniest...Part II.''

The remaining new shows include three half-hour sitcoms and two hour-long dramas. They are:

''Baby Talk,'' to air Tuesdays, 8:30-9 p.m. Eastern time. Connie Sellecca stars in this show based on the hit movie, ''Look Who's Talking.''

She plays a single mother looking for the perfect father for her baby son. The baby has comments on everything, which he will express with the voice of Tony Danza, a role played by Bruce Willis in the film.

''Married People,'' to air Wednesdays, 9:30-10 p.m. Eastern time. Three generations of couples - newlyweds, baby boomers and elderweds - share a New York brownstone and learn about love and marriage from each other.

''Going Places,'' to air Fridays, 9:30-10 p.m. Eastern time. Four talented young people move to Los Angeles to work on their first television show. The sitcom comes from Tom Miller and Bob Boyett, the producers of ABC's other Friday night comedies, ''Full House,'' ''Family Matters'' and ''Perfect Strangers.''

''Cop Rock,'' to air Wednesdays, 10-11 p.m. Eastern time. The show focuses on a group of urban cops dealing with street crime, but also includes

songs and elaborate musical production numbers. Included in the cast is Barbara Bosson, Fay Furillo on ''Hill Street Blues'' and Mrs. Steven Bochco in real life.

''Gabriel's Fire,'' to air Thursdays, 9-10 p.m. Eastern time. James Earl Jones stars in a role created for him, that of Gabriel Bird, a man sentenced to life in prison without parole in the 1960s. He is released from jail 20 years later, thanks to a determined, high-principled, high society woman attorney who discovers inconsistencies and undisclosed testimony at his trial. He offers his unique point of view as her investigator.

Continuing in production are shows starring Treat Williams, Ray Sharkey, Jonathan Winters, Anthony Denison and Linda Purl and wrestlers ''Rowdy'' Roddy Piper and Jesse ''The Body'' Ventura.

The new ABC schedule, with all times Eastern time:

Sunday - 7-8 p.m. ''Life Goes On;'' 8-8:30 p.m. ''America's Funniest Home Videos;'' 8:30-9 p.m. ''America's Funniest...Part II;'' 9-11 p.m. ''ABC Sunday Night Movie.''

Monday - 8-9 p.m. ''MacGyver;'' 9-11 p.m. NFL ''Monday Night Football.''

Tuesday - 8-8:30 p.m. ''Who's The Boss?''; 8:30-9 p.m. ''Baby Talk;'' 9-9:30 p.m. ''Roseanne;'' 9:30-10 p.m. ''Coach;'' 10-11 p.m. ''thirtysomething.''

Wednesday - 8-8:30 p.m. ''The Wonder Years;'' 8:30-9 p.m. ''Growing Pains;'' 9-9:30 p.m. ''Doogie Howser, M.D.;'' 9:30-10 p.m. ''Married People;'' 10-11 p.m. ''Cop Rock.''

Thursday - 8-9 p.m. ''Father Dowling Mysteries;'' 9-10 p.m. ''Gabriel's Fire;'' 10-11 p.m. ''PrimeTime Live.''

Friday - 8-8:30 p.m. ''Full House;'' 8:30-9 p.m. ''Family Matters;'' 9-9:30 p.m. ''Perfect Strangers;'' 9:30-10 p.m. ''Going Places;'' 10-11 p.m. ''20/20.''

Saturday - 8-9 p.m. ''Young Riders;'' 9-10 p.m. ''China Beach;'' 10-11 p.m. ''Twin Peaks.''

#90141u1670 05/21/1990 ~United Press International
WASHINGTON (MAY 21) UPI - The State Department said Monday it was disturbed by the wholesale use of force by the Israeli army in putting down demonstrations triggered by the killing of seven Palestinians by an Israeli.

According to reports from Israel at least nine Palestinians were killed and hundreds were wounded Sunday and Monday as Israeli security units moved in to put down the demonstrations.

The spokesman also indirectly criticized the Israeli government of Yitzhak Shamir for refusing to join the peace process, thereby contributing to the possibility for violence in the occupied territories.

Spokesman Richard Boucher said, ''We regret the violence which occurred after this incident. We're disturbed by the number of casualties inflicted by the Israeli army. We've repeatedly called upon the government of Israel to exercise restraint in these situations in order to avoid heavy casualties such as took place yesterday.''

''But as I said before,'' Boucher said, ''it's not merely enough to have restraint. We need an active, viable peace process to create hope about the future.''

He said the U.S. ambassador to Israel, William Brown, met with Palestinian leaders in the Gaza Strip and officials from the U.S. Consulate in Jerusalem met with Palestinians in the West Bank to discuss the incident.

As Boucher spoke, about 50 pro-Palestinian demonstrators marched peacefully in front of the State Department, calling for the United States to support an end to the Israeli occupation and the creation of a Palestinian state.

Boucher said the lack of any moves toward negotiations added to the sense of desperation. ''When you have this kind of very horrible, very tragic sort of incident, and then that's followed by responses that lead to further violence, we see that as another sign that there must be a peace process and people have to be able to believe in a peace process.''

The Israeli national unity government broke apart over the issue of Shamir's refusal to move forward on a set of peace negotiations mediatated by U.S. Secretary of State James Baker.

The negotiations are in a state of suspension while the Israelis try to put together a viable new government. Shamir is serving as prime minister in the meantime.

#90141u1693 05/21/1990 ~United Press International

WHITE'S CITY, NM (MAY 21) UPI - Winds fanning a wildfire that has charred 20,000 acres of southern New Mexico died down Monday but officials were still unable to say when the blaze might be controlled.

Some 700 firefighters fought the week-old blaze, which grew by another 6,000 acres Sunday night and has forced the closing of parts of Carlsbad Caverns National Park. Four helicopters, five air tankers dropping fire

retardant and four light planes were thrown into the fight.

Ed Wood, information officer for the fire that started in Lincoln National Forest near the Texas border, said officials were unwilling to estimate when the fire could be contained or controlled.

The up-to-60-mph winds that had helped the fire travel quickly through rugged, dry terrain dropped to about 5 mph Monday, he said.

Firefighters planned to torch some 10 square miles along the perimeter of the fire, dubbed Big Fire, with the hope of burning out the fuel of shrubs pines and oaks in the fire's path, Wood said.

The fire was just 8 miles of the main cavern of the park Monday but the chances of it getting to the park were ''between slight and very slight,'' he said.

He said the fire is separated from the cavern visited by some 1,000 people a day by several canyons.

New Cave, within 1 1/2 miles of the fire, and parts of the outer edges of the park were closed Monday but a warning issued to visitors with respiratory problems was lifted.

''Visitors are still coming to the park and they're still having a good time,'' Wood said.

#90141u1694 05/21/1990 ~United Press International

WASHINGTON (MAY 21) UPI - Gitano Group Inc., a New York-based clothing manufacturer, has received preliminary notice that it may be fined $18.9 million by the U.S. Customs Service for not paying duties on payments to a Hong Kong buying office.

The New York branch of the Customs Service sent the company a prepenalty notice, which indicates the office's intent to penalize an importer, in that amount for the loss of $2.4 million in revenue. In total, Gitano may have to pay $21.3 million. Company officials declined to comment on the case because Gitano is issuing new securities and thus must observe a 30-day quiet period.

Customs officials also said they could not comment on a pending case. But the size of the penalty, almost eight times the actual amount of unpaid duty, indicates the offense is a serious one.

"Chances are (the case comes under) the customs fraud statute," Irving Krawet, an assistant regional counsel in the Customs Service's New York

office, said Monday.

Still, the Customs Service often issues prepenalty notices, only to later reduce or drop the fine after an appeal by the company. Some fines are initially high only because they are based on the value of the shipment.

"If there is anything wrong with the import documents, Customs has a right to claim that this gives rise to a (substantial) penalty...no matter how slight the error is," said David Busby, a customs law attorney with the Washington, D.C., law firm of Dorsey and Whitney. "It's like if you made a mistake on your income tax returns, the Internal Revenue Service could fine you the amount of your year's income."

Gitano is seeking withdrawal of the penalty on substantive and procedural grounds, according to a registration statement filed with the Securities and Exchange Commission May 10.

In the SEC filing, Gitano also said it has provided substantial documentation to the Customs Service and believes the products will eventually be found to be nondutiable. "If a formal claim were to be asserted, management would contest such claim vigorously and to the fullest extent available to them," the statement said.

If Gitano does have to pay the fine, several principal stockholders have agreed to replace the lost funds. Their agreement states that if Gitano is required to pay a penalty in excess of ten percent of its consolidated shareholders equity, certain stockholders will buy up to $6.7 million worth of common stock to replace Gitano's capital.

Most of Gitano's outstanding stock is held by Morris Dabah, the company's chairman, and Haim Dabah, president. But the company in early May held a public offering of about 1.5 million shares of common stock.

Last December, the Customs Service sent a prepenalty notice to Gitano alleging the company was negligent in failing to declare quota charges on a shipment from Taiwan. The case, however, was resolved in Gitano's favor and the fines were dropped.

Gustave Birnberg, a senior vice president of corporate development at Gitano, said prepenalty notices, although common, are often reduced or eliminated. "If you were to review the financial statements of many publicly held apparel companies, there are many cases brought by Customs in which prepenalty notices are served and generally resolved in amounts lesser than that of the notice," he says.

In the first quarter of 1990, Gitano had net sales of $223.9 million, a 41 percent increase over the $158.8 million registered in the same period last year. Gross profits for the latest quarter were $63.2 million, up

from $47.8 million in first quarter of 1989.

Gitano designs, markets and, in some cases, manufactures clothing under the "Gitano," "Gloria Vanderbilt," and "Regatta Sport" trademarks.

#90141u1704 05/21/1990 ~United Press International

CHICAGO (MAY 21) UPI - Duff & Phelps Monday downgraded the rating of Dayton-Hudson Corp. senior debt as a result of the retail chain's $1.04 billion acquisition of Marshall Field & Co.

The Chicago investment analysis firm lowered Dayton-Hudson's senior debt rating to A-plus from AA-minus. The rating applies to about $1 billion in outstanding debt securities. The A-plus rating also was applied, on a preliminary basis, to Dayton-Hudson's shelf registration of $1 billion of debt securities.

"This rating reduction reflects the increased financial leverage that will be a product of Dayton-Hudson's acquisition of Marshall Field & Co. for slightly more than $1 billion," Duff & Phelps spokesman W. Dudley Heer said.

"As a result, Dayton-Hudson's fixed obligation ration will initially exceed 70 percent, with prospects that debt reduction will only be of modest nature over the near term," Heer said.

He said the Minneapolis-based retail chain has consistently increased its debt ratio in recent years through acquisitions, capital investment, and stock buybacks.

"We expect the company to continue to make periodic, opportunistic acquisitions of properties as well as spending capital in order to further expand operations," Heer said.

But Heer also noted the strength of Dayton-Hudson's operating results and cash flow have been impressive - especially in view of the weak retailing environment.

Heer expressed confidence in the chain's ability to improve Marshall Field's cash flow. "As a result," he said, "we have not altered our Dayton-Hudson fixed charge coverage forecasts despite the incremental debt and interest expense associated with the Marshall Field acquisition."

D&P retail analyst C. Richard Nelson said while the price paid for Field's was at the high end of analysts' appraisals, the deal was a particulalry good fit for Dayton-Hudson.

"We think that the fit is extremely good, but that the increased leverage increases the financial risk," Nelson said. "The acquisition of Field's is a good move. Dayton-Hudson and Field's have striking similarities, and with the acquisition, they're getting new stores and attractive new markets," he said.

#90141u1725 05/21/1990 ~United Press International

BANGKOK, THAILAND (MAY 21) UPI - World Food Council President Youssef Amin Wally Monday urged member countries to take advantage of the improved climate in international politics to create better human conditions in the Third World.

''New international relations are being developed in a spirit which could not have been expected only a few years ago,'' Wally said in a speech during the 16th ministerial session of the food council.

The May 21-24 session has drawn 300 participants from 36 member countries.

Wally said tensions in the world were easing, leading to arms reduction agreements and international cooperation.

''Solutions to economic issues, like debt and trade, are receiving greater attention,'' he said.

''We should now take advantage of the improved political climate and move decisively to lessen the suffering in the Third World. This is very much within the mandate of the World Food Council,'' Wally said.

For many countries in Africa, Latin America and the Caribbean, the last decade was ''a lost decade for development,'' with hunger and poverty pervading the social fabric, he said.

Many Asian economies have improved, but the number of people suffering from hunger and malnutrition has been increasing.

High technology is the key to more food production in the 1990s, Wally added.

''Each country has to make its own political commitment to give the highest priority to fight against hunger and poverty,'' he said.

He said the WFC ministers should urge their governments, international organizations and non-government organizations to press the world to fight hunger and poverty.

JERUSALEM (MAY 21) UPI - Israeli soldiers fired on rioting Palestinians Monday, killing three and wounding more than 80, in a second day of violence in the Gaza Strip after seven Arab workers were slain by an Israeli posing as a soldier, hospital officials and Palestinian sources said.

Clashes between protesting Arabs and Israeli authorities were reported in towns across Israel.

The U.N. Security Council announced it would meet in New York Tuesday at the request of the Arab Group United Nations to discuss the Sunday slayings which sparked the bloody rioting in the Israeli-occuppied territories.

The Palestine Liberation Organization called Monday for U.N. observers to be sent to the occupied territories in view of the ''enormous violence'' against the Palestinian people.

And the U.S. State Department said it was disturbed by the wholesale use of force by the Israeli army in putting down the demonstrations.

''We regret the violence which occurred after this incident,'' said State Department spokesman Richard Boucher. ''We're disturbed by the number of casualties inflicted by the Israeli army.''

Boucher said U.S. ambassador to Israel William Brown met with Palestinian leaders in the Gaza Strip and officials from the U.S. Consulate in Jerusalem met with Palestinians in the West Bank, discussing the incident.

Israeli soldiers shot and killed three Gaza residents and wounded more than 80 in Monday's rioting on the Gaza strip, hospital officials and Palestinian sources said, and violence also spread to Arab neighborhoods around Jerusalem.

Seven Israeli soldiers and police were injured in the confrontations, while four Israeli civilians were injured during stone-throwing incidents,

military sources and Army Radio reported.

What appeared to be revenge attacks for Sunday's slayings of Arab also were reported Monday in Jordan and Turkey.

In Amman, Jordan, a gunman shot and wounded nine French tourists and one Jordanian Monday in an attack that the PLO said appeared to be in response to the shootings of the laborers.

A bomb explosion in Istanbul, Turkey, outside the offices of the Israeli airlines El Al injured three people, an official of the airlines said.

A Palestinian group in Lebanon, meanwhile, vowed revenge for the killings of the Arab workers as Israeli troops went on full alert in southern Lebanon fearing retaliatory attacks.

''We will respond to violence with more violence and we will avenge with God's will the blood of the innocent martyrs,'' the fundamentalist Movement of Islamic Jihad said in a statement released to a Western news agency in Moslem west Beirut late Sunday.

The Israeli military maintained curfews on the Gaza Strip, major West Bank towns and U.N.-run refugee camps, confining more than 1 million Palestinians to their homes, but Gazans widely defied the restrictions.

In the Israeli Arab town of Nazareth, hundreds of mostly young residents confronted paramilitary and mounted police with stones and Molotov cocktails as protests against Sunday's slayings of Arab workers turned into clashes.

Throughout the day, debris littered the commercial district's main street, which was blocked by barricades erected by the police and burning tires set by Israeli Arab youths.

Israeli Arab villages and towns were shut down Monday in observance of a general strike while dozens of black flags fluttered from rooftops in mourning over the seven Palestinian workers from Gaza killed Sunday by the Israeli posing as a soldier. The slayings occurred at a junction outside the Israeli town of Rishon Le Zion.

Israeli authorities ordered the 21-year-old Israeli suspect, a resident of Rishon Le Zion identified as Ami Poper, detained for at least 15 more days for questioning and a psychological examination.

#90141u1734 05/21/1990 ~United Press International

SOFIA, BULGARIA (MAY 21) UPI - Thirty-six opposition parties refused to

sign a non-violence pact with the government Monday, accusing the ruling communists of undermining their election campaigns through bullying and intimidation.

The action came amid mounting opposition complaints of harassment in the final weeks before the June 10 elections, expected to be Bulgaria's first democratic balloting in four decades.

On Saturday, an opposition candidate for Parliament said he was assaulted by a mob of more than 30 communist supporters armed with bricks, stones and clubs.

''We voice concern over the conditions of coercion and brutal violation of the round-table agreements on the part of the ruling party,'' said Zhelyu Zhelev, president of the Union of Democratic Forces, a coalition of 16 anti-communist parties.

Drafted by the government, the non-violence pact calls on all political parties to obey the law and avoid violence during the election campaign. After initially agreeing to sign the document, opposition leaders rejected it Monday as hypocritical and an attempt by the communists to ''score propaganda points.''

''While we welcome the document in principle, we cannot sign it in its present form,'' Zhelev said.

At a news conference several hours later, UDF officials said they may sign the pact if the government agrees to change its wording.

Bulgarian President Peter Mladenov criticized the opposition's refusal to sign the pact. He dismissed as ''immature campaign propaganda'' the allegations of misconduct by the Communist Party, which changed its name in April to the Bulgarian Socialist Party.

Of 81 officially registered parties in Bulgaria, 33 signed the document, 12 others signed with reservations and 36 parties refused to sign.

Some opposition groups also demanded a postponement of the June 10 elections. The official BTA news agency reported the groups as saying, ''Conditions for an election campaign on equal terms are not available now.''

Although the return to multi-party politics has been relatively peaceful in Bulgaria, in comparison with neighboring Romania, opposition leaders have expressed concern over increasing violence.

Konstantin Kotsev, an actor and parliamentary candidate for the UDF, alleged Saturday he was attacked following a rally in the town of Sliven

by a ''wild and furious crowd of people led by the mayor.''

''There were 30 to 40 people who carried stones, bricks and clubs, a crowd that won't be convinced by words,'' Kotsev told a meeting of UDF supporters.

Shouting communist slogans, the crowd tried to overturn his car, said Kotsev, who managed to escape without injury. Other UDF candidates at the meeting reported similar incidents.

The latest official opinion polls indicate that the communists are poised to win the elections but will fall short of capturing a majority in the new Parliament. The UDF contends the government-sponsored polls are irrelevant, and says Bulgarians will join their Eastern European neighbors in throwing the communists out of office June 10.

Zhelev, speaking to a rally of about 40,000 supporters Sunday night, said a victory by the democratic opposition was the only means of guaranteeing that Bulgaria will receive aid from Western governments in rebuilding its economy.

#90141u1735 05/21/1990 ~United Press International

BURBANK, CA (MAY 21) UPI - Despite last week's unexpected death of Muppets creator Jim Henson, the Walt Disney Co. plans to go through with its pending purchase of Henson Associates Inc., a Disney spokesman said Monday.

"I don't see any reason why the sale won't go through," said Erwin Okun, a spokesman for Disney. "It will be temporarily delayed to allow for an appropriate mourning period."

Okun did not disclose when the deal is scheduled to be completed. Funeral services were held in New York Monday for Henson, who died last Wednesday from bacterial pneumonia. He was 53.

Disney announced the deal, worth an estimated $150 million, last August but it has never indicated when the acquisition is expected to be close. The assets include the Muppets characters, its movie and television library, and several hundred employees.

Harold Vogel, an entertainment analyst with Merrill Lynch, said he expects Disney to go through with the deal despite Henson's death. "I don't think Henson's death should have any effect whatsoever on the deal," Vogel said. "I think the deal is still a very good acquisition for Disney."

Since the deal was announced, Disney and Henson Associates have worked together on a number of projects, including a "Here Come the Muppets" stage

show, due to open June 15 at the Disney-MGM Studios theme park in Orlando, Fla. The show will eventually come to Disneyland in Anaheim, Calif. "Kermit the Frog Presents Muppet-Vision in 3-D" is due to open next year at the Florida theme park.

Disney and Henson Associates have also worked on several programs for The Disney Channel, including "Fraggle Rock," which began airing May 5; "The Fantastic Miss Piggy Show," which is airing this month; "Jim Henson's Mother Goose Stories," scheduled for this August; and an untitled TV series.

The two companies have also worked on the "Muppet Babies" cartoon for network television and on a Muppets anniversary special, tentatively set for airing in November. Disney and Henson Associates also have various projects in development in consumer products and films.

#90141u1747 05/21/1990 ~United Press International

(MAY 21) UPI - Indian officials in Kashmir state say the assassination of a top Islamic cleric sparked violence between mourners and security forces today. Officials say at least 25 people were killed when police fired on crowds of mourners in Sringar. About 250 people were wounded in that clash and three other confrontations provoked by the cleric's slaying. The city is under an indefinite curfew.

A SWAT team has surrounded a church in Melbourne Beach, Florida, where a gunman has barricaded himself inside after shooting at least three people and taking two others hostage in an apparent domestic dispute. Officials say a woman shot at point-blank range with a .44-caliber handgun was taken to a Melbourne hospital, where she's undergoing surgery. It's NOT clear how many people are inside the St. Sebastian Episcopal Church with the gunman... or how many are hurt. Bystanders heard screams coming from inside the church.

Palestinian sources say Israeli soldiers opened fire, killing three Palestinians and wounding more than 80 people in a second day of rioting on the Gaza Strip. Rioting erupted in the Israeli occupied territory after seven Arab workers were killed yesterday by an Israeli man posing as a soldier. Few incidents of violence were reported on the West Bank. Israeli Arab villages and towns were shut down today in observance of a general strike.

Hundreds of AIDS activists besieged the National Institutes of Health in Bethesda, Maryland, to protest what they call the government's ''failure'' to find treatments for the deadly illness. Police say at least 30 AIDS activists were arrested when between 800 and one-thousand protesters gathered at the health agency offices. Demonstrators erected cardboard

tombstones on the grounds. They were kept away from N-I-H buildings by mounted police.

#90141u1758 05/21/1990 ~United Press International

CHICAGO (MAY 21) UPI - Grain and soybean futures were lower to sharply lower at the close Monday on the Chicago Board of Trade, pressured by liquidation and predictions for drier weather this week.

The May contracts expired at noon in generally quiet trading except for relatively volatile activity in wheat and soybean oil.

Weather conditions in the Grain Belt are expected to be cool and dry until at least Friday, enabling farmers to catch up with their corn and soybean planting.

Most of the selling in corn was based on preliminary farm program sign-up figures released Friday by the Agriculture Department. The report indicated farmers may plant more corn than had been expected.

Soybeans took their cue from corn and fell to sharply lower levels at the final bell. However, losses in both corn and soybeans were limited by steady commercial buying at the lows.

Wheat was lower on the prospect of dry weather in the major wheat producing areas and the lack of export business.

Country movement was very light.

At the close, corn was off 3 3/4 to 5 1/4, soybeans down 5 to 11 3/4, wheat off 2 1/4 to 3 and oats down 2 1/2 to 4 1/2 cents.

#90141u1779 05/21/1990 ~United Press International

WASHINGTON (MAY 21) UPI - Agriculture Secretary Clayton Yeutter said Monday that Japan is acting inconsistently and unfairly if it truly expects to exempt its rice policy from world trade reform efforts.

''We just cannot conduct international trade policy in this manner,'' Yeutter said in a sternly worded letter to Japanese Agriculture Minister Tomio Yamamoto.

Yeutter said he is troubled by published remarks in which Yamamoto accused the United States of meddling in Japanese affairs. A newspaper account, published one week ago, also quoted Yamamoto as disagreeing with Yeutter's view that Japan soon would open its rice market to imports.

For years, Japan has followed a policy of self-sufficiency in rice and has allowed only a tiny amount of foreign rice to be imported.

In 1986 while he was trade ambassador in the Reagan administration, Yeutter rejected U.S. rice industry complaints against Japan. His decision again in 1988 to dismiss the complaints was predicated on the expectation that rice would be handled as part of worldwide trade negotiations.

''Recent comments by Japanese officials that Japan will never liberalize its rice market are contrary to all the commitments that have been made by your country during the Uruguay Round (negotiating) process,'' Yeutter wrote.

''Japan is one of the leading economic powers of the world and as such it must conduct its trade affairs in a responsible, predictable manner. Japan cannot insist upon one set of rules for goods and services where it is internationally competitive and another set of rules where it is uncompetitive.''

Critics contend Japan's rice policy forces Japanese consumers to pay prices far above the world price.

Rice, which commonly is served at every meal, has special significance to the Japanese. It is used in Shinto religious ceremonies, and many national traditions are built around the planting and harvesting of the crop.

#90141u1784 05/21/1990 ~United Press International

FRANKFORT, KY (MAY 21) UPI - A single-engine private plane crashed shortly after taking off from Capital City Airport Monday, killing all six people on board.

''For whatever reason - we don't know at this time - the plane lost altitude, was unable to continue takeoff, veered around to the left, crashed and burned,'' said Capt. Phil Miller, spokesman for the state Department of Military Affairs.

Names of those killed, including an employee of the Kentucky Transportation Department, were withheld pending notification of relatives Miller said, adding that the other victims included the pilot and members of an engineering firm.

The plane went down about 100 yards from the end of the runway.

Miller said the accident occurred at 10:15 a.m. EDT. He said the plane was destroyed to a point where even its identifying numbers were burned away.

Hank Lindsey, director of the state air tranport division, watched the plane take off and said it appeared to be in a stall before the crash.

Lindsey said a team from the Federal Aviation Administration was on its way to the scene to begin an investigation with state and local authorities.

#90141u1786 05/21/1990 ~United Press International

(MAY 21) UPI - Severe thunderstorms moved over Arkansas today, while new storms threatened to dump more water on the swollen Trinity River in southeast Texas. The river has already flooded about 46-hundred homes, which are expected to remain under water for weeks. Storms tossed rain and marble-sized hail on Arkansas, where 64 mile-an-hour winds uprooted trees and damaged buildings. Power outages were reported in some areas, including Little Rock.

In South Africa, black mineworkers returned to work today in the country's mining belt, despite a night of rioting that left four people dead and at least 20 wounded in the black township of Thabong. The township was briefly sealed off last night by army troops and police to put down several hours of running clashes with mobs of demonstrators. The mobs stoned police and vehicles, looted shops and burned a number of homes.

#90141u1801 05/21/1990 ~United Press International

BOGOTA, Colombia (MAY 21) UPI - Two motorcycle-riding gunmen assassinated Sen. Federico Estrada Velez of the ruling Liberal Party Monday in the violence-wracked city of Medellin, police said.

Explosives experts also defused Monday a plastic garbage sack full of dynamite set to explode next to gas tanks at a school attended by the grandaughters of President Virgilio Barco, police said.

Officials have said the current wave of bombings is aimed at trying to intimidate the government and voters before Sunday's presidential election.

Estrada Velez, a 16-year senator, former Supreme Court justice and former ambassador to the Vatican, was assassinated while in his car some eight blocks from his home, police said.

''This is atrocious. It is disconcerting. It is crushing,'' said former President Julio Cesar Turbay of the Liberal Party of the shooting.

The senator's driver, Jaime Arango Enao, also was killed by the gunmen who fled the scene, said Francisco Zuluaga, secretary general of the state government of Antioquia.

Assassination by motorcycle is a favorite tactic of cocaine cartel hitmen but authorities did not say immediately who was suspected of the murder.

Estrada Velez, 64, was kidnapped April 3 by the Medellin Cartel hit squad called The Extraditables and freed unharmed two days later. He said later he was against extraditions of suspected drug traffickers to the United States and called for creation of a special court to handle cocaine cases.

''He did not express any doubts about his security to me at all or that he had been threatened,'' said Zuluaga.

A plastic sack with 325 sticks of dynamite was defused about 8 a.m. at the

Colegio Elvetia, the school attended by the children of Carolina Barco de Isackson, daughter of the president.

A Metropolitan Police spokesman said the fuse had been lit and the bomb was set to go off next to tanks of gas used by the school kitchen.

The plot to blow up the school was discovered through police intelligence operations and help from citizens, said the spokesman, refusing to be more specific.

Barco de Isackson was at the school at the time of the bomb, with two of Barco's granddaughters, Alejandria and Adriana, the radio news network RCN reported.

Barco unleashed a war against the Colombia's powerful cocaine cartels last year and police have reported various plots against his life.

At least nine bombs also have exploded in Colombia in less than a month, including a car bomb Sunday night in Bogota that slightly wounded 12 people.

The dynamite located in a jeep severely damaged houses in the Puentelargo neighborhood in northern Bogota. The explosion of some 110 pounds of dynamite blew out windows and damaged buildings in the about a 330 feet area.

Police also reported another officer was killed Sunday in the city of Medellin, headquarters of the warring Medellin Cartel 160 miles northwest of Bogota.

The shooting death raised to 25 the number of officers killed in 12 days in the city, one of the most violent in the world. The Medellin Cartel has offered a reward of some $4,200 for the death of each officer.

More than 80 officers have been killed in the Medellin area this year.

BRUSSELS, BELGIUM (MAY 21) UPI - Europe must ''assume a greater responsibility'' for its own defense even though U.S. nuclear and conventional forces will remain, NATO's European defense ministers said Monday.

The ''Eurogroup'' of NATO defense ministers, meeting in Brussels Monday, also endorsed a unified Germany within the Atlantic Alliance as a ''cornerstone of stability in overcoming the division of Europe.''

All NATO defense ministers, including U.S. Defense Secretary Dick Cheney, were scheduled to begin a two-day meeting on Tuesday of NATO's Defense Planning Committee, to help prepare for a July summit of NATO leaders in London.

The planning group is expected to formally scrap an outdated and often-ignored policy that NATO members increase their defense spending by 3 percent a year in real terms. The Eurogroup did not discuss the 3 percent rule, which was adopted in 1977.

''We reaffirm that the presence in Europe of U.S. conventional and nuclear forces, and of Canadian forces, will continue to demonstrate that North American and European security interests are inseparably bound together,'' the Eurogroup defense ministers said in a communique.

They said, however, that the past year's dramatic changes had underlined the need for a new European identity, so ''it is increasingly incumbent upon us, as Europeans, to assume a greater responsibility for our defense.''

Arms-control treaties now being negotiated will mean a shift in European

defense responsibilities from the United States and Canada to the NATO countries of Europe, said Gerhard Stoltenberg, the West German defense minister.

''We have to accept that the major part of the reductions (in the treaties) will be from our allies in North America,'' said Stoltenberg, who becomes chairman of the Eurogroup on July 1.

The current Eurogroup chairman, Spanish Defense Minister Narcis Serra, added there was no timetable for Europe ''eventually'' assuming a greater role in its own defense.

The Eurogroup includes defense ministers from all 16 NATO countries except the United States, Canada, France and Iceland. The French pulled out of NATOs integrated command structure in 1966, and Iceland has no armed forces.

The meeting of NATO's Defense Planning Committee will be followed by a session of the alliance's foreign ministers, in Scotland on June 7-8, and the London summit on June 5-6. Diplomats say the meetings will chart a crucial blueprint for NATO's future in a drastically changed Europe.

#90141u1824 05/21/1990 ~United Press International

KANSAS CITY, MO (MAY 21) UPI - United Auto Workers President Owen Bieber, embracing the idea of a "new industrial order," said Monday job security and income guarantees would be the union's top priority during 1990 contract negotiations.

Bieber, who spoke to more than 2,000 delegates at the UAW's special bargaining convention, also criticized what he called multimillion-dollar mismanagement by senior executives of the Big Three automakers.

Delegates to the convention that opened Monday gathered to determine a framework that will guide UAW leaders during contract talks as they negotiate a new three-year agreement covering about 450,000 workers at Ford Motor Co., Chrysler Corp., and General Motors Corp. The current contract expires in September.

Bieber said the union also would seek to raise workers' living standards "across the board" and to protect health care benefits for active and retired workers.

The UAW president said the United States needs a "made-in-America formula," possible only if managers stop treating workers and unions as a competitive problem.

But employers "have acted in ways that indicate clearly they still think we're the problem and that they can scapegoat us for all their competitive difficulties," he said.

As an example, Bieber said Chrysler Chairman Lee Iacocca told a Detroit newspaper recently that the UAW and Chrysler were headed for difficulties if "transplant" auto operations continued to enjoy an advantage in hourly labor costs. Transplants are assembly operations run in the United States by foreign automakers. Most employ young, non-union workers and have no retirees.

"What he's basically saying is that we in the UAW - we, the workers of America - should have to trim our standard of living to adjust for the built-in cost advantages of the transplant companies that have nothing to do with what's in workers' paychecks and everything to do with new technology, a newly hired work force, tax incentives and all the other artificial advantages enjoyed by the transplants," Bieber said.

Bieber said U.S. automakers failed to respond properly to successive crises during the 1980s that indicated that major change was needed within the industry.

"They should have seen that the import companies were determined to march steadily ahead regardless of the normal business cycle - and they should have responded by orienting all their priorities toward building and keeping market share," he said.

The UAW president said U.S. industries need to allow worker involvement in every level of decision-making.

During Bieber's speech, references to retiree benefits prompted chants of "COLA, COLA" from the assembled delegates. Cost of living adjustments for pensions is an important issue during the collective bargaining convention.

Another issue expected during the convention is pattern bargaining - a UAW practice of demanding the same basic wages and benefits from each of the Big Three. However, industry officials said increasing foreign competition and growing differences between GM, Ford, and Chrysler make pattern contracts obsolete.

Anthony P. St. John, Chrysler's top negotiator, said those contracts should be eliminated and warned that a pattern agreement could threaten workers' job security.

"There is a valid issue here as to whether precise pattern bargaining is ... appropriate at this point in our history," said St. John, Chrysler's vice president for employee relations.

Executives at GM and Ford were less openly critical of pattern contracts but are still uncomfortable with the agreements. UAW leaders have said they would defend pattern bargaining when they negotiate contracts with the Big Three.

#90141u1830 05/21/1990 ~United Press International

NEW YORK (MAY 21) UPI - Dutch publisher Wolters Kluwer said Monday it has agreed to acquire J.B. Lippincott, the Philadelphia-based medical publisher, for about $250 million from Harper Collins, half-owned by Rupert Murdoch's News Corp.

Wolters Kluwer U.S., which already operates Raven Press and Aspen Publishers, said the acquisition of Lippincott, whose annual revenues total about $100 million, will boost its sales volume to some $150 million in the United States.

Lippincott, which employs 400, publishes information and manuals for the medical profession, including journals and loose-leaf medical information. Founded in 1792, it was independent until seven years ago when Harper & Row purchased the company. In 1987, News Corp. bought Harper & Row for $293 million, then sold a 50 percent stake in the publishing concern to William Collins PLC in 1988.

Included in the transaction are Lippincott affiliates Facts and Comparisons, which provides information on drugs for pharmacists and Gower which publishes medical atlases.

"This acquisition makes Wolters Kluwer one of the largest medical publishers in the United States," said M. Ververs, chairman of WK nv, an international publisher based in the Netherlands. Harper Collins said WK was tops among six bidders for Lippincott in an auction conducted over the last several days.

Bruce Lenz, chief financial officer of WK (U.S.), said the company views the acquisition as "as a way to expand in the United States with an ideal company to meet those objectives. Medical publishing is an area where we already had some strength."

Lenz said WK plans to retain all of Lippincott's employees and keep the company headquartered in Philadelphia. In 1989 WK, comprising 100 companies with more than 8,000 employees worldwide, had sales of $1 billion, of which ten percent came from U.S. operations. With Lippincott the company expects 17 percent of sales to be U.S. derived. The all-cash transaction is expected to close next month.

WASHINGTON (MAY 21) UPI - Brown University will present an honorary degree to Soviet President Mikhail Gorbachev, who will also receive the Martin Luther King award at next week's summit, administration officials said Monday.

As the final details of the May 30-June 3 visit are being worked out, officials also reported that Gorbachev will meet with congressional leaders on the morning of June 1.

Gorbachev is scheduled to arrive in the United States on the evening of May 30. Official welcoming ceremonies will be held the next day, when the summit with President Bush formally begins at the White House.

The doctorate from Brown, the Providence, R.I., Ivy League university, will be presented to Gorbachev on the afternoon of June 1 before he signs about 10 agreements on U.S.-Soviet relations. He will also receive the Martin Luther King award that day.

In view of the progress on reducing long-range nuclear missiles, Gorbachev and Bush may initial a weapons pact, the details of which must be settled before the signing of a formal treaty by the end of the year, officials said.

The leaders also may sign a trade agreement if the Supreme Soviet passes a liberalized immigration law, mainly for the benefit of Soviet Jews. Negotiators have reached a new trade accord, and the United States is expected to grant the Soviet Union most-favored-nation benefits if the immigration law is passed.

The immigration law is scheduled to be debated in Moscow on May 31, and it will take fast action on the part of Soviet aawmakers to get it ratified before the summit ends.

Dispatches from the Soviet Union indicate that the nation's economy has nearly hit bottom. Consumer goods are not available, and the hopes of the Soviet people for a trade agreement have taken precedence over arms control.

Gorbachev will leave Washington on June 3 after a joint morning news conference with Bush at the White House. Gorbachev will then go to Minneapolis for meetings with Minnesota officials and business executives.

Gorbachev will end the day in San Francisco. The following morning he will have breakfast with former President Ronald Reagan. The two men became acquainted at four summits - Geneva in November 1985; Reykjavik, Iceland, in October 1986; Washington in December 1987; and Moscow in June 1988.

Before leaving California, Gorbachev will spend time on the Stanford University campus at Palo Alto.

Bush and Gorbachev and their wives will attend a White House state dinner on the evening of May 31, which will be followed the next night by a dinner at the Soviet Embassy.

Barbara Bush and Raisa Gorbachev, who will be joint commencement speakers at Boston's Wellesley College, also plan to spend June 2 at the Camp David retreat in the mountains of Western Maryland.

#90141u1833 05/21/1990 ~United Press International

WASHINGTON (MAY 21) UPI - In a significant break from the increasingly hard-line stance of his brother bishops, Milwaukee Archbishop Rembert Weakland said Monday the Roman Catholic Church's anti-abortion stand may be ''too simplistic.''

Weakland, in a 21-page statement summarizing a series of ''listening sessions'' he held in his archdiocese, did not question the church's basic teaching opposing abortion but expressed sympathy with those troubled by the church's unequivocal stance.

The archbishop also said he understands some clergy and church members are concerned by the tactics, ''lack of compassion'' and the ''ugly and demeaning'' attacks on legal abortion supporters by the ''pro-life'' movement.

Weakland noted the church's ''unequivocal position'' against abortion in any circumstance ''does not have the full support of many Catholics, especially of many women.''

The official position ''seems to be too simplistic an answer to a complicated and emotional question ... especially when there is no political and societal consensus on the issue, neither in its moral dimension nor in its legal embodiment,'' the archbishop's 5,000-word statement said.

In an interview in Monday's edition of the Milwaukee Sentinel, Weakland went even further, suggesting that in some cases it would be possible for Catholics to be ''pro-choice,'' depending on the definition used.

''Yes. There are possibilities there,'' he told the Sentinel. ''One could reconcile their stance with a church position. I think that is a possibility.''

''Pro-choice'' generally means favoring the availability of legal abortions for women who choose them.

Weakland, who gained national prominence as head of the committee that drafted the bishops' pastoral letter on the economy, has become one of the most articulate leaders of the hierarchy's liberal faction.

His views on abortion put him at sharp odds with other bishops, including the powerful Cardinal John O'Connor of New York, head of the National Conference of Catholic Bishops' Committee for Pro-life Activities.

O'Connor has led a recent escalation in the church's drive against legal abortion, including hiring a large public relations firm for a $5 million anti-abortion campaign.

Since last November, a number of bishops have imposed sanctions against Catholic politicians who support legal abortion, including denying them communion.

Over the weekend, Bishop James McHugh of Camden, N.J., announced that politicians who support legal abortion cannot speak in diocesan churches on any topic.

Weakland's stance drew praise Monday from Catholics for a Free Choice, an independent group of Catholics who support legal abortion.

Calling Weakland's stand ''a significant and welcome departure'' from the attitude of other bishops, Frances Kissling, head of the group, said, ''We hope that Weakland's courage will inspire other bishops, particularly those who are disturbed by the aggressive approach of O'Connor and his ilk to openly express their opposition.''

Weakland also said opponents of abortion lose support by their attitude and tactics.

''Many (people) dislike the narrowness of so many in the pro-life movement their tactics ... their lack of compassion, their alliance with groups that often are very anti-Catholic in other areas, their lack of civility '' he said.

''Many priests, moreover, feel uncomfortable with some of the political and other aggressive activities of the pro-life movement,'' he said. ''Some of the rhetoric and literature seem ugly and demeaning.''

He also criticized the ''pro-life'' movement for not being ''more articulate for me about what the consequences of ... a total prohibition would be in our society.''

#90141u1881 05/21/1990 ~United Press International
MOSCOW (MAY 21) UPI - Mikhail Gorbachev welcomed Alexander Dubcek as a respected fellow reformer Monday, 22 years after Soviet tanks crushed the Prague Spring movement and the Czechoslovak leader was handcuffed and brought to Moscow.

''We met as people interested in solving the same problems,'' said Dubcek, who was elected chairman of the Czechoslovak Parliament in the aftermath of last fall's pro-democracy uprising.

Dubcek said his welcome by the Soviet leadership showed that the Kremlin realizes that the Soviet Union made a mistake in 1968.

''I can't quite put it into words,'' Dubcek said when asked his feelings on returning to Moscow 22 years being dragged to the Soviet capital to renounce his reforms. ''I feel grateful for the rehabilitation.

''What was done 22 years ago, the military crackdown on our democratic movement, has been relegated to our past,'' he said.

Dubcek and Gorbachev met for about 90 minutes Monday, and the Czechoslovak elder statesman later said he found in the Soviet leader something of a kindred spirit.

''My meeting with Gorbachev left a very deep impression,'' he said. ''I'm glad that we were able to find one another.

''Some time ago we introduced the motto 'Socialism with a human face,''' Dubcek said, when asked his personal impression of Gorbachev. ''I found a lot of humanity in him.

''I met him as a man who understands what we are doing and who supports us.''

In January 1968, Dubcek succeeded hard-liner Antonin Novotny as Communist Party leader and ushered in the Prague Spring reforms that introduced ''socialism with a human face.''

Warsaw Pact troops crossed into Czechoslovakia in the early hours of Aug. 21, 1968, to stop the reforms, and Dubcek and other members of the presidium were taken away in handcuffs. In Moscow, the Czechoslovak leaders succumbed after three days of intense pressure and signed an agreement that rolled back the reforms.

Dubcek officially remained in office until April 17, 1969, but his reforms were dead and he was discredited. From 1969 to 1970 he was made ambassador to Turkey and then given a minor job with the forestry office in Bratislava, where he remained until re-emerging triumphantly during last fall's reforms.

Dubcek said Monday he was grateful for Gorbachev's perestroika reforms that ''have promoted the changes which took place in Czechoslovakia,'' but added he regretted the 22 years of ''lost time'' in which the Soviet Union and Eastern Europe could have developed politically and economically.

''The Eastern European countries aspire now to what we did then - namely, the elimination of censorship, freedom of the press and political pluralism,'' Dubcek said. ''These are the things in common between now and then.''

The difference, he said, was that in 1968 ''we were severely punished'' for seeking the same reforms now sweeping the region, including the Soviet Union.

''The brakes that were applied 22 years ago had a negative impact not only on the development of democracy in Czechoslovakia, they also had a negative impact in the Soviet Union and the rest of Europe,'' he said.

#90141u1893 05/21/1990 ~United Press International

NEW YORK (MAY 21) UPI - Donald Trump and Pan Am Corp., faced with problems of their own, are both putting their Eastern corridor shuttle services on the market, and airline industry analysts believe both deals could fly.

The struggling airline and the flamboyant developer, who is said to be no longer worth $1 billion and last month announced plans to raise cash for new ventures, both declined to disclose the asking price for their shuttle services linking New York with Boston and Washington.

The two shuttles were put on the auction block in the past four weeks. Trump said in late April he has retained Merrill Lynch & Co. "to explore strategic initiatives for the shuttle," and Pan Am reported in a filing Friday with the Securities and Exchange Commission its intention to sell its shuttle.

Timing for a sale is more crucial for cash-starved Pan Am which reported a $190.7 million loss for the first quarter, compared with a loss of $151.1 million in the year-ago period.

"We are putting the shuttle on the market at a time when we can get maximum value for it," said Pan Am spokesman Jeffrey Kriendler without disclosing the asking price. "We feel we have a stronger bargaining position now, before the slower winter season."

Pan Am, the leading U.S. transatlantic carrier, generates most of its revenues during the summer when Americans elect to visit Europe. But the airline is less competitive than other U.S. carriers on its domestic routes and traditionally experienced lower revenues in winter. Saddled with nearly $900 million in unsecured debt and liabilities, Pan Am is ill-prepared to survive another winter loss without a fresh capital injection.

"Our shuttle has been profitable in recent years," Kriendler said, adding that the investment firm of Kidder Peabody & Co. was investigating prospective buyers for the Pan Am shuttle which has 64 daily flights from the three Eastern corridor's cities.

A source close to the preliminary sales negotiations said the Pan Am shuttle has attracted a strong interest in the airline industry for more than a year and a number of prospective buyers have required additional information since Pan Am filed with the SEC Friday.

Airline industry analyst Edward Starkman, with PaineWebber Inc., said there is more to differentiate the two shuttles than just the half-hour between their respective departure times.

"The main distinction is that the Trump shuttle owns its fleet and the Pan Am shuttle leases its planes from Pan American World Airways," Starkman said. "Trump's planes are old, only a few have been refurbished, and a healthy buyer would not want to operate their own aircraft."

"The potential buyer for either shuttle could be any airline in the country, American Airlines, Delta, or Northwest. And Continental cannot be counted out," he added.

"The most attractive point is the large customer base an airline would get by buying the shuttle. This is a great base to lock in business travelers, once you get them in a frequent flyer program," he said.

Starkman said Trump bought his shuttle for $365 million from Eastern Airlines and has invested an estimated $60 million in it. "Trump would be lucky to get his money out," Starkman said, doubting that the deal would top the $400 million.

Starkman viewed that Pan Am could get $250 million for the shuttle it acquired from Texas Air Corp. three years ago for $65 million. "Pan Am basically bought the gates and the slots of the shuttle. Since, it has revamped it and built a new terminal in New York," he said.

Profit figures for the Trump and the Pan Am shuttles are not available, but both operations are believed to turn a profit in the $20 million range. Airline industry analyst Glen Engel, with Goldman Sachs & Co., viewed that the two competiting shuttles might just create a buyer's market and push the price down.

"With both shuttles on the market at the same time, it is going to be a buyer's market," Engel said. "The shuttle is an extremely attractive franchise with one player only on the market, but it is not so attractive with two."

"People who want to buy the shuttle need the valuable real estate, the slots and the gates," Engel said. "I would think it would be tough to achieve the asking price whatever that is. I am not sure which one has to sell his shuttle the most. Pan Am might be needing the cash sooner than Donald Trump."

When announcing his plans for the shuttle in April, Trump said he had been approached by a number of airlines attracted by what he had vowed to turn into "one of the really fine airlines of the world."

Trump explained he was selling the airline to fuel new ventures but analysts said his shuttle, mostly bought with borrowed money, has to carry high interest payments which were wiping out profits.

#90141u1908 05/21/1990 ~United Press International

WASHINGTON (MAY 21) UPI - Yields for 13-week and 26-week T-bills increased Monday at the government's weekly auction.

The Treasury Department auctioned $8.4 billion of 13-week bills at an average discount of 7.74 percent, up from 7.67 percent at last week's auction and the highest since May 7, when the auction yielded 7.79 percent.

The government also sold $8.4 billion of 26-week bills at an average discount of 7.79 percent, up from 7.68 percent last week and the lowest rate since May 7, when the rate also stood at 7.84 percent. The discount rate understates the actual yield to investors.

The investment, or coupon-equivalent, rate was 8 percent on the 13-week bills at an average price of $9,804.40 per $10,000 face value. The rate on the 26-week bill was 8.22 percent at an average of $9,604.00 per $10,000.

INDIANAPOLIS (MAY 21) UPI - Paden Engineering will form a joint venture with a Dutch company to construct a new 60,000-square-foot facility at Hope Industrial Park,Indiana officials said Monday.

Paden and TBO Material Handling Co. will invest $2 million in the project, which is expected to be completed by 1992, the Indiana Department of Commerce said Monday. The project will create 70 new jobs, the IDOC said.

The IDOC will provide $33,750 in Industrial Development Infrastructure Program money for sewer, water and road improvements, and $30,000 in a Training for Profit grant.

TBO is a manufacturer of large conveyor and bulk transport systems.

#90141u1925 05/21/1990 ~United Press International

KNOXVILLE, TN (MAY 21) UPI - Japanese manufacturing giant Matsushita Electronic Components Co. announced plans Monday to build a $10 million aluminum foil processing plant in Knox County.

Naoki Kono, president of Matsushita Electronic Components Corporation of America, cited readily available sources of raw aluminum, an ample supply of clean water, support from local government and the chamber of commerce and the success of an existing Matsushita plant located adjacent to the site of the new facility as factors that strongly influenced the decision.

"The decision to locate this new facility in the United States is in keeping with Matsushita's corporate policy of localizing design, manufacturing, and service operations to accompany overseas marketing," Kono said. "Knoxville was selected due to continuing cooperation by both the Knoxville Utilities Board and the Tennessee Valley Authority."

The plant will be the company's first in the U.S. and will employ 30 people when production begins in April 1991 in an East Knox County industrial park, according to Matsushita spokesman Clark Brandon.

Brandon said the plant will make aluminum for electrolytic capacitors, a small battery-sized device used to convert electricity in computers and televisions. He said the plant will double production in five years. The company currently operates a 340-employee plant that makes electrolytic capacitors and car audio speakers in the Forks of the River industrial park.

Matsushita's aluminum processing facility will be built on 12 acres next to the existing plant. The aluminum is now produced in Japan by the Osaka-based parent company. The company now has a plant under construction in Vonore that will make compressors for refrigerators.

Brandon said the company is currently importing all of its aluminum products. "We're very experienced in the foil processing but it's all done in Japan. This is our first experience with a (U.S.) foil processing plant " he said.

Brandon said Matsushita's U.S. operations will be exporting half of the aluminum they manufacture instead of importing it. "It's a real change in trade balance as far as we're concerned," he said.

The Knoxville plant will be affiliated with Matsushita Electric Corporation of America based in Secaucus, New Jersey which has 12 plants and 11,000 employees in North America.

The division produces consumer and industrial products under the Panasonic Technics, and Quasar brand names and had sales in 1989 of $5.4 billion and expects its North American-produced goods to comprise 50 percent of total sales.

#90141u1931 05/21/1990 ~United Press International

WASHINGTON (MAY 21) UPI - The United States posted a record $42.5 billion budget surplus in April on income tax payments after ringing up a record $53.3 billion deficit in March, the Treasury Department said Monday.

Economists had anticipated a more moderate surplus of $38 billion for the month. Many analysts, however, warned that the bonus surplus is likely to do little to prevent the fiscal 1990 deficit from soaring far above the administration's estimate of $123.8 billion because of the thrift bailout and declining revenues.

The $42.5 billion surplus for April is the highest since $40.6 billion in April 1989, a government spokeswoman said. In April 1988, the United States posted a surplus of $13.8 billion.

April's "record high in receipts and surplus resulted from increased individual income tax filing," the Treasury Department reported in its monthly statement on government receipts and outlays. The deadline for filing 1989 income tax returns was April 16.

For the fiscal year to date, the government is running a $108.3 billion budget deficit compared with a deficit of $87.9 billion for the comparable period in fiscal 1989, the Treasury Department said.

Word of the record budget surplus comes as President Bush and congressional leaders are in the midst of a delicate series of negotiations to curb the mammoth shortfall in federal spending.

But economists were less than optimistic with the surplus. "It's certainly nothing to cheer about," said Norman Robertson, chief economist for Mellon Bank, in Pittsburgh. "This humber is really consistent with a deficit running at an annual rate of $175 billion."

"It's not the nightmare the previous month suggested, but nonetheless it's a problem," said Robert Dederick, chief economist for Northern Trust in Chicago. "We shouldn't get overly excited by it. The deficit remains a problem."

March's $53.3 billion budget deficit in March was blamed on a series of technical factors, including the early distribution of paychecks to federal workers that are normally mailed in early April.

#90141u1939 05/21/1990 ~United Press International

BETHESDA, MD (MAY 21) UPI - Police arrested more than 80 AIDS activists Monday as hundreds of protesters besieged the National Institutes of Health to demand faster development of treatments for the deadly disease.

About 900 chanting, banner-waving protesters converged on the suburban Washington campus of the nation's premier biomedical research institute beginning at about 7 a.m.

By the time the protest dissipated about 4 1/2 hours later, officials said 61 demonstrators had been arrested for blocking police vehicles or trying to enter buildings. Some protesters tried to scale small fences.

All but one protester was charged with trespassing and fined $50, officials said. The remaining demonstrator was charged with resisting arrest.

Another 21 activists were fined $50 for entering and refusing to leave the Rockville, Md., office of Dr. Daniel Hoth, director of the division of AIDS, officials said. Nothing was damaged, and there were no injuries, they said.

As government researchers denounced the demonstration, police kept most of the protesters away from buildings on the grassy main NIH campus, preventing disruption of most activities.

The protesters, who came from as far away as New York, California, Ohio and Louisiana, erected cardboard tombstones, chanted, ''NIH, you can't hide. We charge you with genocide.'' Some demonstrators carried placards that read, ''NIH - Negligence, Incompetence and Horror'' and ''Nobody Is Home.''

''The NIH is acting as if they were trying to cure the common cold rather than treating a deadly disease,'' said Charles Franchino, a member of New York's AIDS Coalition to Unleash Power, or ACT-UP, which led the protest.

Some 76,000 Americans have died of acquired immune deficiency syndrome since the epidemic began. Although the federal government has spent $1 billion and spent 10 years testing AIDS drugs, activists say they are angry because only one drug - AZT - has been approved for patients.

''People shouldn't die from neglect. People are dying and are dying regularly,'' said Tom Keenan, 30, an English teacher at Princeton University who said he is not infected with the AIDS virus and is a heterosexual.

Phyllis Sharpe, 39, Bronx, N.Y., a black former drug user infected with the AIDS virus, also accused NIH researchers of not doing their best to include minorities, women and drug abusers in tests of potential AIDS treatments.

''They do not want to save me or my child,'' said Sharpe, whose 3-year-old

daughter is infected with the virus.

Dr. Anthony Fauci, director of the National Institute of Allergy and Infectious Diseases, which leads NIH's AIDS research, defended the government's efforts.

''A demonstration on the campus of the place that is doing the most to help them I think is quite inappropriate,'' Fauci said.

Drugs tested in government-sponsored trials ''have made a dramatic impact on the lives of people who are infected with the AIDS virus,'' Fauci added in a statement.

Acting NIH director William Raub said in a statement that the ''tragedy of AIDS is keenly felt by scientists at NIH, and the frustrations of people who are infected by the AIDS virus and their advocates is understandable. ... NIH is wholeheartedly committed in the search ... to identify and discover the therapies and vaccines that will eventually defeat this disease.''

AIDS activists want NIH to expand the number of potential AIDS-fighting compounds tested for safety and preliminary effectiveness, testing at least 30 new compounds each year.

Fauci countered that NIH-sponsored tests have looked at or are planning to examine ''virtually every promising AIDS or AIDS-related therapy.''

ACT-UP also wants the government to test more drugs for the infections and cancers that are the major killers of AIDS-infected people. Fauci said 40 such compounds have been tested to date, and tests on 15 more are scheduled to begin this year.

#90141u1950 05/21/1990 ~United Press International

WASHINGTON (MAY 21) UPI - A spokesman Monday defended Attorney General Dick Thornburgh from a charge by the Justice Department's No. 2 official that Thornburgh seriously mishandled a news leak investigation to protect two close aides.

Deputy Attorney General Donald Ayer, who submitted his resignation May 11 and will leave the Justice Department at the end of this week, said Thornburgh helped conceal the fact that his top aides failed a lie detector test during the politically sensitive investigation.

Thornburgh also tried to keep the investigation away from the Justice Department's internal watchdog unit - the Office of Professional Responsibility - and then refused to follow a recommendation for a more

detailed investigation, Ayer said.

Justice Department spokesman Dan Eramian was besieged by questions about the issue Monday. Asked if Thornburgh had engaged in a coverup, Eramian said, ''Of course not.''

Eramian said, ''The solicitor general concluded there was no reason for the attorney general to recuse himself'' from the leak investigation.

But the charges by Ayer, former U.S. attorney in Sacramento and deputy solicitor general of the United States, raise serious questions about Thornburgh's troubled tenure at the Justice Department.

The leak investigation has haunted Thornburgh for a year. It was an attempt to find the source of CBS News report about an FBI investigation of alleged financial irregularities involving the office of Rep. William Gray, D-Pa.

Democrats believe the information was leaked to CBS in a Republican effort to undermine Gray's campaign for the No. 3 position of House Democratic Whip. Gray, the top black member of the House, won the post anyway.

Thornburgh said later that Gray was not the target of the investigation. He then led a highly publicized crusade to find the source of the leak.

The investigation cost $224,000 and two of Thornburgh's top three aides were questioned by the FBI. Sources said they both showed signs of ''deception'' during lie detector tests.

Ayer described a tense meeting with Thornburgh Jan. 30 when he learned that the attorney general planned to close the investigation without recommending any prosecution. Thornburgh also intended to bypass the Office of Professional Responsibility, which normally decides on administrative sanctions.

At the meeting, Ayer said, Thornburgh angrily rejected a request that he withdraw from the case and turn it over to internal investigators. From then on, Ayer said, Thornburgh froze him out of meaningful assignments, even though he is the department's second highest official.

Ayer said he finally decided to quit when Thornburgh ordered him to revoke an action Ayer said he took to protect the integrity of the internal watchdog unit - an order Thornburgh rescinded three days later. Ayer described it as ''a coercive threat.''

Thornburgh denied Ayer's charge during the weekend on an ABC News program, saying: ''I'm saddened that he feels that he has to lash out against his former colleagues, but there's no basis in fact for that kind of story.''

Under pressure from Congress, Thornburgh finally allowed department investigators to review the case.

Last week, just before Solicitor General Kenneth Starr said no criminal prosecution was warranted, Thornburgh began a high-level shake-up that included the removal of his personal spokesman, David Runkel, from daily press operations. Thornburgh's closest assistant and ''gatekeeper,'' Robert Ross Jr., said he would return to private practice in several months.

Both Runkel and Ross flunked FBI lie detector tests, according to sources. Justice Department officials claim the job changes for Runkel and Ross are not related to the leak investigation.

Reporters who cover the Justice Department have long accused Runkel of providing inaccurate or misleading information.

On Capital Hill, Gray's chief of staff, Jon Plebani, said: ''This leak investigation report has been like one of those garbage barges. Thornburgh has been floating it around Justice, trying desperately to find someone to accept it. Now, finally, he got the solicitor general to accept responsibility for it - but it still stinks.''

Ayer spoke first with the Los Angeles Times. He issued a brief statement Monday saying he decided to speak out only after ''incorrect statements about the circumstances of my resignation were made by others.''

#90141u1974 05/21/1990 ~United Press International

(MAY 21) UPI - A hostage standoff continues at a church in Melbourne Beach, Florida, where a gunman is barricaded inside with at least two people, including at least one man who has been wounded. Authorities say the gunman shot a woman at her home, then fled to the church and barricaded himself inside. The woman was taken to a Melbourne hospital. Her condition is NOT immediately known. Authorities have sealed off a three-to-four-block area around the St. Sebastian Episcopal Church.

The Supreme Court today upheld a law requiring those convicted of federal crimes to make payments to a fund for crime victims. An appellate court had ruled that the payments were UNconstitutional because they violated a clause requiring all revenue bills to originate in the House of Representatives. Justice Thurgood Marshall ruled that the law aids crime victims and should NOT be considered general government revenue.

In other action today, the nine justices ruled unanimously that the federal government controls water usage at federally licensed power plants. The high court ruling in a California case is a blow to states that argued they should be permitted to set water use standards. Justice Sandra Day O'Connor wrote that state law is ''pre-empted to the extent it actually conflicts with federal law.''

Texan Wanda McNewmar says she's tired of all the flooding that has forced her and hundreds of people from their homes, but she's taking a philosophical attitude about the who situation. McNewmar says ''Maybe we'll have to live in the trees with the birds.'' New thunderstorms today threatened to dump more water into the badly swollen Trinity River in southeast Texas. The River, which is 10 miles wide at some points, already has swamped about 46-hundred homes, many of which will remain under water for weeks or months.

#90141u1982 05/21/1990 ~United Press International
(MAY 21) UPI - A U-S diplomatic mission to help ease tensions in India's strife-torn Kashmir state appeared to fail. The delegation led by presidential envoy Robert Gates met with officials in India and later with Pakistani officials in Islamabad. New Delhi issued a statement saying Pakistan must halt support of what India calls ''terrorism and subversion.'' The U-S delegation is headed back to Washington.

The summer capital of strife-torn Kashmir was placed on indefinite curfew today after police fired on thousands of mourners for a chief Islamic cleric who was assassinated. At least 25 people were killed by police bullets. Officials say three gunmen killed the Islamic priest and mourners seized his body from a hospital and carried it through the streets. Police opened fire when the crowd refused to disperse.

#90141u2014 05/21/1990 ~United Press International

NEW YORK (MAY 21) UPI - Big Bird and singer Harry Belafonte joined an overflow crowd of more than 5,000 in an emotional farewell Monday to Jim Henson, the master puppeteer who made frogs and pigs sing and dance.

The creator of the Muppets family, and the voice of both Kermit the Frog and Sesame Street's beloved Ernie, died suddenly last week at the age of 53, 21 years after public television's ''Sesame Street'' began introducing Kermit, Big Bird, Ernie and his pal Bert and the ravenous Cookie Monster to worldwide audiences of children and parents.

Mourners at a service at the Cathedral of St. John the Divine complied with Henson's specific wish that they not wear black, and one man turned up in a Kermit-hued green suit.

Others wore green sashes in their hair and buttonholes, and waved hundreds of multicolored styrofoam butterflies distributed before the service began.

An old green coat emblazoned with a frog-shaped piece of scarlet cloth greeted mourners as they entered the church, symbolizing a coat belonging to Henson's mother from which he was said to have cut material to make the original Kermit.

Friends and colleagues, their reminiscences interspersed with musical tributes, remembered a gentle man whose boundless enthusiasm proved contagious.

Frank Oz, who plays Bert, Miss Piggy, and many other Muppet characters, remembered watching Henson ''laugh until he cried.''

''I loved him,'' Oz said, his voice breaking.

''Muppets'' writer Jerry Juhl, a friend since 1961, remembered Henson saying a silly pun was ''a terrible joke, but it's worthy of us.''

''That's how I'll always remember Jim: balanced effortlessly and quite gracefully between the sacred and the silly,'' Juhl said.

The emotional high point of the service came when Big Bird, the affable avian from "Sesame Street," sang Kermit's signature tune, "It's not easy being green."

Big Bird added in a breaking voice, ''Thank you, Kermit.''

Henson's son, Brian, one of his five surviving children, read a letter written by his father years ago to be read when he died. The letter ended, ''Please watch out for each other, and love and forgive everybody. It's a good life. Enjoy it.''

Belafonte said Henson ''showed me there was in fact a greater humanity than I'd ever imagined,'' and then sang ''Turn the World Around'' as the butterflies danced above the heads of the crowd.

By the end of the 2 1/2-hour service, dozens of Muppets crowded a stage at the front of the cathedral.

Mourners filed out as the Dirty Dozen Brass Band played ''When the Saints Come Marching In,'' chosen specifically by Henson for the occasion.

Henson, born Sept. 24, 1936, in Greenville, Miss., brought the muppet characters to life with the help of his wife and business partner, Jane Nebel.

''Sesame Street,'' the Children's Television Workshop educational show that came on the air in 1969, introduced Henson's characters to preschoolers around the world and also spawned a vast merchandising empire introducing 700 new products from dolls to T-shirts in 1989 alone.

''The Muppet Show,'' a commercial production, was televised until 1981 and is now in reruns, reaching some 235 million viewers in 100 countries, with the Soviet Union soon to join. It has won two television Emmys and other awards.

At the time of his death, Henson was a consultant to Walt Disney Co., which acquired his Henson Associates Inc. in 1989 for a reported $100 million to $150 million. He had been under a long-term agreement with the company for producing television shows and films exclusively for Disney.

Henson was involved in three films, ''The Muppet Movie,'' ''The Great Muppet Caper," which he directed, and "The Muppets Take Manhattan." He also provided costume design for the current hit, ''Teenage Mutant Ninja Turtles.''

Due for release later this year is ''The Witches,'' a feature film based on the Roald Dahl children's classic.

Henson died at New York Hospital 21 hours after he was admitted with an advanced stage of penumonia. Henson had consulted a doctor in North Carolina four days before his death during a bout of the flu, but had not

been prescribed antibiotics.

Doctors last week said that if he had sought attention earlier for his worsening condition, it might have helped save his life.

Henson Productions invited anyone who wishes to make contributions in Henson's name to the Henson Foundation in Manhattan, which supports the work of emerging artists in the field of puppetry.

#90141u2031 05/21/1990 ~United Press International

LOS ANGELES (MAY 21) UPI - President Bush appeared near a decision Monday to extend ''most-favored nation'' trade status to China despite continued U.S. objections to Beijing's human rights policies and resistance to political reform.

Administration officials accompanying Bush on the final leg of a four-day political trip predicted an announcement this week of a decision that has

been under intensive review and is due by June 3, the one-year anniversary of the Tiananmen Square massacre.

After weighing political, diplomatic and economic factors, Bush's desire to avoid further deterioration of relations with China appears to have won out over calls from some members of Congress for a tougher response to its bloody crackdown last year on the pro-democracy movement.

National security adviser Brent Scowcroft indicated to reporters that the announcement would come this week, but refused to confirm a Wall Street Journal report that the president has decided to extend the special trade status for China.

''Stay tuned,'' Scowcroft said Monday on Air Force One while en route to Los Angeles with the president.

The Wall Street Journal reported the special trade status would be accompanied by a warning that lowest-possible tariff treatment for China's exports to the United States could be revoked if the situation there does not improve.

China has had its most-favored nation status renewed on an annual basis since 1980. Under the law, his decision, which must transmitted to Congress, can be overridden with a two-thirds vote of the House and Senate.

While roundly criticized for his subdued reaction to the events a year ago in Tiananmen Square, Bush defended his statements and actions, which included the dispatch of top aides - including Scowcroft - on a pair of secret missions to Beijing as an attempt to preserve the U.S.-China relationship.

At a news conference last week, Bush strongly hinted he was leaning toward a renewal of most-favor-nation status for China, saying the decision was not ''an easy call.''

''I don't want to send a signal that we are happy with the human rights record,'' he said. On the other hand, he said, ''I still am of a mind that having contact and working ... in an area where there has been progress on the economic side with China is important.''

After the Tiananmen Square massacre, where hundreds and perhaps thousands of pro-democracy dissidents were killed, Bush suspended military sales and high-level government-to-government exchanges with China as well as some trade and investment promotion programs.

For the most part, however, commercial relations were untouched by his punitive measures, though the tense political situation in China was blamed for at least a temporary drop in international business and

investment activity.

Trade between the United States and China neared $18 billion last year, two-thirds of it in Chinese exports to the United States. China warned April 14 that revocation of the special trade status - which would result in a sharp increase in tariffs on toys, textiles, sporting equipment and other goods - would be a ''major setback'' to bilateral relations.

Bush has been under heavy pressure from American and other foreign business interests in Hong Kong, a major exit point for goods leaving China for the United States, to renew the most-favored nation status. China also threatened to retaliate in kind if the United States raised tariffs on its products.

Bush served as the first U.S. envoy to China after President Richard Nixon opened the door to a full normalization of relations with the communist government in Beijing. He has cited that experience as the basis for his strong feelings about China and his reluctance to do anything that could jeopardize further expansion of that strategic relationship.

#90141u2035 05/21/1990 ~United Press International

WELKOM, SOUTH AFRICA (MAY 21) UPI - Youths tracked down and killed a former town councillor Monday, then danced around his burning body during a second day of rioting in the black township of Thabong, witnesses said.

Nine people have died and 40 been injured in the two days of rioting, hospital officials said.

Police set up roadblocks leading into Thabong, in the heart of the

country's gold-mining belt. Army troops patrolled the perimeter in a bid to restore calm, but witnesses reported scattered incidents of rock throwing and arson attacks.

A former town councillor identified only as Phakathi was tracked down by a mob, stabbed to death and doused with gasoline, witnesses said. As the body burned, youths sang and danced around it, they said.

A supermarket and a medical supply depot owned by the victim were looted and set on fire, the witnesses said.

Black and white miners returned to work in the gold fields around Welkom and Thabong and production was reported normal Monday. But racial tension in the conservative town showed no signs of abating as two white victims of racial violence last week were buried.

The extremist movement White Security, breaking an agreeement with the government, deployed vigilantes on Welkom's streets Monday night and demanded the government impose a dusk-to-dawn curfew for blacks in white areas.

Businessman Hennie Muller, owner of the local body shop and leader of the extremist movement, said his deal with Law and Order Minister Adriaan Vlok for a three-month suspension of the vigilante patrols was off, following the violence in Thabong Sunday.

''We are now not going to talk to anyone, not to Adriaan Vlok, and not to the police,'' Muller told reporters. ''We are now going to protect ourselves. We are already mobilizing to protect whites.''

A spokesman for the Law and Order Ministry called the decision ''very unfortunate,'' but police said they were powerless to halt the vigilante patrols unless they committed a crime.

Sunday's violence appeared to have been sparked by divisions in Thabong over the decision of community leaders to end a two-week black consumer boycott of Welkom's white businesses, originally called to protest the rise of white vigilantism.

Hundreds of blacks evidently opposed to the decision massed near the main entrance to Thabong with about 1,000 mineworkers preparing to report for night duty. After the miners left, according to police accounts, youths hurled stones at police, drawing fire in self- defense.

In clashes Sunday night, eight blacks were killed in gunfire or died later of wounds and some 40 others were wounded, three hospitals in the area reported. Streets were littered with smoldering wreckages of vehicles and houses that came under attack.

Maj. Johan Fouche, police spokesman in Welkom, said the homes of eight black members of the police were damaged by firebombs, 11 police vehicles and nine other cars and trucks damaged or destroyed. Several grocery shops and liquor stores were gutted by fire or looted.

The main road into Thabong, declared off-limits to whites, was barricaded with stones and burning tires. Police at roadblocks warned drivers of company trucks not to enter the township.

Photographers and camera crews said blacks armed with knives threatened them and drove them from the township.

Racial tensions in the Welkom area, 275 miles southwest of Johannesburg, have been high since vigilantes began patrolling streets in March in a backlash over President Frederik de Klerk's reform initiatives.

The situation exploded last Wednesday at the Anglo American President Steyn mine outside Welkom, where mine security opened fire on black mineworkers protesting alleged unfair dismissal paractices. In retaliation two whites were killed by the mob.

Sydeny Koen, a mine training officer who was stabbed to death, and computer programmer Johannes du Preez, whose throat was slashed, were buried in the nearby town of Hennenmenn Monday after a 21-gun salute by khaki-clad members of the Afrikaner Resistance Movement.

Known by its Afrikaans initials, the AWB is the second extremist movement operating in the area.

Nineteen black mineworkers appeared in a magistrate's court in connection with the two murders as a crowd of about 50 right-wing extremists waited outside the court house. The 19 were not asked to plead and they were remanded in custody until July 31.

WASHINGTON (MAY 21) UPI - After a long delay, the Senate opened debate Monday on anti-crime legislation with Democratic and Republican sponsors claiming their bills are the toughest of the toughest.

The two bills, as well as the one introduced last May by the administration, identify many of the same problems but take sharply different approaches to the solutions.

''This bill is a tough bill,'' said Sen. Joseph Biden, D-Del., chairman of the Senate Judiciary Committee, a sponsor of the Democrats' version. ''This is as tough as the Senate has ever got.''

But Sen. Strom Thurmond, R-S.C., offering a GOP alternative, said of Biden's bill, ''I don't believe this legislation is tough enough. It would expand the rights of criminal defendants as the expense of those who are victims.

''My substitute is a much tougher crime package,'' Thurmond said, adding that Biden's bill ''falls short of tough, effective reform.''

Sen. Orrin Hatch, R-Utah, branded the Biden legislation ''the criminal rights bill. It should be called the soft-on-crime bill.''

Although Biden said the legislation should not get mired in name-calling and partisan politics, he charged that the administration has not been ''receptive to negotiations'' and ''not interested in compromise.''

''I hope that isn't because they see more political gain through conflict '' he said. ''Let's end partisan games and deal with the crisis.''

In Portland, Ore., on the last leg of a four-day trip, President Bush

reiteratred his call for Senate action, telling a fund-raising breakfast: ''The U.S. Senate will take up these proposals this afternoon. So let us call on the Senate to take the next step and protect Americans with tougher laws.''

Senate Democratic leader George Mitchell has warned that the Memorial Day recess, scheduled to start after Thursday's session, will be delayed until an anti-crime bill is approved.

The bills provide for a major expansion of the federal death penalty, a curb on the number of petitions for relief in capital cases, permission for search and seizure under weakened guidelines and sections dealing with firearms.

There are numerous other, less dominant provisions, in each of the bills and a flurry of amendments are expected from senators who have not been closely involved in bringing the two measures to the Senate.

''If the truth were known, there is not that much disagreement in this body,'' Biden said, acknowledging that there are ''three serious bones of contention'' - the death penalty, firearms and the scope and cost of the legislation.

The Biden and Thurmond bills both expand the federal death penalty to 30 new offenses, but the Democrats have added a provision that an execution cannot be carried out if there is a ''significant risk'' that race is a factor in imposing the sentence.

Thurmond charged that the race provisions would ''eliminate the death penalty in federal law and in every state.''

The two sides are also far apart on approaching the problem of firearms, with the Democrats proposing to outlaw the sale or manufacture of 14 foreign and domestic assault weapons and the Republicans pushing increased and mandatory penalties for the use of firearms in a crime.

Although Biden said he is proposing ''the first ever limit'' on petitions in capital cases - which now allow prisoner to keep going back to the courts - Thurmond charged the Democrats' package would actually increase the time span for seeking relief.

Both Biden and Thurmond would put into law the Supreme Court's ''good faith,'' but in different ways. The Biden bill would allow search and seizure with a warrant, even if the warrant ultimately is found invalid.

Thurmond's bill would not exlude evidence from search and seizure, with or without a warrant, if it is obtained in the ''reasoable belief'' it did not violate the Constitution.

#90141u2076 05/21/1990 ~United Press International
TOKYO (MAY 21) UPI - A top government spokesman said Monday Japan may reject a request to dock the Goddess of Democracy, the ship French activists had hoped to use to broadcast pro-democracy radio programs into China.

The organizers of the floating radio station announced Friday they were heading for Japan, where they were hoping to dock and get a transmitter needed to broadcast to China.

The Goddess of Democracy, operated by the Paris-based Federation for Democracy in China, left Taiwan last week when its welcome wore thin. It was refused permission to dock in Hong Kong earlier.

Chief Cabinet Secretary Misoji Sakamoto, who seemed to welcome the ship last week, said Monday Japan must study a number of problems before granting permission to land.

Sakamoto, the top spokesman for Prime Minister Toshiki Kaifu, said the government will make a decision based on the ship's observance of domestic and international law and other considerations.

Broadcasting from international waters violates international law and Japanese law, said a Japanese Foreign Ministry spokesman at a news conference last week.

Sakamoto said China's opposition to the ship will also be considered.

A Chinese Communist Party official, Zhu Liang, was quoted in Japanese media as telling a visiting Japanese lawmaker Saturday that Beijing is ''gravely concerned'' about how Japan handles the ship.

China has denounced the ship's plan to broadcast from international waters and the crew of the ship said a Chinese freighter earlier deliberately set a collision course for the ship, forcing the Goddess of Democracy to take evasive action.

The activist group had hoped to be broadcasting by this week.

WASHINGTON (MAY 21) UPI - The Pentagon announced Monday an experimental program to help laid-off or retiring military men and women in their readjustment to civilian life, but gave it an unfortunate acronym that is strikingly similar to taps.

The Pentagon said the Transition Assistance Program, or TAP for short, will feature three-day employment workshops and other career counseling services for those leaving or being forced out of the military services.

The acronym is only one letter off from taps, a bugle call often played at military funerals.

The new program is being formed because of the new era of defense cutbacks that will force troop strength reductions.

Defense Secretary Dick Cheney has said he will reduce the 2.1 million troops by about 54,000 this year and another 38,000 in 1991. Some 300,000 more are expected to lose their jobs from 1992-97.

Deputy Defense Secretary Donald Atwood, Labor Secretary Elizabeth Dole and Veterans Affairs Secretary Edward Derwinski signed an interagency agreement Monday creating the TAP, the Pentagon said in a news release.

TAP workshops and counseling services will be available in seven states at 18 military installations through this year and will be at additional sites in 1991-92.

''The TAP workshops will offer assistance and counseling in such areas as

personal appraisal and goal/objective setting, making career and life decisions, initiating a job search, resumes/cover letters/SF 171, job applications, interviewing techniques, dressing for success, and veterans benefits,'' the Pentagon said.

In addition, a Disabled Transition Assistance Program, or DTAP, will be available at three military hospitals for military personnel being separated because of a service-connected disability.

NAZARETH, ISRAEL (MAY 21) UPI - Hundreds of Israeli Arabs poured into the streets of Nazareth Monday, turning a demonstration protesting the slayings of seven Palestinians by an Israeli into cat-and-mouse confrontations with police.

Rocks, bottles and burning tires littered streets of the largest Israeli Arab town, the focus for the rage felt by the estimated 750,000 Israeli Arabs over the deaths of seven Palestinian workers killed Sunday by an Israeli impersonating a soldier.

Protests and scattered stone-throwing incidents also flared in the mixed Israeli-Arab city of Haifa and a host of Israeli Arab villages in the Galilee.

Black flags flew throughout Arab villages and towns, which were closed for a general strike in protest over the bloody attack. Three days of mourning also were called.

But the focal point of the violence Monday within the Israeli Arab sector was Nazareth, where, according to Christian tradition, Jesus lived until he was baptised by John. Police and paramilitary Border Police poured into the city to combat stone-throwing young Arabs.

The violence erupted after a demonstration by hundreds of Israeli Arabs to protest the attack in Rishon Le Zion against Palestinian workers from the Gaza Strip waiting for day jobs.

More than 30 Israeli Arabs were detained in the wake of the Nazareth demonstration and violence, including the wife of Nazareth's mayor. Four police officers were injured, police said.

While young Arabs blocked the commercial district's main street with burning tires and debris, police erected barricades, combining to make the area impassable. Hundreds of empty tear gas cannisters were strewn about the streets.

Police fired tear gas and sprayed green-dyed water to disperse the protesters, who retreated for several hours during the day but then renewed the attack at early evening.

Thousands of demonstrators left their homes and gathered near the traditional site of Mary's Well as night fell. Several of the protesters, who were masked, began stoning police, witnesses and police said.

After the crowd failed to disperse on police orders, officers fired rounds of tear gas. Hundreds of police remained on alert in the town, where officials described the situation as very tense.

While condemning Sunday's bloody attack on Palestinian workers near Rishon Le Zion, Minister of Minority Affairs Ehud Olmert said Israeli Arab leaders must work against ''the violent reaction of Arab youths.''

''They must remember that in most of the cases, Jews are the victims of brutal murders by Arabs and the spontaneous reaction is likely to be much harsher,'' Olmert said in a statement. ''Such riots by either side and under any pretense are intolerable.''

Olmert said police officers were instructed to show maximum restraint in their response but they ''cannot be expected to restrain (themselves) when hundreds of rioters are storming the main roads and threatening to attack civilians passing by.''

#90141u2122 05/21/1990 ~United Press International
KATMANDU, NEPAL (MAY 21) UPI - King Birendra, under pressure to hasten the pace of reform, Monday transferred legislative powers to interim leaders, allowing the fledgling government to frame new laws to ensure democratic change.

''His majesty has transferred all legislative powers vested in the previous parliament to the new council of ministers,'' an announcement from the Royal Palace said.

The move will allow interim government Prime Minister Krishna Prasad Bhattarai a measure of independence to prepare the budget for the new fiscal year and pass new legislation in keeping with the changes in the landlocked Himalayan country.

Bhattarai, leader of the Nepal Congress Party, had asked the king that his multi-party government - the first such in 29 years - be given both executive and legislative powers.

An interim government was formed last month following pro-democracy protests in Nepal, which had been governed by Birendra through a partyless system of councils. The constitution allowed the king to retain emergency powers.

The interim government will draft a new constitution and hold free and fair elections within a year.

The transference of legislative powers to the interim government ''will define government functioning until a new constitution is announced,'' said Girija Prasad Koirala, secretary general of the Nepal Congress Party.

Birendra has said he would be willing to function as a constitutional monarch under the new constitution. His wife, Queen Aishwarya, and other relatives have recently resigned from senior posts in government and private organizations following allegations of corruption.

Nepal, a country of 18 million people, is witnessing a spurt of protests, charges and counter-charges as a result of relaxation of laws after the formation of the interim government.

(MAY 21) UPI - The problems in flood-ravaged Arkansas and Texas continue today as new thunderstorms add to the woes of residents in those states. Rain and 64-mile-an-hour winds combined to knock out power in Arkansas. Storms in southeast Texas dumped more water in the badly swollen Trinity River, which has already swamped an estimated 46-hundred homes.

Police and SWAT teams say they have NOT made contact yet with a gunman who has barricaded himself in a church in Melbourne Beach, Florida. The assailant is holding an unknown number of hostages and is believed to have already shot and wounded one of them. Police say the suspect shot a neighbor before fleeing to the church.

Security is tight today at high schools in Florida's Hernando County following the weekend beating death of a young white man at the hands of several blacks. Police say the situation is calm now, but they say that could be temporary.

The assassination today of the chief Islamic cleric in India's Kashmir state triggered a frenzy of mourning that ended in a bloody confrontation between Moslems and security forces. Security personnel fired on thousands of angry mourners who had seized the priest's body from a hospital. At least 25 people were killed and more than 250 others wounded.

A second day of rioting in the Israeli-occupied Gaza Strip has resulted in three new deaths and injuries to more than 80 others. Israeli soldiers today fired on Palestinians protesting yesterday's slaying of seven Arab workers by an Israeli gunman. The Palestinians defied military-imposed curfews to clash with troops.

(MAY 21) UPI - U-S election observers in Romania are discounting charges of widespread fraud in yesterday's balloting as vote counting began today. One opposition party says the presence of former secret police members at the polling places intimidated peasants into voting for the ruling party.

Soviet President Gorbachev has gotten a raise. The Soviet Parliament voted today to pay the Kremlin leader the equivalent of 64-hundred dollars a month. But taxes take a big bite of that... his take-home pay is about 38-hundred dollars a month. But that's still about 15 times higher than the average national salary.

Soviet President Gorbachev faces a whirlwind agenda during his Washington visit next Wednesday. But somewhere between White House and Capitol Hill talks, he's scheduled to pick up back-to-back honors with the Martin Luther King award and a doctorate from Ivy League Brown University.

The Food and Drug Administration has approved a new treatment for certain kinds of bladder cancer. A company in Ontario, Canada, pioneered the therapy, which calls for large, regular injections of live bacteria into the bladder. The National Cancer Institute says 74 percent of test patients responded to the treatment.

Police in Bethesda, Maryland, say about 60 AIDS activists were arrested today as hundreds more besieged the National Institutes of Health to demand faster development of treatments for the deadly virus. Most of those arrested were charged with trespassing after they tried to break into the building.

NEW YORK (MAY 21) UPI - The Dow industrials set their fourth record high in the last six sessions Monday as stocks overcame early weakness to close broadly and sharply higher. Trading was active.

The Dow Jones industrial average, which fell 11.80 Friday, jumped 24.77 to 2844.68, breaking the previous record of 2831.71 set Thursday.

Among broad market gauges, the New York Stock Exchange composite index rose 1.73 to 195.28 and the price of an average share added 31 cents. Standard & Poor's 500-stock index climbed 3.36 to 358.00.

The market posted broad-based gains as advances pounded declines 983-531 among the 2,008 issues crossing the NYSE tape. Big Board volume was 166,280,000 shares, compared with 162,517,830 shares traded Friday.

The market opened lower and turned narrowly mixed, consolidating the gains of the last three weeks and the new record highs set last week in the Dow industrials.

But before midday, prices turned higher thanks to some computerized program buying, used to profit on price spreads between stocks and stock-index futures. Further computerized buying then sent prices up sharply.

"Buying in the S and P (Standard & Poor's 500) futures was strong all day and that reinforced the feeling that the market would close strong," said Chester Pado, director of technical research at Jefferies & Co. in Los Angeles. "It helped to bring the market back up from the early selloff."

He also said there still seems to be a "reasonable amount of cash around and with the market hitting new highs it puts pressure on money managers to put their money to work.

"Any time a stock or the market hits a new high, it tends to attract money " said Pado. "Enthusiasm builds up." Specifically, he said enthusiasm built up in technology and pharmaceutical issues and drew money into the rest of the market. In the blue chips, Merck and IBM were among the biggest gainers.

Analysts also said a stronger dollar and a stable bond market after recent weakness helped support stocks. The long bond was up 2/32 in late trading at 100 18/32 after losing 1/2 point in Friday's trading. In late trading, the dollar stood at 153.68 yen, up from 152.90 late Friday.

On the trading floor, Nova Corp. of Alberta was the most active issue, up 1/2 at 7 3/8. The company said it may see a gain from the sale of its rubber division to Bayer AG of West Germany. National Semiconductor followed, up 1/2 to 8 1/4 as the technology sector had a strong day. Texas Utilities was the third most active issue, unchanged at 36 1/2.

Among the blue chips, AT&T was down 1/8 at 43 3/8, but IBM led the technology sector higher with a gain of 1 5/8 to 117.

Merck set the pace for the drug sector by jumping 2 1/4 to 81 1/2, General Motors rose one to 48 7/8, Procter & Gamble rose 1 1/8 to 77 5/8 after predicting strong growth in sales and earnings for fiscal 1990 and United Technologies rose 1 5/8 to 57 7/8 after a unit of BTR agreed to buy its auto-sealing unit for $200 million.

Elsewhere in the technology sector, Digital Equipment rose 1 3/8 to 90 5/8, Compaq Computer gained 2 3/4 to 121 3/8 and Motorola rose 1 1/2 to 78 1/8.

Among other drug stocks, Upjohn rose one to 40 1/8, Bristol-Myers rose 1 3/8 to 60 1/2 and Johnson & Johnson added one to 61 3/4.

In other trading, Lowe's surged three to 43 5/8 after reporting a sharp rise in earnings for the quarter that ended in April.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 201,144,750 shares, compared with 195,163,900 shares traded in the previous session.

Prices closed sharply higher in moderately active trading on the American Stock Exchange. The Amex Market Value index rose 3.04 to close at 359.36. Advances led declines 334-252 among the 851 issues traded. The price of an average share added 11 cents. Composite volume totaled 14,161,980 shares, compared with 15,477,100 shares traded Friday. Hillhaven led the Amex issues, up 1/8 at 1 1/4.

The National Association of Securities Dealers composite index rose 4.58 to 452.89.

#90141u2254 05/21/1990 ~United Press International

WASHINGTON (MAY 21) UPI - The House began debating the clean air bill Monday, divided over alternative-fuel cars and efforts to toughen anti-smog language, plus a dispute over unemployment aid to workers caught in the anti-pollution campaign.

As consideration began, backroom negotiations were held in hopes of settling the relatively few unresolved issues and keeping the bill on track to passage this week. Congress has not been able to pass tougher clean air legislation for 13 years.

Most attention was focused on a plan to require mass production of cars that can run on cleaner-burning fuels, such as grain-based ethanol or natural gas. Over the weekend, negotiators reached agreement on scaled-down language to require oil companies to produce less-polluting gasolines for sale in the nation's nine smoggiest areas. Initial proposals would have covered 27 cities.

The new "reformulated" gasolines, which has 15 percent lower levels of smog-causing contaminants, would be required in Los Angeles, New York, Chicago, Houston, Philadelphia, San Diego, Baltimore, Milwaukee, and the Hartford-New Haven area in Connecticut. It also would be sold in 44 cities with excessive carbon monoxide levels.

The petroleum industry strongly opposes the reformulated gasoline requirement, saying it could boost the cost of gasoline by up to 15 cents per gallon. Farm groups back the plan because it would boost the market for corn, used to make ethanol.

Overall, the bill aims to cut in half acid rain pollution from power plants, impose limits on some 170 toxic or cancer-causing industrial emissions, and reduce smog-causing releases from factories and automobiles.

A similar bill was passed by the Senate last month. Sponsors of the Senate bill said it will require $21 billion a year in additional pollution

controls, but business lobbyists put the cost twice as high.

Once the House version is finished, negotiators will have to work out the differences in a conference committee, then return the measure to both the House and Senate for final passage.

The House debate is expected to be relatively quiet and quick because the most controversial issues were settled during consideration by the Energy and Commerce Committee.

"All of the really important environmental issues have been disposed of," said Rep. John Dingell, D-Mich., chairman of the committee and prime sponsor of the bill. Both Dingell and Rep. Norman Lent, R-N.Y., the primary Republican sponsor of the bill, said they would oppose changes in the committee compromises.

Environmental activists have argued the bill does not go far enough, but Lent said House votes strengthening the measure could "destroy the months of careful compromise and result in the kind of legislative logjam with which we are so familiar."

"Let us not allow our fervor for clean air cause us to lose sight of the forest for the trees," said Lent, who also noted President Bush has threatened to veto any clean bill he deems too expensive for industry.

However, Rep. Henry Waxman, D-Calif., chief congressional ally of environmental groups, said the bill must be improved, particularly in regard to automobile pollution, the major source of smog. Waxman said he will propose requiring production of millions of alternative-fuel cars for sale in the nation's nine smoggiest areas.

Bush proposed a similar alternative fuels program last summer, but the mass production requirement has been eliminated in the face of opposition from car makers. Negotiators were working to reach compromises on alternative-fuel cars and other potentially controversial amendments, including:

- Phasing out the use of chlorofluorocarbons, halons and other ozone-depleting industrial chemicals by July 1997.

- Providing special unemployment assistance to workers who lose their jobs due to increased emission control costs. The Senate rejected a costly jobless aid plan geared to helping coal miners.

- Reduce utility emissions that contribute to haze in national parks.

#90141u2358 05/21/1990 ~United Press International

WASHINGTON (MAY 21) UPI - The first photos from the Hubble Space Telescope are in better focus than expected, giving scientists increased confidence the $1.5 billion observatory will live up to its billing to revolutionize astronomy, officials said Monday.

NASA astronomer Edward Weiler said the telescope's historic ''first light'' photos of a Southern Hemisphere star cluster were studied overnight and the quality of the pictures is even better than he initially thought, proving Hubble's near-perfect 94.5-inch mirror came through launch in good condition.

''It's given us more confidence that the mirror's in good shape and survived the launch very well,'' Weiler said. ''Most of the light (from the stars) is concentrated in the center of the image, which is exactly what you'd expect from a very high-quality mirror that is just slightly out of focus.''

Orbiting high above Earth's obscuring atmosphere, the 12-ton telescope's electronic wide-field camera snapped two black-and-white pictures Sunday of a star cluster known as NGC 3532 to test the instrument's focus.

After computer processing, astronomer James Westphal, the camera's chief scientist, said the digital images were two to three times sharper than expected. Over the next two months, the telescope's mirrors will be adjusted in tiny increments to get the focus seven times better.

But even the ''rough focus'' pictures taken Sunday were impressive. In a 30-second exposure, a double star was clearly apparent while a ground-based photo of the same region showed a single somewhat elongated

image.

Weiler said improvements overnight in the contrast of the first-light photos improved the picture so much it will ''knock your socks off.'' The improved picture was to be released Tuesday.

Over the next week, technicians at NASA's Goddard Space Flight Center telescope control room will continue to adjust the telescope's focus and work to resolve tiny errors in the instrument's pointing and control system that are causing it to wobble very slightly.

No more pictures are expected to be released for several weeks.

''We will be doing some more images, but they will be really where we (can) fit them in,'' Weiler said. ''For the next two or three months, we're really trying to get the fine focus down, the fine alignment down.

''But if we get an opportunity to take an image here or an image there, we'll do it over the next two or three months once we are in fine focus. The next time we release photos we want them to be what the space telescope can really do. We don't them just to be engineering images.''

He said public and media impatience to see a first-light photo put pressure on the telescope control team, blowing the significance of the pictures out of proportion.

''It became a very big milestone in a program that has a lot of very big milestones and it was never meant to be a big milestone,'' he said. ''It was meant to be a routine qualitative test of the focus.''

Still, he said, ''We're all very glad we did it because it lifted our morale quite a bit.''

Over the next seven months, the telescope's optical system will be precisely aligned, giving the instrument 10 times the clarity of ground-based observatories and allowing astronomers to peer deeper into the universe than ever before.

The space telescope was designed to operate for at least 15 years, studying various forms of light in the hope of gleaning clues to answer fundamental questions about the birth of the universe, its current structure, its age, size and perhaps its ultimate fate.

#90141u2367 05/21/1990 ~United Press International

(MAY 21) UPI - Driven by the continuing crude-oil glut and apparent profit taking on recent gasoline advances, world oil prices dropped sharply Monday

with U.S. gasoline falling more than a penny a gallon.

On the New York Mercantile Exchange, the benchmark West Texas Intermediate for June delivery was down 50 cents from Friday's close to $18.26 a barrel.

The June contract expires Tuesday and July becomes the spot-month contract Wednesday. July ended Monday down 38 cents to $19.04 a barrel.

Unleaded gasoline for June delivery settled at 63.35 cents a gallon on the Merc, 1.08 cents less than Friday's close.

Mari Buglass of Shearson Lehman Hutton's London office said the continuing glut of crude oil was the main factor driving prices down. ''There are fairly high levels of WTI around compared to last year,'' the analyst said.

With the glut, traders in buy positions ''were scrambling to get out of the market,'' said Mary Haskins of Paine Webber Inc. in New York.

''The Tuesday expiration of the June crude contract was definitely putting some (selling) pressure on the market,'' Haskins said.

Gasoline gained 2.55 cents a gallon on the Merc last week and Buglass said profit taking on these gains was helping drive prices down.

''Gasoline, which had been holding this thing together, gave up the ghost today,'' Haskins said.

''The tightness in the U.S. Gulf Coast cash market is easing up. Sellers are coming into the market,'' she said.

Prompt delivery unleaded gasoline fell 2.55 cents on the gulf coast market to 65.35 cents a gallon, while declining 0.95 cent on the New York Harbor spot market to 64.6 cents a gallon.

Evan Baron of Elders Futures Inc. in New York said traders were anticipating that U.S. gasoline imports would increase since European refineries were producing at higher rates than last year.

Buglass also expected that U.S. gasoline output would soon rise as more American refineries returned to production from their annual maintenance turnarounds from heating oil to gasoline production.

On the U.S. Gulf Coast spot market, prompt delivery WTI slipped 50 cents to $18.25 a barrel.

On the European spot market, Britain's widely traded North Sea Brent crude dropped 36 cents to $16.93 a barrel.

United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - traded 24 cents less at $14.58 a barrel.

On the Merc, heating oil for June delivery declined 0.48 cent to 51.44 cents a gallon.

#90141u2368 05/21/1990 ~United Press International

NICOSIA (MAY 21) UPI - Kuwait is seeking to expand into Eastern Europe and has plans for a joint venture with Hungary, an oil-industry newsletter said Monday.

Kuwait Petroleum International, the international marketing and refining subsidiary of the Kuwait Petroleum Corp., is laying plans to get into the Eastern European market, the Nicosia, Cyprus-based Middle East Economic Survey quoted a subsidiary official as saying.

KPI plans a joint venture with Hungary's national oil company to upgrade its distribution network and hopes to undertake a joint refining venture in Hungary, the newsletter said. Kuwait also is looking for opportunities to improve its market share and enter new markets in the United Kingdom, France, Germany, Spain, Portugal and Austria.

In the Far East, KPI is looking at Thailand as a possible launching pad for a regional presence in the region, the newsletter said, with initial plans calling for building 200 gas and service stations and a refinery to service KPI's regional requirements.

''There is also a project to build a refinery both to supply the local market and for export,'' al Salem was quoted as saying.

''The exports would supplement our existing supplies to these regional markets and would also service any new networks we might develop - which could be in Japan, South Korea, Taiwan and even the Phillipines.''

The official also said that Kuwait's refining and marketing system in Europe is now capable of handling 450,000 barrels a day, following its recent acquisition of Mobil Corp.'s 100,000-barrel-a-day Naples refinery and a distribution network of 2,000 service stations in Italy.

This has raised its share of the Italian market from nearly 4 percent to almost 11 percent, the newsletter said.

#90141u2376 05/21/1990 ~United Press International

WASHINGTON (MAY 21) UPI - Peter Monroe, a lawyer and senior official at the Department of Housing and Urban Development, was named president of the Resolution Trust Corp. oversight board, the RTC announced Monday.

His appointment takes effect June 11.

The oversight panel creates policy and approves funding for the RTC, the agency responsible for selling off the assets of the nation's failed savings and loan institutions, such as houses and commercial real estate.

Although not a member of the board, the president of the panel oversees its day-to-day operations and supervises a staff of about 40. The president is selected by the oversight board members.

Monroe, a general deputy assistant secretary for housing since May 1989, will replace acting oversight board president William Taylor, director of banking supervision and regulation for the Federal Reserve System.

Taylor replaced Daniel Kearney, who resigned Feb. 9 in what he described as a ''misunderstanding of the scope of the position I accepted.''

Treasury Secretary Nicholas Brady, chairman of the oversight board, praised Monroe's appointment.

''Peter Monroe's extensive experience in real estate and finance make him an excellent choice to assume this critical leadership role at the oversight board,'' Brady said.

''Monroe's expertise will be a great asset as the Resolution Trust Corp. faces the challenge of disposing of its inventory.''

Added Housing Secretary Jack Kemp, who also serves on the panel: ''He will provide leadership and experience to the oversight board.''

Before his government service, Monroe, a Harvard Law School graduate, served as president of Rutenberg Commercial Developers in Clearwater, Fla. and as a director of the Republic Bank of Clearwater, Fla.

Monroe, a native of Grosse Pointe, Mich., is also a certified general contractor and a registered real estate broker.

The other members of the RTC oversight board are Federal Reserve Board Chairman Alan Greenspan; Philip Jackson, professor at Birmingham Southern College in Birmingham, Ala.; and Robert Larson, president and chief executive officer of the Taubman Co., Bloomfield Hills, Mich.

#90141u2393 05/21/1990 ~United Press International
NICOSIA (MAY 21) UPI - Exports of crude oil from South Yemen's Shabwa oilfields are to be postponed until early 1991 due to delays in the supply of equipment to a Soviet-built pipeline, an oil industry newsletter said Monday.

The Nicosia, Cyprus-based Middle East Economic Survey said that there had been delays in the supply of the equipment necessary for the completion of a 110 mile, 20-inch pipeline linking the oilfields to the Bir Ali export terminal on the Gulf of Aden.

The pipeline is currently under construction by the Soviet firm Tyumen Pipeline Construction Association, but completion - originally scheduled for the end of 1989 or early 1990 - has now been deferred until later this year, MEES said.

There were also delays in the field development which the Soviet firm Technoexport was carrying out under a sevice contract with the South Yemeni Ministry of Energy and Minerals.

On completion, initial deliveries will be near the 30,000 barrels-a-day mark, ultimately rising to 100,000 barrels a day.

The South Yemeni Ministry of Energy and Minerals has received bids from some 15 countries for exploration rights in the Shabwa area.

Due to the planned unification of North and South Yemen, and the consequent merger of the two oil ministries, contracts will not be awarded in the immediate future.

#90141u2455 05/21/1990 ~United Press International
ROCKVILLE, MD (MAY 21) UPI - Two government researchers called Monday for a ban on the use of the prescription acne drug Accutane by women of childbearing age, saying the drug is causing far more birth defects than the maker has acknowledged.

Despite strong warnings to avoid using the drug during pregnancy, babies

are probably being born with birth defects caused by the drug because women either ignore the warnings or their birth control methods fail, the researchers said.

David Graham, an epidemiologist at the Food and Drug Administration, and Dr. Godfrey Oakley Jr., a birth defects expert with the Centers for Disease Control in Atlanta, estimated that Accutane could cause anywhere from 33 to 227 birth defects. They appeared before two Food and Drug Administration advisory committees considering recommending stricter rules on the acne drug.

Hoffmann-La Roche of Nutley, N.J., has received only three reports of birth defects related to the use of the drug, which is also known as isotretinoin.

But Oakley, Graham and others said they believed many of the deformities have not been reported and that some women chose abortion over the chance of giving birth to a child with defects.

Oakley said the birth defects caused by Accutane ''are at least as severe as and occur as often as exposure to those caused by thalidomide and rubella (German measles).''

Thalidomide was an anti-morning sickness drug popular in the late 1950s and early '60s that caused thousands of severe birth defects before its use was stopped.

''This is clearly the worst epidemic of preventable serious birth defects we have ever seen in the United States,'' said Dr. Sidney Wolfe, director of Public Citizen Health Research Group, a consumer group.

Robert Armstrong, a spokesman for Hoffman-La Roche, acknowledged there probably were more than three babies born with Accutane-related birth defects in 1989. But he said the total is far lower than Graham's estimate.

''We feel this is an important drug with significant benefits to the patient. It is successful in treating patients who have not responded to any other therapies,'' Armstrong said.

Armstrong argued that ''this is not the same as thalidomide. In that case people didn't know what they were getting into. With this drug people know.''

Armstrong was referring to labels on the drug warning women against using the substance during pregnancy. The warnings recently were made stronger after reports surfaced of birth defects linked to the drug's use.

Graham said between 1,200 to 3,600 of the estimated 65,000 women who took

the drug in 1989 probably became pregnant.

Graham based his estimates on the assumption that even with the best birth control available, three out of 100 sexually active women would become pregnant during any year because contraception is not 100 percent effective.

''If you seriously want to limit pregnancy exposure, you just can't give this drug to women,'' said Graham.

Graham also said current labels on the drug seem to encourage women to get an abortion if they become pregnant, which would have prevented more birth defects from occurring from the drug's use.

The company said it plans to improve the labeling by further emphasizing that women should undergo pregnancy tests before starting to use the drug.

#90141u2456 05/21/1990 ~United Press International

SEATTLE (MAY 21) UPI - Paul Allen, who helped found Microsoft Corp. but disappeared from public view after resigning seven years ago, re-emerged Monday in announcing the first product made by his young software company.

ToolBook, produced by Asymetrix Corp. of Bellevue, Wash., was described as a ''software construction set'' designed to simplify software programming and in the process make programming more accessible to business users, educators and others who may want to modify existing software programs or create their own.

''ToolBook provides all kinds of users with unmatched flexibility for building unique sofware solutions,'' Allen said, adding the program ''allows PC users to focus on what they want to do rather than on how to get there.''

ToolBook was designed to work in tandem with Microsoft's Windows 3.0, the newest version of a companion program for the MS-DOS operating system that is supposed to make computing much easier for users of IBM and compatible personal computers.

Windows 3.0, scheduled to be unveiled Tuesday in New York by Microsoft Chairman Bill Gates, is considered perhaps the hottest development for PCs this year and is expected to boost the sales of vendors - including Asymetrix - that write programs for it.

Windows 3.0 works much like the popular Apple computers by presenting a screen with easy-to-understand symbols called icons that let users issue commands without memorizing the arcane DOS language.

TookBook carries that concept into the software programming arena by using symbols that represent prefabricated coding for common programming tasks. Allen said ToolBook was designed to be powerful enough to be used by trained programmers, yet easy enough to understand to allow just about anyone to modify programs to his or her specifications.

ToolBook resembles a product used on Apple Macintosh computers called HyperCard, and analysts said this kind of product for IBMs and compatibles could easily ring up sales in the millions of dollars in the first year.

Asymetrix faces competition for ToolBook from Spinnaker Software of Cambridge, Mass., which has a program called Plus, and Echelon Development Corp. of Burlington, Mass., with its Windowcraft.

However, Asymetrix is already shipping ToolBook, while Plus and Windowcraft are not expected to ship until later this summer.

In addition, Asymetrix is expected to get a revenue boost from Microsoft because a portion of ToolBook containing a computerized calendar and Rolodex is being included with the new versions of Windows.

Asymetrix also has the support of Microsoft, which Allen recently rejoined as a director.

Allen, 37, formed Microsoft in 1975 with Gates and worked as vice president in charge of research and new product development but resigned in 1983 after being diagnosed with Hodgkin's disease.

In 1985, with the disease in remission, Allen formed Asymetrix with the goal of creating software that was more ''user-friendly.''

Allen formed Asymetrix without venture capital because of vast wealth stemming from his ownership in Microsoft. Allen is Microsoft's second-largest shareholder, with about 19 million shares, representing 17.3 percent of the company.

(MAY 22) UPI - DIGEST:

Baseball

Andre Dawson of the Chicago Cubs and Mickey Tettleton of the Baltimore Orioles were named Players of the Week for the National and the American leagues. ... Minor league umpires will receive a $500 monthly salary increase. ... The U.S. Baseball Federation and the Topps Company have

signed a multi-year agreement in Trenton, N.J. Topps will sponsor the federation's national and grass roots awards program and produce cards featuring Team USA.

Basketball

Willis Reed, said to be in the running for Atlanta Hawks coaching job, will stay with the New Jersey Nets. He was promoted to the club's senior vice president of basketball operations. ... The Tuscany club of the Italian League beat the Erie Wave of the World Basketball League 107-106 in Memphis, Tenn.

Cycling

Italy's Stefano Allocchio won the first half of the fourth-stage of the Tour of Italy. Phil Anderson of Australia won the second half. ... A record 102 cyclists are expected for the Tour of Austria, which begins Wednesday.

Obituary

Ed Steitz, 69, the foremost expert on basketball rules and father of college basketball's 3-point shot, died at his home in East Longmeadow, Mass. Steitz was best known for the changes he made while rules editor for the NCAA. Besides the 3-point shot, he introduced the 45-second shot clock in 1985 and reinstated the dunk in 1976.

Outdoors

Dale Goddard, captain of the U.S. climbing team, will scale a 30-foot man-made mountain in New York Tuesday in the third stop of a national fundraising tour to benefit local environmental causes. Goddard and the 10-ton mountain will make stops in Boston, Chicago, New Orleans and San Francisco.

Soccer

Italy's World Cup team closed its practices to the public in Florence because of angry fans protesting the $13 million sale of star striker Roberto Baggio to the Juventus club. Coach Azeglio Vicini made the move after about 300 of the 5,000 fans watching practice began disturbing his players.

Table Tennis

World champion Jan-Ove Waldner of sweden clinched a spot in the semifinals by defeating Frank Boote of Holland 2-1 in the quarterfinals of the World Team Table Tennis Cup in Osaka, Japan.

Volleyball

Tim Hovland and Mike Dodd defeated Sinjin Smith and Randy Stoklos in the first $60,000 Miller Lite Fresno (Calif.) Beach Open.

#90141u2506 05/21/1990 ~United Press International

(MAY 21) UPI - A hostage standoff continues at a church in Melbourne Beach, Florida... More severe weather for flood-weary Arkansas residents... Israel's military puts down rioting in the Gaza Strip... And more bloodshed in India's troubled Kashmir state... These top stories and more, next, from U-P-I.

Florida police are still trying to talk a gunman out of church where he is holding an unknown number of hostages and is believed to have shot one of them.

Dozens of police and a SWAT team have surrounded the St. Sebastian Episcopal Church in Melbourne Beach after an armed man reportedly shot a man and barricaded himself inside.

Police doN'T know the man's motive, but say he was earlier involved in a domestic dispute during which he shot his neighbor three times in the stomach with a .44-caliber handgun at point-blank range.

The neighbor underwent surgery, but her condition is NOT known.

After the shooting, the gunman apparently fled to the church, where witnesses say he shot another person.

Police say they know the wounded man is still alive because they can hear his calls for help.

Authorities have ordered school officials at an elementary school half-a-block away to keep the children locked inside until the man is in custody.

The weather woes continue for Arkansas, Texas and other states as flood conditions are worsened by new thunderstorms.

Powerful thunderstorms backed by 64-mile-an-hour winds battered Arkansas today... ripping down trees, damaging buildings and knocking out power to some areas.

The heavy rain was punctuated with marble-sized hail... prompting one evacuee to describe the situation as ''a living hell.''

More rain also fell in southeast Texas, increasing the volume of the already swollen Trinity River.

Officials say the record volume of water being released through the Lake Livingston Dam floodgates into the lower part of the river has dropped the level of the Trinity.

But some 46-hundred homes downstream are being swamped by the overflow and authorities say some could remain under water for weeks or months.

The worst flooding in more than two decades has hit parts of Indiana's White and Wabash river systems. The raging White River destroyed a levee protecting the water supply of Petersburg, Indiana... leaving residents without the use of tap water.

#90141u2508 05/21/1990 ~United Press International

WASHINGTON (MAY 21) UPI - A genetically engineered version of a naturally occurring protein appears to help reduce a significant side effect of cancer chemotherapy, researchers reported Monday.

A study involving 126 patients with small cell lung cancer found patients were much less likely to develop a condition known as febrile neutropenia when given a substance called granulocyte-colony stimulating factor, or G-CSF.

Febrile neutropenia is a condition marked by fever and low white blood cell count that commonly occurs among cancer chemotherapy patients, forcing doctors to reduce the amount of cancer-fighting drugs they receive to avoid life-threatening infections.

G-CSF is a naturally occurring protein that helps regulate the body's production of white blood cells that battle infections know as neutrophils.

Dr. Jeffrey Crawford of Duke University Medical Center and his colleagues gave the patients either G-CSF or a useless substitute after they underwent standard chemotherapy.

In a report presented at a meeting of the American Society of Clinical Oncology, Crawford said only 37 percent of the patients who received G-CSF experienced febrile neutropenia, compared to 57 percent in the group that received the phony substitute.

''These findings are significant in that G-CSF has been shown to be effective in reducing the risk and frequency of infection associated with a standard chemotheray regimen,'' said Crawford.

''By so doing, G-CSF may make it possible for more cancer patients to receive the intended dose of chemotherapy on schedule,'' he said.

#90141u2528 05/21/1990 ~United Press International

(MAY 21) UPI - The situation remains tense in the Israeli-occupied Gaza Strip following more violence today in response to yesterday's massacre of seven Arabs by an Israeli gunman.

The shooting prompted widespread violence yesterday... and today Israeli soldiers shot and killed three more Palestinians during a second day of rioting. At least 80 Arabs and seven Israeli police and soldiers were wounded in the confrontations.

The U-S State Department says it's disturbed by the wholesale use of force Israel is employing to put down the demonstrations. American officials met with Palestinian leaders in Israel and the Gaza Strip today to discuss the incident.

A number of Palestinian groups have vowed revenge for yesterday's shooting... and it appears retaliatory attacks have already begun in Jordan and Turkey.

A Palestinian gunman in the Jordanian capital of Amman fired on a group of tourists today... injuring nine French citizens and a Jordanian.

Three people were injured in Istanbul, Turkey, when a bomb exploded outside the offices of the Israeli airline El Al.

Hundreds of combat-ready troops are deployed in the summer capital of India's Kashmir state today after violent confrontations today between security forces and thousands of angry mourners.

The security forces fired on the defiant mourners, killing at least 25 people and injuring more than 250 others.

The troops have been ordered to shoot on sight anyone who violates a curfew imposed after today's clashes. The violence was prompted by the slaying of Kashmir's chief Islamic cleric.

NO one has claimed responsibility for the assassination of the Moslem religious leader, who was shot at point-blank range by three gunmen.

Police blame the cleric's assassination on Moslem separtatists trying to engineer a popular uprising against Indian rule in Kashmir.

Followers of the cleric stormed a Srinagar hospital and seized his body to carry it to a Moslem mosque.

As many as 12-thousand people had joined the procession when security forces blocked its way and ordered the crowd to disperse. When the protesters refused, security personnel opened fire.

-30- 2349

#90141u2581 05/21/1990 ~United Press International

(MAY 21) UPI - Continuing violence in the black South African township of Thabong, outside of Welkom, has raised the death toll in the area to seven as police clashed today with rock-throwing youths.

40 others have been wounded in the two days of violence... and racial tensions remain high as two white victims of fighting last week were buried.

The latest outbreak of violence began yesterday when police fired on blacks gathered at the entrance of Thabong. Officers say they shot in self-defense after the crowd began throwing rocks.

An extremist Afrikaaner movement known as White Security says it's breaking its agreement with the government and will once again deploy vigilantes on the streets of Welkom... 275 miles southwest of Johannesburg.

A Law and Order Ministry spokesman calls the group's decision ''very UNfortunate.''

Meanwhile South African President Frederik de Klerk continues his European tour. De Klerk announced at a Bonn news conference today that West German leaders encouraged his efforts to gain financial support for racial reforms back home.

The Supreme Court says families canNOT claim federal tax deductions on money sent to children who are on religious missions.

Today's court's ruling came in a case brought by parents who claimed that the money they sent to their two children, both Mormon missionaries, was charity and therefore eligible as a deduction.

The court, in a ruling by Justice Sandra Day O'Connor, rejected the argument that the money was merely held in trust for the church by the upaid missionaries.

O'Connor said that to rule otherwise would have posed ''insurmountable'' problems for the Internal Revenue Service.

In other action, the court also upheld a law that requires criminals to make payments ranging from 25-dollars to 200-dollars into the Crime Victims Fund.

And it also refused to hear an appeal by the anti-abortion group ''Operation Rescue'' of nearly 70-thousand dollars in fines for ignoring earlier court orders which limited its anti-abortion demonstrations in New York.

#90141u2599 05/21/1990 ~United Press International

PROVO UT (MAY 21) UPI - Novell Inc. wants to keep working with Lotus Development Corp., but the two computer companies have no immediate plans to revive their failed merger talks, the head of Novell said Monday.

Novell scotched a planned $1.5 billion planned merger with Lotus, based in Cambridge, Mass., Friday after negotiations unraveled over control of the new board of directors.

''I wanted it (the merger) to happen a lot,'' said Ray Noorda, Novell's chairman, president and chief executive officer and owner of 12 percent of the company's stock.

But Novell backed out of the proposed merger May 18, Noorda said in a telephone news conference, because his directors and shareholders were uneasy about Lotus's control of the joint board of directors. Lotus would have had four directors and Novell three.

''We didn't reject Lotus,'' Noorda said, pointing out that his company only ''rejected the merger terms. I didn't want to have directors who were not fully supportive of it.''

Noorda said the two companies have no immediate plans to resume their merger discussions and any future negotiations would be ''in the long term if at all.''

He also claimed information Novell obtained from its investment bankers and from the Lotus Development financial reports indicated it was ''not a sure sale to our shareholders.''

The two companies announced plans April 6 for the proposed $1.5 billion merger. Analysts had viewed the merger of equals as a bid to take on the computer software industry giant, Microsoft Corp.

Lotus was to issue 1.19 shares of common stock for each share of Novell common stock, or approximately 41.6 million shares. Lotus had $556 million in sales last year, while Novell had $422 million in sales in 1989.

''It is a situation in which, in many cases, people at our industrial level thought we were selling the business too cheap,'' said Noorda. ''It was never intended to be a sale.

''We don't have the company up for sale. We had to reflect that. In order to make a true merger of equals, we had to make sure that we would satisfy the majority of our shareholders. We feel we've done what we had to do. Naturally all of us, including myself, are disappointed we couldn't come to an agreement.''

Noorda said he hoped Lotus and Novell would be able to continue joint ''development activities that are already underway,'' and he said he would ''make every effort to make that happen.''

He said Novell is ''not looking for merger partners at this time. If it happens, it may happen,'' he said, adding Novell's biggest concern is expanding in the computer software industry and improving service and support operations to compete with Microsoft, which has allied itself with International Business Machines Corp.

''We must make sure our products, service and support are better than theirs or at least equal,'' Noorda said, adding he expects Novell to be a ''dominating force'' in the industry ''in concert with other folks or by ourselves.''

#90141u2616 05/21/1990 ~United Press International

WASHINGTON (MAY 21) UPI - The Federal Reserve Board approved the sale Monday of Bank of New England's leasing group to the Bank of Tokyo, the last in a series of transactions aimed at raising additional cash for the ailing Boston institution.

Terms of the sale were not disclosed.

Fed governor Wayne Angell voted against the sale, citing ''the complexity of the arrangement'' that will be consumated through a New York subsidiary of the Japanese institution, the 18th largest bank in the world.

James Dorsey, a spokesman for the Bank of New England, said that employees of the leasing business, which is based in Boston, ''will transfer over to the new owner.'' He did not know whether layoffs would ensue.

Dorsey also said the loan portfolio involved in the deal ''amounts to about $500 million of our leasing assets'' and ''concludes our previously announced asset sales program.''

Although profitable, the leasing business, which among other things makes, acquires and services loans, is ''non-strategic to the future direction and future orientation'' of the bank, Dorsey said.

The institution - which as recently as last fall had more than $32 billion in assets - claimed to be New England's second-biggest banking company.

But in recent months it has come under the close eye of federal banking regulators and stripped itself of more than $5 billion in assets following the collapse of the northeastern real estate market.

The company lost a staggering $1.11 billion last year and reported another $46.6 million in losses for the first quarter of 1990.

The Bank of Tokyo boasts assets of $171.4 billion.

''In evaluating the public benefits, the board notes that (the Bank of New England) has stated that consummation of the proposal would provide net financial benefits ... by providing additional capital and liquidity,'' the Fed said in its decision.

#90141u2633 05/21/1990 ~United Press International

(MAY 21) UPI - Police in Bethesda, Maryland, have arrested at least 60 AIDS activists for trespassing, as hundreds more continue to rally in front of the National Institutes of Health.

About 900 protesters marched at the Washington suburb headquarters to demand that the N-I-H look harder and faster for AIDS treatments.

Authorities used mounted police to keep the crowd at bay, but at least eight activists broke through campus barricades and tried to enter the buildings.

Protesters say the government isN't looking hard enough for AIDS treatments. They want the N-I-H to expand the number of potential therapies, as well as drugs to treat AIDS-related infections and cancers, the major killer of many AIDS victims.

Acting director of the N-I-H, William Faub, says the institute is wholeheartedly committed to ''defeat the disease.''

A new treatment has been approved for a certain kind of bladder cancer.

The Food and Drug Administration gave its go-ahead for Canadian-based Connaught Laboratories to start marketing the new therapy for a bladder cancer known as ''in situ.''

The disease accounts for 20 percent to 30 percent of all bladder cancer.

The treatment calls for regular, massive injections of live, but weakened bacteria into the bladder.

The patient holds the vaccine in the bladder for about two hours before urinating. The subsequent inflammation kills many cancer cells.

Although there are other bacteria treatments licensed in the United States this is the first appoved to treat ''in situ'' cancer.

Encouraging studies show about 74 percent of test patients responded to the bacteria treatment.

HARTFORD, CT (MAY 21) UPI - Aetna Life & Casualty has become sole owner of Partners Health Plans in a deal worth up to $68 million, the giant insurer announced Monday.

Aetna acquired full ownership in a deal with Voluntary Hospitals of America Inc., which through a subsidiary formed Partners as a joint venture with Aetna in 1985.

The VHA subsidiary received $26 million in cash and will receive up to $8 million more over the next two years. In addition, the VHA subsidiary will be relieved of more than $34 million in Partners obligations, the bulk of which was owed to Aetna.

Under the agreement, VHA will be assigned responsibility for hospital provider network design and composition, Aetna said in a statement.

Aetna is the country's largest investor-owned insurance and financial services organization. VHA is the country's largest alliance of not-for-profit hospitals.

#90141u2793 05/21/1990 ~United Press International

ABIDJAN, IVORY COAST (MAY 21) UPI - Liberian rebels Monday claimed they seized control of the southern port of Buchanan after two days of heavy fighting and said they were planning to move along the coast toward the capital of Monrovia.

A rebel spokesman also claimed the insurgents had attacked the road between Buchanan and Robertsfield airport near the capital, cutting off government troops from Monrovia. Buchanan is only an hour's drive from Liberia's international airport at Robertsfield and is less than two hours from the capital.

A rebel force of up to 1,000 attacked Buchanan Saturday evening and launched a fresh attack Sunday, witnesses said. Rebel spokesman said Monday they captured the town.

Civilian casualties were reported to be light because many residents were aware that the rebels were coming and had fled to Monrovia, a rebel spokesman told United Press International.

In Monrovia, the government of President Samuel Doe had issued no statement on the latest fighting in the port.

Buchanan is the railhead for supplies of iron ore from the Limco iron ore complex at Yekepa in the north of Liberia on the border with Guinea. On Sunday the rebels, who call themselves the National Patriotic Forces of Liberia, attacked the mine and took control of its operations.

In an interview last week, rebel leader Charles Taylor predicted victory within two weeks. He warned civilians to leave Monrovia or face a bloodbath as his troops make their final push. But frightened citizens continued to flow into the capital.

Taylor, who launched his effort to overthrow Doe's 10-year-old regime last Dec. 26, said he rejected any possibility of negotiating an end to the conflict, which the rebels say have left up to 4,000 people dead and produced a flow of up to 250,000 refugees to Guinea and the Ivory Coast.

''If we have to fight for three years, we will eventually remove Doe,'' Taylor said. ''We are going to go after this boy. Legally and illegally, we are going to go after him. Any negotiation which keeps Doe in power is a 'no-go.'''

-30- 2302

#90141u2959 05/21/1990 ~United Press International

(MAY 21) UPI - Police in Melbourne Beach, Florida, say a heavily armed man who barricaded himself in a church after shooting two people has apparently killed himself. The gunman held officers at bay for hours before they fired tear gas into the church and entered to find him dead of an apparently self-inflicted gunshot wound. A man who was shot in the leg had escaped the church earlier. A neighbor shot at her home by the gunman is in a Melbourne hospital in critical condition.

Milwaukee Archbishop Rembert Weakland says the Roman Catholic Church's hard-line stance against abortion is- in his words- ''too simplistic'' and ''lacks compassion.'' In an interview in today's Milwaukee Sentinel, Weakland also said it's possible for Catholics to be ''pro-choice,'' depending on the definition used.

A Justice Department spokesman insists that Attorney General Dick Thornburgh did NOT engage in a coverup involving two top aides who failed a lie detector test during a politically sensitive investigation. The department's number two official, Donald Ayer, charges that Thornburgh helped conceal the fact that the aides failed the test. Ayer is resigning at the end of this week.

Diminishing winds are helping firefighters in their week-old battle to contain a blaze which has devoured 20-thousand acres of rugged terrain in southern New Mexico. The fire is closing in on Carlsbad Caverns National Park, but fire officials say the chances of it spreading are ''slight to very slight.''

A report by the Stcokholm International Peace Research Institute on the world's military situation shows some significant changes. The report says world military spending dropped by two percent in 1989... although weapons purchases remained stable in European NATO countries. The report also reveals that, for the first time in 20 years, the Middle East was NOT the leading arms importer. That distinction is now held by southern Asia.

-30- 2108

#90141u3254 05/21/1990 ~United Press International

(MAY 21) UPI - Florida police say a gunman who shot at least two people and took others hostage inside a Melborne Beach church today has apparently shot and killed himself. SWAT teams found the man dead after firing tear gas and storming the St. Sebastian Episcopal Church. The gunman shot a neighbor before fleeing to the church, where he shot another person. Both victims are expected to live.

NATO defense ministers say Europe must assume a leading role in its own protection... even if U-S nuclear and ground forces remain in Europe. The so-called ''Eurogroup'' of ministers endorsed the move in a meeting in Brussels today, one day before a full session of NATO. The group also endorsed a unified Germany within the Atlantic Alliance as a- quote- ''cornerstone of stability.''

The Senate opened debate today on anti-crime legislation, with Democratic and Republican sponsors each claiming their bill is the tougher. The two bills... as well as the one introduced last May by the Bush administration... identify many of the same problems, but support sharply different solutions. Both, however, call for a major expansion of the federal death penalty.

More than five-thousand mourners at a New York cathedral bid farewell today to Muppet-master Jim Henson. Many who attended wore green, the color of Henson's alter ego, Kermit the frog. One friend said he'd remember

Henson as a man who gracefully balanced the ''sacred and the silly.'' Big Bird, another Henson creation, sang Kermit's signature tune- ''It's NOT Easy Being Green.''

Executives at Walt Disney Company say they'll wait a ''proper'' mourning period before following through with plans to buy Henson's company. The estimated 150-Million-dollar deal has been in the works since last August. Since then, Henson and Disney have worked together on several projects... including a Muppets stage show due to open this summer at Florida's Disney World.

#90141u3517 05/21/1990 ~United Press International

(MAY 21) UPI - Florida police say an UNemployed man upset over renovation work at his church shot a woman before fleeing to the church, where he shot a church leader before taking his own life. Members of the St. Sebastian Episcopal Church in Melbourne Beach say Douglas Pearson, who was overseeing renovations on his church, became upset because workers didN'T do what he wanted. Pearson kept police at bay for hours before killing himself. The two victims were hospitalized- the woman in critical condition.

Nine French tourists and a Jordanian in Amman, Jordan, were shot and

wounded today in an apparent retaliatory attack for yesterday's slaying of seven Arab workers in Israel. A Palestinian shot the victims in downton Amman. Riot police clashed with tens of thousands of Palestinians and Jordanians outside the U-S Embassy in the Jordanian capital. The demonstrators were protesting yesterday's shooting in Israel.

More than 80 people have been arrested so far today in an angry protest by AIDS activists outside the National Institutes of Health in Bethesda, Maryland. About 900 people carrying cardboard tombstones are demanding the N-I-H work faster and harder on AIDS treatments. One protester accused the government of acting as if it were trying to cure the common cold.

Youths in the black South African township of Thabong today tracked down and stabbed to death a former town councillor. Witnesses say the youths doused the body with gasoline and set it aflame... singing and dancing around the body as it burned. Hospitals officials say the death toll stands at nine after two days of rioting in Thabong... with 40 others injured in the violence.

-30- 1846

#90141u3537 05/21/1990 ~United Press International

(MAY 21) UPI - South African President Frederik de Klerk says West German leaders support his current tour to get European leaders to re-examine their policies against his country. De Klerk held a news conference today in Bonn, where he encouraged German businesses to invest in his country as political reforms take root there. He leaves Bonn tomorrow for the Swiss capital of Berne.

The House is divided over a few amendments to what's being called the toughest clean-air bill in 13 years. Members clashed today about a measure that would require mass production of cars that can run on cleaner-burning alternative fuels. Back-room negotiators earlier agreed to cut from 27 to nine the number of smog-filled cities which must make cleaner fuels available.

The Census Bureau, dogged by constant criticism for its handling of the 1990 census, says it has counted more than 76 percent of the nation's estimated 106-Million housing units. That compares with just 63 percent of the households that returned their mail-back census forms. Large and small cities have complained from the start that many people had NOT received forms.

It's time for the annual matchup of the seniors against the wimps again at Pasadena, California's, Caltech... as the decades-old tradition of ''Ditch Day'' rolls around again. Seniors are to avoid being seen on campus today or be lashed to trees by underclass students, dubbed the ''wimps.'' The underclassmen at the science-oriented school also try to outsmart the

seniors by breaking through complex systems devised to lock the seniors' rooms.

#90141u3723 05/21/1990 ~United Press International
(MAY 21) UPI - A standoff at a Florida church ends with the gunman's death...

Protests of yesterday's killing of seven Arabs by an Israeli gunman spread beyond Israel's borders...

And, more violence in South Africa's Thabong township...

These stories... and more... next, from United Press International:

Stunned residents of Melbourne Beach, Florida, are recovering from a day of terror.

For about six hours, police sat outside a church... where inside, a heavily armed gunman had barricaded himself after shooting a neighbor at her home and another person at the church. The stand-off ended when authorities discovered the man had turned the gun on himself.

Officials say the drama began this morning when 47-year-old Douglas Pearson, reportedly upset about the renovation work he was overseeing at his church, shot his neighbor three times in the stomach with a .44-caliber handgun at point blank range. The woman was hospitalized in critical condition.

Pearson fled on foot to St. Sebastian Episcopal Church, where he shot a church leader, Deacon George Smodell, in the leg.

Hours later, after Smodell was allowed to leave, police fired tear gas and stormed the building.

They found Pearson dead... apparently a victim of suicide.

Brevard County sheriff's spokeswoman Joan Heller says Pearson was a gun collector who belonged to several gun clubs. On Saturday night, she says, deputies were sent to his home to investigate a report of a domestic disturbance. They confiscated two assault rifles and two pistols from the home.

Another church leader says Pearson was basically a good man who had-quote- ''just snapped.''

#90141u3744 05/21/1990 ~United Press International
(MAY 21) UPI - Israeli leaders warn that today's violence in reaction to the massacre of seven Arabs by an Israeli gunman could blow the lid off the relative calm that had settled over the occupied territories in recent months.

Three Gaza Strip residents were killed today as Palestinians and Arab Israelis clashed with soldiers and police. More than 170 others were wounded in the fighting... including seven Israeli soldiers.

Military leaders say the added casualties will NO doubt increase the number of revenge attacks for yesterday's slayings.

Authorities believe such attacks have already taken place in Jordan and Turkey today, where 13 people were injured.

Nine French tourists and a Jordanian were injured when a Palestinian gunman opened fire on them in the Jordanian capital of Amman. Three other people were wounded in Istanbul, Turkey, where a bomb exploded outside the office of the Israeli airline El Al.

Palestinians are NOT the only ones voicing displeasure with Israel today. The U-S State Department condemned the wholesale violence Israeli forces were using to put down the disturbances. A department spokesman also repeated a call for Israel to begin a peace process in the region.

Today's protests also touched the shores of the United States. Nearly 250 angry Palestinians and their supporters marched outside the Israeli consulate in Los Angeles.

Racial tensions show NO signs of abating in the riot-torn South African mining belt.

Witnesses say youths today tracked down and killed a former municipal councillor... then danced around his burning body in the black township of Thabong.

Hospital sources report nine people have died and 40 others have been hurt during the two days of racial violence.

Black nationalist Nelson Mandela has condemned the attacks. But he says the white government's failure to quell the rioting is- quote- ''an eloquent expression'' of its own complicity.

Police have erected roadblocks leading into Thabong, which is in the heart of the country's gold-mining belt. Army troops are patrolling the perimeter in a bid to restore calm.

The extremist movement White Security says it will resume vigilante patrols on streets in the nearby township of Welkom. It also wants police to impose a dusk-to-dawn curfew on all blacks in white areas.

The violence was sparked by a decision by Thabong community leaders to end a two-week boycott of Welkom's white businesses. The boycott was sparked by the rise of white vigilantism.

-30- 2705

#90141u3759 05/21/1990 ~United Press International

(MAY 21) UPI - Police in Bethesda, Maryland, today arrested more than 80 AIDS activists, as hundreds more besieged the National Institutes of Health.

The nearly 900 protesters accused the government of NOT caring enough about finding a cure or effective treatments for AIDS. Many of the marchers carried cardboard gravestones and shouted charges of genocide at N-I-H researchers.

Authorities used mounted police to keep the crowd under control, but wereN'T always successful.

Some protesters squeezed through small wooden police barricades and tried to enter the N-I-H buildings and were arrested. Others were arrested during a sit-in at the office of the director of the division of AIDS, Dr. Daniel Hoth.

Protesters... some who came from as far away as California... say they want the N-I-H to work harder and faster to develop treatments for AIDS and AIDS-related diseases.

N-I-H Director Anthony Fauci called the demonstration ''inappropriate.''

Debate began in both branches of Congress today on two separate bills... with the Senate working on long-delayed anti-crime legislation and the House starting action on a clean air bill.

Democratic and Republican senators both claimed they would be toughest on crime as they argued for anti-crime bills touting different approaches to the same problems.

Democrats want to outlaw certain assault weapons, while Republicans call for increased mandatory penalties for crimes involving firearms. Republicans also oppose a Democratic move to protect against race being a factor in the death penalty.

In the House, lawmakers are divided over alternative fuel cars and efforts to toughen anti-smog language. Backroom negotiations were held today in an effort to resolve the UNsettled issues threatening to keep the bill from being passed this week.

Congress has NOT been able to pass tougher clean air legislation for 13 years.

#90141u3773 05/21/1990 ~United Press International

(MAY 21) UPI - Big Bird was one of five-thousand mourners who bid an emotional goodbye to Muppet creator Jim Henson today.

Those who attended services at New York's Cathedral of St. John the Divine respected Henson's request by NOT wearing black. Because Henson's alter-ego was Kermit the Frog, many mourners showed up wearing Kermit-the-frog green sashes and suits.

Friends and colleagues... their reminiscences interspersed with musical tributes... remembered a gentle man whose boundless enthusiasm proved contagious.

Frank Oz... a long-time sidekick and the voice behind Miss Piggy... says he'll remember Henson as a happy man who could ''laugh until he cried.''

The emotional high point of the service came when Big Bird sang Kermit's signature tune, ''It's NOT Easy Being Green.'' Added Big Bird in a breaking voice- ''Thank you, Kermit.''

#90141u3850 05/21/1990 ~United Press International

(MAY 21) UPI - The Israeli-occupied territories were under curfew today following yesterday's massacre of seven Palestinians, killed by an Israeli dressed as a soldier. Today's curfew was widely ignored, and three Gaza residents were killed in clashes with Israeli troops.

The Jordanian capital of Amman was also torn by violence today in response to yesterday's massacre in Israel. A Palestinian shot and wounded a group of nine French tourists and a Jordanian. And an estimated 60-thousand demonstrators stormed the U-S Embassy.

The Supreme Court today refused to hear an appeal by ''Operation Rescue'' on 70-thousand dollars in fines assessed against the anti-abortion group in New York. The fines stemmed from a 1988 protest in which demonstrators ignored federal and state court orders against the blocking of abortion clinics.

And a Boston judge today granted the Massachusetts attorney general an injunction against ''Operation Rescue'' and other confrontational groups that have tried to block access to abortion clinics. The judge warned protesters they face 10 years in jail and 10-thousand dollars in fines if their protests result in injury.

High-ranking White House officials say President Bush appears ready to extend China's ''most-favored nation'' trade status. His decision on the issue is due by June 3rd- the anniversary of the Tianamen Square massacre.

Human-rights and scientific groups are joining with Soviet dissidents and U-S academics in supporting freedom for Fang Lizhi and Li Shuxian. They're the Chinese dissidents who remain holed up in the U-S Embassy in Beijing .

#90141u3860 05/21/1990 ~United Press International

(MAY 21) UPI - They're counting the votes in Romania following yesterday's election. The head of the U-S observer team is calling the voting process ''solid.'' But several other international groups have found evidence of fraud. Results may be available Friday.

The Stateville Correctional Center in Joliet, Illinois, is under a so-called ''lockdown'' after a gang fight broke out at the prison last night. Guards shot and killed two inmates and injured three others in restoring order.

A privately chartered single-engine airplane crashed shortly after take-off at Frankfort, Kentucky, today, killing all six people on board. State officials say they have NOT determined the cause of the crash.

Self-declared ''gonzo'' journalist Hunter Thompson faces a preliminary hearing in Aspen, Colorado, tomorrow on felony and misdemeanor charges involving drugs and an alleged incident of sexual assault. Thompson says the charges are part of a ''witch hunt.''

U-S director David Lynch has won the Golden Palm at Cannes, France. His ''Wild at Heart'' was named the best film shown at this year's 43rd International Cannes Film Festival.

#90141u4011 05/21/1990 ~United Press International

(MAY 21) UPI - Outgoing Deputy Attorney General Donald Ayer says Attorney General Thornburgh covered up the fact that his top aides failed a lie detector test during a politically sensitive investigation. But a Justice Department spokesman today denies Thornburgh was involved in a cover-up.

The allegations by Ayer raise new concerns about Thornburgh's troubled tenure at the Justice Department.

Authorities in Melbourne Beach, Florida, say a shooting rampage by a firearms enthusiast was triggered by his anger over renovation work being done at his church. Douglas Pearson shot two people, then barricaded himself in the church before apparently killing himself. The pastor of the church says Pearson was diagnosed a manic-depressive years ago and had undergone shock therapy.

Extra deputies today patrolled the hallways of Florida's Hernando County schools in the wake of the weekend killing of a white teen-ager by a group of black youths. 19-year-old Russell Coats was beaten to death early Saturday with clubs, boards and tire irons in a racial mob fight. Police say Coats was trying to break up the fight when he was killed. Tensions have been high since.

Ousted Panamanian dictator Manuel Noriega will borrow money from the U-S government to pay for his defense in a Miami drug-trafficking and conspiracy case. U-S Attorney Dexter Lehtinen agreed today to temporarily foot the bill for Noriega's defense. Noriega will repay the money later through the Millions of dollars the government has seized from him.

#90141u4030 05/21/1990 ~United Press International

(MAY 21) UPI - Atlantic City, New Jersey, officials believe a family of five found dead in a rundown apartment building last night died of carbon-monoxide poisoning. Authorities say carbon monoxide fumes traced to a faulty hot-water heater in the building's basement had forcing the evacuation of the building during the weekend. Authorities are awaiting the results of a toxicological report before making their findings official.

The judge in the Los Angeles McMartin Pre-School molestation trial says the district attorney tried to contact him in an attempt to discuss reports of plea bargaining. But a spokeswoman for the D-A has denied the charge. She says prosecutors were concerned the publicity over plea-bargain talks might cause a mistrail and merely wanted the judge to arrange a conference call with defense lawyers.

Government reseachers have called for tighter restrictions on the use of a prescription acne drug by women of childbearing age. Officials from the Food and Drug Administration and the Centers for Disease Control say Accutane is causing far more birth defects than the maker has acknowledged. They say tests show the drug may cause anywhere from 33 to 227 birth defects a year.

The Texas girl who was the patient in the world's first heart-liver transplant will NOT need a third liver transplant after all. 12-year-old Stormie Jones returned to Pittsburgh's Children's Hospital two days ago, after she showed signs of rejecting a liver she received there on February 20th. But doctors say she suffered only a mild episode of rejection, and will be released in time for her birthday on May 31st.

#90142b0017 05/22/1990 ~Business Wire

NEW YORK (MAY 22) BUSINESS WIRE - Microsoft Corp. Tuesday announced the immediate, worldwide availability of the Microsoft Windows graphical environment version 3.0.

A dramatically enhanced version of Microsoft's graphical-user interface for MS-DOS- and PC-DOS-based personal computers, the version 3.0 transforms an ordinary, character-based PC into a powerful, graphical machine. Microsoft Windows environment was developed with a one-megabyte personal computer as a design point, the standard minimum entry system for PCs today -- thereby enabling 30 million of the 50 million current MS-DOS users to quickly and easily add a graphical-user interface to their MS-DOS machines.

''Windows 3.0 puts the 'personal' back into millions of MS-DOS-based computers,'' said Bill Gates, Microsoft's chairman and chief executive officer. ''We want to make personal computing accessible and approachable, so that users can get more out of their PCs -- and have more fun using them.''

Version 3.0 offers dramatic performance increases for Windows applications advances in ease of use and aesthetic appeal, and straightforward integration into corporate computing environments.

Windows 3.0 is part of Microsoft's family of operating systems. The Windows graphical user interface has been made more attractive and appealing in version 3.0 with the use of a proportionally spaced system font, 3-D scroll bars and command buttons and colorful icons. The interface is similar to that of Microsoft OS/2 (see footnote a) Presentation Manager, providing consistency in companies that support both environments. Windows applications automatically take advantage of the improvements to the user interface.

Microsoft Corp. (NASDAQ:MSFT) develops, markets and supports a wide range of software for business and professional use, including operating systems languages and application programs, as well as books, hardware and CD-ROM products for the microcomputer marketplace.

#90142b0020 05/22/1990 ~Business Wire
NEW YORK (MAY 22) BUSINESS WIRE - Following the announcement of the Microsoft Windows graphical environment version 3.0, nine leading vendors of MS-DOS-based personal computer applications Tuesday joined existing and newly announced ISVs in expressing their support for Microsoft's Windows.

Those companies include Ashton-Tate, Lotus Development, WordPerfect, Oracle and Software Publishing Corp., among others.

In addition, more than 30 domestic and international vendors of IBM-compatible personal computers have announced they will provide the Windows package with their computer systems, including: Acer, Apricot, AST Research, Atari, AT&T, Commodore Business Machines, Epson, Fujitsu, Gateway 2000, Grid, Mitac, NCR, NEC, Nokia Data, Northgate, Olivetti, Research Machines, Samsung, Tandem, Tandon, Tandy, Toshiba, Tulip, Unisys, Wang, Wyse and Zeos International. Several will be factory-installing Windows on their hard disk drives; to date, those companies include Austin Computer Systems, CompuAdd and Zenith Datasystems.

With over 700 software packages currently shipping, the Microsoft Windows environment already enjoys a broad applications base. Many of the ISVs supporting version 3.0 are already shipping or have committed to developing applications for Microsoft OS/2 Presentation Manager programs as well.

#90142b0023 05/22/1990 ~Business Wire
REDMOND, WA (MAY 22) BUSINESS WIRE - Microsoft Corp. Tuesday announced that each of its Microsoft Windows applications is fully compatible with the Microsoft Windows graphical environment version 3.0.

Three of these products, Microsoft Word for Windows, Microsoft Excel for Windows and Microsoft Project for Windows, are available now. The Microsoft PowerPoint for Windows desktop presentations program is expected

to be available June 1990. Microsoft is the first developer to deliver a broad line of full-featured business applications running under the Microsoft Windows environment version 3.0.

The current version of each of Microsoft's Windows-based applications is fully compatible with version 3.0. The Windows graphical environment with common menu structures and icons makes these programs easy to learn and use. Features such as the Windows Clipboard and DDE (dynamic data exchange) make it easy to share text, data and graphics between applications.

In focus group research conducted by Microsoft, users consistently cited the ability to work with multiple applications and the ability to combine text, graphics and data as the capabilities they most wanted from their business applications. The technology in the Windows environment version 3.0 has enabled Microsoft to develop a family of applications with superior integration features specifically designed to meet this need.

The Microsoft family of Windows applications takes advantage of Microsoft Windows version 3.0 enhanced memory management, which enables all four applications to remain open and run simultaneously, to automate all kinds of computing tasks. For example, a user can prepare a report in Microsoft Word that can be automatically updated when new data is entered into a Microsoft Excel spreadsheet linked with that report. Using Microsoft PowerPoint to prepare a presentation based on a Microsoft Word outline or Microsoft Excel spreadsheet eliminates the need to re-enter information. And project-cost information generated using Microsoft Project can be easily transferred into a Microsoft Excel spreadsheet for use in completing financial analyses.

Microsoft Corp. (NASDAQ:MSFT) develops, markets and supports a wide range of software for business and professional use, including operating systems languages and application programs, as well as books, hardware and CD-ROM products for the microcomputer marketplace.

#90142b0025 05/22/1990 ~Business Wire

NEWPORT BEACH, CA (MAY 22) BUSINESS WIRE - Vestro Foods Inc. (NASDAQ:VEST) and Jan Holzmeister Cheesecake Ltd. jointly announced Tuesday that Jan Holzmeister Cheesecake has merged with a wholly owned

subsidiary of Vestro.

Jan Holzmeister, organized in 1974, is a leading producer of a full line of frozen cheesecakes, marketed nationally under its well-known brand name of Jan Holzmeister's Cheesecake.

Alfred Strogoff, president and chief executive officer of Vestro, stated: ''We are extremely pleased to acquire Jan Holzmeister, a leader in producing exciting and delicious cheesecakes. These cheesecakes, baked from old recipes handed down through generations, are the standards that all other bakeries try to achieve.

''We are confident that, with Vestro's resources, Jan Holzmeister can expand its product line and serve additional markets. Together with our subsidiary, Heidi's Pastry Inc., a leader in supplying frozen gourmet cakes and pies, we will be able to deliver all of the dessert requirements of hotels and restaurants and expand into the retail markets.''

Robert Klein, president of Jan Holzmeister, stated: ''Of the companies we considered as a partner for Jan Holzmeister, Vestro offered the best opportunity to realize the growth potential of our product lines. Vestro has substantial resources, experienced management and is highly focused.

''Combined with Heidi's product line, its specialized national sales force of 14 dessert consultants and national network of 64 retail and foodservice food brokers, we will be able to present a full line of the finest desserts.

''I am personally very excited to become part of the senior management of Vestro's fine baked products group, and look forward to the opportunities of expansion into retail markets and penetration of international markets.''

Vestro is a specialty food company presently operating in two ''core businesses'': fine baked products and natural foods.

#90142b0026 05/22/1990 ~Business Wire
GARDEN GROVE, CA (MAY 22) BUSINESS WIRE - While satellite communication is increasing rapidly as a major business tool, the availability of its benefits to the small businessman, the school child and other members of the general public is still quite limited.

In Garden Grove, Computer City Supercenter is changing that with an

in-store satellite downlink that is being used to bring important business events, training seminars, tradeshows and educational courses to people who might otherwise have little opportunity to see them. And the first such event is setting a high mark for those to follow.

On Tuesday, May 22, Microsoft will announce Windows 3.0, its newest software standard, to the industry via a nationwide satellite hookup. Most receiving links of the satellite network are at individual hotels in major cities where they will reach a select invited audience. But ''by invitation'' is not the rule of the day at Computer City, one of the very few retail outlets to carry the announcement.

At Computer City, any of the store's broad range of customers -- from all businessmen and home office buyers to enthusiastic computer game players -- can turn out to participate in this important industry landmark.

Not only will they be there firsthand to witness Bill Gate's announcement and first demonstration of the exciting graphical product -- literally a release of worldwide importance -- but they also will be able to receive personal demonstrations and buy the new program on-site.

A joint venture of Mitsubishi and Inacomp Computer Centers Inc., Computer City Supercenter is a 20,000-square-foot computer superstore that offers a completely new and innovative approach to computer retailing. In this tradeshow-like environment, customers can try out systems and converse with actual manufacturers.

In addition, customers select from hundreds of brands of software and computer accessories, copiers, fax machines, books and office supplies. Computer City also offers a family education center and complete access to sales, service, leasing and training.

For more information about Computer City Supercenters, conact Mike Rusert, executive vice president and general manager, 7901 Garden Grove Blvd., Garden Grove, CA 92641, telephone 714/892-0070.

#90142b0027 05/22/1990 ~Business Wire
ORINDA, CA (MAY 22) BUSINESS WIRE - WordTech Systems Inc., the only manufacturer of both interpreters and compilers for the dBASE language, Tuesday announced shipment of Quicksilver/SQL for Gupta Technologies' SQLBase server engine.

This is the second front-end from the SQL leader among dBASE vendors. To

date, only WordTech Systems is shipping dBASE language clients for SQL database servers. WordTech shipped its first front-end, Oracle Quicksilver, in December 1988.

''Quicksilver/SQL gives programmers an easy way to access information stored on the server,'' said WordTech President David Miller. ''The dBASE language provides the tools to create powerful programs and user interfaces, while SQL provides powerful data manipulation and access capabilities. By combining SQL and dBASE, developers get the best of both worlds and can more fully take advantage of client server technology.''

Miller added, ''Most importantly, the compiled application as well as the compiler itself can run in 640K on the client (front-end) system. Ashton-Tate has stated repeatedly that such products combining dBASE and SQL can't fit into 640K, which obviously isn't the case.''

Quicksilver/SQL can access SQL data at the server and dBASE data stored locally or at the server simultaneously, if needed. Both dBASE commands and SQL statements can be used to retrieve SQL data from the server.

According to Michael Gardner, vice president of development, using the dBASE language and WordTech's extensions, Quicksilver/SQL provides application level benefits in addition to the benefits of client/server architecture.

''The developer can create dbASE reports and graphs from SQL data. dBASE facilities such as macro substitution, even into a SQL statement, increase the productivity gains in application development. A recent survey of WordTech customers found that 50 percent want SQL capabilities and so we will continue to provide solutions like Quicksilver/SQL for them.''

Quicksilver/SQL retails for $795 and will be available in June from WordTech Systems. For more information, call WordTech Systems, 415/254-0900.

WordTech Systems is a leading supplier of fully dBASE compatible database management systems, and the only company that provides both interpreters and compilers for the dBASE language. WordTech products offer users an integrated applications development environment and also provide migration paths to UNIX and SQL environments.

#90142b0028 05/22/1990 ~Business Wire

SAN JOSE, CA (MAY 22) BUSINESS WIRE - The Builder Xcessory was unveiled at Xhibition 90 in San Jose by Integrated Computer Solutions Inc., a Motif and X Window System consulting and training firm.

The Builder Xcessory is a powerful, interactive paint-like software tool to prototype build and test Motif user interfaces for the X Window System.

Developers can use The Builder Xcessory to build complex Motif user interfaces quickly and easily by clicking on icons and moving them within the interface -- similar to a paint program. Development time is cut since testing and modifying of the interface can be done without compiling.

With The Builder Xcessory, users can test the interface while it is being built, rather than after it has been compiled. And since the developer is manipulating real Motif objects, the output code exactly matches what the developer sees.

The Builder Xcessory also relies on standard libraries, so developers can port their interfaces to any system that runs Motif simply by recompiling.

The Builder Xcessory consists of the Palette, which contains the entire collection of Motif interface objects, the Resource editor, which allows customizing of interface objects, and the Browser, which illustrates widget instance hierarchy.

The Builder Xcessory is available on a wide range of platforms including all Sun workstations, DECstations running Ultrix, DG AViiON, Silicon Graphics workstations, Sony NEWS and Macintosh running A/UX. It will soon be available on VAX/VMS and the IBM RS6000 platform as well.

The Builder Xcessory is competitively priced at $2,500 and is sold directly through the manufacturer. The Builder Xcessory will begin shipping in June. Additional Motif-compatible tools are planned for the ICS Xcessory product line.

Founded in 1987, ICS offers products, training, support and consulting on the X Window System and OSF/Motif. ICS has headquarters at 163 Harvard St., Cambridge, MA 02139, telephone 617/547-0510.

#90142b0030 05/22/1990 ~Business Wire

PALO ALTO, CA (MAY 22) BUSINESS WIRE - Hewlett-Packard Co. announced HP NewWave 3.0, an enhanced version of a software product that integrates applications from different personal-computer (PC) vendors.

The new version allows users to perform complex, routine tasks at a single command and to share information on a network through simple manipulation of on-screen icons.

HP NewWave 3.0, which has a U.S. list price of $195, runs on Microsoft Windows 3.0, which also was announced Tuesday. It takes full advantage of enhancements made by Microsoft to Windows, including improvements to memory management and the user interface.

Because of better memory management, HP NewWave 3.0 requires only two Mbytes instead of three Mbytes of extended memory to run several applications. This software can be run on any industry-compatible MS-DOS PC that uses an Intel 80286 or 80386 microprocessor, such as HP Vectra ES and RS PCs.

Complex, routine tasks can be completed through the use of "agents." Like personal assistants on the computer, agents can record a series of tasks and reduce them to a single command, greatly improving a user's productivity.

These tasks, which can be programmed to operate at a specific date and time, include retrieving data, creating a graph or chart, merging this information into a document and mailing it electronically.

Sharing of information on a network is done through HP NewWave's object-storage feature. That feature allows users to share information on a network by simply moving icons in and out of a folder on the computer screen. Similar to a library checkout system, files can be loaned to other users without the extra effort of sending these files.

More than 100 independent software vendors, including Lotus Development Corp., Micrografx Inc. and Microsoft Corp., have committed resources to develop HP NewWave applications, and four are shipping applications today. These are FutureSoft Engineering Inc., Lotus Development Corp., New Media Graphics Corp. and VideoLogic.

Under HP NewWave, computer users also can run MS-DOS and Microsoft Windows applications. Four companies have signed licensing agreements for HP NewWave: AT&T Computer Systems Inc., Canon Ins., Data General Corp. and NCR Corp.

The announcement of HP NewWave 3.0 extends HP's NewWave Computing strategy a standards-based strategy that enables customers to select the best available products from HP and other vendors and link them into open,

cooperative networks that make information easier to acquire, share and manage.

#90142b0031 05/22/1990 ~Business Wire

NEW YORK (MAY 22) BUSINESS WIRE - Aldus Corp. Tuesday announced a performance-enhanced version of Aldus PageMaker that is compatible with Microsoft Windows 3.0, the upgraded graphical user interface for DOS-based machines announced Tuesday by Microsoft Corp.

Aldus PageMaker 3.01 for the PC will be available by the end of June.

''The introduction of Windows in 1986 was a major step toward bringing greater ease of use into the PC computing environment,'' said Aldus President Paul Brainerd. ''And now, Windows 3.0 marks another giant leap forward. Eliminating the 640K memory limitation of the previous version is a real boon to our customers.''

Windows 3.0 users will find that PageMaker 3.01 is, on average, 40 to 50 percent faster than PageMaker running under Windows 2.0 on comparable computers, according to Michael Sherwood, PageMaker product manager. ''The overall 'feel' of the program is much snappier,'' he said. ''Some functions, such as selecting a PageMaker tool or clicking on a menu item, are instantaneous. And Windows 3.0's greater network connectivity will be an important benefit to the many desktop publishers who now work in groups.''

In addition to its performance gains, PageMaker 3.01 integrates filters not built into the previous version, including import filters for RTF files, WordPerfect 5.0 and 5.1, and a ''smart'' ASCII filter that gives control over simple formatting of ASCII files.

Registered owners of PageMaker 3.0 for the PC in the United States and Canada can purchase the PageMaker update for $25 (US) from Aldus Customer Relations at 206/628-2320. For subscribers to Aldus' CustomerFirst and Extended Technical Support Service (ETSS) programs, as well as those customers who purchase PageMaker for the PC after May 22, the update will be free.

Upgrades to Windows 3.0 can be purchased directly from Microsoft for $50 by calling 1/800/323-3577. This offer is for owners of full versions of Windows 2.0, as well as owners of run-time Windows, such as that previously supplied with PageMaker. There will be no run-time versions of Windows 3.0.

Aldus is credited with helping build the success of the Windows platform with its release of PageMaker for Windows 1.03 in January 1987. Since then, the software program has become the largest-selling desktop publishing program for the PC worldwide.

Aldus Corp. (NASDAQ:ALDC) creates computer software that helps people throughout the world effectively communicate information and ideas. In addition to PageMaker, the Aldus product line includes Aldus Persuasion; Aldus FreeHand; and Aldus PrePrint, which is expected to ship in the second quarter. Products from Aldus' subsidiary, Silicon Beach Software, include SuperPaint; SuperCard; Super 3D; Digital Darkroom; and Personal Press, which is also expected to ship in the second quarter. Aldus distributes both product lines through an international network of more than 16,000 authorized dealers and distributors.

SANTA BARBARA, CA (MAY 22) BUSINESS WIRE - Certified Grocery Co., the wholesale distributor for the Southern California Independent Grocers' Association, has signed agreements with Western Data Systems, which has offices in Santa Barbara, and Smyth Business Systems, with offices in Orange County, for the installation of an automated system of NCR cash registers and related equipment.

Western Data Systems is the authorized sales and service dealer for NCR, ICL Retail Systems, formerly ICL/Datachecker, and Sharp. It sells electronic cash registers and point-of-sale systems, which use the computerized registers as devices to collect and transmit information for analysis. The firm also sells computers, custom software programs and supplies for cash register systems.

Western Data Systems has offices at 4 W. Calle Laureles in Santa Barbara and at 1429 E. Thousand Oaks Blvd., 200, in Thousand Oaks.

BELMONT, CA (MAY 22) BUSINESS WIRE - Nikon Precision Inc. will hold a grand opening ceremony Tuesday to inaugurate its new facility, located at 1399 Shoreway Road in Belmont.

The three-story NPI North American headquarters will offer 50 thousand square feet of office and showroom space for Nikon wafer steppers, measurement/inspection equipment, and other microelectronics manufacturing equipment.

Five-thousand square feet of the first floor houses a cleanroom which will allow potential customers to evaluate NPI's equipment in a real-world environment.

''With the completion of this new facility, Nikon's network of global subsidiaries is strengthened and our commitment to the North American marketplace is re-affirmed,'' said Yoichi Nishida, president of NPI.

''It has been NPI's goal since its formation to build a facility to serve the North American marketplace, and we thank all of our customers and supporters who have helped us to realize this achievement.''

The design-builder of the new facility is Takenaka International (U.S.A.) Ltd. The associated architect is Richard Sambucetti. The design of the cleanroom was by Industrial Design Corp. with Turner Construction company, the general contractor for the project.

The grand opening ceremony begins at 6:30 p.m. today at the building site.

Speakers include Mr. Koji Sho, president, Nikon Inc.; Shunji Yanal, the Japanese Consulate; Allan Melkesian, director of the office of foreign investment, California Department of Commerce; Peter Giles, president and chief executive officer, Silicon Valley Technology Center; and Mr. Yoichi Nishida, president of Nikon Precision Inc.

A reception, featuring Mel Torme, will follow in the grand ballroom of the Hotel Sofitel beginning at 7:30 p.m. The press is invited to attend.

Nikon Precision Inc. (NPI), Belmont, is the North American subsidiary for Nikon Corp., a leading global supplier of microelectronic manufacturing equipment. In the Americas, NPI provides service training, technical support, sales, and marketing for Nikon's equipment serving the wafer, photomask, flat panel display, and printed circuit fabrication industries.

NATICK, MA (MAY 22) BUSINESS WIRE - Rational Systems Inc. Tuesday announced its commitment to support Microsoft's Windows 3.0.

Rational's DOS/16M DOS extender technology is supported by a large number of software developers that include Lotus Development Corp., Ashton-Tate, DataEase International, Informix, Autodesk, the TOPS Division of Sun Microsystems and Microrim.

DOS/16M takes advantage of the fact that the 80286 and 80386 microprocessors run in two modes. ''Real'' mode was developed to provide full DOS compatibility with earlier microprocessors. ''Protected'' mode was designed to support multitasking operating systems with large memory requirements. DOS/16M utilizes a personal computer's untapped potential by allowing software to access the additional memory available in protected mode.

Rational Systems Inc. of Natick, develops and markets professional programming tools for the personal computer. The company is a leader in providing development environments that maximize efficiency and creativity and enable programmers to deliver PC applications that are not limited by the DOS 640K barrier.

GOLDEN, CO (MAY 22) BIZ WIRE - ConferTech International Inc. (NASDAQ:CFER), a leading provider of teleconferencing products and services, Tuesday introduced the ALLEGRO(tm) Audio Teleconferencing Bridge System, a powerful new product designed for high capacity teleconferencing applications.

Geared toward the Fortune 200, government and private network markets, ALLEGRO will accommodate from 24 to 384 user ports and up to N/2 simultaneous conferences. The system has full duplex, digitally enhanced audio, direct T-1 interface, and a variety of advanced features that give customers and end users a broad array of teleconferencing options.

In its initial configuration, ALLEGRO will include up to 144 ports and be deliverable in the fourth qaurter of 1990.

''As the industry's first truly high-capacity system, ALLEGRO is a significant advancement in technology,'' said H. Robert Gill, president of ConferTech, ''Customers for the product will be large corporations, government agencies and private networks who require direct T-1 interface

and who may conduct hundreds of teleconferences every day.''

Gill said the ALLEGRO will complement ConferTech's award-winning TEMPO product, a medium capacity system that provides for 72 user ports and 10 simultaneous conference calls. TEMPO has been voted the industry's ''Product of the Year'' three years running.

ALLEGRO FEATURES:

Management Features:
- direct T-1 connection
- true digital technology
- schedule management
- directories
- real-time diagnostics
- multiple, remote and local operators
- detail reports
- emergency action controller

User Features:
- dial-out
- meet me
- chairperson
- progressive
- preset
- passcode
- easy operation

Based in Golden, ConferTech is a leading provider of digital audio teleconferencing systems and services. After reporting record revenue and net income for its fiscal year ended Dec. 31, 1989, ConferTech reported revenue of $3.1 million for its first quarter ended March 31, 1990 compared to revenue of $1.9 million for the same quarter a year ago.

SAN FRANCISCO (MAY 22) BUSINESS WIRE - A PacTel Cable subsidiary and Masada UK Cable Partners Tuesday announced that they have won the largest of four Manchester area cable franchises awarded last week by the Cable Authority of Britain.

The franchise area, encompassing the boroughs of Manchester, Salford and Trafford, contains 363,000 homes.

This is the sixth U.K. cable franchise in which PacTel Corp. (PacTel) are co-investors. PacTel and a Jones Intercable affiliate also co-own six other franchises. These 12 franchise areas contain over 1.5 million homes. PacTel's share of these franchises equal approximately 830,000 homes -- a number that makes PacTel one of the leading players in the U.K. Cable industry.

Masada chief operating officer Daryl Harms described the most recent win as ''an exceptional opportunity to deploy our communications services in one of the U.K.'s finest markets.''

PacTel and Masada currently have applications filed for other franchises covering 527,000 homes. PacTel and Jones have applied for one other franchise covering 60,000 homes. Of these applications, two are uncontested. PacTel also is pursuing franchise acquisitions in areas adjacent to its current holdings.

Cable service is currently available in a portion of the East London franchise area. The new Manchester system should be operative in the first half of 1991. Service in some portions of the remaining franchise areas should become available by year end 1991.

PacTel Corp. and PacTel Cable are subsidiaries of Pacific Telesis Group, a worldwide diversified telecommunications corporation based in San Francisco. Telesis is the first regional holding company to attempt to enter the domestic cable market by applying for a waiver to the 1982 Consent Decree to purchase an interest in a cable company serving two franchises in Chicago.

Masada Corp. is a top 100 U.S. multi-system cable company with current operations in six states serving over 60,000 subscribers. Masada has a long history of providing cable service throughout the Sunbelt regions of the United States, operating in such urban markets as Los Angeles, Phoenix Atlanta, St. Louis and Birmingham.

In addition to their cable operations, Masada has substantial investments in cellular telephone and security/alarm operations.

NEW ORLEANS (MAY 22) BUSINESS WIRE - US Sprint Tuesday announced that it has added several new features to its SprintMail service, including enhancements to PC SprintMail in release 2.0, the latest release of US Sprint's innovative E-mail software; enhanced facsimile delivery for users of private E-mail systems and X.400 systems that provides varying formats, logos and signatures; and commercial availability of an access gateway that allows X.400 connectivity to SprintMail from "native language" E-mail systems.

"These new enhancements allow us to better address the large installed base of LANs and IBM-based mail systems. SprintMail provides the ability for

these users to communicate outside their own domains and take advantage of the capabilities of SprintMail without high investments in hardware or software," said Howard Brooks, vice president and general manager of International Value Added Services. The new features include:

- The Access Gateway resides on the SprintMail host computer, and allows customers to send messages created in "native language" on an in-house mail system through the X.400 gateway to SprintMail.

Customers can thus reach any user of SprintMail or a user of any E-mail system or service that is interconnected to SprintMail via the X.400 messaging standard. The gateway translates from "native languages" to X.400, and thus extends the reach of the customer's in-house mail system globally.

The gateway is particularly useful for IBM users. It supports IBM's PROFS, DISOSS, AS/400, SMTP, 5520, S/38 and S/36, as well as a number of other in-house systems including Data General's CEO (via the Data General SNADS gateway) and local area networks equipped with a Soft-Switch gateway, including 3+Mail, Banyan Mail, Higgins, Network Courier, cc:Mail, Microsoft Mail/Macintosh, Novell MHS, DEC, Wang and Hewlett-Packard.

The following new features will be demonstrated in the US Sprint booth during the ICA Show, May 22-24 in New Orleans:

- PC SprintMail(sm) 2.0 "next generation" software for PCs which permits easy communication from a PC directly with the SprintMail service, or through a Novell, 3Comm or Ungerman-Bass local area network (LAN) communications server.

With PC SprintMail 2.0 running on each PC, only one connection from the server to the SprintMail service is required to provide wide-area E-mail service for all of the users on the LAN. Users of LANs can now have delivery and receipt of fax and telex messages on their desktops, via the interconnection with SprintMail.

- Enhanced fax service provides the customization of messages created in a PC and delivered to a facsimile device through the addition of pre-registered logos and signatures. Logos and signatures provided by customers are digitized and stored until needed. Users also can select the format of the fax - for example, up to 132 characters per line and legal-size paper.

#90142b0069 05/22/1990 ~Business Wire

NEW ORLEANS (MAY 22) BUSINESS WIRE - US Sprint Tuesday announced an addition to its TP4000(tm) Family of packet switches for dedicated networks -- the TP4944(tm), a new full-featured compact model.

In addition, the company announced several significant new enhancements to the TP4900(tm) Series of packet switches, which improve user connectivity and provide higher performance, thus enabling users to take advantage of high-speed lines for packet-based communications.

The enhancements include support for T1 and Fractional T1 (FT1) circuits, which significantly increases bandwidth and speed within the network; a frame relay interface between the TP4900 Series of packet switches and the TP7900(tm) Series of fast packet switching systems -- the first of its kind in the industry, which will be available in the third quarter of 1990; and an ISDN Primary Rate Interface (PRI) for access to the US Sprint fiber-optic network.

Other new features include the SDLC Plus PAD (packet assembler/disassembler); and a 256 Kbps high-speed interface to the TP4900 Series of switches. US Sprint also has developed an X.25 Inter-network Gateway interface for the TP4900, which permits private networks to easily interconnect with public networks to create hybrid networks on a worldwide basis; and an upgrade to the TP4900 Series that provides local network management functions via an integral processor and disk subsystem.

More than 150 TP4900 Series switches have been installed worldwide in dedicated packet networks, corporate backbone networks, hybrid networks and public service networks, including SprintNet(sm), the largest commercial packet network in the world. US Sprint's packet switching products are field proven, and feature-enhanced to provide a low-risk investment in data communications technology.

US Sprint is a unit of United Telecommunications, Inc., a diversified international telecommunications company headquartered in Kansas City, Mo.

#90142b0074 05/22/1990 ~Business Wire

SAN MATEO, CA (MAY 22) BUSINESS WIRE - The first public viewing of Applied Materials' new Endura 5500 PVD, which was introduced a month ago as the company's entry into the physical vapor deposition (PVD) market, will be a highlight of the SEMICON/West 90 trade show, which opens in Santa Clara, Tuesday.

Jim Bagley, president and chief operating officer of Applied Materials, noted that PVD is the fifth major wafer fabrication step to be addressed by the company, giving Applied Materials the most comprehensive line of front-end semiconductor production equipment in the world.

The Endura 5500 is a dual load-lock, multichamber system based on the new Applied Materials MasterFab system architecture, which the company believes will take multichamber processing through the 1990s. The ultrahigh vacuum design of the system, plus its unique source/target design, will yield higher purity films than any system now on the market, according to the company.

It is aimed at producing high-quality aluminum alloy and barrier metal films for advanced metallization applications.

Applied Materials, which reported revenues of over one-half billion dollars in fiscal 1989, continues to be the largest U.S. semiconductor equipment supplier, and moved up to third position from fourth in annual revenues worldwide by the end of 1989, according to a recent study by VLSI Research.

The Applied Materials exhibit in the San Mateo County Fairgrounds Hall of Flowers also will feature the newest products in all of its other areas of technology. In addition to its own booth, Applied Materials is also represented in the Sematech pavilllion, located between the Hall of Flowers and the Garden Cafe.

Applied Materials Inc., is a global growth company based in Santa Clara, and is the leading independent supplier of wafer fabrication systems to the worldwide semiconductor industry. It is a market leader in chemical vapor deposition (CVD), dry plasma etching and silicon deposition. It is also a leading manufacturer of ion implantation and physical vapor deposition (PVD) systems.

#90142b0075 05/22/1990 ~Business Wire

NEW ORLEANS (MAY 22) BUSINESS WIRE - US Sprint Tuesday announced an array of new Sprint 56(sm) service access options and applications.

Sprint 56 uses US Sprint's nationwide 100-percent digital, fiber-optic backbone network to provide convenient, cost-effective data transport.

Sprint 56 can be accessed via existing T1 circuits or via VPN 56(sm), a ubiquitous switched 56 Kbps service that enables Virtual Private Network (VPN) customers with T1 access to extend the digital capability of the US fiber-optic network to their on-net and off-net locations.

At the customer's option, the service also can be accessed via Dial 1 Digital service, which allows users to originate and terminate data transmissions on lines provided by the local exchange carriers (LECs) with digital connectivity to the US Sprint Network. Dial 1 Digital service is currently available from five Regional Bell Operating Companies and major independents.

Sprint 56 supports a number of business-oriented applications, including:

- Video Conferencing. For as little as $12 an hour, using inexpensive and easily portable hardware, customers can hold a video conference, and save on travel time and expenditures.

- Group IV Fax Transmission. Users can send a fax at nearly 7 times faster than using Group III fax machines, saving time and line charges, and speeding the entire communications process. Group IV Fax documents are near-perfect copies of the originals, without the lines and blotches usually associated with facsimiles.

- File Transfer. Sprint 56 makes it cost-effective to transfer files from one or more locations as needed. Spreadsheets for financial analysis, CAD/CAM graphics, database information or order entry/inventory control information can be sent and received via Sprint 56.

- LAN Reach 56. This application, one of a family of LAN connectivity services, makes it economically feasible to interconnect islands of local area networks throughout the organization for LAN-to-LAN, LAN-to-host and PC-to-LAN applications requiring high-speed, bandwidth on demand.

US Sprint is a unit of United Telecommunications, Inc., a diversified international telecommunications company headquartered in Kansas City, Mo.

#90142b0077 05/22/1990 ~Business Wire

DENVER (MAY 22) BUSINESS WIRE - AIRCOA Hotel Partners L.P. (AMEX:AHT), a Denver-based master limited partnership engaged in ownership of hotels announced financial results for the first quarter ended Mar. 31, 1990.

The partnership recorded a net loss of $399,000 compared to $724,000 net loss in the first quarter of 1989, reflecting depreciation and amortization for the respective periods of $895,000 and $1,129,000.

Net loss allocable to the Class A units in the first quarter of 1990 was 16 cents based on 2,574,133 weighted average units outstanding compared to a net loss of 35 cents based on 2,358,478 weighted average units outstanding in the same period of 1989.

On Sept. 26, 1989, one of the operating partnerships, through which the partnership owns its individual hotel properties, sold the Kona Village Resort. In order to accurately compare 1990 first quarter operating results to results of the first quarter of 1989, results for the first quarter of 1989 have been restated to exlude the results of Kona.

Partnership operating revenues for the quarter ended Mar. 31, 1990 were $11,605,000, an increase of $527,000, or 4.8 percent over restated operating revenues of $11,078,000 for the period ended Mar. 31, 1989 and were derived principally from operation of the partnership's six hotels and resorts. Operating income for the first quarter of 1990 was $1,983,000, and $46,000 increase over restated operating income of $1,937,000.

Comparative operating statistics for the six properties for the first quarter of 1990 vs. the first quarter of 1989 are as follows: average daily room rate - $72.99 and $69.38; percentage of occupancy - 68.8 percent and 67.8 percent; and gross operating profit - $3,458,000 and $3,788,000. Gross operating profit includes all operating revenues less operating expenses, except for debt service, depreciation, amortization and certain other fixed expenses.

As indicated above, overall occupancy was slightly higher and average daily room rates were up approximately 5.2 percent for the first quarter of 1990 vs. first quarter of 1989. Individual property performance indicates that the Sheraton Inn Buffalo East and the Sheraton Lakeside Inn were the primary contributors to the increase in room revenues and room rates.

Although occupancy rates remained essentially flat in the first quarter of 1990 compared to first quarter 1989, both hotels benefited from revenue maximization programs implemented at the properties resulting in increased room rates of 14.5 percent and 14.7 percent, respectively.

On May 15, 1990 the partnershsip paid its quarterly cash distribution of 54 cents per Class A unit to owners of record as of Apr. 30, 1990.

MONROVIA, CA (MAY 22) BUSINESS WIRE - Vision Sciences Inc. (NASDAQ:LENZ) Tuesday announced revenues of $1,441,000 for the first quarter of 1990, with a net loss of $345,000 and a loss per share of 5 cents.

This compares with revenues for the first quarter of 1989 of $2,470,000 and a net income of $289,000 (includes income of $235,000 representing the cancellation of a research & development agreement with an affiliated third party) and income per share of 2 cents. Annual revenues for the entire year of 1989 was $6,773,000 with a loss of $3,355,000.

''Although Vision Sciences continues to experience losses, we are encouraged by the progress we have made to date in our operations and expect the rate of sales to stabilize and to increase as the effects of our efforts begin to impact the marketplace,'' said Gerald T. Keahl, Vision Sciences president.

The company continues to negotiate the terms of the $2 million financing previously announced with Alan Patricof Associates Inc. (APA), a private New York venture capital firm, and to complete the rights offering to shareholders.

Vision Sciences is the recognized leader in the manufacture of office-based spectacle lens casting equipment. In-office lens casting provides eyecare professionals with the latest technology available in the production of quality, yet inexpensive, spectacle lenses.

#90142b0082 05/22/1990 ~Business Wire
RACINE, WI (MAY 22) BUSINESS WIRE - Versa Technologies Inc. (NASDAQ:VRSA) Tuesday reported fourth quarter and fiscal year-end sales and earnings.

For the fourth quarter, earnings were $1,633,000 or 27 cents per share, up modestly from $1,565,000 or 27 cents per share, for the fourth quarter last year. Sales were $13,427,000 vs. $12,721,000 for the same period a year ago.

Net earnings for the fiscal year ended March 31, 1990 were $6,036,000, or $1.02 per share, vs. $6,250,000 or $1.07 per share, for the prior year. Sales at $53,122,000 compare to $47,941,000 for fiscal 1989.

For fiscal 1990, the company's Fluid Power and Medical divisions reported record sales and operating income. The Custom Components Division, producers of silicon rubber and plastics components, however, experienced lower margins than anticipated, more than offsetting the improved performance of the other two divisions of the company.

In commenting on the results, James E. Mohrhauser, chairman and chief executive officer, stated, ''We are encouraged by our fourth quarter performance and feel recent actions taken to reduce fixed costs in the custom components division will provide the basis for improvement in the results for the division.''

MILPITAS, CA (MAY 22) BUSINESS WIRE - Diasonics Inc. (ASE:DIA) Monday announced that James R. Higdon has joined the company as chief financial officer.

Higdon joins Diasonics from MicroPower Systems Inc., where he was chief financial officer and responsible for all administrative functions. Prior to MicroPower Systems, Higdon spent 16 years with Texas Instruments Inc., where he held a number of responsible positions in financial management including senior financial officer for two of T.I.'s business units: The Consumers Electronics Group and Geophysical Service Inc.

Higdon holds a BBA in economics from the University of Houston, a master of science degree in industrial administration from Carnegie Mellon University, and is a certified public accountant.

Jerry McMillin, chief financial officer for the past three years, will continue as senior vice president of the company. McMillin has made major contributions to the company, and will continue to assist Stewart Carrell, chairman and chief executive officer, on key operations and financial projects.

In announcing the appointment, Carrell said: ''We are fortunate to have Jim Higdon. His extensive background in the full range of financial management responsibilities will make him a valuable member of our management team. And retaining Jerry McMillin's active involvement in the company is an important plus.''

Diasonics Inc. is a leader in the development and manufacture of computer-based medical instrumentation. Diasonics corporate headquarters are located at 1565 Barber Lane, Milpitas, Calif., 95035; telephone 408/432-9000.

#90142b0103 05/22/1990 ~Business Wire
NORTHRIDGE, CA (MAY 22) BUSINESS WIRE - Pacific Southwest Corp. (OTC) Tuesday announced a net loss of $257,253, or 9 cents per share, for the second quarter of fiscal 1990 ended Jan. 31, 1990.

In the same quarter last year, the company reported net income of $3,098, or less than 1 cent per share. Revenues for the quarter were $683,026 vs.

$588,025 in the second quarter of fiscal 1989.

For the six-month period, the net loss was $259,938, or 9 cents per share, on revenues of $1,453,730. In the first half of fiscal 1989, net earnings were $51,726, or 2 cents per share, on revenues of $1,223,409.

President Jerry Fraschilla said that the increase in second-quarter and first-half revenue was due to the expansion of the company's mortgage banking operations through two acquisitions completed in late 1989. He said that the net loss for the period primarily reflects the continued application of resources to integrate and further expand these businesses.

''We expect our expanded mortgage banking operations to begin generating profits in the near future,'' Fraschilla said.

Fraschilla added that CareerSTART Software Inc., in which Pacific Southwest owns a 50 percent equity interest, released its innovative career management software to the current college graduating class. This new product provides interactive software to help a job applicant develop the communication and presentation skills necessary to conduct a successful employment search.

Fraschilla said that the company is targeting this year's spring graduating class, and added, ''A significantly expanded mail and direct marketing program could be underway by mid-year if certain minimum response rates are achieved from the test mailing.''

Since its formation in 1980, Pacific Southwest has increased shareholders' equity more than 20-fold by identifying and purchasing real estate and other assets on favorable terms. The company also has built, largely through acquisition, complementary mortgage banking and financial service businesses that provide the medium to further enhance and unlock the value of Pacific Southwest's growing asset base.

DENVER (MAY 22) BUSINESS WIRE - USMX Inc. Tuesday announced that it has signed a letter of intent with NERCO Metals Inc., a NERCO Inc. (NYSE:NER) subsidiary, whereby USMX will acquire NERCO's 50 percent working interest in the Alligator Ridge Mine and in approximately 33,000 acres on the Alligator Ridge Trend.

USMX previously announced that it had reached an accord with Kennecott Corp. under which USMX will purchase the other 50 percent interest.

Upon completion of these transactions USMX will control 100 percent of this property position.

USMX operates the Casino project, which consists of the Casino and Winrock Claim groups located in the Alligator Ridge Trend, pursuant to a joint venture with Pegasus Gold Corp. Production from Casino is anticipated during 1990, with Winrock projected to come on-line in 1991.

USMX Inc. is involved in the exploration, development, and production of gold properties in the United States. The company's stock is listed on the NASDAQ National Market System under the symbol USMX.

MENLO PARK, CA (MAY 22) BUSINESS WIRE - Informix Software Inc. (NASDAQ:IFMX) announced that its Wingz graphic spreadsheet will support Microsoft's new Windows graphical environment version 3.0.

Wingz is the first spreadsheet to fully exploit graphical environments by allowing users to easily combine text, numbers, graphs and 3-D images with one product on one page.

Wingz was first introduced in early 1989 for the Apple Macintosh market, where it has garnered significant marketshare. It has since become the first graphic spreadsheet to support multiple graphic environments including Windows 3.0 introduced today, along with OS/2 Presentation Manager, OPEN LOOK on Sun, MOTIF and NextStep.

Wingz is now scheduled to support these environments by the end of the second quarter of 1990.

Wingz is the largest, fastest, and most versatile graphic spreadsheet for workstation platforms. Wingz features advanced charting with 3-D graphics desktop presentation capabilities, and the HyperScript application development language.

HyperScript is a graphical programming language developed specifically for end-user programming. HyperScript is more powerful and flexible than typical spreadsheet macros, giving users complete control over every aspect of their graphical interface.

With HyperScript, the user interface can be completely customized for an executive information system (EIS). Using the added capability of

Wingz-DataLink, users can create an EIS that accesses data from a remote or local Informix SQL database.

Wingz-DataLink provides point-and-click options so that users who are unfamiliar with SQL can ''create'' queries to the database. The data can then be imported into a customized EIS or into a standard Wingz worksheet.

Informix Software Inc. is a leading supplier of information management software providing solutions from the database through the desktop.

Informix products include powerful distributed database management systems robust application development tools, and graphical- and character-based productivity software for delivering information to every significant desktop platform.

AKRON, OH (MAY 22) BUSINESS WIRE - Richard L. Houser, manager of international auditing for Goodyear since 1988, has been appointed general auditor.

He succeeds Charles E. Edmisten, who was appointed vice president and comptroller.

Houser, 62, was graduated from the University of Akron in 1950 and joined Goodyear in 1951 as a junior accounting clerk. He held various positions in the corporate factory accounting department before joining the comptrollers staff in 1962. He became a staff auditor in 1970.

Three years later he was named manager of international auditing, and in 1981 he was named manager of general accounting.

In 1988 Houser returned to the international auditing position to implement a new regional audit concept at Goodyear, a project which was completed last year.

He is a Certified Public Accountant and lives in Barberton.

HOUSTON (MAY 22) BUSINESS WIRE - Wyoming-California Pipeline Co. (WyCal) said 36 natural gas shippers requested 1.5 billion cubic feet per day (Bcfd) of firm transportation during its 45-day open season for pipeline transportation services.

WyCal, a subsidiary of The Coastal Corp., plans to build an interstate pipeline from Wyoming to California. The pipeline also received interruptible transportation requests for 4.7 Bcfd.

Oglesby indicated that contracts will be negotiated with most of these natural gas shippers during the next 30 days.

''With the signing of these contracts, WyCal has more than sufficient firm business to commence construction late this year,'' he said.

The Coastal Corp. is a Houston-based energy holding company. It has consolidated assets of $8 billion and subsidiary operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals and independent power production.

BEVERLY HILLS, CA (MAY 22) BUSINESS WIRE - Salick Health Care Inc. (NASDAQ:SCHI) Tuesday announced an agreement to develop an outpatient comprehensive cancer center at Alta Bates-Herrick Hospital, Berkeley, Calif.

The center will be the eighth in Salick's nationwide network of cancer centers and will provide outpatient cancer diagnostic and treatment programs and services, including chemotherapy, radiation therapy, laboratory, pharmacy and radiology services, minor surgical procedures, a full range of psychosocial services and nutritional counseling.

Alta Bates-Herrick Hospital is a 512-bed acute care facility. The hospital's services lines include: Women and Infant Services, Medical/Surgical, Rehabilitation, Mental Health, Cardiovascular, Older Adult, Hematology/Oncology and Respiratory.

The hospital offers regional programs in High-Risk Obstetrics, Acute Psychiatry, Rehabilitation, Burn, Adult Sickle Cell, Hemophilia, Renal and

Bone Marrow Transplantation. Alta Bates-Herrick Hospital is a part of the Alta Bates Corp., which includes hospitals, long-term care facilities, home care and hospice and free-standing laboratories located throughout Northern California.

Salick Health Care also announced that Dr. Alan Koletsky, chief of the Department of Oncology/Hematology, Cleveland Clinic in Fort Lauderdale, has been named medical director of the company's JFK Comprehensive Cancer Center in Palm Beach, Fla. Koletsky is a highly respected medical oncologist who specializes in solid tumors and has practiced in the immediate south Florida area for several years.

Koletsky will be joining the JFK Comprehensive Cancer Center by July 1, 1990. We anticipate that his expertise and large following in the area will attract other oncologists and patients to the cancer center and its excellent programs and services.

The company also disclosed that, in addition to appointing a medical director at the JFK Comprehensive Cancer Center, significant progress has been made in restoring earnings to previous levels.

The non-recurring and unusual events which primarily caused the second quarter's decline in earnings consisted of approximately $400,000 which related to reduced revenues caused by the conduct of certain oncologists at the Palm Beach Florida Cancer Center and costs of litigation with them and approximately $100,000 relating to the company's decision to terminate a proposed acquisition of a home infusion therapy company.

Salick Health Care expects the effect of Tuesday's announcements and programs that have been instituted to enable the company to significantly and rapidly restore revenues and earnings to prior levels.

A leading provider of outpatient disease-specific health care, Salick Health Care now operates a nationwide network of eight outpatient comprehensive cancer centers in Los Angeles; Miami, Miami Beach and Palm Beach, Fla.; Palm Springs, Calif.; Philadelphia; and Berkeley, Calif. It operates eight dialysis centers throughout Southern California, manages 24 inpatient dialysis contracts and distributes medical supplies.

#90142b0154 05/22/1990 ~Business Wire

BEAVERTON, OR (MAY 22) BUSINESS WIRE - Graphic Software Systems Inc. (GSS) Tuesday introduced the first high-resolution display controller to support Microsoft Windows 3.0.

The GSS AT1050 Graphics Accelerator features Programmable Frequency Control (PFC) circuitry that supports the industry's broadest range of displays, including all popular multi-scan monitors.

Optimized for graphical user interface (GUI) performance, the AT1050 is built around the Texas Instruments 34010 graphics coprocessor. GSS augments the 34010 with custom-designed hardware that increases the chip's graphics speed as much as 800 percent for text handling, area fills and other GUI functions. The AT1050 supports the industry's broadest line of GUIs, including the Windows/386, Windows/286, Presentation Manager and X Window System, in addition to Windows 3.0.

''Because our architecture is customized for GUI performance, the AT1050 provides top productivity for users of Microsoft Windows,'' said Jim Cochell, GSS director of new products. ''Operations such as pop-up windows and pull-down menus happen faster, and smaller windows are more readable.''

''Microsoft Windows Version 3.0 features a rich graphical user interface that is best appreciated with a high-resolution display,'' said Russ Werner, general manager of MS-DOS and Windows business unit. ''We are pleased that GSS, as a developer of high-resolution display controllers, is contributing to this important category of products for Windows.''

The AT1050's PFC circuitry allows the accelerator to control all monitors within the range of 640 x 480 resolution at 60 Hz (VGA frequency) through 1024 x 768 resolution at 70 Hz. The user can specify resolution and refresh rate via a menu of monitor options when installing the AT1050.

''Other display controllers support only a handful of the most popular frequencies,'' said Cochell. ''With the PFC, the AT1050 can synchronize to almost any multi-sync monitor, giving OEMs and users the flexibility to support an exceptional number of monitors and to configure a monitor's resolution and refresh rate as they choose -- 800 x 600 resolution at 90 Hz, for example. And the 70 Hz support will be particularly welcome in Europe, where 70 Hz is the emerging standard.''

Additional new AT1050 features include choice of an optional snap-on VGA module or a pass-through VGA cable, making the AT1050 particularly cost-effective for users whose PCs already have VGA capability.

The AT1050 also provides an optional snap-on module for users who want to expand from 16 displayable colors to 256 displayable colors. As with other GSS' 1000 Series controllers, the AT1050 includes optimized graphics firmware, providing compatibility with DOS, OS/2 and UNIX environments.

Also, Direct Graphics Interface Standard (DGIS) device drivers optimized for the AT1050 are available for more than 1,000 DOS and UNIX graphics environments and applications.

Now shipping, the AT1050 is designed for IBM PC AT architectures and is available to original equipment manufacturers (OEMs), systems suppliers and value-added resellers (VARs). Suggested list price is $995. For further information on the AT1050, contact GSS at 503/641-2200.

Graphic Software Systems Inc. is the world's leading developer and licenser of PC graphics technology for hardware manufacturers and software developers. GSS products include display and printer controllers, programming tools for developing portable graphics applications and X terminal emulation software for application developers and end-users. Established in 1981, the company is headquartered in Beaverton, Ore., and employs more than 75 people.

#90142b0159 05/22/1990 ~Business Wire

CINCINNATI (MAY 22) BUSINESS WIRE - The board of directors of Haben Industries tentatively set its annual meeting for June 30, 1990, for the election of directors for the coming year and to effect a one for 10 (1 for 10) reverse split of all classes of its outstanding shares.

Nominees for the board of directors to serve for the coming year are: Benton L. Becker of Miami, CEO and chairman of the board; Albert Ames of New York, director; Walter Helton of Cookeville, Tenn., director; Russell A. Ratliff of Lexington, Ky., director.

Further information concerning these nominees and the affairs of the company will be contained within an information statement and the 1989 annual report to stockholders which will accompany the notice of annual meeting. Proxies will not be solicited as principal stockholders owning in excess of the number of shares required to elect the nominees and to effect the reverse split have indicated their intention to vote in favor of the nominees and the reverse split.

Simultaneous with the announcement of the annual meeting of Haben Industries the board of directors of City Gas & Transmission Corp. of which 60 percent of its outstanding shares are owned by Haben Industries,

announced that it would submit resolutions to its stockholders to effect a merger of City Gas & Transmission Corp. into Haben Industries on the basis of .94 shares (94 hundredths of a share), of Haben for every one share of City Gas & Transmission Corp. computed after the reverse split of Haben Industries' outstanding shares.

Haben Industries is a Delaware corporation (NASDAQ:HABN) and City Gas & Transmission Corp. is a Utah corporation (OTC:CG&T). Since the announcement by Haben Industries of its acquisition of a controlling interest in CG&T on April 27, 1990, the respective boards of directors of these two companies have been comprised of the same members.

The meeting of stockholders of CG&T to consider the merger into Haben Industries shall be held as soon as appropriate filings can be made and Haben Industries has been granted an effective date on an S-4 Registration Statement it intends to file with the Securities and Exchange Commission.

#90142b0160 05/22/1990 ~Business Wire

OTTAWA, ONTARIO (MAY 22) BUSINES WIRE - Corel Systems Corp. has announced a new release of CorelDRAW which is compatible with both Microsoft Windows 2.1 and 3.0.

CorelDRAW 1.2 includes a powerful tracing utility called CorelTRACE, a collection of 11 additional import/export filters and an update to the WFNBOSS type conversion utility.

CorelTRACE is a valuable graphics production tool that can be used to trace any type of artwork, from logos and letterforms to technical illustrations and architectural drawings. CorelTRACE automatically traces an entire bitmap image in a single pass. It also batch autotraces multiple files with a single command. CorelTRACE provides users with customizable tracing options. These include outline and centerline tracing methods. CorelTRACE is fast and easy to use and is included free with CorelDRAW 1.2. It accepts TIF and PCX files and exports EPS which can be easily imported into CorelDRAW for editing.

CorelDRAW's typeface conversion utility, WFNBOSS, now lets you import fonts created with version 3.0 of Altsys Fontographer. The previous version only imported version 2.0 Fontographer files. With CorelDRAW 1.2, the improved WFNBOSS also exports Corel fonts to Z-soft Type Foundry for modification. This allows uers to customize any COREL font (or font

converted to COREL.WFN format using WFNBOSS). The previous version only allowed users to import fonts from Type Foundry and not to export them. Corel's WFNBOSS program continues to lead the industry, allowing CorelDRAW users access to over 4,300 compatible typefaces from vendors such as Adobe Bitstream, Agfa Compugraphic.

Eleven new import/export filters have been added to this new release making CorelDRAW compatible with most word processing, page layout and graphic packages. WordPerfect 5.X users can now quickly import their CorelDRAW graphics by using WordPerfect's WPG format.

There is also a GEM import for GEM Artline, Draw and Graph files, and a GEM export for wait-free Ventura loading. An AutoCAD DXF import lets users enhance their CAD graphics for use in documentation, marketing literature and presentations with CorelDRAW's artistic features and type library. The DXF export filter sends CorelDRAW outlines (shapes) to CAD/CAM devices or to other software packages which accept this standard.

Those working with plotters or sign-cutting equipment will appreciate the HPGL export. This filter includes options to scale the impage up to 10 times normal size and create images as large as 170'' (14 feet) square. The HPGL import filter creates files in the HPGL format from other drawing graphics or CAD applications. A Videoshow (PIC) export enables owners of Viedoshow products to use CorelDRAW images.

The Macintosh is now part of CorelDRAW's vocabulary. An Adobe Illustrator EPS export (MAC/PC) is available making CorelDRAW a graphics link to Adobe Illustrator 88 and Aldus Freehand on the Mac. A PICT import/export filter now allows CorelDRAW to exchange images with many Macintosh graphics software applications including the popular MacDraw.

Corel Systems Corp. is a PC software development company and systems integrator. The company was founded in 1985 by Dr. Michael Cowpland and its revenue is generated from three divisions: PC Graphics Software, Optical Disk Products and Systems.

DENVER (MAY 22) BUSINESS WIRE - Grease Monkey Holding Corp. (NASDAQ:GMHC) reported a loss of $75,399 on revenues of $2,233,302 for its first quarter which ended March 30, 1990.

This compares to a loss of $63,559 on revenues of $1,640,602 for the same quarter in 1989. Both losses are $.002 per share. For its fiscal year

ended Dec. 31, 1989 the company reported a loss of $222,990 on revenues of $8,759,984 vs. a loss of $433,062 on revenues of $5,305,712 for 1988.

Grease Monkey is the nation's fourth largest franchisor of automotive quick lubrication centers. At a Grease Monkey service center, a team of service technicians will change the oil, install a new oil filter, lubricate the chassis, wash windows, check the tire pressure, and vacuum the car's interior.

All fluid levels are checked and topped off if necessary. The service is performed in 10 minutes without an appointment.

Grease Monkey currently has 384 franchises sold with 168 centers open and an additional 216 scheduled for future openings.

#90142b0174 05/22/1990 ~Business Wire

IRVINE, CA (MAY 22) BUSINESS WIRE - Wonderware Software Development Corp. Tuesday announced Version 3.0 of its popular InTouch system for developing PC-based operator interfaces for factory and process automation.

The new revision incorporates features of Microsoft's new Windows 3.0 system providing improved performance, dramatically increased main memory size and extensive graphics enhancements. In addition to Windows 3.0 enhancements, InTouch 3.0 also features a new series of design tools to aid application engineers in the design of man-machine and operator interface applications.

Windows 3.0 is designed to take advantage of the power of the Intel 80286 and 80386 class of personal computers and is particularly well suited to supporting sophisticated operator interface applications, such as InTouch, according to Dennis R. Morin, Wonderware chairman and chief operating officer.

''Windows 3.0 breaks the artificial 640K memory barrier of the IBM PC, allowing users to directly address 16 megabytes of main memory,'' Morin explained. ''This means users can load multiple large programs for dynamically linked applications and can create very large databases for handling applications with thousands of control points.

''Combining this much high-speed RAM memory with the high-performance 80386 CPU means applications will operate faster and users can browse between windows or operator interface frames much more quickly.

''Windows 3.0 also enhances connectivity between an operator interface terminal and a plant mainframe computer through its use of the Dynamic Data Exchange (DDE) protocols and new terminal emulators,'' Morin said.

''This means that there is a simpler and more direct way to link the office to the factory floor, providing an 'open' system for management of control functionality rather than the closed nature of competitive systems. Using DDE, InTouch itself can control other Windows programs and share data with them for real-time communications among applications.''

Like the original product, InTouch 3.0 has also been designed for easy transition into the OS/2 Presentation Manager environment. ''Most developers agree that Windows will be the leading PC operating environment and that OS/2-based systems will lag behind for some time,'' Morin noted.

''Applications for Windows 3.0 will look and feel identical under OS/2. An application program interface (API) will be available to permit running of today's Windows applications under OS/2 without any modification. Although it may not use all of the Presentation Manager features, it will reduce the time and expense required for porting applications to the OS/2 Presentation Manager.''

InTouch 3.0 consists of two major elements: WindowMaker, which is a development environment used to create the animated graphics display windows and the tag name dictionary that comprise the operator interface, and WindowViewer, which is a runtime environment for display and animation of those graphics windows.

WindowMaker is list priced at $6,995 and WindowViewer is priced between $1,495 and $2,995, depending on the size of the user control applications.

Wonderware Software Development Corp., with headquarters in Irvine, was founded in 1987 specifically to develop software for industrial control applications on IBM PC and compatible microcomputers, using the Microsoft Windows environment.

#90142b0175 05/22/1990 ~Business Wire

EVERETT, WA (MAY 22) BUSINESS WIRE - INTERMEC Corp. (NASDAQ:INTR), manufacturer of automated data collection systems, Tuesday reported record revenues and profits for the fiscal year ended March 31, 1990.

Fiscal 1990 earnings rose 43 percent to $11.5 million compared to $8 million in fiscal 1989 and earnings per share increased 31 percent to

$1.51 compared to $1.15 a year ago. Revenues increased 28.5 percent to $168.5 million, up from $131.1 million in fiscal 1989.

INTERMEC's net income increased 19 percent to $3.7 million for the fourth quarter ended March 31, 1990, compared to $3.1 million in the like quarter of fiscal 1989. Fourth quarter earnings per share were $.43 compared to $.43 a year ago, reflecting the issuance of 1.2 million new shares in a stock offering completed during December 1989. Fourth quarter revenues increased 14 percent to $46.1 million from $40.3 million in the like quarter of fiscal 1989.

"In addition to achieving record results, we substantially strengthened our balance sheet this year. INTERMEC's recent stock offering, which resulted in $32.1 million of additional capital, coupled with the strongest cash flow from operations we have ever experienced, has positioned us well for the growth that lies ahead," said John W. Paxton, Chairman, President and Chief Executive Officer.

"During fiscal 1990, INTERMEC generated $13 million in cash from operations, a significant accomplishment for a company growing at our rate. Improved profitability and decreases in accounts receivable, as well as increases in inventory turnover, contributed to this result," said David C. Mobile, Vice President - Finance, Treasurer and Chief Financial Officer.

"INTERMEC's commercial markets remain strong, both at home and abroad, as this year's substantial growth in sales and profits reflects. Fiscal 1990 results were slightly below our expectations, primarily because of a shortfall in U.S. government purchases for the military and various civilian agencies," Paxton noted. "We expect the company's near-term results may be dampened by the continued uncertainty that surrounds the federal budget. However, we are confident about the future and INTERMEC's increasing profitability in fiscal 1991."

The world leader in solutions for automated data collection, INTERMEC designs, manufactures and markets the most comprehensive line of data collection hardware, software, media products, systems and services available for computer integrated transaction processing worldwide.

SAN DIEGO (MAY 22) BUSINESS WIRE - TCS Enterprises Inc. is pleased to report that it has successfully completed negotiations with the Resolution Trust Corp. (RTC) for the total repurchase of all stock owned by the RTC through their takeover of Lincoln Savings.

''After nearly a full year of negotiations with the RTC, we are very pleased this goal is accomplished,'' said Tom C. Stickel, chairman and chief executive officer of TCS Enterprises Inc.

''Our initial offer to the RTC was for the original price Lincoln Savings paid for our stock of $5 per share and was rejected by the RTC because it

had a payment feature extending to 10 years. The RTC wanted a cash offer, which we eventually settled upon at $1.50 per share. We will retire the entire 578,000 shares for a cost of $867,000.

''As I mentioned in our first-quarter report on earnings, we anticipated substantially lower earnings for the near future. We should be reporting our second-quarter numbers in a few weeks.

''Additionally,'' Stickel said, ''the TCS Enterprises Inc. board of directors has requested that management purchase, on the open market, from time to time, stock which may be available at a price the company feels is advantageous to our corporation.''

PHOENIX (MAY 22) BUSINESS WIRE - A.J. Pfister, general manager of Salt River Project made the following statement regarding board actions of Pinnacle West Capital Corp.:

In light of Pinnacle West Capital Corp.'s decision not to entertain any offers to sell Arizona Public Service and its rejection of PacifiCorp's offer, we are not surprised at the rejection of our proposal.

Our proposal includes acquisition of downtown service areas in seven Phoenix-area cities for 150 percent of book value and a freeze on electric rates in those areas for up to seven years.

Nevertheless, we remain interested in discussing our proposals with Pinnacle West anytime it would like to do so.

#90142b0245 05/22/1990 ~Business Wire

PORTLAND, OR (MAY 22) BUSINESS WIRE - PacifiCorp Tuesday issued the following statement:

The Board of Pinnacle West has rejected a cash offer that represents a significant premium over the market value of the company. Yet, shareholders of Pinnacle West have been told by their management not to expect dividends for at least the next three years.

We believe shareholders of Pinnacle West see the significant value of our offer and support the merger proposal from PacifiCorp. We share their disappointment in the refusal of the Pinnacle West Board to take action

which clearly would benefit customers and shareholders.

Pinnacle West shareholders have an opportunity Wednesday, May 23, at the annual shareholders meeting to let their views on the PacifiCorp offer be known to the Board of Pinnacle West. We hope the Board will reconsider its rejection after hearing from the shareholders.

PacifiCorp's offer includes a commitment to limit price increases for customers of Arizona Public Service to 2 percent per year over the next four years. That compares to increases proposed by Pinnacle West of nearly 25 percent over the next three years.

The PacifiCorp offer is good for customers of Arizona Public Service and PacifiCorp and good for shareholders of PacifiCorp and Pinnacle West.

We remain interested in obtaining the benefits from merging the two electric utility systems -- benefits that will reduce costs and keep prices competitive in the long term for both PacifiCorp and APS customers. PacifiCorp is exploring its options which could include approaching shareholders directly.

We have yet to hear any positive statement from Pinnacle West management concerning the future. Continued rejection of a better alternative for shareholders and customers is unacceptable. We think it is appropriate for shareholders and customers to seek responsible action from Pinnacle West management.

LONG BEACH, CA (MAY 22) BUSINESS WIRE - Leo's Industries Inc. (ASE:LI) has reached an agreement with Elite Group Inc., a Los Angeles-based administrator of extended service plans, under which Leo's will provide repair services for approximately 700,000 consumer electronics products customers covered by Elite's service contracts.

Paul M. Cohen, Leo's chairman and chief executive officer, said the contracts provide extended service plans for electronics products originally sold through the Federated Group.

Under terms of the agreement, Leo's will receive payment directly from Elite as service under the respective contracts is performed, Cohen said. The program is expected to be fully phased in throughout Leo's California

system within the next 60 days.

''The benefit of the service arrangement to Leo's is really two-fold,'' Cohen stated. ''When fully implemented, the program should generate significant monthly service income without significant additional overhead. It will also give Leo's access to the previous buyers of electronic products when they bring their product into our stores for service -- making available a substantial, new customer base to which we can introduce our competitively priced selection of cellular telephone and car stereos and alarms.''

Leo's Industries operates a 41-store retail consumer electonics chain, as well as Twentieth Century Cellular Inc., a certificated reseller of cellular telephone service in California. The Leo's Stereo stores feature a diverse selection of brand name audio/video merchandise, specializing in cellular telephones and in the installation of car stereos and alarms.

FREMONT, CA (MAY 22) BUSINESS WIRE - VeloBind Inc. (NASDAQ:VBND), Tuesday announced that it has nominated Richard M. Drysdale and Lawrence S. Dolin to stand for election to its board of directors at the company's annual meeting of shareholders on May 31, 1990.

Dolin has for the past five years been president of The Front Row Theatre Inc. He also serves as a director of Helian Health Group Inc. (OTC) and Morgan's Foods Inc. (ASE), and as general partner of Mordo Partners, an investment partnership. Mordo Partners is general partner of the Northern Union Club, a New York investment concern. Dolin replaces Henry Carter, who has decided not to stand for reelection.

Drysdale is founder and president of Westwood Management Co., a Los Angeles-based investment management firm that oversees over $50 million of foreign and domestic special situation investments.

He was a founder and U.S. manager of MK International Ventures, a Dutch-based venture capital fund founded in 1985, and was a founding partner of Sierra Ventures, a technology venture capital fund which he initially managed. Drysdale fills a recently created position on the board.

According to Carl J. Swenson, VeloBind's president and chief executive officer, ''Electing board members who can help VeloBind grow is essential to our long-term goals. We intend to become a world leader in the binding

industry, and we look forward to working with these gentlemen to make that happen.''

VeloBind has manufactured and marketed professional-quality office binding systems for more than 20 years. The company's products are widely used by law offices, accounting firms, government agencies, schools, and other organizations that require attractive, securely-bound documents.

TROIS-RIVIERES, QUEBEC (MAY 22) BUSINESS WIRE - Sprout-Bauer and Groupe Laperriere and Verreault Inc. (GL and V) jointly announced they have concluded an agreement for the manufacture and servicing of Sprout-Bauer high-yield pulping equipment.

Sprout-Bauer designs, builds and services a full range of process machinery and systems for the worldwide pulp and paper industry.

Sprout-Bauer previously announced its intention to concentrate North American production of its large TMP refiner systems in one facility in Canada. The agreement will provide Sprout-Bauer with a well-qualified source for new equipment, and the repair and rebuild of the Sprout-Bauer equipment in use in many Canadian mills.

In a related move, Sprout-Bauer is completing the previously announced relocation of management, project engineering and support services to Montreal.

GL and V specializes in the fabrication and installation of pulp and paper equipment, as well as aluminum, hydro-electric and heavy industry equipment.

This agreement will enable GL and V to consolidate and expand its market presence in this industry through its facilities in Trois-Rivieres, and through its subsidiaries industries Couture ltee, located in the Saguenay Region, and Ateliers Fabron Inc., located in Trois-Rivieres.

GL and V's manufacturing capabilities (over 260,000 square feet, up to 100 ton lifting devices, over 120 machine tools) and quality control enable it to build refiner equipment to the high-quality standards demanded by Sprout-Bauer.

BEVERLY HILLS, CA (MAY 22) BUSINESS WIRE - MGM Grand Inc. (NYSE:MGG) has named Larry J. Woolf chairman and chief executive officer of its Las Vegas subsidiary MGM Grand Hotel Inc., it was announced Tuesday by Fred Benninger, chairman and chief executive officer of the parent company, MGM Grand Inc.

Most recently serving as president and chief operating officer of Caesars Tahoe Resort in Lake Tahoe, Nev., Woolf expressed his thrill in joining the MGM Grand team by saying, ''I'm excited about the prospect of working on what promises to be the largest and most spectacular hotel and theme park complex in the entire world.''

He went on to say, ''I'm also very fortunate to be associated with MGM Grand, one of the most exceptional organizations around today.''

Benninger commented: ''Larry's exceptional track record and expertise in managing resort properties create a perfect fit with our plans for the MGM Grand hotel and theme park. We're extremely pleased that he agreed to join us and look forward to his being an integral part of our success.''

As president and chief executive officer of Caesars Tahoe, Woolf led the dramatic increase of the resort's profitability and market share. Prior to his move to Tahoe, Woolf served as senior vice president, operations, at Caesars Atlantic City Hotel & Casino where he played a key role in the start-up activities of that operation as well as the management of all day-to-day operations.

Active in several professional and philanthropic organizations, Woolf also is a member of the Advisory Board of the Institute for the Study of Gambling and Commercial Gaming; the Nevada Commission on Substance Abuse Education, Prevention, Enforcement and Treatment; and is vice president, board of trustees of the Gaming Industry Association.

The MGM Grand Hotel and Theme Park is being constructed on approximately 113 acres on the Las Vegas Strip across the street from the Tropicana Hotel and the new Excalibur Hotel. The hotel, which fronts both the Strip and Tropicana avenues, will have approximately 5,000 rooms. Completion of the complex is scheduled for fall 1992.

REDWOOD SHORES, CA (MAY 23) BUSINESS WIRE - Oracle Corporation, the world's largest supplier of database software and services today announced several organizational and corporate changes, constituting the final steps in its two-year restructuring into Product Divisions and Distribution Divisions.

The first change is the formation of a new company, called Oracle USA. ''As the size of our business in the United States approaches $500 million we have decided that it's time to form a subsidiary company dedicated to distribution in the U.S. market,'' said Lawrence J. Ellison, President and Chief Executive Officer of Oracle Corporation. Oracle USA will assume all of the activities of the old United States Operations organization and have new, expanded responsibility in the areas of finance and distribution marketing. Gary D. Kennedy, most recently Senior Vice President and General Manager of Oracle Corporation's United States Operations Division, has been named President of Oracle USA.

Second, Geoffrey W. Squire, most recently Chief Executive Officer of Oracle Europe and Senior Vice President, has been named President of Worldwide Distribution Operations, and Corporate Executive Vice President. Mr. Squire will be responsible for coordinating the activities of all of Oracle's distribution companies, around the world. As head of worldwide distribution, Mr. Squire will also assume the responsibilities previously held by John R. Luongo, most recently Senior Vice President of Oracle's International Division, who is leaving the company.

The other members of Oracle's Management Committee -- Robert N. Miner, Peter R. Tierney and Jeffrey L. Walker -- continue in their roles as Senior Vice President of Development in charge of the Database and Tools business units; Senior Vice President of Corporate Marketing and Oracle's Office Automation, Desktop, DEC and Minicomputer business units; and CFO and General Manager of the Applications Division, respectively.

Finally, the Board of Directors of Oracle Corporation voted recently to elect Joseph Costello, President and Chief Executive Officer at Cadence Design Systems in San Jose, California, Director of Oracle Corporation. In addition, Ellison was elected Chairman of the Board. Donald L. Lucas, most recently Oracle's Chairman, was elected Chairman of the company's Executive Committee.

Oracle Corporation, headquartered in Redwood Shores, Calif., is the largest supplier of DBMS software and the third largest software and services company in the world.

Oracle develops and markets an integrated line of software products for database management, applications development, decision support and office automation, as well as families of financial and manufacturing applications packages. All Oracle products are available on PCs,

minicomputers and mainframes, and ORACLE is the first and only database to run on supercomputers.

#90142b0374 05/22/1990 ~Business Wire

PHOENIX (MAY 23) BUSINESS WIRE - DATAPHAZ Inc. (NASDAQ:DPHZ) Tuesday announced operating results for the first quarter ended April 30, 1990.

Sales and revenues for the first quarter of fiscal 1991 declined 20 percent to $19,550,000 from the $24,569,000 reported in the year earlier period. Net income of $20,000, or 1 cent per share was reported for the current quarter, compared to the net loss of ($559,000), or (15 cents) per share reported in the first quarter of the prior year.

Commenting on the quarterly sales/revenues results, company officials noted that the prior year quarter included $5 million in sales and revenues from the Albuquerque and Dallas/Fort Worth ComputerLand stores. These stores were sold during the fourth quarter of fiscal 1990; accordingly, the current quarter only includes activity from the company's Phoenix, Las Vegas, Tucson and Denver stores.

The company reported a 17 percent increase in sales and revenue in the Phoenix market between periods; however, comparable sales activity declined in each of the remaining markets due to personnel turnover, management reorganizations and the company's decision to limit bids and participation in highly discounted business.

The net income reported for the first quarter of fiscal 1991 was attributed to the company's aggressive focus on the sale of high margin service and support offerings, and a decrease in same store selling, general and administrative expenses of $775,000, or 15 percent, between periods.

The company implemented restrictive expense control programs during the current quarter and realized interest savings of more than $100,000 as a result of reducing average short-term borrowings by $3 million between periods.

Edward E. Faber, chairman and chief executive officer, stated, ''DATAPHAZ is encourged by the financial results reported for the first quarter of fiscal 1991, particularly, the improvement in margins over the fourth quarter and the large reduction in same store selling, general and

administrative expenses between periods.''

DATAPHAZ presently operates seven ComputerLand locations in three states and continues to be one of ComputerLand Corp.'s largest domestic franchisees. The company's corporate offices are located at 15002 N. 25th Dr., Phoenix, 85023.

#90142b0378 05/22/1990 ~Business Wire

FREMONT, CA (MAY 22) BUSINESS WIRE - Responding to the semiconductor industry's call for corrosion-free single-wafer metal etching, Lam Research Corp. (NASDAQ:LRCX) has unveiled its second generation Rainbow 4600 metal etcher.

Specifically targeting critical submicron etch applications, this enhanced Rainbow 4600 etcher combines a multiple chamber design with precise temperature control features to deliver corrosion-free metal etching with excellent profile control.

Corrosion control is one of the single greatest hurdles to overcome in plasma etching of aluminum film. To eliminate the post etch corrosion concerns typically associated with these metal films, the 4600 employs a proprietary interchamber integrated processing unit.

Designated the Total Passivation Module (TPM), this versatile subsystem enables a dry plasma passivation with dual-gas capability and an atmospheric passivation consisting of a hot or cold water rinse. An optional stripper, which removes all traces of photoresist from the wafer in-situ, is also available in place of the dry plasma passivation module.

Depending upon the specific process requirements, the passivation and stripper modules can be used separately or in tandem with the rinse station to prevent the yield-threatening corrosion found in other etch systems.

Further enriching the Rainbow's suitability for VLSI and ULSI requirements a proprietary temperature control feature improves profile control, minimizes polymer deposition and enables the use of non-carbon chemistries.

This in turn delivers excellent etch characteristics: less than 0.05um critical dimension loss with 150 percent over-etch; reduced loading effects; notch-free profiles on complex sandwich structures; stringer removal and advanced tungsten etch capabilities. In addition, process

repeatability is enhanced and mean time between cleans is extended.

When coupled with the inherent benefits of single wafer etching, such as ease of process characterization and precise end-point control, the 4600 addresses the process, performance and manufacturability mandates posed by today's most advanced semiconductor device designs.

Other features provided through the Rainbow series platform include uptime in excess of 90 percent, ease of maintenance and minimal particulate generation.

Joe Ocampo, Lam's director of etch marketing, notes that historically the industry has been plagued by the metal etch process step with chipmakers forced to accept trade-offs between cumbersome manufacturing burdens and process performance.

''With our new 4600 etcher, customers don't have to compromise. The Rainbow 4600 eliminates the headaches associated with batch systems, solves tough corrosion issues and delivers the performance of a single wafer process.''

About Lam Research: Lam is a leading supplier of wafer processing equipment for the worldwide semiconductor industry and the leading supplier of single-wafer etchers and epitaxial deposition systems.

The company's broad product offerings are focused on thin film management, one of the most vital areas in the fabrication of current and future integrated circuits. Serving as the foundation for this focus, Lam has developed core technologies encompassing etch, epitaxy and CVD disciplines.

Headquartered in Fremont, Lam maintains customer support centers throughout the United States, Europe and Pacific Rim to support its global customer base. Founded in 1980, Lam Research is publicly held.

#90142b0380 05/22/1990 ~Business Wire

FREMONT, Calif. (MAY 23) BUSINESS WIRE - Lam Research Corp. announced Tuesday that it has launched Phase III of its Chemical Vapor Deposition (CVD) product plan which includes an extensive beta site testing program for Integrity, the new integrated processing system currently under

development.

This final stage in a three-part program is structured to provide extensive product application feedback prior to formal market introduction. Phase I of the product plan involved characterization of Integrity's proprietary reactor chamber. This was followed by Phase II, an intensive co-development effort with one of the world's largest merchant semiconductor device houses.

This phase culminated in the first system shipment and initial acceptance testing which was conducted in the customer's 16 megabit development facility last month.

According to Bruce Rhine, Lam's vice president of marketing, this final phase of development is the last critical step in assuring production-proven performance. ''Too often, new products are marketed before the bugs have been worked out. As a result, the users often experience severe production and even process repeatability problems,'' Rhine asserted.

''Lam is bucking this trend with a strong beta site program that involves multiple manufacturing locations worldwide with different customers and a variety of device applications.''

Process and performance advances derived from studies at these sites will be incorporated into the final product design prior to introduction later this year. In this way, Lam can assure a production-worthy system capable of meeting stringent manufacturability criteria as it delivers breakthrough CVD capabilities.

Lam officials report that the Integrity integrated processing tool eliminates certain pre and post-process steps required in advanced thin film formation. Although specific film applications for the system have not yet been divulged, the inherent control over process parameters - pressure, concentration, reactant residence time, and temperature - creates a strong platform for both current and future CVD applications.

This capability serves to further expand Lam's thin film core technologies.

Coinciding with the completion of Phase II of the program, Lam officially opened its Advanced Research Center in San Diego, Calif. At this site, Lam engineers have worked in tandem with resident engineers from Lam's first beta customer. For the past three and a half years, this off-line product development location has been closed to all but a few R&D and process engineers working on the project.

Facility upgrades have greatly expanded both the process characterization capabilities of the lab and the clean room facilities. The 22,000 square

foot center will now serve as the official development arm for all of Lam's advanced CVD products. About Lam Research:

Lam is a leading supplier of wafer processing equipment for the worldwide semiconductor industry and the leading supplier of single wafer etchers and epitaxial deposition systems. The company's broad product offerings are focused on thin film management, one of the most vital areas in the fabrication of current and future integrated circuits.

Serving as the foundation for this focus, Lam has developed core technologies encompassing etch, epitaxy and CVD disciplines. Headquartered in Fremont, Calif., Lam maitains customer support centers throughout the United States, Europe and Pacific Rim to support its global customer base.

#90142b0609 05/22/1990 ~Business Wire
NEW YORK (MAY 22) BUSINESS WIRE - Borland International (NASDAQ:BORL) Tuesday announced a new version of its Paradox Engine which will add support for Windows 3.0, as well as an object layer that allows programming in C++ and Turbo Pascal under DOS.

The Paradox Engine (version 2.0) is a tool that lets computer programmers access and manipulate Paradox database tables in both single-user and multiuser environments.

Borland will demonstrate the Paradox Engine in conjunction with the announcement of Microsoft Corp.'s Windows 3.0, the much-anticipated multitasking DOS-based graphical environment. Borland announced earlier it is developing Windows versions of its key products: Paradox, Quattro Pro and the Turbo programming languages.

The Paradox Engine (version 2.0) uses a dynamic link library (DLL) that programmers can link to their Windows applications to manipulate Paradox data in tables. The Paradox Engine DLL supports multiple-session use and provides multiuser access to Paradox data. The DLL architecture also allows multiple applications to share a single copy of the Engine and save memory.

Version 2.0 of the Paradox Engine also includes a TPU (Turbo Pascal Unit), a separate Turbo Pascal compiler module that can be linked into the Paradox Engine. For the first time, today's growing number of Pascal programmers can use the Engine to develop applications that work with Paradox data.

Version 2.0 of the Paradox Engine also includes a class library for C++. The Engine's C++ library includes Borland's VROOMM (Virtual Runtime Object-Oriented Memory Manager) technology, allowing developers to create programs with improved memory management and performance.

Version 2.0 of the Paradox Engine, scheduled to ship this summer, will have a suggested retail price of $495. Upgrade pricing is still to be determined. For more information on purchasing the Paradox Engine, call 800/331-0877.

Borland International Inc., of Scotts Valley, Calif., is a leading developer of high-performance software products. Borland offers some of the world's most widely used business applications and programming software such as Paradox, Quattro Pro, SideKick, Turbo Pascal, Turbo C, Turbo C++ and Turbo Debugger & Tools.

#90142b0619 05/22/1990 ~Business Wire

SUNNYVALE, CA (MAY 22) BUSINESS WIRE - Telebit Corp. (NASDAQ:TBIT), a leading provider of high-speed dial-up connectivity solutions, Tuesday introduced the T2500L -- a leased line modem with four-wire functionality in addition to dial and two-wire compatibility.

According to Gibson, the T2500L also supports V.25bis bit-synchronous dialing and the industry-standard asynchronous dialing command sets.

Designed to provide leased line backup in synchronous network environments the T2500L is compliant with V.42bis error control and V.42 data compression, and offers password and callback security, remote configuration, management, and access functions.

With the T2500L, users can now ensure reliable data transmission, regardless of leased line failures. When a problem with the leased line is detected the T2500L interrupts transmission, dials a pre-determined phone number, and resumes transmission over a public switched dial line.

Automatic loopback allows the T2500L to determine when the condition of the leased line has improved so that it can restore lease line transmission. The T2500L then automatically disconnects the dial-up connection, and restores the leased line connection -- reducing duplicate line costs.

The T2500L operates in asynchronous and synchronous modes and supports all major modulation standards, including CCITT V.32, V.22bis, V.22, and Bell 212A and 103J. It communicates with the installed base of Telebit and other multicarrier PEP modems at speeds up to 18,000 bps without data compression and up to 19,200 bps with data compression.

When communicating with V.32 modems, the T2500L supports error-free transmission speeds up to 9600 bps with Trellis-Coded Modulation (TCM). In V.42, the T2500L utilizes the LAP-M (Link Access Procedure for Modems) protocol or MNP Classes 2-4.

Over dial lines, the Telebit modem ensures data integrity with PEP 16-bit CRC error-detection and control protocols and delivers data compression using a Lempel-Ziv algorithm. In asynchronous PEP and V.32 modes, performance is maximized by providing integrated support for UNIX UUCP, Kermit, Xmodem, Ymodem, and SNA/SDLC file-transfer protocols.

Telebit's T2500L supports three types of dial-access security to protect host computers against unauthorized access -- password security, callback security, and callback reverification. Remote modem management is made possible via remote access capabilities that allow remote modems to be configured, tested and diagnosed from the central site.

Telebit's T2500L modem with V.42 and V.42bis compatibility lists for $1,495 and will be available in July. Additional product information can be obtained by calling telephone 1-800-TELEBIT or 408/734-4333.

Telebit Corp., a leader in the high-speed dial-up modem market, develops, manufactures and markets advanced high-speed communications products for dial-up networking and wide-area digital communications.

The company's patented digital signal processing and packet transmission technologies allow for the software implementation of widely used communications protocols.

Telebit markets its products worldwide through original equipment manufacturers, value-added resellers, distributors and direct sales to major national accounts. The company is headquartered at 1315 Chesapeake Terrace, Sunnyvale, Calif., 94089.

CARLSBAD, CA (MAY 22) BUSINESS WIRE - International Totalizator Systems Inc. (NASDAQ/NMS:ITSI) announced at its annual shareholders meeting that

it has entered into an agreement to acquire McKinnie & Associates Inc. (MCK), a Louisiana-based company, through an exchange of stock.

MCK is a company that has developed a multimodule, comprehensive software system to provide management information for racetrack operators. MCK will become a wholly owned subsidiary of ITS, and its founder, Jon R. McKinnie, will be retained as president and chief executive officer. MCK employs a total of 25 people.

McKinnie & Associates, with headquarters in Shreveport, is the producer of TRACK MANAGER, a software system designed for the management of modern racing facilities. The system consists of 35 modules that handle nearly every aspect of a racetrack's operation, other than actual wagering transactions.

Among the available modules are Admissions, Member Management, Food Service, Marketing, Personnel and a host of accounting functions.

MCK's customers include some of the most prestigious thoroughbred racing organizations not only in North America but in the world: Arlington International Racecourse, Churchill Downs, Remington Park, Louisiana Downs The Royal Hong Kong Jockey Club and the Macau Jockey Club are but six of its 22 total clients.

ITS designs, manufactures and markets computerized ticketing systems and terminals for use in ticket-processing applications worldwide.

ORLANDO, FL (MAY 22) BUSINESS WIRE - Official Airlines Guides announced Friday the addition of Vacation Florida Data Base to the OAG Electronic Edition Travel Service.

The Vacation Florida Data Base provides information on a wide range of subjects of interest to would-be Florida vacationers. Subscribers may access the system 24 hours a day by using any communicating terminal, such as a home or office computer and a modem, allowing them to plan their entire vacation before leaving home.

The service provides detailed information on topics such as hotels and motels, campgrounds and RV parks, dining, attractions (including current operating hours and admission prices), rental cars, relevant press releases and more.

Vacation Florida Data Base is published by Kenney Communications Inc., a diversified tourism communications firm located in Orlando, Fla. The company's President, Richard Kenney, reported, ''We are especially excited to have the opportunity to supply this valuable information service to OAG users.

''The service has been more than two years in development and we believe it is the most accurate source for planning a Florida vacation available today. We have brought the system online with the primary emphasis on the greater Orlando area, which is the world's number one tourism destination.

''We will be expanding to every major Florida destination very soon, starting with the Florida Keys and the Miami/Fort Lauderdale areas.''

Kenney went on to say, ''We are most excited about the potential distribution of the Vacation Florida Data Base. The OAG Electronic Edition Travel Service can be accessed directly or through numerous online services such as CompuServe, Dialog, and Dow Jones News/Retrieval, giving approximately two million U.S. and international users access to Vacation Florida.

Parties interested in learning more about subscribing to the OAG Electronic Edition Travel Service may contact OAG toll-free at 800/323-3537.

LAS VEGAS (MAY 22) BUSINESS WIRE - Electronic Data Technologies (NASDAQ:EDAT), a designer and manufacturer of computerized systems for the gaming industry, announced Tuesday an agreement with the Flamingo Hilton Laughlin Inc. for the installation of the EDT Slot Tracking System.

This installation, on 1,500 slot machines, represents the first Hilton property to install the EDT Slot Information and Player Tracking System.

Mike Farnham, vice president of the Systems Division, commented: ''EDT is excited and is looking forward to installing our Slot System at the Flamingo Hilton Laughlin. We value the confidence that Hilton Management continues to show in EDT products.''

EDT currently has its Keno Systems in the Las Vegas and Flamingo Hilton properties and is the only designer and manufacturer to install a Slot Tracking System in Laughlin.

EDT is a world leader in computerized gaming management systems with over 32,000 units attached to slot machines in over 40 casinos worldwide.

The Las Vegas based company employs more than 300 people, including approximately 70 hardware and software engineers and 70 customer service personnel dedicated to the support and development of quality computerized gaming systems and route operations.

The company maintains sales and service offices in Reno and Laughlin Nevada.

MOUNTAIN VIEW, CA (MAY 22) BUSINESS WIRE - Consilium Inc. (NASDAQ:CSIM), a leading supplier of integrated factory floor management software, reported results for its fiscal 1990 second quarter ended April 30, 1990.

The company achieved revenues of $8.2 million, 43 percent over revenues of $5.8 million in the like quarter last year. This marks the company's 10th consecutive quarter of increased revenues. Net income was $1.4 million (20 cents per share), up 80 percent from $766,000 (14 cents per share) for the like quarter last year.

Among the highlights of the second quarter were the following:

-- Continued penetration of new and established markets. WorkStream was sold to key new customers and sites including Nilit, a chemical fiber textiles manufacturer in Israel; U.S. electronics manufacturers Akashic Memories and Seagate Technologies; and a major U.S. aerospace and defense contractor.

-- Continued strong sales of additional products and services to customers across industries, including Allied Bendix Aerospace, Oceanics Division; MEMC Electronic Materials; a chemical plant of E.I. Dupont de Nemours; and Wacker Chemitronic GmbH, a German semiconductor manufacturer.

-- The signing of a long-term OEM and product development agreement with DocuGraphix (NASDAQ:DOCX), a supplier of documentation systems which combine text and graphics for the manufacturing environment. Under the agreement, Consilium will be able to sell DocuGraphix's software in conjunction with the company's WorkStream product line.

Consilium will also fund further enhancements of the software by DocuGraphix, and received warrants for up to 20 percent of DocuGraphix's

stock.

-- On Mar. 13, the company's first annual meeting of shareholders as a public company was held, at which the company's board of directors was elected. The board consists of Dr. Jonathan Golovin, founder of the company and chairman of the board, Thomas Tomasetti, F. Warren Hellman of Hellman & Friedman, and L. Barton Alexander of Cable Howse Ventures.

Consilium Inc. is a leading supplier of integrated factory floor management software and services. The company's WorkStream line of integrated software modules directs the execution of the manufacturing plan on the factory floor, enabling lot-based manufacturers to reduce costs, improve quality and achieve just-in-time delivery.

SEATTLE (MAY 22) BUSINESS WIRE - Metropolitan Federal Savings and Loan Association of Seattle (NASDAQ:MSEA), an FDIC-insured financial institution with $500 million in assets, Tuesday announced that Patrick F. Patrick, age 48, has been named president and chief executive officer, subject to approval by the Office of Thrift Supervision.

Patrick also will join Metropolitan's board of directors.

''Pat Patrick is charged with carrying out the turn-around program that began last year with Metropolitan's restructuring and conversion to stock ownership,'' said Webster B. Anderson, chairman of the board of directors.

Patrick was president and CEO of Prudential Bancorporation and Prudential Bank, FSB, from l983 through l988. Prudential was a $700 million publicly held savings bank in Seattle, that was acquired by Pacific First Federal in 1988. From 1980 to 1983, Patrick was executive vice president for United Mutual Savings Bank, Tacoma, Wash. Patrick has been a consultant to troubled banks and thrifts since 1988 and has served on the board of directors of Independence Savings, Vallejo, Calif., and Community Savings in Vancouver, Wash. Previously he was a director of Northern Air Freight, Bellevue, Wash., which was acquired in 1989.

''We are pleased that Pat has accepted the board's offer and look forward to a successful future for Metropolitan Savings. He is recognized as an outstanding bank chief executive officer and is highly regarded by both

the banking and securities industries,'' Anderson added.

Metropolitan is an FDIC-insured, federally-chartered savings and loan association with total assets of $500 million at March 31, 1990. Organized in 1935, Metropolitan has seven branches located in the greater Seattle area. The association converted from mutual to stock ownership on Jan. 9, 1990.

WILMINGTON, MA (MAY 22) BUSINESS WIRE - Shareholders attending the Altron Inc. (NASDAQ:ALRN) annual meeting were told by Samuel Altschuler, chairman and president, that the company's growth prospects remain excellent and that a strong 1991 is expected.

Altron, a producer of printed circuit boards and backplanes, has enjoyed a significant increase in sales and profits over the past several years. In comparing Altron with the industry, Altschuler noted that Altron sales grew 27 percent in 1989 while the overall industry declined. In 1988, Altron sales increased by 33 percent, twice the industry average.

This growth pattern continued into the first quarter of 1990. Earlier this month, Altron reported that first quarter sales reached $14.02 million, up from the $13.13 million reported for the year earlier period.

Quarterly earnings per share of 16 cents were reported, up from 8 cents in 1989. Altschuler explained that Altron had been able to exceed industry growth rates because of its product quality, superior technology, and strong sales and marketing.

Altschuler stated that the company had recently designed and implemented a proprietary computer-aided design program which addresses the needs of design engineers for automated mechanical and electrical design and simulation.

He continued, ''This unique capability, combined with an aggressive sales/marketing program, is expected to provide the impetus for strong sales growth in our backplane business over the next two to three years.''

At the meeting, shareholders approved a stock option plan for non-employee directors and increased the number of shares available for the Employee Stock Purchase Plan.

Arthur Anderson & Co. was reappointed independent auditors. All directors nominated for reelection were approved by the shareholders.

ALAMEDA, CA (MAY 22) BUSINESS WIRE - Aristacom International Inc. Tuesday announced their Application Partnership with Aspect Communications.

Aristacom provides software that links Aspect's CallCenter with applications that reside on IBM System/370 mainframes.

Aristacom's SCIL ASPECT is the latest addition to their SCIL Link (Switch Computer Interface Link) product line. Earlier this year Aristacom also announced three AT&T-related products that link AT&T PBXs into the IBM mainframe environment.

Aristacom specializes in providing the last step in the integration process between switches and mainframes - the link into the user's existing application. The implementation is transparent to end users and avoids expensive and time-consuming reprogramming of application software.

Currently, significant interest in this technology comes from the teleservicing industry where service agents routinely handle large numbers of calls which require some access to mainframe data. By letting technology provide the bridge between the voice and data systems, the agent can provide faster, more personal and more effective service.

Typically, productivity gains of greater than 15 percent, and in many cases gains of 40 percent or more are realized.

SCIL ASPECT is mainframe-based software that permits existing applications to incorporate functions such as synchronized screen management, data directed call routing and preview dialing. The interface is based on a LU6.2 protocol facilitating two-way, peer-to-peer application communications and uses a PS/2 microchannel interface.

SCIL ASPECT works with Aristacom's SCIL Intelligent Call Processor mainframe product to deliver a rich selection of inbound and outbound call-management features.

Aristacom SCIL ASPECT is available in August 1990.

EMERYVILLE, CA (MAY 22) BUSINESS WIRE - Cetus Corp. (NASDAQ:CTUS) and Genetics Institute Inc. (NASDAQ:GENI), of Cambridge, Mass. Tuesday announced a cross-licensing agreement concerning macrophage-colony stimulating factor (M-CSF).

M-CSF is a protein which is expected to be useful in the treatment of cancer and other diseases.

The royalty-free cross-licensing agreement is worldwide except for East Asia. It will allow the companies to proceed independently with development of M-CSF, while avoiding potential disputes over competing patent positions..

In 1989 both Cetus and Genetics Institute received separate patents covering aspects of M-CSF products and methods of production. The agreement covers these patents and certain proprietary rights.

M-CSF is a protein that stimulates the production and functional activities of two kinds of white blood cells called monocytes and macrophages. These cells play an important role in defending the body against infections and also may form a natural defense against cancer.

Cetus is conducting human clinical studies in cancer and infectious disease with M-CSF in the United States and Europe.

Genetics Institute is testing M-CSF in human clinical trials as a direct anti-cancer agent. Additional clinical testing of M-CSF as a cholesterol-lowering agent are planned for this summer.

Cetus Corp is a leading biotechnology company primarily engaged in the development, manufacturing and marketing of pharmaceutical products to treat cancers and serious infectious diseases.

The company also is developing commercial applications of its GeneAmp polymerase chain reaction (PCR) technology. Founded in 1971, Cetus is based in Emeryville, and also operates EuroCetus in Amsterdam, Netherlands.

Genetics Institute is a leading biotechnology firm engaged in the discovery and development of human pharmaceuticals through recombinant DNA and other technologies.

The company has a diversified portfolio of licensed and proprietary pharmaceutical products including three products awaiting FDA approval: erythropoietin (EPO), GM-CSF and Factor VIII. Genetics Institute's first proprietary products include M-CSF and novel bone growth factors (BMPs).

#90142b0647 05/22/1990 ~Business Wire

LOS ANGELES (MAY 22) BUSINESS WIRE - Caesars World Inc. (NYSE/PSE:CAW) Tuesday announced net income for its fiscal 1990 third quarter was $10,501,000, or 44 cents per share, compared with $17,363,000, or 70 cents per share, in the same quarter of fiscal 1989.

Revenue for the quarter ended April 30, 1990, was $217,936,000, compared with $221.76 million in the third quarter of fiscal 1989.

Net income for the first nine months of fiscal 1990 was $29,438,000, or $1.20 per share, compared with $50,459,000, or $2.05 per share, for the nine months of fiscal 1989.

Fiscal 1990 nine-month revenue totaled $646,577,000, compared with $666,359,000 in the same period of fiscal 1989.

Lower contributions to operating income from the company's Nevada operations were the primary factors in the earnings declines. In the fiscal 1990 third quarter, these included lower casino revenues resulting from lower table game win percentages at Caesar's Tahoe in northern Nevada; higher casino payroll and operating costs, higher provisions for bad debts and increased depreciation costs.

These same factors in addition to lower casino revenues resulting from reduced win percentages from all of the company's casino operations, as well as construction disruptions, were principal factors in the earnings decline for the fiscal 1990 nine months, compared with the same year-earlier period.

The increase in contributions to operating income from New Jersey during the fiscal 1990 third quarter, when compared with the same quarter of fiscal 1989, was primarily the result of lower rental costs at Caesars Atlantic City.

During April of 1990, the opening of a new, large casino/hotel in the New Jersey marketplace had an adverse effect on Caesars Atlantic City's casino revenue. Additionally, disruptions caused by the construction of a new parking and transportation center expected to open in July 1990 had a negative influence on Caesars Atlantic City's business.

In New Jersey, the decline in contributions to operating income for the

fiscal 1990 nine months, when compared with the same period of fiscal 1989 was mainly caused by lower casino revenue resulting from lower win percentages and higher casino expenses, partially offset by lower rental costs.

DENVER (MAY 22) BUSINESS WIRE - Crown Resources Corp. Tuesday announced a net profit of $3 million, or 24 cents per share, for the quarter ended March 31, 1990.

This compares with the 1989 first quarter net loss of $0.3 million, or 3 cents per share.

Included in income for the quarter was the $5 million paid by Battle Mountain Gold Co. in March on the grant of an option to enter into a joint venture and is now managing and funding the project. If Battle Mountain exercises the option they will pay Crown a further $5 million and carry Crown's 49 percent share into production.

Gold production commenced at Crown's 30 percent owned Kettle River Project in February and production totalled 11,627 ounces for the two months. Crown's share of gold production was 3,488 ounces for the period although only 231 ounces were sold with the balance still in process at the refinery.

At March 31, 1990, Crown had total assets of $49.4 million and working capital of $6.7 million. Stockholders' equity stood at $21.2 million and there were 11.5 million shares outstanding at the end of the first quarter.

Crown is listed on the NASDAQ National Market System under the trading symbol CRRS and on the Vancouver Stock Exchange under the sybmol CRO.

#90142b0650 05/22/1990 ~Business Wire

SAN JOSE, CA (MAY 22) BUSINESS WIRE - NCR Corp. Tuesday unveiled its new three color and two gray scale X-Station network display graphics workstations for UNIX-based systems that provide up to a 200 percent increase in graphics processing performance over traditional solutions.

NCR showed its new NCR XLC and NCR XLG X-Station models -- designed for business and technical users -- that support 14, 17 and 19 inch color monitors and 17 and 19 inch gray scale monitors respectively. These new X-Stations, shown for the first time at the XHIBITION '90 trade show, expand NCR's X-Station family of products.

List prices for the new NCR X-Station models will range from approximately $4,400 to $6,500, with availability scheduled for the third quarter of 1990.

NCR's X-Stations include the same modular design and graphical user interface as the NCR monochrome X-Stations, thus allowing customers the ability to upgrade monochrome units simply by adding a color adapter board and new monitor.

The new X-Station models provide all of the same features and performance advantages of the monochrome models, including the ability to run distributed X Clients, such as local window managers and terminal emulators. This reduces host processing load and heavy network traffic.

NCR plans to sell these products through its direct and indirect channels to major accounts, value-added resellers, and OEMs.

The X-Station products are designed to allow user access to multiple hosts and simultaneous display of multiple text and/or graphics applications within separate windows. This design combines the best features of a graphics terminal, personal computer and UNIX workstation. Standard Features

The new X-Station products will be manufactured in NCR's Orlando, Florida-based Engineering and Manufacturing division and are backed by NCR's worldwide service and support organization.

NCR Corp., based in Dayton, Ohio, develops, manufactures, markets, and supports business information processing systems for worldwide markets.

UNIX is a registered trademark of AT&T Corp. and Bell Laboratories. The X logo and X Window System are trademarks of the Massachusetts Institute of Technology.

#90142b0651 05/22/1990 ~Business Wire

LENEXA, KN (MAY 22) BUSINESS WIRE - Syntro Corp. (NASDAQ:SYNT) Tuesday announced that the U.S. Patent and Trademark Office (PTO), in response to Syntro's petition, will reassess the validity of a patent previously issued to The Upjohn Co.

More specifically, the PTO's Board of Patent Appeals and Interferences has declared an interference between Upjohn's patent and a pending application under which Syntro's animal health subsidiary, SyntroVet, is licensed. The disputed patent involves genetically engineered vaccines to prevent pseudorabies, an infectious disease of swine.

Syntro and Upjohn have been involved in litigation since March 1989 when Upjohn filed suit in Delaware charging Syntro with direct and willful infringement of the Upjohn patent. A similar suit was filed by Upjohn in Kansas against SyntroVet in September 1989.

In March 1990, Syntro was granted partial summary judgment in the Delaware court, where the court ruled that Syntro could not be held liable for willful or direct infringement. Syntro subsequently filed counterclaims against Upjohn, requesting substantial monetary and punitive damages.

Syntro Corp., founded in 1981, is a Lenexa- and San Diego-based biotechnology company engaged in the development and commercialization of technology with applications in the health sector. Its current strategy is focused on achieving rapid revenue growth and profitability by penetration of the animal health market with innovative vaccines while pursuing corporate alliances that will broaden its product line in the future.

SyntroVet, the company's animal health subsidiary, was established in 1985 to register, manufacture and market products resulting from Syntro's research.

#90142b0655 05/22/1990 ~Business Wire

CALABASAS, CA (MAY 22) BUSINESS WIRE - Jack Lin, president of National Technical Systems Inc. (NASDAQ:NTSC) announced the results of operations for the first quarter of fiscal year 1991.

Consolidated sales for the three months ended April 30, 1990, were $7,715,000 as compared with sales of $7,743,000 for the same quarter in 1989, a decline of $28,000. Net income for the quarter was $201,000, or

3 cents per share, as compared with $285,000, or 5 cents per share.

Lin noted: ''The most significant development that has taken place within the company during the first quarter is the start of the implementation of a Total Quality Enhancement Program (TQEP). This is an on-going Department of Defense and industry initiative to achieve continuous measurable improvement in quality, cost and performance.

''Major aerospace firms have placed these programs in process and some of our customers require it. Successful implementation of TQEP required all employees to attend costly training programs which reduce productivity, increased selling, general and administrative and reduced gross profits in the short term.

''We believe that the initial significant costs which are being incurred will be more than offset in the future with increases in quality of work, cost reductions and employee performance.''

National Technical Systems, with operations in California, Virginia, Masschusetts and Michigan, is one of the largest independent aerospace testing organizations in the United States. The company provides testing services to a wide range of industries, principally aerospace, defense, communications, automotive and nuclear power generations.

#90142b0660 05/22/1990 ~Business Wire

ANCHORAGE, Alaska (MAY 22) BUSINESS WIRE - Martech USA, Inc. (NASDAQ:MUSA) Tuesday revised its outlook for revenue and net income for the year ending August 31, 1990.

According to Ben C. Tisdale, chairman of the board, Martech expects to report revenue in the range of $52 to $55 million for the year, resulting in net income of approximately $1.00 per share. For the nine month period ended August 31, 1989, Martech generated $35,628,000 in revenue and net income of $.67 per share. The Company has changed its fiscal year from November 30 to August 31. For the trailing 12-month period of September 1 1988 to August 31, 1989, Martech's revenue was $41,139,000, resulting in net income of $.64 per share.

''In view of Exxon's announcement in early May regarding its approach to the Valdez oil spill clean up operations this spring and summer, we are

providing our shareholders with a prudent, conservative outlook for our current fiscal year based on no further revenue contribution from Exxon. However, it is important to note that we are still in a bidding process for contracts with Exxon and that we may realize additional revenue from our current estimate of $52 to $55 million.''

''During our shortened 1989 fiscal year, approximately 71% of our revenue base was realized from one project, the clean-up of the Valdez oil spill. Our business has become more diversified during the current fiscal year as a result of growth in our on-shore environmental remediation work,'' said Mr. Tisdale.

For the six months ended February 28, 1990, Martech has reported revenue of $20.8 million and earnings of $.31 per share as compared with revenue of $8.0 million and a loss of $.06 per share for the year earlier period. The first half of the Company's fiscal year, especially the second quarter is prone to seasonality factors. Martech USA completed the initial public offering of 1,400,000 shares of common stock on December 21, 1989 at a price of $10 per share.

Martech USA, Inc. provides a broad range of environmental remediation and marine construction services to major oil and gas companies, industrial companies and governmental entities from its primary operating location in Alaska, the West Coast and Gulf Coast of the United States.

#90142b0661 05/22/1990 ~Business Wire

LOS ANGELES (MAY 22) BUSINESS WIRE - Nikki Haskell is a true renaissance woman whose financial and social empire spans both coasts.

A former Wall Street stockbroker, film producer and artist, she first became famous as a spectacular party giver and host of her own television show in New York City.

Now, over the past few years, she has developed as one of the country's top beauty products entrepreneurs, having introduced ''Tone Caps'' and ''Celluslim'' to the American public.

Tone Caps are diet supplements that use the properties of garlic and papaya to help individuals lose weight. Perhaps her most successful client has been Margaux Hemingway, who lost 75 pounds and is featured on the May cover of Playboy Magazine.

Other Tone Cap users include actress and model Cornelia Guest, model Beverly Johnson, Nabila Khashoggi and Ivana Trump, who carries Tone Caps at the Plaza Hotel in New York.

''Since January, sales of Tone Caps have been up over 300 percent, more than our combined sales in 1986 and 1987,'' said Haskell. ''We will soon be changing the product name to 'Star Caps' and marketing them starting in June through General Nutrition Center (GNC), top-end independent pharmacies and health stores.''

Her second venture, a cellulite control system called Celluslim, is being marketed over the Home Shopping Network and is generating nearly $200,000 in sales per month.

''Cellulite is every woman's nightmare,'' said Haskell. ''I've designed a program to help control all those lumps and bumps you always wanted to get rid of. It's the only system I know of that can actually reduce cellulite buildup.

''We are very pleased with the progress the company has made and look forward to implementing our new marketing strategies, which will push our sales well into the multimillion-dollar category over the next year,'' added Haskell.

Future endeavors include a new company called ''Celebrity Power Products '' which will market private-label products of stars and personalities over the Home Shopping Network and other direct TV markets.

There is also a planned return to television and a proposed moving of corporate offices back to the West Coast.

For further information on any of her products or marketing proposals, Nikki Haskell may be reached at 212/794-9793 or 213/274-8483.

#90142b0662 05/22/1990 ~Business Wire

EMERYVILLE, CA (MAY 22) BUSINESS WIRE - An administrative law judge for the U.S. International Trade Commission has issued a strong decision in favor of Cetus Corp. (NASDAQ:CTUS) in a patent dispute with Erbamont Inc., Cetus annouced Tuesday.

In the case, Erbamont had attempted to block Cetus and its venture partner Ben Venue Laboratories Inc., from importing bulk doxorubicin from a supplier based in Italy. The suit alleged that the supplier, Sicor S.p.A.

was infringing a process patent owned by Farmitalia Carlo-Erba S.p.A. and licensed to Erbamont.

Administrative Law Judge Sidney Harris ruled that the Erbamont patent is invalid, finding that it was obvious and anticipated due to prior publications and patents.

He also ruled that Sicor is not infringing any claims of the patent. In addition, Harris held the patent unenforceable due to inequitable conduct before the U.S. Patent Office. Finally he ruled that neither Erbamont nor Farmitalia are using the patented process and thus are not entitled to protection under U.S. trade laws.

Doxorubicin is the most widely prescribed antitumor drug in the United States today, with sales exceeding $160 million in the United States. Cetus began selling its generic form of doxorubicin in May 1989 after obtaining FDA approval. The brand name version, Adriamycin, is sold by the Adria Laboratories division of Erbamont Inc.

In addition to the ITC action, litigation relating to the Erbamont process patent is pending between Cetus, Erbamont and other parties in federal courts in California and Delaware.

In the California action, Cetus has charged Erbamont and its parent, Montedison, and their affiliate, Farmitalia, with unfair competition and violation of U.S. antitrust laws.

Cetus and Ben Venue formed their 50-50 joint venture in 1985 for the purpose of formulating, manufacturing and marketing generic anticancer products worldwide. Ben Venue is an established manufacturer of small volume pharmaceuticals based in Bedford, Ohio.

Cetus Corp. is a leading biotechnology company primarily engaged in the development, manufacturing and marketing of of pharmaceutical products to treat cancers and serious infectious diseases.

#90142b0666 05/22/1990 ~Business Wire

ALAMEDA, CA (MAY 22) BUSINESS WIRE - Triton Biosciences Inc. Diagnostics Division is now manufacturing and marketing a new monoclonal antibody, RB Gene Product Antibody (MAb1), for research use only in studying the role of the retinoblastoma (RB) gene in the pathogenesis of cancer.

The RB gene was identified as the first ''tumor suppressor'' gene in the

childhood cancer, retinoblastoma. Retinoblastoma occurs during the first four years of life, affecting about one in 20,000 live births worldwide.

Tumor suppressor genes are thought to function by suppressing the cell's ability to proliferate. When this regulation is removed through the genetic loss or mutation of the gene, the cell is then able to proliferate uncontrollably, one of the characteristics of cancer. The loss or inactivation of the RB gene was established as the key event in retinoblastoma tumor development.

RB gene mutations have also been demonstrated in osteosarcoma, small cell lung carcinoma, breast cancer, bladder carcinoma and prostate carcinoma cell lines or human tumors. Triton researchers are exploring possible applications of the RB Gene Product Antibody (MAb1) in these other indications.

The RB Gene Product Antibody (MAb1) has been shown to detect, by radioimmunoprecipitation and Western blot analyses, an unphosphorylated protein of Mr 110 kD. An associated, less distinct, variable region of Mr 100 kD to 116 kD was also identified, which represents the various phosphorylated forms of the RB protein.

Triton researchers established the specificity of the antibody by positive reactivity with bladder carcinoma and normal fetal fibroblast cell lines known to express the RB protein.

Both Western blot and radioimmunoprecipitation reactivity have been blocked by antibody preadsorption with a synthetic peptide from the published RB DNA sequence. Negative reactivity was demonstrated with a retinoblastoma cell line known to lack the RB gene.

Triton Biosciences is a wholly-owned health care subsidiary of Houston-based Shell Oil Co. The company is focused on the development and commercialization of diagnostics and pharmaceuticals for cancer, viral diseases and other serious illnesses.

LITTLETON, MA (MAY 22) BUSINESS WIRE - Alliant Computer Systems Corp. (NASDAQ:ALNT) Tuesday announced the appointment of Richard B. Goldman as vice president of finance and chief financial officer.

Goldman was formerly the vice president of finance, administration and planning and chief financial officer at Prime Computer Inc. of Natick,

Mass. Goldman also held management positions at Digital Equipment Corp. and The Gillette Co.

Goldman will report directly to Ronald H. Gruner, president and chief executive officer, when he joins Alliant on June 4, 1990. ''We are delighted Dick is joining our senior management team,'' said Gruner. ''He made major contributions toward the growth of Prime Computer. His 20 years of financial and operational experience and large company perspective will be an important asset to Alliant as it continues its worldwide expansion.''

Goldman lives in Weston, Mass. with his wife and four children. He earned an M.B.A. in finance from Boston University in 1974, and a B.S. in business administration from Northeastern University in 1969.

Alliant Computer Systems Corp. manufactures standards-based parallel supercomputers with visualization tools that enable scientists and engineers to quickly interpret and solve complex problems.

#90142b0674 05/22/1990 ~Business Wire

ALAMEDA, CA (MAY 22) BUSINESS WIRE - A new research assay kit for detecting the c-erbB-2 oncogene protein, which may be a new prognostic factor in breast cancer, is now being manufactured and marketed, for research use only, from Triton Biosciences Inc., Diagnostics Division.

The TRITON c-erbB-2 (HER-2/neu) ICA (Immunocytochemical Assay) Kit can be used to test frozen sections or formalin-fixed, paraffin-embedded tissue samples in an immunocytochemical format. the kit contains all reagents necessary to perform the assay, including negative control serum.

A detailed protocol is included with the kit. A useful staining guide and positive control slides are also available separately.

The TRITON c-erB-2 (HER-2/neu) ICA Kit identifies the c-erbB-2 protein in fixed tissue sections through an immunostaining procedure that results in a red-brown stain on the membrane of cancer cells. Normal cells or supportive structures are not stained.

The pathologist reviewing the slides is able to distinguish those areas of positive staining for the c-erbB-2 protein from normal or supporting cells by tissue counterstaining with hematoxylin to detail overall tissue

morphology.

The test kit is marketed under the basic oncogene patent rights (U.S. Patent 4,699,877 and foreign counterparts) licensed by Triton on an exclusive, worldwide basis.

Standard prognostic factors in breast cancer include lymph node involvement, clinical staging, tumor size and hormone receptor status. Independent research has linked the overexpression of the c-erbB-2 protein in breast cancer with an earlier time to recurrence and a less favorable prognosis. Preliminary findings in ovarian cancer show similar results.

According to National Cancer Institute estimates, breast and ovarian cancers in the United States could account for an estimated 171,400 new cases and 56,700 deaths in 1990.

Triton Biosciences Inc. is a wholly owned health care subsidiary of Houston-based Shell Oil Co. The company focuses on the commercialization of diagnostics and pharmaceuticals for cancer, viral diseases and other serious illnesses.

EL SEGUNDO, CA (MAY 22) BUSINESS WIRE - Aura Systems Inc. (NASDAQ:AURA), a leading innovator of HDTV display systems and filmless projection systems, has received a $1.4 million KHILS add-on contract from the U.S. Air Force, it was announced Tuesday by Harry Kurtzman, president of Aura Systems Inc.

Under the KHILS Phase II contract, Aura will continue its research and development of an advanced missile seeker testing system at Eglin Air Force Base, which Aura began in 1988. The system is a high-performance laser scene projector with high resolution and heat sensitvity for simulating flight tests on missile seekers.

''This competitive award further establishes Aura as the leader in advanced scene projection systems,'' said Kurtzman. ''Our success in this area should achieve significant results for the U.S. Air Force in testing its missile systems.''

Founded in 1987, Aura Systems is a leader in magnetic-suspension technology, electro-optic projection systems and advanced computing systems. The company has headquarters in El Segundo.

ANAHEIM, CA (MAY 22) BUSINESS WIRE - Added funding totaling more than $100 million for work on the U.S. Air Force Peacekeeper intercontinental ballistic missile (ICBM) program has been awarded to Rockwell International Corp.

Rockwell's Autonetics ICBM Systems Division is responsible for integration of the Peacekeeper guidance and control system. Work on the program is under contract to the Air Force Systems Command's Ballistic Missile Organization.

The larger of the two efforts, for $81 million, is for the production of 12 Peacekeeper guidance and control systems and includes $4.9 million in previously received funding. The funds are an add-on to the division's on-going production contract.

The second segment added $24 million to an existing Peacekeeper support program, which calls for sustaining engineering services for the guidance and control system.

The division, a part of Rockwell's Defense Electronics business, has been involved in Peacekeeper development and production since September 1979. It has some 500 employees assigned to the project and 35 key suppliers in 18 states (see table below). The Peacekeeper guidance and control system controls and monitors missile performance from pre-launch power application on the ground, through the inflight deployment of the missile's re-entry vehicles.

Rockwell International is a $12 billion multi-industry company applying advanced technology to a wide range of products in its aerospace, electronics, automotive and graphics businesses.

LONG BEACH, CA (MAY 22) BUSINESS WIRE - HQ Office Supplies Warehouse Inc. (OTC:HQOSA, Class A common stock; PSE:HQO) Tuesday announced that its annual meeting of stockholders will be held on June 12 at the Ramada Renaissance Hotel, 111 E. Ocean Blvd., Long Beach, Calif., at 10 a.m. Pacific Daylight Time.

The board of directors fixed May 22 as the record date for stockholders entitled to notice of and to vote at the meeting.

HQ Office Supplies Warehouse Inc.'s merchandising strategy is to offer a wide selection of quality, brand-name office products, including general office supplies, business machines, office furniture and other business-related products, at discount prices primarily to small and medium-sized businesses.

The stores will average at least 25,000 square feet of selling space with an inventory of approximately 8,000 stock keeping units.

CHATTANOOGA, TN (MAY 22) BUSINESS WIRE - Astec Industries Inc. (NASDAQ/NMS:ASTE) Tuesday announced a development in the patent litigation between its Barber-Greene subsidiary and CMI Corp.

In the U.S. District Court for the Northern District of Illinois, Eastern Division, in Chicago, the jury awarded $4,457,066 to CMI. Interest on such amount has yet to be determined but Barber-Greene is not responsible for CMI's legal fees and court costs.

As previously reported Barber-Greene had been found liabile for infringement of certain patents licensed to CMI who had contended that it was entitled to damages ranging from $55 million to $102 million. Immediately prior to trial, CMI increased its claims to $71 million to

$150 million; however, during the trial CMI reduced their claims to a range of $15 million to $38 million.

We anticipate filing certain post-judgment motions in an effort to reduce the amount of the jury award.

Astec, a manufacturer of asphalt mixing plants, paving equipment, heat transfer equipment, aggregate crushing equipment and excavating and trenching equipment is traded over-the-counter and is reported on the NASDAQ National Market System under the symbol ASTE.

ANDOVER, MA (MAY 22) BUSINESS WIRE - Vicor Corp. (NASDAQ:VICR) and Lorain Products, Lorain, Ohio, a division of Reliance Comm/Tec Corp., have agreed to an expansion of their license agreement which will allow Lorain to manufacture and sell custom power products, on a non-exclusive basis, within an expanded territory.

The accord also grants Reliance and its affiliated companies broadened rights relative to captive use of Vicor's technology.

Under a 1986 merchant license agreement, Lorain was granted rights to manufacture and sell power systems - an essential element in virtually all electronic systems - utilizing Vicor's patented power conversion technology within the Western Hemisphere telecommunications markets. The new pact allows Lorain to manufacture and sell licensed custom products to telecommunications customers in an expanded territory which includes Europe and protects all licensed products manufactured by Lorain under all of Vicor's current and future patents.

It is also Vicor's first captive license in that it grants non-exclusive rights to Reliance and its affiliated companies relative to embedded use of Vicor's power technology within their commerical products.

The new agreement reflects the complementary strengths and market approaches of the two companies: Vicor has pursued a strategy which focuses on worldwide sales of standard families of compact component-level power converters and configurable products, while Lorain has concentrated on sales of custom power systems based upon Vicor's technology. Vicor's patented technology allows rapid development of economical power systems which are smaller, more efficient and more reliable than most competitive offerings.

Both parties see advantages in the new arrangement. Vicor, through its wholly owned licensing subsidiary VLT Corp., expects to receive incremental royalty revenues from Lorain, and Lorain expects to benefit from increased sales of custom power supplies within an expanded sales territory. The agreement is part of Vicor's strategy aimed at expanding and strengthening its family of merchant and captive licensees.

SALT LAKE CITY (MAY 22) BUSINESS WIRE - Plexus Resources Corp. announced its qualification and designation as a foreign private issuer for reporting purposes with the Securities and Exchange Commission and The National Association of Securities Dealers.

''This change in designation and reporting requirements merely eliminates the preparation of largely duplicate filings for Canadian and U.S. regulatory authorities while continuing to assure responsible reporting and disclosure to Plexus' shareholders,'' stated Michael D. Fowler, vice president and chief financial officer of Plexus.

''The revised filing status was justified by a shift in Plexus' shareholder constituency to majority ownership by Canadian citizens,'' continued Fowler.

''The recently announced private-placement transaction with TOTAL Energold Corp., a Canadian corporation, wherein Plexus will issue an additional 6 million common shares to TOTAL, will further increase Canadian ownership of Plexus common shares when completed. Consideration included in the TOTAL Energold private placement is valued at CDN $3 (or approximately US $2.55) per common share.''

Plexus Resources Corp. is an expanding diversified U.S. natural resources organization with extensive base base metal and precious metal interests as well as oil and gas production, the company's shares are traded through the Toronto Stock Exchange (PXS) and in the United States on NASDAQ (PLUSF).

#90142b0688 05/22/1990 ~Business Wire
GARDEN CITY, NY (MAY 22) BUSINESS WIRE - Computer Associates

International Inc. (NYSE: CA) Tuesday announced revenue and net income results for the fiscal year ended March 31.

Revenue for the year was $1,295,987,000, an increase of 5 percent compared with revenue of $1,232,287,000 for last fiscal year. Pre-tax income for the year grew 4 percent to $235,693,000 from $227,239,000 for the prior year.

Net income for fiscal 1990 was $157,751,000 (85 cents per share), a growth of 21 percent compared to net income of $130,319,000 (74 cents per share or 71 cents per share on a fully diluted basis) for fiscal year 1989.

For the quarter ended March 31, revenue was $363,656,000, an increase of 2 percent over the revenue of $357,842,000 for last year's comparable quarter. Pre-tax income for the quarter was $100,139,000 compared with pre-tax income of $75,340,000 for the same quarter last year, an increase of 33 percent.

Net income grew 58 percent to $66,928,000 (36 cents per share) compared with net income of $42,419,000 (23 cents per share) for last year's quarter.

Cullinet Software Inc. was acquired by Computer Associates on Sept. 12, 1989, and treated for accounting purposes as a ''pooling of interests.'' Prior to the acquisition, Cullinet had a fiscal year which ended on April 30 of each year.

The combined results reported above for the fiscal year ended March 31, 1989 should be used for comparison with the results for the fiscal year ended March 31, because all periods reported for both the operations of Cullinet and Computer Associates end on March 31 of the respective years.

The combined results reported above, however, do differ from the combined audited results for the fiscal year ended March 31, 1989, previously published and to be published.

The combined audited results reflect the combination of Cullinet's audited results for the fiscal year ended April 30, 1989, with the audited results of Computer Associates for the fiscal year ended March 31, 1989. Such combined audited results for fiscal 1989 show revenue of $1,233,111,000 and net income of $148,292,000 (81 cents per share on a fully diluted basis).

Computer Associates is engaged, on a world-wide basis, in the development, marketing and supports of systems management, information management and business applications software for a broad range of mainframe, mid-range and desktop computers. Computer Associates today has over 6,500 employees located in over 24 countries around the world.

LOS ALTOS, CA (MAY 22) BUSINESS WIRE - HyperRacks Inc. announced it would license to ToolBook developers and corporate end users its OpenField technology.

Apple Computer licensed this technology in December 1989 for the benefit of its HyperCard developers and end users. The OpenField technology includes rights to U.S. patents 4,486,857 and 4,736,308.

Heckel said: ''We see the bundling of a ToolBook runtime with Microsoft Windows as further evidence that Apple Computer continues to define the future of the personal computer market. We are focusing our primary development efforts on the Macintosh platform.'' Apple began bundling HyperCard with the Macintosh in 1987.

HyperRacks president, Paul Heckel, developed and introduced the first card and stack metaphor product, Zoomracks, in 1985. ''Zoomracks' card and rack metaphor is a more general version of HyperCard's card and stack metaphor '' according to Heckel. ''We will bring the full card and rack metaphor to HyperCard this summer with HyperRacks, a HyperCard add-on.''

Heckel said that HyperRacks Inc. is looking into porting its HyperRacks product to ToolBook and similar products after establishing it on the

Macintosh.

When Zoomracks was introduced, Alan Kay, Apple Fellow and the leader of the group at Xerox PARC that developed much of the technology popularized by the Macintosh, called Zoomracks' rack metaphor ''an important new metaphor by the author of the best book on user interface design.'' Heckel is the author of ''The Elements of Friendly Software Design.''

     #90142b0694 05/22/1990 ~Business Wire
NEW YORK (MAY 22) BUSINESS WIRE - Westvaco Corp. (NYSE:W), a major manufacturer of paper, packaging and chemicals, reported Tuesday its second quarter and six-month sales and earnings for the 1990 fiscal period which ended April 30.

Second quarter sales were $582,972,000, a new record for the second quarter, and exceeded sales of $561,711,000 in the same quarter last year by 3.8 percent.

Sales for the first six months were $1,168,465,000, compared to $1,116,333,000 for the same period last year, an increase of 4.7 percent and an all-time sales record for the first six months.

Second quarter earnings were $45,970,000, or 71 cents per share of common stock, representing a decline of 21 percent from $58,165,000, or 90 cents per share, earned in the same period last year.

Earnings for the first six months of the year totaled $92,408,000, or $1.42 per share. In the same period last year, earnings for the first six months were $106,815,000, or $1.65 a share.

Commenting on the company's results, John A. Luke, president and chief executive officer of Westvaco said, ''Growth in the United States econcomy remains at only moderate levels, and there were several unusual factors which affected our second quarter in comparison with last year.

''First, in April of this year, as a final part of our most recent major growth program, we took one of our largest coated paper machines out of operation for most of the month to modify it for the production of more advanced products.

''This and other similar work reduced our sales somewhat and cost us approximately 7 cents per share in earnings.

''By contrast, in the second quarter of last year, we also did some major work in our plants, but this was more than offset by gains from the annuitization of certain pension benefits resulting in a net addition to earnings of three cents per share.

These items together represent a difference of 10 cents a share in favor of last year. Taking the 10 cents into account, the remaining difference in earnings in comparison with last year's second quarter is a decline of 10 percent.

#90142b0695 05/22/1990 ~Business Wire

WESTFORD, MA (MAY 22) BUSINESS WIRE - Iris Associates Tuesday announced a unique new software product, called 3-for-3, that enables Lotus 1-2-3 Release 3 to operate within a window in the Microsoft Windows 3 operating environment. Iris 3-for-3 is available immediately.

Many users who have grown accustomed to the power of 1-2-3 Release 3 have requested an increased level of compatibility with the Microsoft Windows operating environment.

Although the forthcoming upgrade to 1-2-3, Release 3.1, will offer compatibility with all operating modes of Microsoft Windows 3, it will do so only in a "full screen" fashion. 3-for-3, on the other hand, weds 1-2-3 to Windows 3 so that it feels to the user just like any other Windows application.

When using it with 3-for-3, 1-2-3 operates in a sizeable window, offering pull-down menus, mouse support, and use of Windows virtual memory management. It enables Lotus users to print to the wide range of Windows-supported printers. Users can also choose from a wide variety of fonts and colors for display and printing.

With 3-for-3, Lotus users can also transfer their spreadsheet information into a variety of Windows programs such as word processors. Users can exchange text and graphs through the Windows Clipboard, or can use the "DDE" (Dynamic Data Exchange) feature to have graphs or ranges contained in 1-2-3 dynamically updated in related word processor documents when the spreadsheet changes.

When a user interacts with 1-2-3 under Windows, all existing 1-2-3 keystrokes, interfaces, and macros remain the same. No special training is

required, and installation takes minutes.

"Because Lotus 1-2-3 Release 3 was engineered to function in a wide variety of operating environments, it was possible for us to independently create a modular software package that weds 1-2-3 to Windows 3," said Ray Ozzie, president of Iris Associates. "Users will find that they can do amazing things when combining the power of 1-2-3 with other applications in the newly released Windows 3 operating environment."

The software required to run 3-for-3 is Lotus 1-2-3 Release 3 and Microsoft Windows 3. The hardware requirements are that the computer must be capable of running Windows 3 and must have a 286 or 386 processor with a minimum of two megabytes of memory.

3-for-3 is being sold both through dealers and directly from Iris at 1-800-225-5800. The suggested retail price is $99. For more information, contact Iris Associates, Inc., P.O. Box 735, Westford, MA 01886, (508) 692-2800.

IRVING, TX (MAY 22) BUSINESS WIRE - Michaels Stores Inc. (AMEX:MKE) Tuesday reported its net income for the first quarter ended April 29 improved nine percent to $444,000, or 4 cents per share, on a more than 27 percent increase in sales, to $71.7 million.

In last year's comparable period, the company earned $408,000, which also equated to 4 cents per share, on revenues of $56.2 million.

According to President and Chief Executive B. B. Tuley, ''Michaels' sales are clearly beginning to benefit from the new marketing and merchandising programs established earlier in the year. While our earnings are consistent with expectations for the first quarter, the sharp growth in sales suggests we're off to a very good start in fiscal 1990...it's going to be an exciting year for us.''

As previously reported, sales of Michaels stores in operation for the first quarter of both fiscal 1989 and 1990 rose just over 12 percent to $61.7 million, from $55 million. During the latest quarter, the company opened six new stores.

Michaels Stores Inc. owns and operates a chain of 127 specialty retail stores located in 17 states throughout the southern half and midwestern sections of the United States, featuring a wide selection of competitively priced home decoration and arts and crafts items.

#90142b0701 05/22/1990 ~Business Wire

LONDON (MAY 22) BUSINESS WIRE - Polly Peck International PLC and Sansui Electric Co. Tuesday signed a letter of intent for the sale, subject to contract, of Polly Peck's wholly owned subsidiaries comprising the Capetronic Group and the Imperial SpA Group to Sansui which is currently a 51 percent owned subsidiary of Polly Peck.

Capetronic, whose principal operations are based in the United States, Taiwan, Malaysia, Hong Kong and China, is among the world's largest OEM manufacturers of consumer and computer electronic equipment.

Imperial, which is based in Italy, manufactures color televisions and distributes a wide range of color televisions, VCRs and other goods such as satellite receivers and antennae.

The total acquisition price for Capetronic and Imperial is Yen 79.8bn ($521.9 million). Sansui intends to finance the acquisition through the issue of new shares for cash. The major part of the issue will be subscribed for by Polly Peck with the balance being placed with third parties.

The cash received by Sansui will be used to satisfy the consideration for the purchase of Capetronic and Imperial. As the result of the transaction it is anticipated that Polly Peck's shareholding in the enlarged Sansui will be approximately 70 percent.

Cash received by Polly Peck, over and above the cash paid for the subscription for the new Sansui shares, will be used to reduce Polly Peck group debt. Polly Peck originally purchased its interest in Sansui in January 1990.

Completion of the transaction is subject, inter alia, to a number of conditions, including the admission by the Tokyo and Osaka Stock Exchanges of the new shares to listing in the First Section of each exchange. It is anticipated that the issue price of the new shares will be fixed in the middle of June 1990 and that completion of the transaction will take place during July 1990.

Polly Peck International PLC is a London-based international manufacturing and trading company with a major emphasis on fresh produce, electronics and leisure. Recently, the company acquired the Del Monte fresh fruit company.

SAN JOSE, CA (MAY 22) BUSINESS WIRE - NKR Research Inc. and Unisys announced Tuesday that NKR will provide NKR Basic to the U.S. Air Force for the Desktop III Desktop Project under subcontracting arrangement with Unisys Corp.

The NKR Basic compiler was included in the winning bid, satisfying the Basic language requirement of the procurement.

An estimated 250,000 PCs are slated to ship under this award. The requirement for Basic is approximately 20,000 compilers. NKR Basic implements the FIPS 68-2 (ANSI X3.113) standard for Basic, which was required in the award.

This standard is required for procurement by military and civilian agencies alike. As part of the offered product, NKR will also provide the NKR GW converter, a software tool that allows users to translate programs to NKR Basic from the Microsoft GW Basic language.

NKR Basic serves the ''open systems'' environment and its requirement for portability, while also addressing the needs of existing users. PC users programming in Basic under MS-DOS can now conveniently translate existing GW Basic programs to NKR Basic and write new programs under MS-DOS directly in NKR Basic.

Because NKR Basic is available for the UNIX environment, users can also move their applications with ease to run under UNIX on PCs, on workstations, or on other systems. This portability feature promises to reduce costs in government and promote continued popularity for Basic among users as a language that is easy to learn and convenient to use.

NKR Research Inc. is based in San Jose, Calif., and develops high performance state-of-the-art computer language compilers and other software products. All of NKR's products are fully supported and can be rapidly reengineered to run on new computer system architectures with reduced maintenances.

Other NKR products include NKR Fortran, a high performance, globally optimizing compiler with VAX/VMS Fortran extensions.

Unisys Corp., the prime contractor for Desktop III, is a $10 billion manufacturer of commercial information systems, defense systems and related services. it has approximately 80,000 employees and 60,000 customers in over 100 countries.

ORLANDO, FL (MAY 22) BUSINESS WIRE - The 760-room Twin Towers Hotel and Convention Center, located at the entrance to Universal Studios Florida, has announced its 1990 summer packages, effective June 30 through Dec. 21.

All packages feature one-day admission to Universal Studios Florida and

unlimited use of the hotel's health club and tennis/paddleball courts.

The hotel's two-night "Taste of Universal" package is priced at $115 per person, double occupancy. "Twin Temptation," a four-night package, is priced at $329 per person, double occupancy.

Additional amenities include one-day admission to Sea World; welcome cocktail; daily buffet breakfast; one dinner in the hotel's Palm Court Restaurant; and choice of dinner at one of Orlando Entertains' dinner theaters: King Henry's Feast, Mardis Gras, Caruso's Palace or Fort Liberty.

In addition to those amenities, "The Towers Grand Slam" five-night package priced at $489 per person, double occupancy, includes a four-day, All-Three-Parks Passport to the Walt Disney World Resort.

A six-night "Honeymoon/Anniversary" package is offered for $1,119 per couple. Including all the amenities featured in "The Towers Grand Slam," this package also offers luxury accommodations with upgrade; admission to Walt Disney World's Pleasure Island and five "Disney Dollars;" admission to Church Street Station; fresh flowers in the room; a bottle of chilled champagne; one-day breakfast in bed and four days of buffet breakfast.

Special children's packages are available. All packages are commissionable to travel agents.

The Twin Towers Hotel and Convention Center is nearing completion of a $29 million renovation. By June, the north tower will be ready for occupancy. In July, the hotel plans to unveil their two new restaurants, an exciting lounge with live entertainment and the pool bar.

Located just 15 minutes from Orlando International Airport and less than 20 minutes from the area's most popular attractions, the Twin Towers Hotel and Convention Center is within camera shot of Universal Studios Florida and the Hard Rock Cafe Orlando, which is scheduled to open in June. Hotel guests staying in rooms that face west have a bird's eye view of the attraction/production studio.

NEW ORLEANS (MAY 22) BUSINESS WIRE - ROLM, the telecommunications joint venture of IBM and Siemens, Tuesday announced CallDisplay, a new product that significantly improves productivity in call centers, and new international capabilities for its widely used PhoneMail system.

CallDisplay and PhoneMail's new Japanese and French-Canadian capabilities, along with ROLM's new CallBridge, which was announced on May 15, are being demonstrated in New Orleans at the International Communications Association (ICA) conference and exhibition.

CallDisplay allows call center managers to view moment-to-moment activity at a glance. CallDisplay is a software product that enhances the ROLM Automatic Call Distribution (ACD) current status display. Offering color screens and graphics on an IBM Personal System/2, CallDisplay is menu-driven, easy-to-use and easy-to-read. It is being demonstrated in the ROLM booth at ICA.

ICA attendees can see PhoneMail being demonstrated, in the IBM booth, using Japanese and French-Canadian prompts. Japan and Canada represent the two largest countries outside the United States where customers use ROLM's PhoneMail System.

ROLM's CallBridge -- a new offering that will allow customers to implement advanced, integrated voice and data applications for inbound and outbound telephone calls -- is being demonstrated in the IBM booth and in the ROLM booth.

ROLM also announced today ROLM 9751 computerized branch exchange (CBX) support for AT&T's ACCUNET Switched 56 data service, using the T1 card available with ROLM's Release 9005 software. The 9751 now also supports connections to the following AT&T voice services: MEGACOM, MEGACOM 800 and Software Defined Network.

In addition, 9751 users who are customers of MCI's 800 ESP with Dialed Number Identification Service (DNIS) capability now can receive both Automatic Number Identification (ANI) and DNIS.

ROLM also said today that it has scheduled a press conference at ICA tomorrow to announce new business relationships to further serve its customers.

In addition, ROLM announced new partnerships with 12 companies. Of ROLM's 24 Business Partners, 17 are demonstrating their products in the ROLM booth during ICA. CallDisplay

HOPKINTON, MA (MAY 22) BUSINESS WIRE - Just three months after introducing its first inter-networking software, Trellis Software is issuing an upgrade that doubles the capability of its Banyan/Novell Gateway.

Version 2.0 of the Gateway provides complete access to Banyan VINES file services for users of Novell Inc.'s Netware operating system. The upgrade will be distributed free to customers participating in Trellis Software's extensive support program.

''We've always planned to enhance Trellis Gateway's functionality,'' said Bob Shea, vice president of business development for Trellis Software, which is based in Hopkinton. ''It's just that customer demand for the Gateway product was so overwhelming that we released the initial component of the gateway as soon as it was ready.''

The dual capabilities of version 2.0 resolve a critical problem faced by many of Banyan's customers, by using a custom DOS file bridge to connect islands of previously incompatible operating systems. This is critical for many Banyan users, who frequently select the VINES software because of its superior wide-area capabilities.

''Now the pockets of Novell users that almost every company must cope with can have access to VINES,'' said Shea. ''It completes the functionality of our Gateway product.''

The unusually rapid development of this new product illustrates Trellis's commitment to provide significant upgrades on a rapid basis, often at no cost to users.

''We expect to continue to provide this kind of added functionality on the timely basis to all of our products,'' said Shea.

No price change accompanies the current enhancement. The Gateway sells for $1,795 per bridge pair, with support for an unlimited number of client workstations.

The Gateway software resides on two dedicated bridge workstations which contains separate network interface cards for each of the two operating systems. The works station runs DOS 3.0 or above. -0-

Trellis is a leading systems integrator, trainer, networking applications developer, and software publisher. Its portfolio of products include calendaring, menuing, bulleting board, mirroring fax and an optical disk interface for Banyan VINES networks.

Trellis, a privately held company, has offices in Hopkinton, Falls Church,

Va., and Princeton, N.J.

Banyan and VINES are registered trademarks of Banyan Systems Inc.

Novell and NetWare are registered trademarks of Novell Inc.

NEW YORK (MAY 22) BUSINESS WIRE - Millicom Inc. (NASDAQ:MILL) announced Tuesday that its subsidiary, Millicom Radio Telephone Co. Inc. has been granted a waiver from the Federal Communications Commission (FCC) which will permit Millicom to offer customers a nationwide two-way mobile data and voice communications network in the 900 MHz radio frequency band.

The Specialized Mobile Radio (SMR) system is an inexpensive, private, two-way radio service that offers an efficient method of using scarce radio frequency spectrum. SMR uses trunking technology, that is, the automatic sharing of common communication channels among a large group of users, to achieve this efficiency.

SMR is particularly well-suited to mobile dispatch businesses such as taxi and delivery services because it enables group and individual calls as well as connection to the public switched telephone network (PSTN). The network is expected to develop even greater system capacity by providing digital data as well as as voice capabilities.

Millicom's network, which is expected to incorporate at least 30 major U.S. cities, will include one to six 10-20 channel high power base stations in these strategically located urban areas. The system will handle data transmissions in the digital format and voice transmissions in an analog format until digital technology is available. The innovative system to be constructed by Millicom Radio Telephone Co. is expected to incorporate both voice and digital data transmission on the same channel.

The Millicom SMR system should have the capability to interface with the PSTN, allowing calls from an SMR unit to a wireline telephone, a remote host computer, or a public data base. Millicom's nationwide SMR service should also accommodate remote data gathering and remote monitoring, used for example, by alarm systems and utilities.

Millicom currently holds SMR licenses in seven U.S. cities: Atlanta, Dallas, Honolulu, Jacksonville, Orlando, Phoenix and Tampa Bay. The nationwide system will incorporate at least another 24 major cities where Millicom has obtained agreements with the current license holders to

construct SMR systems.

Millicom Inc. is a diversified international communications company with interests in telecommunications, satellite television and media. The FCC recently awarded Millicom the first Personal Communications Network (PCN) experimental licenses in the U.S., pursuant to which Millicom will construct PCN systems in Houston and Orlando. PCN is expected to be the next generation of cellular, mobile communications. PCN technology should enable highly personalized and portable voice and data communications via pocket-size phones.

RONKONKOMA, NY (MAY 22) BUSINESS WIRE - Logitek Inc. (NASDAQ Symbol:LGTK) Tuesday announced results for the third quarter and nine months ended March 31, 1990.

In making the announcement, the company noted that sales for the lastest third quarter rose to $1,520,360 from $1,407,826 for the three months ended March 31, 1989.

Net income for the third quarter ended March 31, 1990 increased some 300 percent to $68,474, or 4 cents per share, from $17,230, or 1 cent per share, for the previous third quarter.

For the nine months ended March 31, 1990, net sales increased sharply to $3,878,013, up from $2,883,237 for the previous comparable nine months.

Net income for the latest nine months was $130,676, or 8 cents per share, compared to a loss of $215,445, or 13 cents per share, for the same period of the prior year.

Commenting on the results, Herbert L. Fischer, president of Logitek, stated, ''The excellent performance achieved during the latest third quarter and nine months again demonstrated how completely the company has recovered from the manufacturing disruptions experienced during fiscal 1989 due to problems associated with a government contract.

''Having successfully resolved the problems and completing the contract, we then received and successfully completed two additional government contracts for the same part. Based on results through the third quarter

and the positive trends that are continuing in the current quarter, we remain optimistic that fiscal 1990 will prove an extremely strong year in both sales and earnings for Logitek,'' Fischer concluded.

Logitek Inc. manufactures and markets electronic power monitors and controls and electronic power supplies for use in mobile systems such as aircraft and space vehicles, aboard ships, vehicular mobile communications and radar systems, off-shore rigs and pipeline control stations. In addition, Logitek is also engaged in the contract manufacturing operations.

CLINTON, NJ (MAY 22) BUSINESS WIRE - Foster Wheeler International Corp. and IHI (Ishikawa Harima Heavy Industries), have signed a Cooperation Agreement to undertake pharmaceutical projects for Japanese companies worldwide and non-Japanese pharmaceutical companies in Japan.

The agreement was signed in Tokyo by N. William Atwater, executive vice president of Foster Wheeler Corp., and S. Takahaski, executive vice president of IHI.

IHI is a leading Japanese engineering and heavy industries manufacturing organization that covers a wide diversity of high-grade engineering technologies. It is active in the design, engineering and construction of

equipment and facilities for the manufacturing, machinery, marine and aerospace industries.

Foster Wheeler, one of the largest pharmaceutical engineering organizations in the world, will be putting its total international capability at the disposal of IHI. Both companies have a relationship which goes back over 40 years and FW will now help to train IHI engineers and advise on their execution of pharmaceutical works.

According to Gianni Bachiddu, Foster Wheeler International Corp. executive vice president, ''We see very great business potential in our becoming part of the global investment plans of the Japanese pharmaceutical industry as well as assisting those European and American pharmaceutical companies wishing to invest in Japan.

The pharmaceuticals market is growing rapidly in Japan, which has the world's highest spenders on prescription drugs. In 1987, for example, expenditure per head there was $166 compared with West Germany ($136), USA ($109) and the UK ($51).

The Japanese pharmaceutical industry has been stimulated to set up new manufacturing facilities overseas as a result of profit erosion in the domestic market and a need to establish a world market to defray spiralling launch costs of new products. These have been developed as a result of heavy investment in the research and development field, and currently many technically-advanced new health care products show exciting potential.

The pharmaceutical industry recognizes few national boundaries. For this reason many international pharmaceutical companies are setting up tripartite research centers -- based in the United States, Europe and Japan.

Foster Wheeler has been involved with several overseas initiatives by Japanese pharmaceutical companies, including engineering a manufacturing facility for a hypertension treatment in Ireland and a plant for a major Japanese pharmaceutical house in France.

Foster Wheeler International Corp. is the wholly owned subsidiary of Foster Wheeler Corp. that directs the activities of the organizations overseas affiliates.

Foster Wheeler Corp. is a diversified international design, engineering, manufacturing, construction, real estate development, environmental and service organization with subsidiaries and affiliates operating worldwide. The corporation's headquarters are at Clinton.

CORAL GABLES, FL (MAY 22) BUSINESS WIRE - BLOC Development Corp. (NASDAQ: BDEV) announced Tuesday that its wholly owned BLOC Publishing Corp. subsidiary has acquired exclusive publishing rights to its first Microsoft Windows-based PC software product, marking BLOC's initial entry into this expanding marketplace.

Tentatively named WindowShop, this program is a fully integrated set of basic business applications, whose modules include word processing, spreadsheet, database, graphics, communications and various other capabilities.

''We are excited about WindowShop's potential in providing novice PC users low-cost access to broad applications utilizing the power of MS-Windows 3.0,'' stated Gilbert Fiorentino, BLOC Publishing's president. ''Pending discussions with Microsoft, we intend to sell WindowShop bundled with MS-Windows 3.0 for an initial Manufacturer's Suggested Retail Price of $199.95,'' Fiorentino continued.

Based in Coral Gables, BLOC develops, publishes and markets business, personal productivity and information management software products for the IBM PC, PS/2, IBM compatible and Apple Macintosh markets. In addition, the company also provides business automation services to small and mid-sized companies.

TULSA, OK (MAY 22) BUSINESS WIRE - Memorex Telex Tuesday announced a technologically advanced twinax line printer that offers increased reliability and performance for System 36/38 and AS/400 users.

The Memorex Telex 1234 Line Printer is available in two models: Model 2 prints at 450 lines per minute; Model 4 prints at 800 lines per minute. ''The combination of a patented shuttle assembly, unique print mechanism and the use of VLSI (very large scale integration) technology is directly responsible for the surprisingly compact size and increased reliability,'' said Greg Grodhaus, vice president, Midrange Systems.

Available in an open pedestal or pedestal with quiet cabinet and cover configurations, the Memorex Telex 1234 Line printer is completely 4234-compatible. With a workload rating of 75,000 pages per month, it is able to withstand demanding industrial and data processing applications, without the need for periodic calibration or lubrication.

A wide range of character styles, pitches and language sets are included with the ability to print any or all character styles available in any combination of font, language, pitch or height.

The dot-addressable graphics features of the 1234 Line Printer can be combined with the Graphics Processing Option for QMS Code V Version 1 and 2 printing to streamline generation of forms, bar codes, labels, OCR characters, and other industrial graphics.

Both models of the Memorex Telex 1234 Line Printer will be available July 1. Model 2 in a desktop configuration is list priced at $7,495; Model 4 in a desktop configuration is list priced at $10,200.

Prices for the following options are added to the desktop configuration price: $799 for the Graphics Processing Option; $550 for the pedestal configuration; and $1,000 for the pedestal with quiet cabinet configuration.

Memorex Telex is one of the world's largest suppliers of plug-compatible computer equipment and accessories with annual revenues of over $2 billion. Among the company's products are disk and tape storage devices, terminals, intelligent systems, local area network products and services, network controllers, printers, airline reservations systems and a comprehensive range of computer supplies.

Memorex Telex operates in 27 countries around the world with distributor links in 50 other markets.

GOLBASI, TURKEY (MAY 22) BUSINESS WIRE - The first satellite link in a new state of the art digital wideband communications system will be activated Tuesday, May 22, by officials of Turkey, the U.S. Department of Defense and the COMSAT Systems Division (CSD).

The new system, named DMIP-DCS Mediterranean Improvement Program, is the first in a series of planned improvements to U.S. military communications facilities in the Mediterranean area funded by the Defense Communications Agency (DCA).

The initial satellite connection links the Golbasi Satellite Communications Center, located about 25 miles south of Ankara, with the Incirlik military air base at Adana. The event marks the first step toward a fully implemented wide band digital communications system scheduled to be operational throughout the southern European region within the next five years.

COMSAT Systems Division was selected prime contractor by the Turkish Postal Telephone and Telegraph (TPTT) Agency for systems engineering and integration of the new network in March, 1989.

Scheduled participants in the ceremony include Joel R. Alper, COMSAT Systems Division, president; Emin Baser, director general of the Turkish PTT, and Brigadier General Phillip Bracher, director of communications, United States European Command, Vaihingen, Germany.

The occasion will also mark the dedication of the satellite earth station at Incirlik in memory of Colonel Byron (Brad) Bradbury, USAF, a former program manager of the DMIP project. A plaque, which will be on permanent display at the Incrilik Earth Station, will be unvieled by Taggart Bradbury, son of the late Colonel Bradbury, and General Bracher.

The DMIP upgrades are designed to replace the aging terrestrial Defense Communications System Network which consists of analog microwave and troposheric scatter communications facilities from the 1960s. When completed, eight Turkey DMIP earth stations located at major U.S. and Turkish General Staff (TGS) facilities will provide combined high-speed

voice and data transmissions services over a broad range of digital bandwidth options.

Within Turkey, the DMIP network will interconnect the Turkish PTT and U.S. and TGS facilities with voice and data circuits relayed via an Intelsat satellite. Turkish locations include Sinop, Cakmakli, Izmir, Marmaris, Incirlik, Erzurum and Pirinclik, each linked to the ''hub'' facility in Golbasi.

The Turkish PTT will monitor and control the DMIP network from a Network Control Center at Golbasi. This ''hub'' facility also contains the engineering Service Channel (ESC) order-wire which will maintain voice contact with all TGS, TPTT and U.S. Technical Control facilities in the network.

As prime contractor and systems integrator, COMSAT is responsible to the Turkish Government for systems and technical requirements, including network design, equipment selection, procurement and implementation.

Working with COMSAT are three Turkish firms, Endem, Toker, and Yelpro, which are supplying installation and facilities construction, in-country logistical and administrative services. Satellite Transmission Systems Inc., Hauppauge, N.Y., is providing radio frequency terminals and monitoring and control portions of the system.

COMSAT Corp., a shareholder-owned company headquartered in Washington D.C. provides communuications services to telecommunications carriers, industry, government and other organizations. Created in 1962, COMSAT is the representative to the International Telecommunications Organization (Intelsat) and the International Maritime Satellite Organization (Immarsat).

COMSAT Systems Division is a systems integrator assisting government, international and commerical customers in the design, implementation and operation of information and telecommunications systems and networks worldwide.

KENNER, LA (MAY 22) BUSINESS WIRE - Sizeler Property Investors Inc. (NYSE:SIZ) announced Tuesday results for the three months ended March 31, 1990.

The company reported net income for the quarter ended March 31, 1990, of $322,000 or 9 cents per share based on 3,554,128 shares outstanding. For the quarter ended March 31, 1989, the company reported net income of $874,000 or 24 cents per share based on 3,716,200 weighted shares outstanding.

Funds from operations, defined as income before gains on sales of properties, adjusted for non-cash items (principally real estate depreciation and amortization expense), was $822,000 (23 cents per share) compared to $1,358,000 (37 cents per share) for the quarters ended March 31, 1990 and 1989, respectively.

Operating results for the 1990 period included a non-recurring $495,000 (14 cents per share) charge against earnings for unreimbursed costs incurred primarily in connection with the company's terminated tender offer for shares of Property Trust of America.

The company has previously announced the payment of a dividend of 39 cents per share on May 30 to shareholders of record as of May 15, 1990.

Sizeler Property Investors Inc. is an equity real estate investment trust engaged in acquiring and holding real estate interests, principally shopping centers, for investment. The company is based in Kenner, a suburb of New Orleans.

NEWARK, NJ (MAY 22) BUSINESS WIRE - New Jersey Bell, a Bell Atlantic company, Tuesday (May 22, 1990) announced plans to roll out its new voice messaging service to more than a million residence customers during the next two months.

First tested in 1989 with customers served by the Plainfield switching office, the new service - Answer Call - enables residential customers to cut down on telephone tag by allowing callers to leave messages if the number they are calling is busy or goes unanswered.

Beginning later this week, customers served by 30 New Jersey Bell switching offices throughout the North Jersey Serving Area will receive information about the new service. (See attached list).

The service will become available to other areas of the state later this year.

Answer Call allows residential users to use their touchtone telephones for sophisticated answering services. Each member of a household can have a ''voice mailbox'' and record a personalized greeting for callers.

If a line is busy or goes unanswered, the caller will hear the recorded greeting and can leave a message for the person he or she is calling.

The called party hears a ''stutter'' dialtone and knows that a message is waiting. Messages are retrieved by dialing into the system and entering a personalized password to reach the appropriate mailbox.

About 500 customers served by the Plainfield switching office used the service during the limited introduction. The office serves North Plainfield and parts of Green Brook, Warren and Watchung in Somerset County; Plainfield and parts of Scotch Plains and Fanwood in Union County, and parts of Edison, Piscataway and South Plainfield in Middlesex County.

Answer Call customers can elect to have up to eight personalized mailboxes per household, as well as select from two message storage options. Prices range from $5 to $8 per month.

The one-time connection charge of $21 associated with the service will be waived from May 30 to August 27.

The voice messaging service is part of Bell Atlantic's family of IQ Services, which include Custom Calling Services like Call Waiting, and CLASS Calling Services like Caller ID, which lets you know who's calling before you answer the phone.

NEW YORK (MAY 22) BUSINESS WIRE - Telerate Inc. said Tuesday that its financial information network has added real-time pricing data on options on Japanese Government Bond (JGB) Futures, trading on the Tokyo Stock Exchange.

The JGB futures market has become one of the largest futures markets in the world, following the introduction of the 10-year JGB futures contract in 1985, as a financial intstrument to reduce interest rate risk. Telerate covers JGB futures, as well as the new options contracts.

Responding to the growth of the JGB futures market, the Tokyo Stock Exchange introduced options on JGB futures as an additional hedging tool, which is expected to be used largely fy financial institutions. Options on JGB futures represent the right to buy or sell a specific amount of JGB futures at a set price for a specific period of time.

Trading of these options started Friday, May 11.

Live coverage of options on JGB futures can be accessed on Telerate's standard service, the PC-based Telerate Matrix system and Tactician.

Using Telerate Matrix, subscribers can track options of JGB futures on a composite page with other Japanese market data, such as spot yen, JGB futures, the Nikkei index, and other information. The JGB options also are carried on Tactician, a leading fundamental analysis system for fixed-income markets.

''Traders use Tactician to analyze market movements and apply valuable trading techniques, providing a means to achieve higher profits,'' said P. Howard Edelstein, Telerate's senior vice president, international product marketing.

Telerate Inc., a wholly owned subsidiary of Dow Jones & Co. Inc., is a leadig supplier of real-time financial information, decision support products and transaction services to the international business community.

SOMERVILLE, NJ (MAY 22) BUSINESS WIRE - Biosearch Medical Products Inc. (BMPI) announced Tuesday that the trading of its common stock on the NASDAQ System will be re-established, effective May 23, 1990.

BMPI is now in compliance with NASDAQ listing requirements, including net worth of at least $375,000, which caused the listing of stock to be deleted on Jan. 22, 1990.

During March, 1990 the company had $1,140,000 of debt converted into common stock of the company at $1.00 per share.

In addition, on May 8, 1990 Biosearch Medical Products announced net earnings of $77,000 for the first quarter of fiscal 1990, which ended March 31, 1990. The results for the first quarter represent an important shift toward higher operating profit away from gain, or loss, generated by foreign currency translations.

MINNEAPOLIS (MAY 22) BUSINESS WIRE - MOCON (Modern Controls Inc.) announced Tuesday that on May 15, its board of directors declared a cash dividend of six cents a share, payable on Aug. 17 to shareholders of record on Aug. 3.

The company has provided stockholders with quarterly dividends for the ninth consecutive quarter. Prior to the present policy of quarterly dividends, the company had been paying dividends on a semi-annual basis since 1984.

MOCON is a leading developer, manufacturer and marketer of high technology measurement instrumentation designed to test packages and packaging materials for permeation of gases and water vapor, and systems to measure the thickness of thin film materials during production.

MOCON testing instrumentation is used in quality control and research laboratories in the food and pharmaceutical industries, to test plastic packaging materials for cost effective protection against loss of color, flavor, fragrance, texture, potency and freshness.

The company also manufactures weighing and sorting instrumentation that helps the pharmaceutical industry maintain the rigid weight tolerances needed in producing drugs in capsule and tablet form.

MOCON's shares are traded over-the-counter and are listed in the NASDAQ National Market System. The company's electronic NASDAQ trading symbol is MOCO.

HOUSTON (MAY 22) BUSINESS WIRE - Seitel Inc. (ASE:SEI) Tuesday announced that approval was received from Digicon Geophysical Corp.'s principal lender and the U.S. Bankruptcy Court overseeing Digicon's affairs, which now enables Seitel, through a joint venture with Digicon, to proceed with the purchase of approximately 9,500 miles of U.S. onshore seismic data and

155,000 miles of data offshore of the U.S. East Coast, Alaska and the Gulf of Mexico.

A closing date for the transaction has been set for May 30.

Seitel recently completed a common stock offering which netted the company approximately $4,649,000. Proceeds from this offering were dedicated to supplement Seitel's seismic data library. Seitel is contributing approximately $4 million to the joint venture for the purchase of the Digicon data base.

Seitel is engaged in the development of proprietary seismic data bank and arranging the creation and marketing of seismic data.

#90142b0785 05/22/1990 ~Business Wire
MARLBORO, MA (MAY 22) BUSINESS WIRE - Stratus Computer Inc., a leading manufacturer of fault-tolerant computers for critical online business applications, Tuesday announced three new marketing agreements with third party software developers.

These new agreements will expand the applicability of Stratus XA2000 Continuous Processing Systems in the market for online wholesale banking systems.

The agreement will make electronics data interchange (EDI), wholesale lockbox, and data security software available for the Stratus XA2000 computers. The company also today announced that under an existing third party marketing agreement, an enhanced version of electronic window software will be available for XA2000 Systems.

Stratus' fault-tolerant online transaction processing systems are already used by major banks and credit card providers worldwide to electronically deliver services to their customers online.

In retail banking, Stratus is a prominent supplier of automatic teller services and point-of-sale credit/debit card authorization systems. The new agreements will expand the computer maker's emerging business in wholesale banking. In the wholesale banking segment, Stratus has been primarily used to run online cash management services for bank's corporate customers. Growing Worldwide Market

The new EDI software, alone, addresses a rapidly growing market for Stratus. EDI software allows computer-to-computer interchange of business documents between banks, their corporate customers, and the banks of their customer's trading partners and suppliers.

For example, worldwide market estimates for EDI in 1989 ranged from $70 to $208 million with expansion ranging from $1.1 to $1.9 billion by 1992. That market includes EDI applications for numerous industries, in addition to banking. Last year, Stratus launched EDI software that addresses those other industries, such as manufacturing, retail, and transportation.

A recent survey conducted by American Banker polled 100 U.S. cash management banks. Fifty-six of the 69 respondents had EDI systems.

NEW ORLEANS (MAY 22) BUSINESS WIRE - Northern Telecom's (NYSE:NT) Meridian Norstar digital key telephone system can now provide users with simultaneous digital voice and data communications, with the Meridian Norstar Data Communications Interface (DCI) device.

''In order to communicate data, Norstar users previously had to rely on a modem and an analog terminal adaptor,'' said John Losier, vice president, Meridian Key Systems division, Northern Telecom Inc. ''Now, Norstar DCI is the only device the user needs to communicate both voice and data.''

This announcement was made here Tuesday at the 1990 International Communications Association 43rd Annual Conference and Exposition.

Norstar DCI allows RS232 devices to be connected to Meridian Norstar for data communications at asynchronous speeds ranging from 300 to 19,200 bits per second.

A built-in Hayes compatible modem allows Norstar DCI to use many commercially available communications software packages, such as CrossTalk ProCommPlus, and Red Ryder. Norstar DCI can call over an outside line to place external data calls. Internally, data can be communicated to other DCIs within the Norstar system.

Norstar DCI can be installed with any Norstar telephone and doesn't require additional wiring or system hardware upgrades.

Northern Telecom's Meridian Norstar is available from distributors nationwide, including the Regional Bell Holding Companies and all major independent telephone companies.

Northern Telecom is the leading global supplier of fully digital telecommunications systems. The company provides products and services to the telecommunications industry, businesses, universities, governments and other institutions worldwide. Northern Telecom Inc., with its headquarters in Nashville, Tenn., employes approximately 22,000 people across the United States.

NATCHEZ, MS (MAY 22) BUSINESS WIRE - Callon Petroleum Co. (NASDAQ/NMS:CLNP) of Natchez, and partners Santa Fe Energy Partners L.P., Houston, and Placid Oil Co., Dallas, announced Tuesday that the No. 1 Irvin Langford 5-10 well in Monroe County, Ala., tested, prior to stimulation, at the rate of 336 barrels of 35.9 gravity oil per day on a 24/64 inch choke with tubing pressure of 300 pounds from perforations at 14,492 to 14,500 feet.

No formation water was reported. The well was drilled to a total depth of 14,576 feet and 27 net feet of pay were cored from 14,492 to 14,526 feet in the Smackover formation.

The new field discovery well is located in Section 5, Township 4 North, Range 5 East. Closest production is in Wallers Creek Field approximately one and one-quarter miles to the southeast. The discovery well and surrounding leases are owned 50 percent by Placid Oil Co., 37.5 percent by Sante Fe Energy Partners L.P., and 12.5 percent by Callon Petroleum Co.

This prospect is the first in a series of exploratory wells to be drilled in south Alabama by the Callon and Santa Fe joint venture. Approximately

three miles southeast of the discovery, the two companies are currently drilling the No. 1 Blacksher 14-7, offsetting Smackover production in Section 14, Township 4 North, Range 5 East.

In addition, another Smackover test, the No. 1 Irvin Langford 31-14, has been permitted approximately one and one-quarter miles northwest of the discovery. Several other prospects have been assembled by the Callon-Sante Fe joint venture and will be ready for drilling in the near future.

NEW ORLEANS (MAY 22) BUSINESS WIRE - Northern Telecom (NYSE:NT) Tuesday introduced Meridian Norstar Call Accounting, a software enhancement to the digital key telephone system that gives users the ability to generate numerous call accounting reports, such as time spent on hold, number of unanswered calls and other standard detail and summary reports.

Meridian Norstar Call Accounting is a personal computer software application which allows users to quickly organize, summarize and report on all incoming and outgoing telephone activity.

The announcement was made in New Orleans at the 1990 International Communications Association 43rd Annual Conference and Exposition.

Small businesses and branch offices of large corporations can create and save customized reports, which allow the user to spot trends, understand traffic flow, categorize long distance spending, control telephone misuse, and recognize service deficiencies.

Meridian Norstar Call Accounting works hand-in-hand with Call Detail Recording (CDR), which gathers calling data such as number of unanswered calls, time spent on hold, phone number called and duration of call.

Meridian Norstar Call Accounting is also integrated with Dial-By-Name (DBN) directory. Names in DBN can be substituted for numbers in the Call Accounting reports, making them easier to read.

Meridian Norstar Call Accounting makes it simple to generate summary reports on telephone usage or detailed reports about individual calls. A menu-driven report generator offers users the flexibility to design, save or modify reports.

Suggested list price for Meridian Norstar Call Accounting is $1,200 or

$1,995 with Dial-By-Name directory, Call Detail Recording and Personal Computer Interface (PCI) card.

An option for the Call Accounting system is Norstar Rates and Tariffs Service. This service provides accurate calculation of the cost for telephone calls placed almost anywhere in the world. In the United States, long distance rates by AT&T, MCI and U.S. Sprint are included.

Northern Telecom's Meridian Norstar is available from distributors nationwide, including the Regional Bell Holding Companies and all major independent telephone companies.

Northern Telecom is the leading global supplier of fully digital telecommunications systems. The company provides products and services to the telecommunications industry, businesses, universities, governments and other institutions worldwide. RICHMOND, BRITISH COLUMBIA (MAY 22) BUSINESS WIRE - MTC Electronic Technologies Co. Inc. (NASDAQ:MTCEF) announced Tuesday that the company generated record revenues and income for the year ended Jan. 31, 1990.

Sales climbed to $58,164,879, up from $41,369,324, recorded in the comparable year-earlier period. Income jumped to $632,153, or 8 cents per share, up from $4,551, or .1 cent per share, in the comparable year period. All figures reported are in Canadian funds.

According to Miko Leung, president of MTC: ''We are most pleased with the progress the company has achieved this year, and anticipate continuing growth for fiscal 1991. In actuality, our numbers could have been significantly higher if not for the unfortunate circumstances in China last year.

''Fortunately, it appears that none of the business that was suspended because of the political unrest was lost, but rather will now be realized in the company's current fiscal year.''

MTC Electronic Technologies is an 18-year-old manufacturer, distributor and importer of over 160 products imported from the Far East, including television, stereo equipment and VCRs. The company also imports

sub-assembled FAX machines into China under an exclusive trade agreement with the Yin Jiang Telephone Co.

NEW ORLEANS (MAY 22) BUSINESS WIRE - Northern Telecom (NYSE:NT) Tuesday introduced LIBERATION, a flexible, lightweight headset designed for telemarketing and telephone operator services applications.

LIBERATION's headset weighs only 1/2 ounce and can be worn over the ear (as an ear hook), around the ear (as an ear loop), or headband style. Interchangeable earpieces allow the wearer to modify the headset to their needs.

The announcement was made in New Orleans at the 1990 International Communications Association's 43rd Annual Conference and Exposition.

LIBERATION is compatible with all telephone terminals for Northern Telecom's Norstar digital key telephone system, Meridian 1 PBX (private branch exchange), Meridian SL-1 PBX, Vantage key system and Unity product lines. A version for the Centrex environment will be available later this year.

LIBERATION will be available on June 1, from various telecommunications products distributors. The suggested list price ranges from $109 to $160 depending on the components desired.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems. The company provides products and services to the telecommunications industry, businesses, universities, governments and other institutions worldwide.

Northern Telecom Inc., with its headquarters in Nashville, Tenn., employs approximately 22,000 people across the United States.

NEW ORLEANS (MAY 22) BUSINESS WIRE - Cardiac patients who benefit from a pacemaker will soon be able to receive medical assistance more rapidly as

a result of the innovative use of computer-to-PBX technology developed by Northern Telecom (NYSE:NT) and applied to the medical field by Medtronic CardioCare.

Remote pacemaker monitoring will be one of four innovative uses of Northern Telecom's Meridian Link computer-to-PBX (private branch exchange) technology. These applications were reviewed at a briefing Tuesday held by Northern Telecom and four of its customers at the International Communications Association's 43rd Annual Conference and Exposition.

Other applications of the technology included accessing sales leads by Time-Life Libraries Inc. from its Digital Equipment Corp. 3400 host computer 300 miles away, assistance to 500 Matrixx Marketing telemarketing agents in answering up to 120,000 calls daily to sell goods and services with a Tandem CLX computer, and use by Porsche Cars North America to access sales information from the company's 270 dealers nationwide with an IBM AS/400 computer.

Medtronic CardioCare's application uses a Hewlett-Packard 3000/70 host computer.

Meridian Link represents the evolution of Northern Telecom's Integrated Systems Digital Network Applications Protocol (ISDN/AP), introduced in November 1987. Meridian Link is an intelligent interface that supports multiple data protocols, enabling the integration of Meridian 1 call processing capability with the data processing capability of a wide range of host computers.

Matrixx Marketing, Medtronic CardioCare, Porsche Cars and Time-Life Libraries Inc. discussed productivity improvements and improved business operations which will result from the integration of their Meridian PBXs, Meridian Link and their computer systems.

''It's one thing to develop a product designed to improve a customer's productivity, but the real reward comes when you see a customer implementing that product and improving his operation,'' said Rick Faletti vice president and general manager, Meridian Communications Systems, Northern Telecom Inc.

''Through Meridian Link, the Meridian 1 has the broadest computer-to-PBX connectivity and functionality of any PBX available on the market.''

Northern Telecom is the leading global supplier of fully digital telecommunications systems. The company provides products and services to the telecommunications industry, businesses, universities, governments and other institutions worldwide.

NORTH BERGEN, NJ (MAY 22) BUSINESS WIRE - Emerson Radio Corp. (NYSE:EME) reported its operating results for the fourth quarter and year ended Mar. 31, 1990.

Consolidated net sales for the year reached a record $891,368,000 vs. $761,640,000 last year. Consolidated net income for the year ended Mar. 31, 1990 totaled $10,412,000 or $.29 per share as compared to $10,214,000 or $.28 per share last year.

Net income for the current fiscal year included a $746,000 or $.02 per share loss related to its subsidiary, Cardiac Resuscitator Corporation (CRC). The net loss related to CRC last year totaled $353,000 or $.01 per share. Last year's net income also included an extraordinary tax credit of $580,000 or $.02 per share.

For the fourth quarter of fiscal 1990, consolidated net sales were $178,269,000 compared to $171,055,000 last year. A consolidated net loss of $2,877,000 or $.08 per share was reported for the current fourth quarter. Net income for last year's fourth quarter totaled $2,056,000 or $.06 per share. The net loss for the current fiscal fourth quarter included a $687,000 or $.02 per share loss related to CRC versus a $5,000 loss last year.

Emerson Radio Corp. designs and markets a full line of popularly priced consumer electronics products. The range of the company's products includes televisions, video cassette recorders, compact disc players, radios, stereo systems, tape players and recorders, microwave ovens, compact refrigerators, telephones and answering machines. Recently, through its subsidiaries, the company has introduced a line of personal computers and peripherals. H. H. Scott, Inc., a wholly owned subsidiary, designs and markets a line of high-fidelity audio and video equipment.

DALLAS (MAY 22) BUSINESS WIRE - Income Opportunity Realty Trust (ASE:IOT) Tuesday announced operating results for the first quarter ended March 31, 1990.

The trust recorded a net loss of $481,000, or 13 cents per share, on revenues of $2 million for the first quarter of 1990, compared with net losses of $139,000, or 4 cents per share, on revenues of $3.8 million for the prior year's first quarter.

Net rental income (rental income minus property operations) decreased from $851,000 in the first quarter of 1989 to $347,000 in 1990's first quarter. However, rental income on properties held in both quarters actually increased 141 percent, as the trust currently has four fewer properties in its portfolio.

Income Opportunity Realty Trust is a combination mortgage and equity real estate investment trust which operates nationwide.

HOUSTON (MAY 22) BUSINESS WIRE - Opicoil America Inc., an affiliate of the Chinese Petroleum Corp. (CPC) of Taiwan, and Roy M. Huffington, the chairman and chief executive officer of Roy M. Huffington Inc., announced jointly Tuesday that Opicoil's acquisition of Huffington Corp. (Huffco) had been completed.

Huffco is the parent company of Roy M. Huffington Inc. Both Opicoil and

Huffco are headquartered in Houston.

CPC, based in Taipei, Taiwan and owned by the Republic of China, conducts oil and gas operations worldwide. It signed a 20 year LNG sales contract with Pertamina, the Indonesian state oil and gas enterprise, in 1987, under which CPC imports 1.5 million tons of LNG annually. C.Y. Huang, vice president, represented CPC in the acquisition.

Opicoil is a subsidiary of Overseas Petroleum and Investment Corp. (OPIC) which is CPC's worldwide exploration arm. Opicoil is also a joint venture participant with Phillips Petroleum in United States exploration activities.

Huffco controls a 16.7 percent working interest in an Indonesian joint venture formed in 1968 to explore for oil and gas in East Kalimantan, Indonesia. The Indonesian Joint Venture (IJV) comprises Huffco and affiliates of Union Texas Petroleum Holdings Inc., Ultramar PLC, and Universe Tankships Inc., and supplies natural gas to one of the world's largest liquefied natural gas (LNG) facilities. CPC recently began receiving LNG cargoes from this facility.

Huffco also owns the equivalent of 11 city blocks in downtown Houston and 419 acres of undeveloped land adjacent to Houston's Intercontinental Airport, among other real estate assets.

WESTBROOK, ME (MAY 22) BUSINESS WIRE - Data General Corp. Tuesday announced that it has sold its Westbrook precision sheet metal fabrication operation to PRECISmetals Inc., a new company which has been formed by former managers of the Data General facility.

Terms of the sale were not disclosed.

PRECISmetals is headed by four long-time Data General Westbrook employees: Charles Caron, who had served as the operations manager; Robert Schneider, the plant's engineering manager; Jeffrey Briggs, the accounting manager; and Jeffrey Benedetti, the production manager.

The new company, which has leased approximately 130,000 square feet of the Westbrook facility from Data General, plans to offer continuing employment to the employees who have been working in the metal fabrication operation for Data General.

''We are pleased that the sale has been concluded successfully and that the PRECISmetals team has now taken over operation of the metal fabrication business,'' said John Caruso, who has been serving as the plant manager for Data General. ''The agreement with PRECISmetals serves the best interests both of our former employees and the city of Westbrook.''

''The PRECISmetals group is very professional,'' said Caruso. ''They know the business -- between them they have more than 35 years of Data General metal fabrication experience. They should do very well.''

Caron, PRECISmetals' president, said that Data General will be a major customer for PRECISmetals and the new company is actively working with new customers who have expressed interest in taking advantage of PRECISmetals state-of-the-art fabrication capabilities.

Caron also said, ''PRECISmetals plans to expand its services to include sub-contract manufacturing for those customers who wish to purchase completed assemblies as opposed to component parts.''

ROME (MAY 22) BUSINESS WIRE - A major new research laboratory, Instituto di Ricerche di Biologia Molecolare (IRBM), designed to undertake research in human diseases such as cancer and viral infections, was opened today in Pomezia, 30 kilometers from Rome.

IRBM is the first joint venture for research in Italy. It was formed by Merck Sharp & Dohme Italia, S.p.A., a subsidiary of Merck & Co., Inc., the world's largest pharmaceutical company, and Sigma Tau Industrie Farmaceutiche Riunite S.p.A., a leader in Italy's pharmaceutical industry.

IRBM is a technologically advanced laboratory dedicated to the discovery and development of innovative new medicines to treat human diseases such as cancer that are caused by viral infections. The 60 billion Lira (50 million US dollars) IRBM facility will house a staff of approximately 100 researchers and non-scientific personnel.

Professor Riccardo Cortese, full professor of Molecular Biology at Naples University and former Director of the Gene Expression Department of the European Molecular Biology Laboratories of Heidelberg, Germany, was named earlier this month to head IRBM research.

IRBM becomes the seventeenth Merck research center worldwide and the sixth in Europe. Merck, based in Rahway, New Jersey, USA, is the world leader in pharmaceutical research; it will spend an estimated $855 million in 1990 on research and development.

This new facility is part of the company's ongoing commitment to expand its research activities worldwide. In 1989, Merck opened a new Safety Assessment facility at its West Point, Pennsylvania, site, which doubled its workspace for documenting the safety of potential drug candidates. Merck broke ground this spring in Japan for a laboratory it is building with its affiliate Banyu Pharmaceutical Co., Ltd. Special fields of interest there will include cancer, cardiovascular and infectious diseases. In 1991, the company will complete the expansion of its research center in Quebec, already Canada's largest industrial center for discovery of new drugs, to twice its current size.

Merck & Co. Inc., is a worldwide health products company that discovers, develops, produces and markets human and animal health products and specialty chemical products.

NEW YORK (MAY 22) BUSINESS WIRE - Home Box Office Inc. Tuesday announced that the operational responsibility for the pay-TV company's 10 regional offices and affiliate relations staff will now be under the supervision of Bill Hooks, senior vice president, affiliate operations.

Hooks will continue to report to Larry Carlson, executive vice president.

''Over his long tenure in this business, Bill Hooks has demonstrated a knowledgable and skillful handling of all our key business issues,'' said Carlson. ''He knows our organization well and the people who make it work. No one is better suited to manage our sales staff and all our relationships with our cable customers than Bill.''

Hooks joined HBO in February 1974 as a marketing manager, and he opened the company's regional office in Dallas in April 1976. He was appointed general manager of HBO's central region in June 1977 and was promoted to vice president in May 1978. Under his direction, HBO opened additional

regional offices in Chicago and Kansas City.

He became vice president and general manager of the eastern region, HBO's largest, in September 1979. In November 1980, he was named vice president, marketing administration and communications, became vice president, regional operations in August 1982, and was promoted to senior vice president, regional operations, in February 1983.

In August 1984, he was named senior vice president, affiliate operations, responsible for overseeing sales and marketing activities in HBO's Philadelphia, New York, Ft. Lauderdale, Chicago and Kansas City regions.

Before joining HBO, Hooks worked for a year as regional marketing director for Warner Cable Corp. in New York. From 1970 to 1973 he worked as a regional marketing manager of Teleprompter Corp. in New York.

A graduate of Brown University, Hooks is also a graduate of Harvard's Advanced Management Program, and has attended Boston University and Southern Methodist University, taking communications and business courses.

ROCKY HILL, CT (MAY 22) BUSINESS WIRE - Stephen L. Pistner, chief executive officer of Ames Department Stores Inc., Tuesday announced the appointment of Gerald L. Kanter as executive vice president, merchandising replacing Leslie E. Dietzman who will be leaving Ames in August.

Kanter, 55, was most recently a consultant to a number of retail operations. He will report directly to George M. Granoff, Ames' president and chief operating officer.

Pistner said, ''Gerald Kanter's retailing skills make him an excellent addition to our new management team. His merchandising experience and his familiarity with Ames will serve us well as we restructure Ames for the future.''

Kanter, president and chief operating officer of Marshall's from 1985 to 1987, was Ames' president and chief operating officer from 1983 to 1985.

Prior to 1983 he held a variety of merchandising positions with Target stores, Prangeway and Allied Stores.

Ames, which filed for protection under Chapter 11 of the U.S. Bankruptcy Code on April 25, operates more than 600 stores in 20 states and has 55,000 employees. The company, which reported net sales of $4.8 billion for the year ended Jan. 27, 1990, sought court protection to restructure its business and finances.

POMPANO BEACH, FL (MAY 22) BUSINESS WIRE - Silk, Silk, Silk International Inc., a public company based in Pompano Beach, Fla., which owns and operates 24 retail stores in Florida from Miami to Gainesville that sell silk trees, plants and flower products, announces that it has voluntarily filed for conversion under the Bankruptcy Code from a Chapter 11 to a Chapter 7 status.

On Jan. 31, the company and various of its operating subsidiaries filed an application under Chapter 11 of the Bankruptcy Code for protection from creditors and for financial reorganization. In voluntarily converting to a Chapter 7 liquidation status, the company's assets will be sold to satisfy to the extent possible, its obligations.

It is expected that, under the control and supervision of the Bankruptcy Court appointed Trustee, a marketing campaign will be conducted to secure buyers for either the company, it's assets in bulk or individual stores.

The proceeds will be utilized primarily to satisfy company debt and to pay the expenses associated with the liquidation of the company. The plan of liquidation is proposed to be conducted during the next 90 days.

Interested parties should contact the Trustee, Milton Gene Freidman, at 305/763-6966 for further information.

NEW YORK (MAY 22) BUSINESS WIRE - The Softbridge Group announced Tuesday the release of Version 2.0 of its Bridge integration products for

Microsoft Windows.

Bridge 2.0 is being presented at the Microsoft Windows 3.0 announcement in New York Tuesday. Designed to take full advantage of the added functionality of Windows 3.0, Version 2.0 also contains several new features which allow developers to more effectively build Windows-based applications and provide more intuitive workstations for end-users.

Bridge, a command language for Windows, allows the seamless integration of multiple off-the-shelf and custom Windows and DOS applications under a common graphical interface of menus, icons and dialog boxes. Corporate developers use Bridge to create integrated desktop systems for end-users. Bridge is also used to build Windows-based applications that contain strong interprocess communication capabilities, such as software testing, prototyping, communications management, DOS migration and client/server management.

Bridge 2.0 contains enhanced communications capabilities that provide a fivefold speed increase in local area network throughput, which allows developers to design more sophisticated LAN-based systems. Applications built with Bridge will now operate more effectively over any net-BIOS compatible LAN.

A new link to the Windows 3.0 Help facility allows users to access any user-developed or Windows applications' help files directly from their Bridge workstation. Developers can create custom help menus within Bridge which incorporate help functions of individual applications, providing end-users with intuitive, context-sensitive help across all applications integrated under Bridge.

Bridge 2.0 now includes cascading menus which allow easier interface design for the developer. This new feature significantly reduces the number of dialog boxes the developer must create to run a Bridge application and also provides an easier interface for the end-user.

Bridge's documentation now includes a section of extensive example programs, each illustrating one or more of the major features of the product. In addition, error codes and debugging information have been enhanced.

''Softbridge fully supports the Windows platform as a leading operating environment in the 90's,'' said Greg Kee, director of product management for the company's Commercial Products Division. ''The improvements in Windows memory management combined with Bridge now allow the developer to design more advanced workstations with powerful communications capabilities.''

As well as offering the leading Windows integration tools, Softbridge is a

codeveloper of the Microsoft Windows operating environment. The macro Recorder in Windows 3.0 was developed by Softbridge. ''With our close ties to Microsoft and contributions to Windows 3.0 development, our customers can be assured that Softbridge will continue to provide top-notch integration solutions in the future,'' said Kee.

Bridge Version 2.0 and the applications created with it are compatible with any software that runs under Microsoft Windows 3.0. Bridge 2.0 will run under earlier versions of Windows and is backwards compatible with earlier versions of Bridge. Bridge runs on any machine that runs Windows 3.0, in either Real, Standard or Enhanced 386 mode. The Bridge Tool Kit is $695; Bridge Run Times are $125. Volume discounts are available.

The Softbridge Group is a world leader in PC-based technology and integrated desktop systems. The company develops commercial, off-the-shelf technology tools, builds large scale integrated business systems in areas of sales and customer support, asset and risk management trading and develops decision support and executive information systems.

Softbridge also creates turnkey desktop solutions for the transportation, financial services and capital markets. Founded in 1983, Softbridge has its principal U.S. offices in Cambridge with other offices in Washington, Chicago, Los Angeles, London and Oslo, Norway and representatives in Tokyo and Hong Kong.

#90142b0854 05/22/1990 ~Business Wire

NEW YORK (MAY 22) BUSINESS WIRE - The Softbridge Group Tuesday released details of their involvement in developing the Recorder feature found in the new Microsoft Windows 3.0.

Recorder allows the user power and flexibility in recording and using Windows-based macros.

Recorder brings macro utilities into the Windows 3.0 environment. It allows a user to record a sequence of user interactions with Windows 3.0, thereby capturing a macro which may be ''played back'' at a later time. With Recorder, macros now consist not only of keystrokes, but also of mouse movements and mouse button clicks.

The user can also define a short-cut key to later trigger the macro. Thus

Recorder allows Windows 3.0 users to easily automate repetitive or cumbersome tasks without learning a macro language.

''Softbridge has been a third-party Windows developer for many years and is pleased to have had a part in creating Windows 3.0,'' says Fred Ciaramaglia, senior vice president of technology. ''Our broad technology base was used to develop Recorder and our knowledge of Windows led us to create it in the most visual and natural way possible -- with the user's mouse and keyboard.''

Recorder supports a nesting of macros within other macros, user-definable playback speed and continuous replay or looping of a macro. A macro can be defined as applicable either to a particular application or to any application running when the macro is invoked. In addition the user can define his recording as being specific to a certain window.

The Softbridge Group is a world leader in PC-based technology and integrated desktop systems. The company develops commercial, off-the-shelf technology tools, builds large scale integrated business systems in areas of sales and customer support, asset and risk management trading, and develops decision support and executive information systems.

Softbridge also creates turnkey desktop solutions for the transportation, financial services and capital markets. Founded in 1983, Softbridge has its principal U.S. offices in Cambridge with other offices in Washington, Chicago, Los Angeles, London and Oslo, Norway and representatives in Tokyo and Hong Kong.

NAPPANEE, IN (MAY 22) BUSINESS WIRE - Mallard Coach Co. Inc. announced its sales and operating results for the quarter ended April 28, 1990.

Net income for the 13 weeks was $1,338,000 or 21 cents per share on sales of $53,349,000. This compared to net income of $2,103,000 or 33 cents on sales of $61,761,000 for last year.

Net income for the six months ended April 28, 1990 was $1,561,000 or 25 cents per share on sales of $86,801,000. This compared to net income of $3,228,000 or 51 cents per share on sales of $107,209,000 for last year.

The highly competitive condition of the market which developed during the final half of 1989 has persisted through Mallard's second fiscal quarter. The outlook for the market in the immediate future remains essentially unchanged.

Mallard Coach manufactures motorized and pull-type recreational vehicles and truck campers in eight locations in Indiana, Michigan, Georgia and California. These products are sold under the brand names of Mallard, Prairie Schooner, Flight Leader, Overland, Discovery Express, Lexington, Sprinter, Sprint, Sport and Real-Lite.

The company's stock is traded on NASDAQ/NMS under the symbol MALC.

BEVERLY HILLS, CA (MAY 22) BUSINESS WIRE - Leasing transactions with a value of $170 million were announced Tuesday by International Lease Finance Corp. (NASDAQ:ILFC).

ILFC said that the transactions involved new leases for three aircraft plus the extension of current leases on two other aircraft.

''Because all five of these are Boeing 757 or 767 jetliners they are advanced-technology jet aircraft that exemplify ILFC's philosophy of purchasing and leasing the world's most modern jet transports,'' said Steven Udvar-Hazy, ILFC president.

Details of the leasing transactions, including airline customers, are:

AMERICA WEST AIRLINES, Phoenix -- with a value of $40 million, the airline leased a 757-200ER on a seven-year agreement, beginning in May 1990.

NATIONAIR CANADA, Montreal -- leased two 757-200ERs and one Rolls-Royce spare engine for seven years, beginning in May and June, 1990. Contract value is more than $85 million.

MONARCH AIRLINES LTD., Luton, United Kingdom -- the lease of a 757-200ER was extended by ILFC for five additional years, from April 1991 to April 1996. This extension is valued at $30 million.

AIR NEW ZEALAND, Auckland, New Zealand -- the airline and ILFC agreed to an extension of the lease for a 767-200ER for a minimum of two additional years, from March 1991 to March 1993. Value of this lease extension is $15 million.

The three 757-200ERs leased to AMERICA WEST and NATIONAIR CANADA were formerly leased to SOUNDAIR Corporation, Toronto, which has ceased ts charter operations.

ILFC has a portfolio of 93 aircraft with a value in excess of $3 billion. Average age of the ILFC fleet is only three years. ILFC is the world's premier operating lessor and remarketer of advanced-technology commercial jet transports.

READING, MA (MAY 22) BUSINESS WIRE - MASSBANK Corp. (NASDAQ:MASB) for Savings announced Tuesday that its wholly-owned subsidiary MASSBANK for Savings has entered into an agreement with First Mutual of Boston under which MASSBANK will acquire certain deposits of First Mutual's branch located at 648 Fellsway Plaza in Medford, Mass.

Such deposits totalled approximately $40,000,000 on March 31, 1990. MASSBANK plans to operate a branch at the location upon the acquisition of the deposits.

The acquisition is subject to certain conditions, including without limitation the receipt of certain regulatory approvals.

MASSBANK for Savings is a Massachusetts-chartered savings bank with offices in Reading, Melrose, Stoneham and Wilmington. Total deposits for MASSBANK for Savings on March 31, 1990 were approximately $236,463,000.

#90142b0864 05/22/1990 ~Business Wire
NEW YORK (MAY 22) BUSINESS WIRE - IBM Tuesday announced Current Version 1.1, a powerful upgrade to its personal information management (PIM) software package that offers users increased data base capabilities and compatibility with Microsoft Corp.'s Windows 3.0 operating environment. Current 1.1 will operate concurrently with other applications by taking advantage of Windows 3.0's Standard and 386 Enhanced modes of operation.

Current 1.1 also includes major product enhancements, such as dynamic data exchange (DDE), which enables users to exchange data between Current and other Windows-based products; a doubling of the data base capacities; multiple data directories; additional font support, and "copy to" and "paste from" functions for moving data directly between files.

"We are dedicated to responding quickly to our customers' requests for improved features and functions," said Fernand B. Sarrat, vice president of IBM Desktop Software. "Current 1.1 gives users even broader and easier access to more information."

Current, introduced Oct. 31, 1989 by IBM Desktop Software, is a Windows-based PIM package designed to help business users organize, relate and retrieve text and graphical data.

A predefined set of categories - people, appointments, expenses and projects - are included with the product. The powerful design allows users to create and customize categories of information simply by making selections. Current's unique connections capabilities allows users to establish links between related information automatically.

Current features on-screen graphical representations of a color-coded calendar; an address book, and color-coded Gantt (time line) charts that display quick overviews of projects and tasks.

Current 1.1, by incorporating DDE, gives users the flexibility and power to exchange information with other Windows applications such as spreadsheets and word processors. The number of categories, connections and items in each category has doubled, and the number of fields in each item has increased significantly.

In addition, multiple data directories give users the option of completely separating data for one Current application from data belonging to another, giving users more flexibility and control over their information.

Current 1.1 will round fonts to the nearest half-font size, and supports font cartridges with hundreds of fonts, giving users greater flexibility in printing reports.

PARAMUS, NJ (MAY 22) BUSINESS WIRE - TSS Ltd. (NASDAQ:TSSL) announced the appointment of Stewart M. Cohen, 45, to the position of vice president,

finance and administration, a newly created position.

Cohen was also appointed chief financial officer and treasurer, positions previously held by Stephen D. Tannen, TSS's president and chief executive officer.

In announcing the appointment, Tannen stated: ''The addition of Stewart to our management team will increase the depth of our senior management as well as augment and focus our resources in the areas of accounting, financial planning and controls, general corporate administration and the coordination of legal counsel for the company.

''Since our initial public offering in November 1989, we have conducted a search for a CFO with smaller company experience, a management style suitable to our entrepreneurial environment and the large company disciplines needed to achieve orderly growth. Stewart brings all these strengths to TSS at a critical point in its growth plans.''

Cohen comes to TSS from Topaz International Partners, a West Orange, N.J. consulting firm where, as president since October 1988, he specialized in mergers and acquisitions and financial consulting.

Previously, he served for three years as vice president- finance and administration at adidas USA Inc., where he successfully implemented a new central organization and uniform systems that greatly reduced costs and improved efficiency.

He began his business career as an audit manager with the firm of Peat Marwick Main & Co. and moved on to successively higher officer positions with Colgate-Palmolive and Kenai Corp. before joining adidas in 1988.

TSS Ltd. provides its proprietary in-store coupon distribution service to packaged goods manufacturers through its The Savings Spot (R) program. The program features computerized, consumer-operated coupon dispensing terminals which are installed in supermarkets, and print and issue cents-off coupons within three seconds after they have been selected by shoppers.

There is no fee to the shopper to enroll and participate in the TSS program.

TSS's common shares, warrants and units are traded on NASDAQ; under the symbols TSSL, TSSLW, and TSSLU, respectively.

BLUE BELL, PA (MAY 22) BUSINESS WIRE - Unisys Corp. Tuesday announced immediate availability of Microsoft Corp.'s Microsoft Windows Version 3.0 for the Unisys Personal Workstation2 (PW2) family of network servers and personal computers.

Unisys will package the Windows 3.0 graphical user interface (GUI) software with each copy of the MS-DOS operating system licensed for members of the Intel-based PW2 family.

Available immediately for all members of the PW2 family, the MS-DOS/Windows 3.0 package is priced at US $195. An upgrade kit for current users of Windows 2.1 is available for US $50.

In addition to the ease of use provided by the icon-oriented interface, Windows 3.0 offers features that enhance the power and performance of Unisys PW2 systems in networked environments. It simplifies control of and access to network resources for network servers and workstations alike.

Through Windows 3.0, networked PW2 systems can easily share resources, connecting and disconnecting network disk drives and printers, controlling local and and network printing, and viewing and changing the status of print jobs quickly and easily.

''Unisys has packaged Microsoft Windows with the MS-DOS operating system on the PW2 line since 1988,'' said Armond Newton, vice president of business development, Unisys Personal Workstation Division.

''Unisys support for Windows 3.0 furthers our commitment to providing customers with industry-standard GUIs and other tools that allow them to

implement powerful, cost-effective, easy-to-use commercial network computing solutions.''

CINCINNATI (MAY 22) BUSINESS WIRE - National Sanitary Supply Co. (NASDAQ:NSSX) announced Tuesday that 22 directors were elected at the company's 1990 annual meeting of stockholders.

New members elected to the board of directors include James A. Cunningham, a director of The First Boston Corp., and Jack L. Thomas, vice president, chief finanical officer and secretary of Century Papers, a subsidiary of National. In addition, Price Waterhouse was ratified as the company's independent accountants for 1990.

Addressing stockholders at the meeting, Edward L. Hutton, chairman of National, stated, ''National continued its record of impressive growth in 1989. Specifically, National's sales advanced 46 percent from $179.2 million in 1988 to $262.4 million in 1989 and income increased 10 percent from $3.9 million in 1988 to $4.3 million in 1989.

Following the meeting, National's board of directors declared a quarterly cash dividend of 4.0 cents per share on the company's common stock, payable on June 20, 1990 to stockholders of record on June 4, 1990. This dividend, which is at the same rate per share paid during each of the last three quarters, represents National's 16th consecutive dividend since its initial public offering in June 1986.

National Sanitary Supply Co., headquartered in Cincinnati, is the largest distributor of sanitary maintenance supplies in the United States. Through over 600 sales representatives in 53 branch sales and distribution facilities located in 14 western, southwestern and midwestern states, National distributes cleaning chemical compounds, paper and packaging products and other maintenance supplies and equipment to a wide variety of customers.

BEVERLY HILLS, CA (MAY 22) BUSINESS WIRE - Great Western Bank Tuesday announced a $130 million, 10-year fixed rate subordinated debt issue with

a yield of 10.562 and a spread of 187.5 basis points above the 10-year Treasury notes. Great Western Bank is rated A by Standard and Poor's Corporation and A3 by Moody's Investors Service.

The offering is being underwritten by Merrill Lynch Capital Markets, as the lead underwriter. Shearson Lehman Hutton Inc. and First Boston Corporation are co-underwriters.

''With the completion of this transaction, Great Western Bank's risk-adjusted capital ratio will increase from 7.8 percent to 8.22 percent. This is well above the 6.4 percent ratio currently required by the Office of Thrift Supervision and brings Great Western into full compliance with the fully phased-in capital standards to take effect in 1992,'' the company said.

Great Western Financial Corporation, with nearly $38 billion in assets, is the parent company of Great Western Bank, a real estate-oriented, retail bank and one of the nation's leading residential mortgage lenders.

BOSTON (MAY 22) BUSINESS WIRE - Healthco International Inc. (NASDAQ: HLCO) announced that its board of directors Tuesday declared a dividend distribution of one preferred share purchase right on each outstanding share of Healthco common stock.

At the same time, the board adopted certain amendments to Healthco's by-laws, designed, among other things, to impose fair and orderly procedures in the event of shareholder solicitations.

A company spokesman stated that the rights, which are similar to those in place at hundreds of other companies, are designed to assure that all of Healthco's stockholders receive fair and equal treatment in the event of any proposed takeover of the company.

The rights will be exercisable only if a person or group acquires 15 percent or more of Healthco's common stock or announces a tender offer the consummation of which would result in ownership by a person or group of 15 percent or more of the common stock. The company also said that it had retained Lazard Freres & Co. as its financial advisor.

Healthco International Inc. is a major provider of supplies, equipment and services to dentists and institutional providers of dental care, including dental schools and dental laboratories. Healthco currently has 154 branches in the United States, Canada, and Western Europe.

MONTREAL (MAY 22) BUSINESS WIRE - Eicon Technology Corp. Tuesday announced Access for Windows (Access/W), a sophisticated 3270 terminal emulation package that runs under Microsoft Windows 3.0 Access/W will be presented for the first time at Comdex/Spring '90 in Atlanta, booth No.1629 in the Georgia World Congress Center, from Sunday June 3 through Wednesday June 6.

The main feature of Eicon Technology's Access/W is that it provides full functionality of 3270 host connectivity, while at the same time taking full advantage of the new generation of the graphical user interface, unrestricted use of memory, and other features offered by Windows 3.0. PC users can connect to their corporate IBM host by emulating 3270 display terminals and printers while allowing the PC to process other Windows applications at the same time.

''Access/W supports Multiple Document Interface which allows users to display multiple simultaneous sessions on the screen with Access/W users can switch from one emulation session to another with a single mouse-activated action. Other Microsoft Windows applications like Microsoft Excel or Microsoft Word can run concurrently with Access/W and be arrayed in full view or cascaded. Access/W also supports the Microsoft Windows feature, Dynamic Data Exchange (DDE),'' stated Irma Humby, manager of Marketing Services.

Access/W emulates the 3278 Display Models 2 through 5, 3279 Color Display, and 3287 Printers. It also supports 3270 S3G Graphics, 3270-PC File transfer (IND$FILE), and full support for APL/APL2. In addition, Access/W features application programming interface (API) fully compatible with IBM EHLLAPI specifications. Access/W is the first graphical 3270 emulation package on the market today that takes full advantage of the enhanced functionality of Windows 3.0.

Access/W supports the editing features of Windows, such as copy and paste. Access/W's macro recordings allow users to record and run a sequence of commands and keystrokes.

Access/W softkeys are a unique feature: a programmable on-screen keyboard. Users can create any number of softkeys and select the location on the screen where they will be displayed. Softkeys can be either strings of text, macro functions, 3270 program keys, or any such combination.

Access/W allows users to remap the PC keyboard as a 3270 keyboard. Users can easily customize the keyboard by remapping keys through a graphical representation of the keyboard on the screen. They simply select the combination of their choice and click ''OK''. Access/W also supports full character translation tables for up to 17 different countries.

Access/W is a software package that operates with the ElconCard, an intelligent communications card the the IBM PC and PS/2. The ElconCard is compatible with any NetBIOS or Novell NetWare LAN and supports up to 254 LAN sessions and speeds of up to 128kbps. Access/W allows users to connect to an IBM host over a dial-up or leased SDLC line, or using an x.25 packet-switched network.

Availability for Access for Windows is July, 1990.

Eicon Technology Corp. provides advanced data communications solutions for micro-to-mainframe and LAN-to-LAN connectivity. With headquarters in Montreal the company offers worldwide sales and service support.

STAMFORD, CT (MAY 22) COMTEX - At a May 8 meeting, the board of Mattel Inc. decided not to extend the term of the Hawthorne, Calif., company's $75 million outstanding principal amount of 10 7/8 percent senior subordinated extendible notes, but to repay them on July 15 as originally scheduled, according to a Securities and Exchange Commission filing.

This 8-k Filing was submitted to the Securities and Exchange Commission on MAY 21, 1990

-30- 595
#90142c0070 05/22/1990 ~Comtex
STAMFORD, CT (MAY 22) COMTEX - Walbro Corp. of Cass City, Mich., purchased Sharon Manufacturing Co., a maker of fuel rails for automotive fuel-injection systems, on May 3 for $9.9 million as part of a Feb. 23 agreement among Walbro, Champion Spark Plug Co. and Cooper Industries Inc. according to a Securities and Exchange Commission filing.

Sharon, which was a wholly owned subsidiary of Cooper, employs about 170 people at two facilities in Lambertville, Mich., and Ligonier, Ind.

This 8-k Filing was submitted to the Securities and Exchange Commission on MAY 21, 1990

-30- 719
#90142c0071 05/22/1990 ~Comtex
STAMFORD, CT (MAY 22) COMTEX - Sonoco Products Co. of Hartsville, S.C., on May 1 acquired substantially all the assets and assumed certain liabilities of VOPLEX Corp. for $2.39 million.

VOPLEX and Sonoco also reached a noncompetition agreement, and Sonoco said it will lease a portion of VOPLEX's manufacturing facilities in Canandaigua, N.Y., for cartridge-making activities, according to a Securities and Exchange Commission filing.

This 8-k Filing was submitted to the Securities and Exchange Commission on MAY 21, 1990

-30- 684
#90142c0072 05/22/1990 ~Comtex
STAMFORD, CT (MAY 22) COMTEX - Americorp Inc. of Savannah, Ga., agreed May 10 to sell 1.38 million of its common shares and 2,500 preferred shares to Bank Corporation of Georgia for $1.14 and $100 each, respectively.

Bank Corp. was also given a two-year option to buy up to 12,000 more preferred shares at the same price, according to a Securities and Exchange Commission filing. The transactions are subject to regulatory approval, which isn't expected until Sept. 1, and the consent of preferred stockholders.

Americorp also announced that former Bank Corp. Executive Vice President J. Thomas Wiley has been named president of Americorp's subsidiary, AmeriBank N.A. The appointment will not become effective until regulatory approval has been obtained, probably around June 10. Finally, Americorp said it plans to sell another 242,000 common shares to its stockholders at $1.14 each.

This 8-k Filing was submitted to the Securities and Exchange Commission on MAY 21, 1990

#90142c0142 05/22/1990 ~Comtex
WASHINGTON (MAY 22) COMTEX - The Senate Banking Committee was told today the major culprit in the thrift crisis is the current structure of the federal deposit insurance system.

"Capital must be adequate to provide an incentive for insured depositary institutions not to engage in excessively risky activities," said James R. Barth, a financial expert from Auburn University.

While acknowledging that other factors such as deregulation and fraud contributed to the thrift failures, Barth said institutions were insolvent for lengthy periods of time before being closed and these ailing thrifts in effect used federally insured funds to gamble for resurrection.

"Inadequately capitalized institutions that are left open have every incentive to bid up rates on deposits so as to attract funds to engage in excessively risky activities in an attempt to overcome their difficulties " Barth said. "Many troubled institutions pursued just such a strategy and not surprisingly only exacerbated an already serious situation."

George G. Kaufman, professor of economics and finance at Loyola University, said matters were further aggravated when regulators did not require these institutions to be reorganized and recapitalized as soon as their economic net worth was depleted.

"Federal depositor insurance reduced depositor concern about the safety of their funds and permitted banks to reduce their private capital ratios

sharply to near 6 percent," said Kaufman. "It does not take much of a shock to wipe out 6 percent of a bank's assets. In effect, the banks supplemented their private capital with public capital and taxpayers implicitly became shareholders with unlimited liability. "And, at least, in the case of savings and loan associations, they have been called upon to pay for the losses."

Barth urged a three-step approach to reform the structure of the federal deposit insurance system. This involves the collection and assessment of market-based information to monitor the financial health of banks and thrifts, the reliance on an adequate level of capital, and the reorganization or closure of insufficiently capitalized depositary institutions in a timely and cost-effective manner.

According to Barth, maintaining minimum capital levels is the major lesson to be learned from the thrift crisis.

"Capital must be adequate to provide an incentive for insured depositary institutions not to engage in excessively risky activities," he said. "As capital declines the risk of loss is clearly shifted from the owners to the depositors and, if insured, to the insurer and, if exclusively a federal insurer, to the taxpayer."

Kaufman stresses the need to focus on early regulatory intervention to minimize the probability of bank failure.

"Early intervention and capital maintenance is the preferred solution," Kaufman said. "It deals directly with the two most costly features of the existing deposit insurance structure -- too little private capital in banking and the potential for continued operation when banks are insolvent -- and would impose the least cost on either the banking system or the taxpayers."

Lowell L. Bryan, a director of McKinsley and Company, an international consulting firm, said he believes the U.S. financial system needs a fundamental overhaul beyond deposit insurance reform.

"We should stop concentrating on fine-tuning a system that is flawed and start concentrating on the design of a smarter system for the future that will work and keep banks profitable," Bryan said. "Our goal should be to design, probably from the ground up, a financial services industry without artificial boundaries, without duplication of efforts, and without any more regulation than we need to ensure the integrity of our deposits and our payment system."

WASHINGTON (MAY 22) COMTEX - The 10-Q report filed at the NASD shows Sun Sportswear Inc. earned $1.25 million, or $0.22 per share, on revenues of $2.04 million for the quarter ended March 31, 1990.

SEC - AMENDMENT NUMBER: 4

SOUTHMARK CORP OF DALLAS, TX OWNS 18,566,333 SHARES (36.70%) OF PRATT HOTEL CORP (TICKER: PHC) OF DALLAS, TX.

ANNOUNCEMENT:

As a debtor-in-possession under Chapter 11 of the Code with bankruptcy proceedings now pending in the northern district of Texas, Southmark is authorized to operate in the ordinary course of business and be managed by its board of directors without approval of the Court.

Southmark is the respondent in a proceeding, State of New Jersey, Department of Law & Public Safety, Division of Gaming Enforcement v.

Southmark Corporation, Agency Ref. No. 89-445, initiated by the New Jersey Division of Gaming Enforcement with the New ersey Casino Control Commission.

In an effort to resolve the proceeding, Southmark entered into a stipulation of settlement with the Division pursuant to which Southmark agreed to, among other things, transfer all of its right, title and interest to any and all shares of common stock or other securities of the issuer held, maintained or controlled by Southmark into a trust to be held by a trustee acceptable to the Commission pursuant to a trust agreement.

The stipulation was contingent upon approval of the Court and the Commission.

After a hearing on April 18, 1990, the Court entered an order approving the stipulation and the New Jersey Trust Agreement and on April 23, 1990, the Commission did likewise.

Southmark entered into a stock purchase agreement, dated April 24, 1990 with Jack E. Pratt and Union Planters National Bank wherein Pratt agreed to purchase from Southmark 10,445,179 shares at a price of $.27 per share.

The closing of this sale transaction, to be held in Dallas, Texas, is the 15th business day following the latter of the date on which the Court issues a final order permitting the sale transaction, but not later than June 15, 1990.

A final order approving such sale transaction has not been issued by the Court as of the date of this filing.

STAMFORD, CT (MAY 23) COMTEX - Two shareholders of Medco Research Inc. have charged the Los Angeles medical products company and its former director of research and medical affairs, Dr. William C. Govier, with violating federal securities laws.

The suit alleges that Govier possessed certain materially adverse information that had not been disclosed to the public when he sold stock in March, according to a Securities and Exchange Commission filing.

It claims that Medco misled the public in an April 9 press release in which it did not reveal a potential sale of Medco.

The shareholders are seeking unspecified monetary damages.

Medco said it does not believe it has done anything wrong and that it intends to vigorously defend itself.

Meanwhile, Medco has announced that Govier is no longer employed by company.

Dr. Roger D. Blevins, who was a director of cardiovascular research at Medco, is acting as director of research.

MONACO (MAY 22) - A 1962 Ferrari Berlinetta fetched a record price of 59.9 million francs (10.9 million dollars) at a Sotheby's auction here Monday.

The racing car was bought by a Swede, Han Thulin, for the firm Consolidator, owners of a museum where it will be displayed alongside some 100 other collectors' models.

The car was put up for auction by the U.S. collector, Robert Rubin.

The previous record for the auction sale of car was set last November when a 1961 Ferrari Berlinetta was purchased for nearly 3 million dollars.

The Ferraris, which dominated Formula One racing tracks in the 1960s, have seen their prices skyrocket since the death of the Italian firm's founder, Enzo Ferrari, in 1988.

TOKYO (MAY 22) - Japan's labor productivity ranks second to last among 11 industrialized nations because of its poor showing in agriculture and construction, the Japan Productivity Center reported on Tuesday.

The center, in its survey report entitled "International Comparison of Labor Productivity--1990," said Japan's national productivity registered a strong 1.75-fold rise between 1970 and 1987, falling just below Spain

which marked a 1.83-fold increase over the same period.

During the 18-year period, the United States remained almost unchanged, marking a 1.13-fold rise.

But Japan was the second lowest on the list in per capita labor productivity in 1987, with an index of 100, compared with Sweden's 90, while the United States and Canada recorded 134.

Per capita productivity stood at an identical 131 for France and Italy, while Belgium's index hit 130, West Germany's hit 124, Spain was at 112, Australia at 103 and Britain at 101.

The report said Japan's overall productivity was lower than other nations because of low agricultural and construction productivity.

It specifically noted that Japan's agricultural productivity was one-third that of the United States, Belgium and Australia.

In the manufacturing sector, Japan ranked fourth after the United States, Italy and Belgium, the report said.

MELBOURNE, Australia (MAY 22) - The Ford Motor Company here said Tuesday it was recalling 76,000 Falcons and Fairmonts after discovering mechanical faults in some models.

They said 46,000 automatic transmission models were being recalled for potential problems with a sticking accelerator pedal.

The parking brake on the other 30,000 models might slip, the company said.

A Ford spokesman said the faults came to their attention when customers complained. Routine testing uncovered other faults.

PARIS (MAY 22) - The French trade deficit grew in April to 4.31 billion francs (about 770 million dollars) compared with a deficit of 1.06 billion francs in March on a revised basis, official figures published on Tuesday showed.

On a seasonally adjusted basis, exports in April were worth 94.06 billion francs compared with a figure of 100.40 billion francs in March, and imports were worth 98.37 billion francs compared with a figure of 101.46

billion francs. Exports compensated for imports to the extent of 95.62 percent compared with a level of 98.96 percent the previous month.

In terms of raw data, there was a deficit of 3.03 billion francs compared with a deficit of 1.08 billion francs in March. Exports were worth 95.82 billion francs compared with 110.69 billion francs the previous month, and imports were worth 98.85 billion francs compared with 111.77 billion francs. Exports compensated for imports to the extent of 96.94 percent compared with a level of 99.04 percent.

During the first four months of the year, the total deficit was 11.21 billion francs (about two billion dollars) on an unadjusted basis compared with a deficit of 13.32 billion francs during the same period of 1989. On an adjusted basis, the deficit was 6.66 billion francs (about 1.2 billion dollars) compared with a deficit of 8.59 billion francs.

The trade in industrial goods, including military equipment, resulted in a deficit of 7.01 billion francs on an adjusted basis, compared with a deficit of three billion francs the previous month.

The surplus on the trade in military equipment fell to 1.69 billion francs from 2.42 billion francs.

The figures included the sale of six Airbus aircraft worth 1.39 billion francs.

The surplus on agricultural produce fell from 5.43 billion francs to 4.75 billion francs.

SYDNEY (MAY 22) - The Australian Wool Corp. (AWC) will stockpile five million bales of wool to preserve the floor price for another year, c Hugh Beggs said Tuesday as growers discussed the industry's crisis at their annual meeting.

Mr. Beggs said on radio the AWC was determined to keep the floor price at 8.70 Australian dollars (6.63 U.S.) a kilo but also admitted the minimum price scheme could not last forever.

Bob Hawke's Labor government, which has the power to cut the floor price, has pressured the AWC to slash the minimum price, citing concern at the AWC's soaring debt which is needed to fund the wool stockpile of 2.5 million bales.

The government is also worried falling wool exports will add to Australia's yawning current account deficit.

The Wool Council of Australia, the growers' organisation, met Tuesday to discuss the industry's woes sparked by the withdrawal of buyers from Western Europe, the Soviet Union and China. It is expected to set the 1990-91 floor price on Wednesday.

Most of Australia's 60,000 wool farmers, who own 177 million sheep which produced one million tonnes of wool in 1989-90, want to preserve the floor price. They say a cut in the floor price could destabalise the market.

Mr. Beggs said on radio that "we are prepared to hold a stockpile of perhaps four to five million bales" which would take about a year to reach.

"(AWC) Buying at this rate can't continue, nor will it," he said. "The best way we can restore confidence in the market is to make this jolly decision to hold the floor (price)."

Other industry officials have estimated that wool supplies in Western Europe and Japan are low and that China was about to buy a large amount of fleece which could shore up the wool price.

At wool sales here and in Melbourne Tuesday, the AWC was forced to buy 76.5 percent of the 30,890 bales on offer, a spokesman for the AWC said.

#90142d1470 05/22/1990 ~French/German News Agency

BRUSSELS (MAY 22) - Belgium plans to tie the Belgian franc to the Deutsche mark as part of the first phase of economic and monetary union within the European Economic Community (EEC), it was announced here Tuesday.

Belgian Finance Minister Philippe Maystadt said in a radio interview that the government "plans to announce its firm desire to link the Belgian franc to the German mark."

The minister did not give details, but his remarks were interpreted as implying that Belgium would follow what has been the practice of the Dutch government for several years.

Financial observes said that such a move would probably involve also the Luxembourg franc which is tied to the Belgian franc. Belgium, the Netherlands and Luxembourg are closely linked within the Benelux customs union.

The first phase of economic and monetary union within the EEC is due to take effect on July 1, 1990. It will require a strengthening of co-ordination of economic policies pursued by the 12 countries in the EEC

and free circulation of capital.

The latter condition has been met with the removal of exchange controls in Italy and France, and the abolition of a double exchange rate in Belgium.

The financial nesspaper Echo de la Bourse reported that a decision to link the currencies could be announced when the draft budget was published, which would be before the summer.

Experts said that such a link with the strongest currency within the EEC would make possible a reduction of Belgian interest rates which are about one percentage point higher than rates in the Netherlands and in West Germany.

They noted that the Belgian authorities appeared to be seizing an opportunity to establish a link with the mark at a time when the mark is showing some weakness because of concerns about the costs of achieving monetary union and a unified Germany.

LONDON (MAY 22) - British conglomerate Polly Peck International said Tuesday that it plannned to reorganise its electronics interests, increasing its stake in Japanese group Sansui Electric from 51 percent to 70 percent.

Polly Peck had acquired a 51 percent stake in Sansui in October for 69 million pounds (115 million dollars).

The conglomerate now plans to sell two of its companies, Capetronic and Imperial, to Sansui for 79.8 billion yen (515 million dollars).

Sansui will finance the purchase by a new share issue which will be largely taken up by Polly Peck, increasing its stake in Sansui to 70 percent.

Capetronic, which operates in the United States and the Far East, notably Taiwan, had pre-tax profit of 25 million dollars last year on sales of 398 million.

Italian-based Imperial had a pre-tax loss last year of 9.5 million dollars on turnover ov 81.2 million.

But Polly Peck, which acquired Imperial last year, said it had now begun to trade profitably after remedial measures had been taken.

The company, founded in Germany in the 1930's, is "well placed to take advantage of the emerging economies of Eastern Europe," Polly Peck said.

The group said it believed these electronics interests would be worth much more as part of a Japanese-listed company whose share profit ratio is better than that of Polly Peck, which has been pulled down by the group's other main activity, fruit trading through Del Monte.

The conglomerate said Tuesday it was also to introduce 15 percent of the capital of its television, video recorder, audio equipment and microwave oven maker Vestel on the Istanbul stock exchange.

This will bring in 70 million pounds for Polly Peck, to be used to reduce the conglomerate's debt.

Vestel is one of Europe's leading audio makers and has recently linked up with French group Thomson to produce colour television tubes in Turkey.

The company will also benefit from the transfer to Turkey of part of Sansui's production currently carried out in South Korea and Taiwan.

Polly Peck shares were up one pence at 433 in early trading in London on Tuesday.

WELLINGTON (MAY 22) - New Zealand's foreign debt at the end of 1989 stood at 47.6 billion New Zealand dollars (27.2 billion U.S), the Statistics Department reported Tuesday.

It represented an increase of 1.4 billion dollars (0.8 billion U.S.) between September and December last year.

Opposition finance spokesman Ruth Richardson said the figure was "dangerously high."

She said New Zealand's overseas indebtedness was about 70 percent of gross domestic product.

"The outlook is even more alarming given the rate at which our current account deficits are adding to our indebtedness," Miss Richardson added.

She said it was little wonder foreign investors viewed New Zealand with suspicion and demanded some of the highest real interest rates in the Western world to invest here.

#90142d1830 05/22/1990 ~French/German News Agency

BRUSSELS (MAY 22) - French auto maker Renault is to be ordered to repay half of 12 billion francs (2.18 billion dollars) in state aid it received from the French government, sources close to the European Commission said here Tuesday.

The Commission had decided that Renault would have to repay six billion francs after reaching agreement with the French government, the sources said.

Renault will have to repay 3.5 billion francs immediately and the remaining 2.5 billion will be added to Renault's long-term debt.

The French government had written off 12 billion francs of Renault debt with the agreement of the European Economic Community, but subject to certain conditions.

#90142d1880 05/22/1990 ~French/German News Agency

LONDON (MAY 22) - The administrators of Sock Shop International, the debt-troubled British retailer, on Tuesday announced the closure of 58 of the company's 109 stores around Britain.

The administrators were appointed at the end of February this year and shares in Sock Shop were suspended at 34 pence each after the group revealed a four million pound (seven million dollars) interim loss and debts in excess of 19 million pounds (32 million dollars).

Over the past three months accountants from the firm of BDO Binder Hamlyn have been working on plans to save the firm, and it was they who made the decision to axe the stores.

Mr. Peter De Buisson of BDO said after the announcement "I believe the steps we are now taking to rationalise the company will improve its profitability and reward everyone's efforts to save Sock Shop."

Mr. De Buisson said he was still looking for new investors to "take a sustantial interest" so that the company can be refloated.

Sock Shop still has 12 stores in France, but closed down its 17 U.S. outlets in December.

The closures announced Tuesday will take place in the British provinces, leaving the chain's profitable stores in London and six other major cities untouched.

The administrators were due to find a rescue plan to put to shareholders and creditors on May 21, but were last week given a further three months to find a package.

Sock Shop was founded by former British Businesswoman of the Year Sophie Mirman and her husband Richard Ross, who opened their first Sock Shop in 1983 and in less than eight years turned the company into a multinational.

But the cost of servicing the heavy debts incurred through rapid expansion and a downturn in consumer spending in the clothes sector caught up with the company last year.

#90142d1890 05/22/1990 ~French/German News Agency

TOKYO (MAY 22) - Japan's Oji Paper Co., the country's biggest paper manufacturer, said Tuesday its net profit fell 8.6 percent in the year to March to 21 billion yen (138 million dollars).

But sales rose 11.5 percent over the previous year to 468.9 billion yen (3.1 billion dollars), it said.

The company, an affiliate of the Mitsui group with major activities in Brazil, New Zealand and Canada, said the profit decline reflected higher raw material prices stemming from the weaker yen.

Oji expects to earns a net profit of 16 billion yen (105 million dollars) in the current year on sales of 500 million yen (3.3 billion dollars).

#90142d1920 05/22/1990 ~French/German News Agency

TOKYO (MAY 22) - Japan's Ube Industries Ltd. said Tuesday it had won an order from Thailand's Siam Cement Co. to build the largest cement plant in the world near Bangkok, company officials said.

The plant costing 165 million dollars will be built in Khao Wong district some 130 kilometers (80 miles) north of Bangkok and is to be completed by March 1993.

The new plant, capable of producing three million tons of cement a year, would surpass the 2.7 million ton capacity of an Ube Industries' plant in western Japan, the officials said.

The cement market in Thailand is expanding rapidly due to the country's steady economic growth with demand in 1990 estimated at 15 million tons, the officials said.

#90142d1940 05/22/1990 ~French/German News Agency

TOKYO (MAY 22) - Japan's Mitsubishi group is to supply West Germany's Daimler-Benz AG with up to 400 billion yen (2.6 billion dollars) a year in auto parts for vehicles sold in the Asian market, a news agency reported Tuesday.

Reports also quoted Mitsubishi Corp. vice president Yoshio Taneguchi as saying that the two industrial giants had agreed to additional plans to assemble vehicles in the Soviet Union and East Germany.

Other fields of cooperation include semiconductors and aeronautics, the reports said.

The reported announcement represents the first concrete results of the cooperation agreement announced jointly by the two companies in March.

Jiji Press said that Mitsubishi would supply pumps and other parts to Daimler subsidiary Mercedes Benz for vehicles destined for Southeast Asia.

Mr. Taneguchi was also quoted as saying that Mitsubishi would supply machine tools and other equipment for a Mercedes car plant to be built in the Soviet city of Gorky, producing between 240,000 and 300,000 vehicles a year.

A spokesman for Mitsubishi Motors Corp. confirmed that the company might cooperate with Mercedes in assembling trucks at an East German plant to be built near Berlin.

"But at this stage, it's just a plan," he said.

Officials at Mitsubishi Corp., the core company in the group, were not available for comment.

#90142d1950 05/22/1990 ~French/German News Agency

KEELUNG (MAY 22) - Taiwan incinerated confiscated ivory stocks and lion heads and skins smuggled from South Africa Tuesday as part of the island's

contribution to wildlife protection.

The destruction of the items worth millions of dollars was the the first such event in Asia, agricultural officials said.

The 700 kilograms (1,542 pounds) of ivory and 10 lion heads and skins trafficked by a local trading company and confiscated by the authorities in August were burned in five cases in a public cemetery in the northern port city of Keelung, the officials said.

Former chairman of the World Wildlife Fund Prince Bernhard of the Netherlands and Director General of the International Council of Bird Protection Christoph Imboden were invited to witness the public cremation.

Despite a strong demand for ivory-made ornaments and name seals in Taiwan, authorities here have prohibited imports and exports of raw and worked ivory from August 29 in support of international agreements to end ivory trading and to save elephants from extinction, the officials said.

#90142d2250 05/22/1990 ~French/German News Agency

SEOUL (MAY 22) - South Korean President Roh Tae-Woo goes to Tokyo Thursday for a three-day state visit despite strong demands here that he scrap the trip unless he gets an unlikely but clear-cut apology from Emperor Akihito over Japan's colonization of Korea.

Mr. Roh made it clear to Japanese news correspondents based in Seoul last week that he expected the emperor to apologize in no uncertain terms for the 35-year-long occupation, which ended when Japan was defeated in World War II.

But Japanese officials and politicians have balked at the idea, saying the Emperor, though the symbol of national unity, is not constitutionally bound to make such a gesture - an attitude which enraged South Korean public opinion.

Leading editorialists have demanded that Mr. Roh cancel the whole trip.

To recall vividly the memories that Japan left behind, local newspapers have been reproducing old photographs from the occupation.

The series shows Japanese executions of Korean independence fighters and thousands of Korean youths being recruited into the imperial army or mobilized to work in Japan's coal-mines.

Most eye-catching were pictures of young Korean women being taken away to serve as "comfort girls" for Japanese soldiers fighting in Southeast Asia

and the South Pacific, and hundreds of Koreans forced to bow in groups before the Japanese Shinto shrine to express their loyalty to the emperor.

Scores of families of the victims of the Pacific War are now daily staging a sit-down protest in front of the Japanese Embassy in Seoul, noisily demanding that Japan pay due compensation for hundreds of thousands of Korean victims.

Japan has said that the 1965 bilateral normalization treaty providing for a 500 million dollar "property claim" to South Korea settled the whole issue of compensation.

A snap public opinion poll conducted by a leading Seoul daily five days ago showed that the majority of South Koreans wanted Mr. Roh not to make the planned visit to Japan because Akihito's reported plans to declare that "my heart aches for the unfortunate past" was not sufficient.

#90142d2290 05/22/1990 ~French/German News Agency

SEOUL (MAY 22) - Workers at the giant Hyundai automobile plant in the industrial city of Ulsan voted two-to-one to Tuesday to reject a wage-rise agreement reached after week-long talks with management, and decided to continue striking, union leaders said.

They said that 16,955 men or 68.9 percent of those vote opposed the agreement - which stipulates a wage raise of 39,000 won (55.7 dollars) or 7.6 percent, plus a 44-hour work week.

Union chairman Lee Sang-Bom told a workers meeting before the vote that the wage hike was the best won by any large South Korean union this year.

Production stopped eight days ago at the Ulsan plant, which employs 26,500 workers, with the union demanding a 19 percent wage hike.

Company officials said labor disputes cost Hyundai a 22 percent production loss last year, when it produced 590,000 cars of which 200,000 were exported.

#90142d2300 05/22/1990 ~French/German News Agency

PERTH, Australia (MAY 22) - Alan Bond's Bond Brewing Holdings Ltd. was on Tuesday granted an extension to repay more than 800 million Australian dollars (610 million U.S.) owed to a banking syndicate that had pressed for its wind-up.

The parent company, Bond Corp. Holdings Ltd., said in a statement that the

syndicate, led by the National Australia Bank Ltd., had dropped legal action to recover the debts and agreed to allow Bond's brewing arm until September 30 to pay its debts.

The repayment deadline would be extended to July 1, 1991, if Bond Corp.'s brewery assets were sold to another Bond subsidiary, Bell Resources Ltd., by July 31, Bond Corp. said.

The extension by the banking syndicate ended five months of bitter court battles during which time the syndicate had sought, was granted, and then lost the right to appoint receivers to Bond Corp.'s brewing arm.

The reprieve occurred the same day that the federal government decided to limit foreign ownership of commercial television and radio stations to 20 per cent, a move that could torpedo Bond Media's plans for an injection of much-needed foreign capital.

-30- 1337

#90142d2310 05/22/1990 ~French/German News Agency

NEW DELHI (MAY 22) - The chief minister of the state of Haryana, northern India, Om Prakash Chautala, resigned Tuesday, ending a crisis that had gripped India's six-month-old coalition government.

Prime Minister Vishwanath Pratap Singh told the Lok Sabha, the lower house of parliament, that Chautala submitted his resignation to the new chief of the governing Janata Dal (People's Party), S.R. Bommai, following a unanimous decision by the federal cabinet overnight Monday.

V.P. Singh, who was president of the Janata Dal until Bommai took over last week, said the resignation would be forwarded to the Haryana governor and that the state chapter of the party would elect a new legislative leader Wednesday.

Earlier, Bommai told reporters here Tuesday that Chautala "will immediately step down from his office ... as a disciplined member of the party."

The announcement signaled an end to a political crisis that had gripped the National Front government here after Deputy Prime Minister Devi Lal opposed the cabinet's call for the resignation of Chautala, his elder son.

Lal's stand, announced late Monday, was expected to pit him directly against V.P. Singh, but Chautala made known his decision Tuesday after hurried consultations with his father.

The opposition Congress (I) party has accused Chautala of engineering the murder of a candidate Thursday, which invalidated a bye-election to the

Haryana legislature due May 26.

Chautala, one of 29 candidates, was said to be reluctant to face the electorate in the constituency of Meham, where influential village elders were backing his main opponent, Anand Singh Dangi.

The independent candidate's murder led to police firing on violent crowds, leaving three people dead and several wounded. On Monday, the federal parliament was plunged into chaos over the violence.

An earlier election in Meham on Feb. 27 was declared invalid by the authorities after violence, also blamed on supporters of Chautala, that left six people dead and dozens wounded.

The authorities later fixed May 26 for a fresh election in Meham.

Chautala, who needs to win an election before June 2 if he wants to remain the chief minister, has also entered himself as a candidate in a second constituency, Dariba Kalan, where ballotting is due Saturday. Earlier Tuesday, police arrested some 200 members of the Congress (I) youth wing after they crossed police lines during a noisy protest demanding Chautala's resignation. There was no violence.

#90142d2470 05/22/1990 ~French/German News Agency

WARSAW (MAY 21) - The trial of strength between the Polish Government and striking railway workers in northwest Poland is the first major social test for Prime Minister Tadeusz Mazowiecki and his team who were carried to power by the anti-Communist movement.

The strike is also an embarrassment for the Solidarity trade union movement, observers here said.

Since Sunday, the strike, which began spontaneously in Slupsk, a northern town of 100,000 people, has spread throughout western Pomerania. On Tuesday it continued to paralyze traffic throughout the region. So far, appeals by the government against what it has termed "wildcat" action, have had no effect.

At the same time about 50 railway workers in Slupsk were continuing a hunger strike which was begun by 10 of them on May 10. Three of the hunger strikers were taken to hospital on Monday.

Both protests were in support of demands for an increase in pay, and accelerated progress towards reform of management of the rail network.

The main demand is for an increase in their average pay from 751,000 zlotys

or 76 dollars per month to the level of average national pay plus 10 percent, or to about 1.1 million zlotys.

The transport ministry said that 14 long-distance train departures had been suspended, and that the departure of 160 local passenger trains had been cancelled. A further 18 scheduled train services had been changed.

In addition, 47 goods trains had not arrived at their destinations, the ministry said.

The hunger strikers in Slupsk have been joined by 11 railway workers from Torun, 200 kilometres (125 miles) north of Warsaw, as a sign of "solidarity".

Since the beginning of the conflict the government has taken a firm line, saying that "to satisfy the demands of the strikers would amount to an undermining of economic reforms".

In a statement published by the press on Tuesday, the government described the strike as being "outside the law" and stressed that "union groups alone are in a position" to negotiate with the rail management.

Labor Minister Jacek Kuron said that "the government can give ground in no other way except by resigning".

Kuron was immediately attacked by a close aide of Solidarity leader Lech Walesa, Lech Kaczynski, who is vice president of Solidarity. He implicitly reproached Kuron of wanting to give the conflict a political aspect.

Kaczynski met the protestors in the absence of Walesa who was visiting West Germany. He said on Tuesday that "the first task" of his union was to "defend the interests of the workers". But he declined to express support for the strike.

The leaders of Solidarity were due to meet in Gdansk on Tuesday to adopt an "official position" on this. Walesa was expected to attend.

Observers here hold that Solidarity is caught between the hammer and the anvil of this conflict which has erupted outside its structures and can therefore be described as "illegal".

The dispute is highly embarrassing for the government, but Solidarity cannot side fully with ministers without appearing to betray its origins.

Meanwhile, the government has set up a network of buses and air links. From Tuesday the military were due to transport people and goods.

The strikers and the management began talks early on Tuesday.

The president of Solidarity's parliamentary club Bronislaw Geremek, commenting on the strike to AFP, said that "patience has its limits" but that the government "has no choice" but to continue its policy of austerity.

He said: "For the first time the workers are expressing their discontent in an organized and massive way. Until now the Polish people have shown enormous patience -- although during the first months of 1990 real pay fell by about 40 percent, there was no strike, no explosion."

#90142d2570 05/22/1990 ~French/German News Agency

KUALA LUMPUR (MAY 22) - The High Court here on Tuesday granted unionized workers of the U.S.-based Harris Solid State Malaysia Sdn. Bhd. an order stopping the company from interfering with union activities.

The court order came on the heels of allegations by the Washington-based International Labor Rights Education and Research Fund here Saturday that Malaysia and its electronics industry were violating workers' rights.

The order applied also to Harris Solid State's sister company Harris Advanced Technology (Malaysia) Sdn. Bhd., Bernama news agency said.

The Harris Solid State union, set up in January last year, fought a long battle with management for recognition. It was recognized last month only after Human Resources Minister Lim Ah Lek intervened.

Union leaders said that by that time Harris Solid State had sacked most of the unionized workers and re-employed them through Harris Advanced Technology.

Bruno Pereira, the union's president, said in an affidavit that "victimization, harassment and intimidation of union members and officials were a regular occurence" from the formation of the union on January 21 last year.

Mr. Pereira said union leaders were placed in a building away from the two companies' main buildings and were only allowed to enter the main premises under escort to go to the clinic and use automated teller machines.

"We place orders for food which is brought to us from the main canteen," he said, accusing the two companies of trying to prevent communication between union leaders and members and the rest of the employees.

The union is also seeking a court declaration that the termination of services of Harris Solid State employees and their subsequent

re-employment by Harris Advanced Technology was illegal.

#90142d2600 05/22/1990 ~French/German News Agency

SINGAPORE (MAY 22) - Despite the Singapore economy's strong showing in the first quarter, it was still too early to revise the six percent to eight percent growth forecast for the year, a senior official said Tuesday.

But the Singapore economy was likely to grow at the higher end of the forecast in 1990, Mah Bow Tan, minister of state for trade and industry, told reporters.

Mr. Mah said that the economy grew at 10 percent in the first quarter, but it was "too early to revise the forecast in view of the economies of our trading partners."

He said caution should be the key word, as there was a general consensus of a coming slowdown in the world economy.

Mr. Mah said that the strong first quarter growth was partly the result of a one-time boost from the petrochemical industry.

He said the industry recorded a production increase of 58 percent, compared to the same period a year ago when there was a plant shutdown of the petrochemical complex for maintenance.

He said that all sectors of the economy, except construction, grew faster than the previous quarter. The star performer was the financial and business services sector, which grew at a rate of 16.7 percent.

Commerce was next at 13.7 percent, followed by manufacturing at 12 percent, while the transport and communications sectors grew at 9.9 percent, and construction at 4.4 percent.

Mr. Mah cautioned that the high growth may not be sustained, although the composite leading index, an indicator of economic activity, and business expectations for the rest of the year were positive.

He said both external and domestic demand contributed to the growth.

#90142d2620 05/22/1990 ~French/German News Agency

TOKYO (MAY 22) - Japan, which is closely following developments in the East Bloc, wants to be associated in some way with the Conference on Security and Cooperation in Europe (CSCE) so as to be part of shaping the new Europe.

Japanese Foreign Minister Taro Nakayama told a House of Councillors budget committee that Tokyo was interested in promoting economic and political dialogue with Europe and wanted to take part in the CSCE as an observer.

Earlier this month former prime minister Yasuhiro Nakasone, who is particularly influential within the ruling Liberal Democratic Party, advocated Japan's involvement in the conference, which includes 35 countries - all the European nations, except Albania, together with the United States and Canada.

In an article in the quarterly New Perspectives Mr. Nakasone said, "The United States and Canada participate in the CSCE although they are not European countries. As a result, the only major Western country (among the Group of Seven industrialized nations) that does not participate in CSCE is Japan.

"As the CSCE is of major significance for global security, it is inconceivable that Japan not engage itself, directly or indirectly, in that process," he added.

Tokyo's interest in the CSCE is a reflection of its concern to boost its political clout in East-West talks.

It has pledged economic aid to Hungary and Poland and will be one of the main contributors to the European Bank for Reconstruction and Development in countries in the East bloc.

BEIJING (MAY 22) - China expects to step up construction of nuclear reactors in the near future, aiming for a total capacity of 12,000 megawatts to alleviate an acute energy shortage, China Daily said Tuesday.

The China National Nuclear Corp. (CNNC) has set the goal of generating 6,000 megawatts by the end of the decade, the English-language daily said, adding that the country's first two reactors at Qinshan, near Shanghai, and at Daya Bay in the southern province of Guangdong were already under construction.

CNNC also hopes to have more plants capable of producing another 6,000 megawatts under construction, CCNC executive vice president Chen Zhaobo was quoted as saying.

Mr. Chen said the first phase of the 300,000-kilowatt water reactor at Qinshan Station, the first Chinese-designed nuclear power plant, will begin producing electricity by the beginning of 1991.

The Daya Bay reactor, built with French and British technology, will have a capacity of 1,800 megawatts and is expected to go on line in 1992-1993.

Mr. Chen said China hopes to discover new uranium deposits and boost its uranium reserves, adding that more than 200 types of uranium have been found so far.

"The current uranium over-supply in the world market, caused by oil price reductions and the negative effect of the Three Mile Island and Chernobyl accidents, is a temporary phenomenon," Mr. Chen was quoted as saying.

LONDON (MAY 22) - More than 6,000 job cuts are likely in the British coal industry in the next three years, British Coal chairman Sir Robert Haslam said here Tuesday.

Sir Robert was speaking in London after a meeting with National Union of Mineworkers leader Arthur Scargill to discuss the future of the country's coal industry.

On Friday the British Broadcasting Corporation had said that British Coal was planning to axe 10,000 jobs in coalfields in Yorkshire and Nottinghamshire in northern England because of falling demand for the coal which is high in sulphur.

Some 150,000 jobs have been cut and 100 pits closed since a lengthy miners' strike in 1984-85.

#90142d2720 05/22/1990 ~French/German News Agency

TOKYO (MAY 22) - Japanese automaker Daihatsu Motor Company has broken off talks with the Polish authorities aimed at establishing a joint venture in the Eastern European country, the Yomiuri Shimbun newspaper reported.

The Japanese firm, linked to the Toyota group, was discouraged by Poland's economic problems as well as the lack of organization among the leaders of the Polish automobile sector, an unnamed senior Daihatsu executive told the daily.

A Daihatsu spokesman reached in Osaka refused to comment on the report, saying the firm had not yet made a decision on the Polish project.

Daihatsu chairman Tomonaru Eguchi announced in January that his firm, which specializes in compact cars with small or mid-sized engines, was

establishing a joint venture to build cars in Poland.

The Polish plant was to produce 5,000 to 6,000 cars a year starting in 1991,
 and as many as 10,000 in 1992.

MILAN (MAY 2) - Italian concern Olivetti, part of the De Benedetti group, on Tuesday categorically denied that it was holding talks with Philips on the possibility of the Dutch electronics giant taking a controlling stake.

The denial came after a Dutch newspaper reported on Tuesday that Philips wanted to take control of Olivetti and was willing to pay three billion guilder (1.5 billion dollars) for a 51 percent stake in the Italian computer and electronic office equipment concern.

Olivetti "categorically and absolutely denies that it is holding negotiations with anyone, including Philips, on a possible selling of shares," the group said in a statement issued in Ivrea outside Milan.

"As for our relations with Philips, we reaffirm that we are currently holding technical discussions with this company on possible technological andor commercial cooperation in particular and limited sectors of the market."

Olivetti holding company CIR also issued a statement dismissing the Dutch press report as "absolutely false."

Dutch newspaper De Volkskrant on Tuesday cited two senior Philips officials as saying that the Dutch group wanted to acquire the 49.9 percent stake in Olivetti held directly and indirectly by financier Carlo de Benedetti.

Philips could already have acquired the remaining shares needed to give it at least 51 percent of Olivetti on the Milan stock exchange, De Volkskrant said.

Philips spokesman Cor Vreven refused to comment on the report, but reaffirmed that Philips was holding talks "with several companies, including Olivetti."

#90142d2890 05/22/1990 ~French/German News Agency

TEHERAN (MAY 22) - Iran's parliamentary speaker Mehdi Karubi called Tuesday for the world's one billion Moslems to revolt against Israel following the killing of eight Palestinian workers by an Israeli gunman

near Tel Aviv.

"Moslems should threaten Zionist interests worldwide by setting up resistance and Hezbollah cells so they can no longer feel safe or secure from the revolutionary wrath of Moslems in any part of the world," Mr. Karubi said.

In an address to parliament quoted by IRNA news agency, he said Sunday's attack was "expected from the Zionists in view of their enmity to Islam and Moslems, especially since they are backed by the Great Satan, United States."

A group of 240 MPs called on all Moslem governments to "break their silence on the Zionist regime's latest crime against the Palestinian people."

"Only Palestinian people sincerely backed by Islamic governments and having faith in the issue of Palestine can help liberate the usurped land from U.S.-Zionist control," they said.

Israeli officials have said the Tel Aviv gunman, whose attack triggered violent Israeli-Arab clashes in the occupied territories and Israel itself was mentally unbalanced.

BERN (MAY 22) - Swiss police and some 100 anti-apartheid demonstrators clashed violently here Tuesday after South African President Frederik de Klerk arrived on the latest leg of a European tour to explain his plans to abolish apartheid.

Witnesses said police used rubber bullets and teargas to disperse protestors close to the hotel where Mr. De Klerk was due to give a news conference. Some of the demonstrators threw smoke-bombs and fired other missiles, including ball bearings, at the hotel.

It was the second outbreak of violence since Mr. De Klerk's tour began, following clashes last week in Athens.

Switzerland, unlike the 12 European Economic Community (EEC) nations, has always refused to impose economic sanctions on Pretoria. Mr. De Klerk was due Tuesday to have talks with the president of the Swiss confederation, Arnold Koller.

On Wedneday, the South African leader is due to go to Zurich in a "private" capacity for talks with bankers and businessmen.

The South African Embassy would give no details of his agenda or say who he

would meet. Economic ties between the two countries have always remained strong despite international pressure for sanctions.

Mr. De Klerk's visit has triggered protests from anti-apartheid and religious groups. Swiss church leaders have urged the government to come out openly in favour of reform and respect for human rights in South Africa.

In London Tuesday, British Prime Minister Margaret Thatcher said political reforms Mr. De Klerk had introduced in South Africa were "irreversible", adding that sanctions had become "almost irrelevant."

The reforms would lead to "an end to apartheid" and the establishment of a non-racial, fully democratic system of government in the country, Mrs. Thatcher told the British parliament, three days after talks with Mr. De Klerk.

"Those people who want South Africa to have a prosperous economy should not support sanctions in any way," Mrs. Thatcher added. She said "everyone has been impressed with Mr. De Klerk's integrity and courage".

PARIS (MAY 22) - The French stock market soared on Tuesday in active trading which saw blue chips in demand, and the CAC 40 index ended the day 1.09 percent up on Monday's close.

The rise started early in the day, and at first caught operators by surprise, particularly as the announcement of French foreign trade figures for April showed little cause for optimism.

The trade deficit swelled to 4.35 billion francs (790 million dollars), against one billion (181.8 million dollars) in March.

But the Paris market was cheered by the good overnight showing on Wall Street, and many market analysts remain optimistic, seeing stocks as underpriced given the good forecasts for many major businesses this year.

CMB Packaging gained six percent on Tuesday, Vallourec was up 5.5 percent and cement group Lafarge Coppee gained four percent.

#90142d2950 05/22/1990 ~French/German News Agency

NEW DELHI (MAY 22) - The death toll from a cyclone that struck the southern Indian state of Andhra Pradesh a fortnight ago neared 1,000 Tuesday, the Press Trust of India (PTI) reported.

The news agency said the toll now stood at 977 but did not specify where and how the new deaths occurred. At least 815 people had been reported killed by Sunday in the powerful mid-summer cyclone, which hit the coastal state May 9.

The worst-hit was Andhra Pradesh's Guntur district, where there were 360 deaths, followed by the coastal areas of Krishna with 226, Visakhapatnam with 148 and East Godavari with 106.

The storm, which packed winds up to 250 kilometers (150 miles) an hour, also caused damage worth several hundred million dollars.

A 1979 cyclone in Andhra Pradesh killed more than 10,000 people, but this year more than 400,000 people were evacuated before the storm hit.

#90142d2970 05/22/1990 ~French/German News Agency

CAPE TOWN (MAY 22) - Soweto, Sharpeville, and the countless other isolated, smog-cloaked black dormitory "townships" could be history under a blueprint for a new South Africa outlined by Planning Minister Hernus Kriel.

Delivering another body blow to apartheid, Mr. Kriel said the hugely unpopular, race-based councils administering black, Indian and Coloured (mixed race) townships had no credibility because they lacked a sound financial base.

The next step would be to forge a common tax base to bind the townships to the white-controlled towns, shopping precincts and industrial areas where most of the wealth at present remains tied up.

"Everyone should share in tax and income benefits created by the selling and rendering of services in industrial areas and central business districts," he told parliament Monday.

Then the chronic shortage of skilled labour to run townships smoothly would have to be addressed.

"We do not have sufficient trained manpower to supply the needs of existing local authorities," he said.

"I believe that we shall have to seriously consider the possibility of various local authorities being served by a single administration."

#90142d3010 05/22/1990 ~French/German News Agency

PARIS (MAY 22) - French nuclear fuel group Cogema said on Tuesday its consolidated net profit tripled last year to 1.52 billion francs (276.3 million dollars) from 459 million (83.4 million dollars) in 1988.

Consolidated turnover was up 6.4 percent at 23.6 billion francs (4.3 billion dollars).

The performance of the different divisions of Cogema, which is involved in the nuclear fuel industry at all stages from uranium mining to storage of nuclear waste, varied widely during 1989.

The mining division saw turnover shrink 15 percent due to a fall in the uranium market, which saw spot prices fall to 8.80 dollars a pound.

Cogema was particularly being hit by formidable competition from the Soviet Union, anxious to earn foreign currency, and group president Jean Syrota said he was worried about "risks of destabilisation of the market due to selling at dumping prices."

The group's production of nuclear fuel soared 140 percent, due to the equipping of the core of a new supergenerator, Superphenix.

It also obtained the green light from the authorities on Tuesday to build a new plant to produce 120 tons of uraniumplutonium fuel a year.

Cogema and French group Framatome will each hold an equal stake in the new Melox plant, and Pechiney Uranium has taken an option to take a 10 percent stake, Mr. Syrota said. But this did not mean that foreign involvement was ruled out.

The plant is due to go on line in 1994.

#90142d3120 05/22/1990 ~French/German News Agency

JERUSALEM (MAY 22) - Prime Minister Yitzhak Shamir warned Israeli Arabs on Tuesday that the government would no longer tolerate the protests sparked inside Israel by the killing of eight Palestinian workers near Tel Aviv.

Israeli Arabs "have gone beyond the tolerable limits and Israel will not stand with arms crossed and wait for the acts of violence to cease," Mr. Shamir told a meeting of his right-wing Likud bloc deputies.

In the northern city of Nazareth, Israeli forces clashed Tuesday with Arab youths who hurled stones and waved outlawed Palestinian flags. Troops shot dead two young Palestinians in the occupied Gaza Strip, Arab sources said.

The prime minister charged that the demonstrations in Arab districts of Israel sparked by the killings Sunday by a lone Israeli gunman in the Tel Aviv suburb of Rishon le Zion were not spontaneous acts of outrage.

Israeli officials have said the assailant, 21-year-old Ami Poper, a former soldier, was mentally unbalanced.

"Any effort to attribute the Rishon le Zion massacre to a change in Israeli policies is a deformation of the facts," Mr. Shamir said, dismissing criticism of his party's hardline stand on negotiations with the Palestinians.

The caretaker prime minister, whose government collapsed last month because of Likud's opposition to such negotiations, accused Arabs of displaying "violent hatred ... and a desire to kill."

In the wake of official Israel condemnation of the Rishon le Zion killings, the government appears to have now decided to adopt a tough line with Israeli Arabs, analysts said.

"We have until now done everything to avoid bloodshed," warned Israeli Police Superintendent Yaakov Turner. "But there is a limit and I advise them to be careful."

Police launched a "very violent" charge Tuesday into the ranks of Arab youths trying to march in east Jerusalem, the army radio reported.

An Arab Israeli MP, Abdel Wahab Daroushe, meanwhile, warned that the situation in Arab districts could deteriorate if a Likud-led right-wing government came to power.

"What is happening in the Israeli Arab sector is an accumulation of the suffering and anger of my compatriots in the face of the situation in the occupied territories," he said.

"If this continues and a rightist government comes to power, there will be even more trouble inside Israel itself."

#90142d3140 05/22/1990 ~French/German News Agency

BUDAPEST (MAY 21) - New Hungarian Prime Minister Jozsef Antall gave priority to privatisation and European integration in a policy speech to parliament here Tuesday.

Mr. Antall, due to be formally appointed premier in Tuesday's parliamentary session, added that he wanted negotiations with other Warsaw Pact members

on the future of the East bloc military alliance.

Speaking for more than two hours, Hungary's first post-communist leader said he planned to "establish a social market economy and speed up privatisation of state enterprises, which account for 90 percent of the industrial sector."

Mr. Antall, 58, said in an interview in the latest issue of West German magazine Der Spiegel that he wanted to see the public sector reduced to 30 per- cent "in the foreseeable future".

Tuesday, he announced an anti-inflation program to bring the annual rise in prices "down in three years from 25 percent to 10 percent", while trying to tackle a foreign debt currently estimated at 21 billion dollars.

Mr. Antall's conservative Democratic Forum won 164 seats in elections in April. It has teamed up with the Smallholders Party and the Christian Democrats to form a governing coalition commanding an absolute majority of 229 of the 386 parliamentary seats.

Internationally, Mr. Antall said his priorities were European. "The first stage of integration will be Hungarian membership of the Council of Europe, with longer-term prospects for membership of the EEC in the year 2000."

The Council of Europe, which seeks to promote inter-governmental cooperation, includes the 12 nations in the European Economic Community (EEC) and the other European democracies.

Mr. Antall said it was "necessary to open negotiations with the other countries of the Warsaw Pact on the future of this military organization" which, he added, "is no longer needed in its current shape".

#90142d3160 05/22/1990 ~French/German News Agency

DHAKA (MAY 22) - Bangladesh President Hussain Mohammad Ershad launched Tuesday his campaign for re-election, while the opposition threatened to boycott the presidential poll unless parliamentary elections are held first.

"The Jatiya Party (JP) government and myself as president have undertaken innumerable uplift projects for the peoples' welfare, and I hope they will consider these factors, for which the JP deserves their vote," the official BSS news agency quoted Mr. Ershad as saying.

Addressing a large meeting in southern Bangladesh's Barguna district, Mr. Ershad also said parliamentary elections would take place "in due course" following the presidential vote, which is currently set for 1991.

He "pleaded" that people vote for nominees of his ruling JP in the parliamentary poll, saying a strong government would be able to implement policies for the nation's progress, BSS added.

On Sunday, Mr. Ershad, the longest serving head of state of this South Asian country, confirmed that he would run for a second term. He has also recently hinted that all national polls could be held ahead of schedule.

Mr. Ershad, a 60-year-old retired general who seized power in a bloodless 1982 coup, was elected president in 1986. Last July, the JP-controlled parliament passed a constitutional amendment authorizing him to run for an additional two terms.

The leading opposition Awami League (AL) of Sheikh Hasina Wajed has demanded that parliamentary elections should be held ahead of a presidential vote.

Party sources said here Tuesday that they could boycott both polls, as they did the 1988 parliamentary elections.

The sources added that the AL could also call a strike on the election day.

The AL demands that the system of government be returned to parliamentary form, as envisaged in Bangladesh's original constitution, from the current presidential form.

Assassinated president Ziaur Rahman, founder of the Bangladesh Nationalist Party (BNP), introduced the presidential form of government.

His wife, Begum Khaleda Zia, who now heads the opposition BNP, has so far refrained from commenting on the presidential elections, but she charges that fair and free polls are not possible with Mr. Ershad in power.

#90142d3200 05/22/1990 ~French/German News Agency

RISHON LE ZION, ISRAEL (MAY 22) - For the Israeli government and his family, Ami Poper was seized by a sudden fit of insanity when he gunned down eight Palestinian workers in this Tel Aviv suburb.

But for the Arabs of Israel and the occupied territories, the 21-year-old former soldier epitomizes a swelling hatred of Arabs in Israeli society.

The murder of the Palestinian workers Sunday has sparked some of the worst violence in the Gaza Strip and West Bank, as well as in Arab areas of Israel, since an anti-Israeli uprising erupted in December 1987.

"Ami couldn't stand people talking about Arabs in his presence," said a 19-year-old girl who knows him well, declining to give her name. She said he claimed he had been raped by an Arab man when he was 13.

Many residents of Rishon le Zion now see Ami as a local hero. "Sababa," a boy said in praise of his machine-gun attack, using the Hebrew word for super. "I would have done the same if I were more courageous," said a housewife.

Violence against the Palestinians is "the only way to get them to ... off out of the country," a young man said. "At last, it was about time somebody made a start."

The government and the Poper family say the former soldier lost control of himself. Foreign Minister Moshe Arens described his act as "a tragic accident, caused by a demented person, that could have happened in any other country."

His sister, declining to be named, went on television to express her condolences and regrets to the bereaved Palestinian families. "My brother was never linked to any political movement," she said.

The baby-faced, short Abi Poper had threatened to commit suicide because of problems with his girlfriend, a 19-year-old soldier called Haguit Mizrahi, according to his friends.

The girl managed to talk him out of the threat, but she went ahead and left him last Saturday.

The next day, Ami Poper stole his brother's M-16 automatic rifle and army uniform. He forced Palestinian workers to line up for an identity check and shot dead eight of them at point-blank range, wounding 10 others.

#90142d3230 05/22/1990 ~French/German News Agency

WASHINGTON (MAY 22) - President George Bush, pointing to the tide of democracy sweeping the Americas, Tuesday said President Fidel Castro could delay but never stop the dream of democracy from taking hold in Cuba.

In a speech before a group of investors from the Council of the Americas, Mr. Bush renewed his call for Congress to promptly pass an 800-million-dollar economic aid package for Nicaragua (300 million) and Panama (500 million) he had proposed in March.

Both those Central American nations depended on the emergency aid, he added.

The president stressed that only by developing a free market economy could economic growth and democracy be ensured in Latin America.

He said the United States was interested in having Latin America open up its markets and would do all it could to achieve that goal. He called on Latin American countries to back U.S. efforts in the General Agreement on Tariffs and Trade negotiations.

"All across the Americas today more people live under freely elected governments than ever before, and we are closer than ever before to the day when all the people of the Americas, north and south, will live in freedom " Mr. Bush said.

"In all of Latin America, only Cuba remains, Castro's island prison, isolated, out of step with the democratic tide," he added.

Remembering that Cubans were celebrating the 92nd anniversary of their independence this month, Mr. Bush said "even in Cuba, the dream of democracy can only be deferred, it will never be destroyed."

#90142d3280 05/22/1990 ~French/German News Agency

WASHINGTON (MAY 22) - Fueled by declining U.S. interest rates, Wall Street share prices have soared over the past two weeks an new series of records.

And, say analysts, Monday's record high closing level for the Dow Jones average of 30 leading industrials (2,844.68 points) is likely to be short-lived.

In the past 10 trading sessions, the Dow has broken its previous record high closing level on four occasions.

Since the beginning of May, Wall Street share prices have soared some seven percent, adding 190 points to the Dow index.

Analysts say the sudden turn-around -- from the doldrums of February to April to the surge of May -- is due virtually entirely to the equally sudden turnaround on the bond market where interest rates have dropped sharply.

The reason for the improvement in the interest rates, according to economists, is the slowdown both in inflation and in U.S. economic growth.

Yields on 30-year U.S. Treasuries, the benchmark for the bond market, fell to 8.62 percent in early trading Tuesday from more than nine percent just over two weeks ago.

A decline in bond market interest rates normally has a positive effect on share prices as investors seek better returns for their portfolios. At the same time, a decline in interest rates makes it easier and cheaper for industry to finance expansion, making shares again more attractive.

It also fuels the general belief that a pending recession, once believed inevitable, is no longer likely. Many economists are now confidently predicting a two percent growth for the U.S. economy for 1990.

#90142d3300 05/22/1990 ~French/German News Agency

MOSCOW (MAY 22) - The Soviet Government has agreed the essentials of the economic reform program which will introduce a market economy in the country, Soviet President Mikhail Gorbachev said Tuesday.

"The government has done great work these past two days, even though there's still some work to be done on a number of points," Soviet television showed him telling a joint meeting of his presidential council and the council of the federation.

"What is now important is to agree on the tactics for implementing the eonomic programme and discussions are now underway on its time-frame," he said.

"But one must take it one stage further, in order to bring it to the attention of the Supreme Soviet and of society as a whole. Society is waiting," he said.

Explanation of the changes is expected to begin Wednesday with a news conference of deputy premier Leonid Abalkin, the minister responsible for economic reform.

On Thursday and Friday, the reforms are to be debated by the two houses of the supreme soviet sitting in joint session.

Tuesday's meeting was chaired by President Gorbachev, who had told journalists last week that hostile public opinion was making it very difficult to make changes.

The reform plans were announced at the beginning of the year but have been repeatedly reconsidered and the publication of details of the reforms and the implementation date have been postponed.

The first measures were initially due to take effect in July, if necessary being pushed through by means of presidential decree.

But fears of widespread social unrest and concern over some particularly draconian suggestions by the president's economic advisors on the need for "shock therapy" or "Polish-style reform" led the leadership to tone down its plans before putting them before parliament.

Mr. Abalkin has however recently stressed the need for consensus on the issue and proposed setting up a "round table" grouping various political and social forces as has been done in Poland.

But some members of the leadership have said they do not see how representative figures can be selected for such a venture.

#90142d3350 05/22/1990 ~French/German News Agency

THABONG, SOUTH AFRICA (MAY 22) - Racial hatred in Thabong black township outside ultra-conservative Welkom claimed its 11th victim in three days Tuesday as black leaders threatened drastic action.

Doctors heading the two local hospitals said Tuesday that three gunshot victims had died overnight, taking the death toll on the wards to 10 since police opened fire on some 1,000 black demonstrators Sunday.

At least 91 more people had been wounded, they said, and Dr. Brian Brink of the Anglo American Corporation's Ernest Oppenheimer mine hospital told Agence France-Presse one of his patients was "critical and likely to die."

Most were suffering from shotgun pellet wounds, he said, adding some could have been hit by live rounds.

A former black councillor and leading light in the local branch of the Zulu freemasonry Inkatha was knifed and burnt to death outside his house Monday.

African National Congress Deputy President Nelson Mandela said the violence had jeopardized the historic talks-about-talks with the government begun in Cape Town on May 2-4.

He told a media conference in Johannesburg Tuesday: "These negotiations can only be fruitful if an atmosphere for negotiations exists. It is clear Mr. De Klerk is unable to control the police.

"If this continues...if the government continues to massacre our people, that we cannot tolerate.

"We will have to address that question specifically in relation to whether these negotiations will continue."

He added: "The government has been slaughtering our people throughout

history and it is doing so now.

"It is a problem Mr. De Klerk has to solve if he wants to prove he is indeed travelling a new road."

Internal ANC leader Walter Sisulu demanded Tuesday that Mr. De Klerk crack down on trigger-happy police and right-wing vigilantes when he returns Saturday from his nine-nation European tour.

NEW DELHI (MAY 22) - Tibet's spiritual leader the Dalai Lama has recovered from a slight fever and will leave here for a scheduled trip to Italy, Spain, Sweden and Switzerland on Tuesday, a spokesman for his office said.

The Dalai Lama, winner of last year's Nobel Peace Prize, cancelled a visit to Bombay on Monday and was flown to New Delhi because of a fever which developed while on a trip to western India.

The Dalai Lama has lived in exile in India along with some 100,000 Tibetans who fled here following a bloody anti-Chinese uprising in 1959.

ABIDJAN (MAY 22) - The African Development Bank approved 141 loans in 1989 worth 2.9 billion dollars, up 31.25 percent from 2.2 billion dollars approved in 1988, ADB Secretary-General Alioune Blondin Beye announced here Tuesday.

Mr. Beye, a Malian, told a press conference that the bank paid out more than 1.5 billion dollars in 1989, an increase of 31 percent over the previous year's total of 1.2 billion dollars.

The ADB's net revenue for 1989 was about 130 million dollars, he said.

The bank is to open its 26th annual meeting here next Tuesday during which ADB president Babacar N'Diaye of Senegal is expected to be re-elected for another five-year mandate.

Mr. N'Diaye, who has headed the institution since 1985, is running uncontested.

Representatives of the 75 member countries -- 50 African and 25 non-African states -- are also to move to admit Namibia, which gained independence from South Africa in March.

Other items on the agenda include an increase in bank capital, now standing at 22 billion dollars, and negotiations for the sixth reconstitution of the African Development Fund (ADF), which together with the Nigeria Trust Fund make up the ADB group.

MOSCOW (MAY 22) - The Soviet Union announced the appointment of two deputy foreign ministers on Tuesday, to replace two recently appointed ambassadors, Tass news agency reported.

One of them, Alexander Belonogov, 59, worked at the Soviet Embassy in Britain from 1962 to 1967 and later headed the directorate for the planning of foreign policy activities at the Soviet foreign ministry.

In 1984-86, he served as Soviet Ambassador to Egypt and since 1986 has been Soviet representative at the United Nations and at the U.N. Security Council.

The other, Alexei Obukhov, 54, worked at the Soviet Embassy in Thailand and later at the foreign ministry's South East Asia department.

From 1980 to 1986, he was deputy head of the USA department at the foreign ministry, from 1986 to 1989 ambassador at large. Since 1989, he has headed the directorate for the United States and Canada.

KUALA LUMPUR (MAY 22) - Malaysia's Sarawak state said Tuesday it had no definite plans to cut timber production to comply with a recommendation of the International Tropical Timber Organisation (ITTO).

"This is not a simple matter to be decided overnight," said Sarawak chief minister Taib Mahmud, who represented Malaysia at last week's ITTO meeting in Bali, Indonesia, where the recommendation was made.

ITTO cleared Malaysia of charges that it had poor forest management practices but said that to sustain yield Sarawak must reduce production to 9.2 million cubic metres annually.

Primary industries minister Lim Keng Yaik said Monday that Sarawak produced 15 million cubic metres of timber last year, 12 million cubic metres in 1988 and 10 million cubic metres in 1987.

Mr. Taib said it would take time for the state government to practically

implement moves to curtail any economic activities especially those which were significant revenue earners.

Sarawak, which nets some 500 million dollars (185 million U.S.) from the timber industry annually, has been attacked by Western environmentalists who claim that uncontrolled logging in the state is destroying tropical rainforests and contributing to global warming.

NEW DELHI (MAY 22) - The state governor of Jammu and Kashmir has asked India's Central Bureau of Investigation to investigate the killing of Kashmiri religious leader Mirwaiz Maulvi Farooq, state television said Tuesday.

No one has claimed responsibility for the assassination of Mr. Farooq, 45, who died after being riddled with bullets by three unknown gunmen posing as vistors to his house in the Kashmir summer capital of Srinagar.

The assassination, which shocked both India and Pakistan, was followed by police firing on massive mourning processions in Srinagar Monday which left at least 47 dead and some 300 injured.

Three major Kashmiri militant organizations, including the dominant Jammu and Kashmir Liberation Front (JKLF) have condemned the killing, as have the governments of India and Pakistan, which gives moral backing to the militants.

At the Mirwaiz (high priest's) funeral in Srinagar Tuesday, Moslem crowds shouted slogans against Kashmir governor Jagmohan (Eds: one name), holding him responsible for Mr. Farooq's death.

Indian Prime Minister Vishwanath Pratap Singh has vowed that no stone will be left unturned in the search for the killers, reported to have posed as journalists to gain entry to the Mirwaiz house.

Mr. Farooq was an advocate of self-determination for Kashmir.

MOSCOW (MAY 22) - The two Soviet cosmonauts aboard the Mir orbiting space station are to return to earth on July 29, deputy mission director Viktor Blagov said Tuesday, denying western reports that the pair were stranded in space.

"We are not concerned about the condition of the orbital space complex Mir

as a whole or that of the Soyuz TM-9 transport spacecraft in particular. The present crew has been working aboard the Soyuz craft for more than 100 days now," he told Tass news agency.

Mr. Blagov rejected as "sensational" a report in U.S. Aviation Week and Space Technology that Anatoly Soloviev and Alexander Balandin were stranded in space. They have been in orbit since February 11.

"It seems that our foreign competitors are deliberately blowing the entire affair out of proportion and feeding fears over the Soyuz craft," he said.

Speaking of damage to the shield-vacuum insulation, Mr. Blagov said this was first detected when the Soyuz craft docked with the orbital station.

"We saw that all paramaters were normal. The cover, which is designed to help curb the extreme temperatures during flight had come loose (...) by orienting the station with respect to the sun, we selected temperature modes -- one third of the day the complex is heated by the sun, during another third the flight is made in its shadow and the rest of the time in a moderate zone.

"The thermal regulation system makes it possible to maintain normal temperature inside the compartments of the orbital complex. The insulation will be secured back in place during a spacewalk," he added.

#90142d3670 05/22/1990 ~French/German News Agency

BAGHDAD (MAY 22) - Arab foreign ministers here Tuesday accused Israel of "state terrorism" in the wake of the Rishon le Zion killings and said they held the United States responsible for Israeli aggression.

At a meeting to prepare an Arab summit that opens in Baghdad next week, the ministers deplored the murder of eight Palestinians by an Israeli gunman Sunday in the Tel Aviv suburb as a "crime against humanity."

The attack sparked violent Arab protests in Israel and the occupied territories, as well as in Jordan. Israeli troops have since shot dead 14 Palestinians in the Gaza Strip and West Bank.

The ministers said in a statement that the United States, a key supporter of Israel, was "responsible for the continuation of Israeli crimes."

Past U.S. decisions to veto U.N. Security Council resolutions critical of Israel have encouraged Israeli leaders "to persevere with their aggressive policies ... and to block the peace process," the statement said.

The Arab foreign minister urged the United States to "halt its material aid

and political protection for Israel so long as this country persists in defying the international will and refuses a just peace."

They also called on the international community and Security Council "to impose sanctions on Israel and assure the protection of the Palestinian people by placing the occupied territories under international control."

The U.N. Security Council was meeting Tuesday on the situation in the occupied territories at the request of Arab states.

Syria and the Syrian-backed Lebanese government were absent from the foreign ministers' meeting. Damascus, a long-standing rival of Iraq, has said it would boycott the Baghdad summit.

BANGKOK (MAY 22) - Singapore's Tradewind Airline Co., Ltd. will begin twice weekly commercial flights to Rangoon on August 21, Burmese state-run radio said in a report monitored here Tuesday.

Currently Myanmar (Burma) Airways flies once a week between the two Southeast Asian cities.

The agreement to increase the number of commercial flights followed such a suggestion by Singaporean Transport and Communication Minister Yeo Ning Hong to his Burmese counterpart Lieutenant General Tin Tun in February, the radio said.

In April, Burma's military government signed a similar agreement with Indonesia's Garuda Air, while Thai Airways International and Myanmar Airways exchange regular flights beteen Bangkok and Rangoon twice a week.

BUCHAREST (MAY 22) - A senior Romanian government official, Sever Georgescu, was punched Tuesday when he went to negotiate with demonstrators who have for a month occupied a city centre square here in an anti-communist protest.

Yelling "Down with the communists!", demonstrators also chased the country's justice minister off University Square.

A hostile crowd of several dozen people had pursued Mr. Georgescu when he was thumped, an Agence France-Presse correspondent said. Looking shocked, the official retreated to the nearby Intercontinental Hotel.

Mr. Georgescu, who is secretary-general to the government, was attacked after trying to talk to hunger strikers among the demonstrators at the request of Prime Minister Petre Roman.

Justice Minister Teofil Pop, accompanying him, was chased back to his car by demonstrators.

In a statement released two hours after the incident, the government said the demonstrators were "entirely" at fault.

The two officials had gone to hear what the hunger strikers wanted, but "no discussion was possible" because "of aggression from a few people out to express their political views through violence", the statement added.

Romania's acting president Ion Iliescu and his National Salvation Front won the country's first free elections in four decades on Sunday with a massive majority, according to voting figures still coming in Tuesday which gave Mr. Iliescu 85.7 per cent.

Anonymous leaflets distributed here Tuesday accused the Front of rigging the poll, several sources said. Police said the tracts were thrown from cars driven round Bucharest streets.

The protestors in University Square have been objecting to the presence of former communists close to the regime of Nicolae Ceausescu, the dictator toppled and executed in last December's Romanian revolution.

Some 40 people are on hunger strike in a tent city on the square.

CAIRO (MAY 22) - The latest upsurge in the Israeli-Arab conflict dominated proceedings of the Socialist International here Tuesday, with a Palestine Liberation Organization (PLO) delegation present for the first time as official guest.

Host President Hosni Mubarak of Egypt warned in an opening speech that if Israel were to settle Soviet Jewish emigres in the occupied territories, there could be a "fresh, bloody confrontation".

The debate here came as pro-Palestinian protests swept Israel, the occupied territories and neighbouring Jordan, with at least two people killed and dozens injured, after an Israeli gunman murdered eight Palestinians on Sunday.

Israel's Labour Party delegation, led by Shimon Peres, blocked otherwise unanimous agreement on a draft motion favouring a Middle East settlement,

on the basis of United Nations security council resolutions.

The draft referred not only to Palestinian self-determination but also the right to "a Palestinian state of their choice," according to sources close to the debate. Mr. Peres was opposed to any mention of a Palestinian state.

Mr. Peres also said that Soviet Jews arriving in Israel would be installed in the vast southern Israeli Negev desert, and not in the occupied territories. He added that Israel did not need land for the immigrants.

A drafting committee was set to work into the night to find a compromise on the Palestinian resolution, several sources said. The Socialist International meeting, the first in Egypt, is due to end Wednesday.

Some delegates said that the draft called on the PLO to recognize Israel's right to exist within secure borders in the PLO's own Charter, describing this as a major concession for the Palestinians.

#90142d3800 05/22/1990 ~French/German News Agency

AMMAN (MAY 22) - A group of demonstrators, believed to be Moslem fundamentalists, ransacked breweries and another factory producing alcohol in a town near Amman, witnesses said.

They attacked two breweries and a factory for arak, an Arab alcoholic spirit made from grapes or dates, in the town of Ruseifa, 20 kilometres (12 miles) northeast of here, an employee at one of the breweries said.

An anonymous telephone caller to Agence France-Presse said he took part in the demonstration, alongside other residents of the Palestinian refugee camp of Hittin, near Ruseifa.

The incident came amid a wave of pro-Palestinian demonstrations around Jordan since Monday, in protest at the killing of eight Palestinians by an Israeli gunman Sunday near Tel Aviv.

Demonstrators in Hittin opened fire at police earlier Tuesday, wounding an officer. One person was killed by a protester who fired a rifle, Jordanian officials said.

#90142d3810 05/22/1990 ~French/German News Agency

DAMASCUS (MAY 22) - The Syrian electorate of almost seven million people voted Tuesday in a two-day poll to elect 250 members for the country's new parliament.

Polling booths closed late Tuesday but were to reopen Wednesday until 2.p.m. (1100 GMT). The final results are expected Thursday.

Sixty percent of seats have been reserved by a presidential decree issued last month for the Progressive National Front, a seven-party coalition led by the Baath party of President Hafez al-Assad, who has ruled since 1970.

At the last elections in 1986, the coalition won 82 percent of votes.

The People's Council, or parliament, will have 100 independent deputies, compared to the previous 35.

In a campaign for a "freer and more democratic" election, the authorities have increased the number of seats from 195 to 250.

The role of parliament, which has a four-year mandate, is purely legislative. The president has the power to name and dismiss the vice president, prime minister and members of the government.

Several candidates and officials said they were satisfied the vote was being carried out democratically.

KARACHI, PAKISTAN (MAY 22) - Gunfire broke out here Tuesday leaving at least four people dead and 12 injured, as the official death toll from eight days of ethnic violence in Pakistan's southern Sindh province climbed to 55.

Clashes also continued in Hyderabad. The violence pits native Sindhis against Mohajirs, Urdu-speaking settlers who came from India after the partition of the subcontinent in 1947.

President Ghulam Ishaq Khan ruled out here Tuesday the declaration of a state of emergency or martial law in troubled Sindh, as some opposition legislators had demanded.

"There are laws to deal with the situation and the government has taken political and administrative measures to restore law and order," he said.

In Hyderabad, armed groups took advantage of a lifting of a curfew Tuesday to loot a mill, witnesses said. Earlier, two people were injured by security forces while violating the curfew.

Violence in Hyderabad, where ethnic rivals used rocket-launchers and mortars for the first time last week, spread to rural areas and a death was reported Tuesday in Tando Mohammad Khan, southeast of the city,

witnesses said.

The press descrived the situation as "near civil war" and local politicians have not excluded the possibility of Indian agents exploiting the situation in the province.

In Karachi, Pakistan's biggest city, four people were killed and 12 injured by sniper fire or clashes with security forces, according to the official Associated Press of Pakistan (APP).

Riot police were sent into the city center where a bus was torched, residents said.

Singh Governor Fakhruddin G. Ebrahim called for calm Tuesday, denouncing "enemies of democracy" who he said were inciting decent people to commit crimes against their own Moslem brothers.

#90142d4090 05/22/1990 ~French/German News Agency

BISSAU (MAY 23) - Guinea-Bissau troops were involved in a fresh border clash with Senegalese soldiers Tuesday, following an outbreak of fighting Saturday, the Guinea-Bissau military command said in a communique.

It said there were no casualties on the Guinea-Bissau side and described the situation as controllable.

The Guinea-Bissau ambassador to Portugal on Tuesday said at least one Senegalese soldier had died in a border clash Saturday, Radio Bissau reported. The ambassador said Guinea-Bissau troops found the bodies of another two Senegalese soldiers Monday.

Guinea-Bissau and Senegal are in a dispute over the attribution of territorial waters on their accession to independence.

In Dakar, Senegalese President Abdou Diouf told a cabinet meeting Tuesday that Senegal would defend its territorial integrity, in his first official reaction to clashes Saturday.

Senegalese authorities, meanwhile, were evacuating by bus the inhabitants of several villages located on the border with Guinea-Bissau.

Witnesses said one villager was killed and several were injured by Guinea-Bissau artillery fire Tuesday. There was no official confirmation of the toll.

Guinea-Bissau's ruling party, in a statement Tuesday, reaffirmed the government's desire to seek a peaceful solution to the dispute.

The party's politburo met Monday in the absence of President Joao Bernardo Vieira, in Paris on an official visit.

MONTEVIDEO, (MAY 22) - Chinese President Yang Shangkun met Tuesday with his Uruguayan counterpart Luis Lacalle at the start of a four-day visit to this tiny South American nation.

Details of the 30-minute session were not immediately available. But at an airport welcoming ceremony, Mr. Lacalle, a champion of free-market economics, said Uruguay was "interested in increasing bilateral trade (with China) regardless of ideological differences" between the two governments.

The presidents are to meet again before General Yang leaves Saturday for Argentina.

Gen. Yang's tour of Latin America -- the first by a Chinese head of state -- has taken him to Mexico and Brazil and will end in Chile.

His agenda in Montevideo includes visits to the Supreme Court and Parliament.

The president is being accompanied by Vice Prime Minister Wu Xueqian, Vice Foreign Minister Liu Huaqiu and Vice External Trade Minister Lu Xuejian.

China is Uruguay's fourth largest trading partner. Over the past six years, Montevideo has posted a 401-million-dollar surplus in its trade with China, thanks largely to wool exports.

Gen. Yang's visit follows an invitation by then president Julio Maria Sanguinetti during a visit to China in November 1988.

#90142d4130 05/22/1990 ~French/German News Agency

OTTAWA, MAY 22 - Hong Kong Governor Sir David Wilson and Canadian Prime Minister Brian Mulroney discussed bilateral trade here Tuesday, an official said.

Canada's exports to Hong Kong have climbed 118 per cent since 1987 and last year total exports reached more than 1.1 billion Canadian dollars (881 million U.S. dollars).

But the trade balance has slightly favored Hong Kong, which exported 1.2

billion Canadian dollars (974 million U.S. dollars) in goods to Canada over the same period, according to Canadian statistics.

Canada is the sixth largest export market for Hong Kong, which plans to open a commercial office in Vancouver. It already has one in Toronto.

Hong Kong sells Canada primarily clothes, toys, sporting equipment and machinery. Canada's exports to Hong Kong are notably newsprint, aluminum, plastics and precious metals.

Canada plans to send a delegation of high-ranking officials to Hong Kong and to Beijing to discuss the future of the British colony, which will be returned to China in 1997.

#90142d4160 05/22/1990 ~French/German News Agency

WASHINGTON (MAY 22) - A study by the U.S. Environmental Protection Agency (EPA) of research over the last decade suggests a tentative link between heavy electrical currents and some types of cancer.

Richard Guimond, director of EPA's Office of Radiation, said the agency is reviewing scientific studies on the effects on the human body of long-term exposure to magnetic fields created by powerful alternating electric currents.

All household appliances, and almost all power lines, use alternating current that produces an electromagnetic field. Only a handful of very high power transmission lines use direct current, which produces a steady magnetic field.

Studies had previously shown there was no link between human cancer and electrical currents, Mr. Guimond said.

But he added that over the last 10 years there has been "stronger and stronger evidence being developed as more and more of these studies are done" to suggest that there is a connection.

A panel of scientists will review the EPA study to deterimine whether or not "our evidence is strong enough to declare that this (long term exposure to magnetic fields) is a probable human carcinogen or not."

There have been more than a dozen studies on the possible link between electrical currents and cancer, some of which suggested there is a connection, although that hypothesis has not been universally accepted by scientists.

A 1987 Denver, Colorado, study claimed children living near electric power

lines were 1.7 times more likely to develop leukemia than Denver children living elsewhere.

Other studies linked the exposure to electric currents on the job -- telephone line workers in particular -- to brain tumors.

#90142e0001 05/22/1990 ~Latin America New Agency

LIMA (MAY 22) EFE - Colombian President Virgilio Barco will not be attending Tuesday's summit with his colleagues from Peru, Ecuador, Venezuela and Bolivia because of the upsurge in drug-related violence at home, his foreign minister said.

In the Peruvian capital to prepare for the so-called Andean Summit, Colombian Foreign Minister Julio Londono said that Barco told him over the phone late Monday he could not leave the country, which is set to hold presidential elections on Sunday.

"The situation in Colombia requires his presence," Lodono said. The other presidents were set to meet until Wedenesday afternoon at the ancient Incan fortress-city of Machu Picchu, 112 km north of Lima.

He had been kidnapped last month by "The Extraditables", as leaders of Medellin's infamous cocaine cartel style themselves, but was freed two days later after Barco announced he would not extradite cartel leader Pablo Escobar.

Hours before the senator was slain, police defused a bomb made of 70kg of dynamite planted at the entrance of a Bogota elementary school where Barco's daughter was dropping off her two small children.

The bomb had been spotted by the bodyguards accompanying Carolina Barco de Botero and her daughters who called police bomb squad experts to the scene.

A wave of terrorism in the runup to Sunday's presidential elections was unleashed May 12, when two car bombs in Bogota and a third in the southwestern city of Cali killed 27 people.

Since then, two more car bombs blasmed on the drug gangs have rocked the cities of Bogota and Cartagena injuring more than 40 people.

It was the murder of Barco's political heir apparent, Liberal senator Luis Carlos Galan, in August last year that triggered the crackdown on Colombia's billionaire cocaine cartels. Since then, two other presidential candidates have been murdered.

Threatened with extradition to the United States, the drug barons declared

retaliatory war on the government, blowing up an airplane with over 100 passengers on board and exploding a number of car bombs.

#90142e0006 05/22/1990 ~Latin America New Agency

LA PAZ (MAY 22) EFE - At least seven people were killed and 70 others wounded, 10 of them seriously, after a suspected drug trafficker lobbed a grenade into a crowded bar in a village in central Bolivia, government officials said Tuesday.

Officials in Cochabamba province said the man, suspected by authorities of being involved in drug smuggling, entered the Bingo Tropical bar in the village of Isinuta late Saturday where he had an argument with his wife.

He then left the bar, where between 200 and 300 had gathered and returned with a grenade which he threw inside the building, killing seven people and wounding 70 others.

The government officials said among the injured were 10 people in a coma.

A group of villagers from Isinuta chased after the assailant, lynched him and shot him eight times.

Around 80 per cent of Bolivia's coca leaves, the raw material for cocaine, are cultivated in Cochabamba and the area is a major drug processing and trafficking center.

#90142e0010 05/22/1990 ~Latin America New Agency
MADRID (MAY 22) EFE - As part of a continuing improvement in union-government relations, Spain's Labor and Finance Ministries signed a controversial agreement Tuesday allowing union access to company employees' contracts.

The accord, which has enraged businessmen, will allow union officials to inspect contracts given to workers by their companies. Management contracts are excluded from the deal.

The deal, signed by the two ministries and Spain's biggest unions, the General Workers Union and Workers' Commissions, comes four months after an accord was reached on pensions and public sector wages, ending two years of stormy union-government relations.

The unions broke with Prime Minister Felipe Gonzalez's government and called a successful general strike in 1988, claiming the Socialists had abandonded workers in their drive for rapid economic growth.

Under the latest accord, union representatives will be shown all details of contracts except the name, address and marital status of the worker concerned.

The president of Spain's main business association, Jose Maria Cuevas, slammed the contract agreement and warned that businessmen will not cooperate with the government.

Cuevas, who was re-elected Tuesday for a third consecutive term as the association's president, said the government had given in to the unions without receiving anything in return.

He added that businessmen would ask each worker if they wanted their contract to be shown to the unions.

Meanwhile, officials said that negotiations between the unions and the government on other wage and social issues would start up again in the next two weeks.

#90142e0012 05/22/1990 ~Latin America New Agency
SANTIAGO (MAY 22) EFE - The Chilean government is to introduce new anti-terrorist measures in a bid to halt a recent wave of bomb attacks by suspected leftists, a rightist opposition leader said Tuesday after a meeting with the Interior Minister.

National Renovation Party Secretary General Andres Allamand, whose party

offices have been bombed twice this week, said Interior Minister Enrique Krauss and Government Secretary General Enrique Correa assured him the measures would be implemented quickly.

"It's not up to me to give details on the measures," Allamand told reporters when questioned on what steps the 2-month-old government of President Patricio Aylwin would take.

Besides the two bombs at the party offices, in the past 24 hours, five other bombs have exploded in the capital, causing serious damages but no injuries.

A bomb was hurled at the home of Appeals Court President Guillermo Navas, while two court buildings, a Mormon chapel and a bank were also attacked with explosives devices.

An eighth bomb was deactivated at the headquarters of the rightist Independent Democratic Union (UDI) party.

While no group has claimed responsibility for the blasts, it is suspected that a faction of the leftist Manuel Rodriguez Patriotic Front (FPMR) rebel group is behind the attacks.

According to UDI chairman Andres Chadwick, the attacks against his party headquarters and those of the National Renovation Party were motivated by their opposition to a government proposal to reduce prison terms for violent political crimes.

Aylwin took office from dictator Gen. Augusto Pinochet in March, ending 17 years of harsh military rule during which thousands of leftists were killed, tortured or disappeared.

Under Pinochet thousands of political prisoners were jailed under tough anti-terrorist laws. While Alywin has freed political prisoners jailed for non-violent crimes, he has so far refused to pardon those imprisoned for blood crimes.

The FPMR has attacked a number of former members of Pinochet's government and Armed Forces figures accused of human rights violations.

While most recent violence has been blamed on the rebel group, some observers have suggested that right-wing extremists could have carried out the attacks in a bid to destabilize Alywin's coalition government.

#90142e0022 05/22/1990 ~Latin America New Agency

SAN JOSE (MAY 22) EFE - Guatemalan leftist guerrillas confirmed Tuesday that they would be attending peace talks with politicians in Spain next week.

Guerrilla spokesman Hector Nuila said in the Costa Rican capital of San Jose he was optimistic about the prospects of the talks, and he hoped they would lead to direct negotiations between rebels and government, "which shouldn't be too far off".

The Guatemalan National Revolutionary Movement rebels are to meet with representatives of nine political parties between May 28 and May 30.

There was no fixed agenda for the talks, which are to be conducted through Guatemalan Bishops' Conference President Rodolf Quezada, Nuila said.

Commenting on the replacement of Gen. Hector Gramajo by Gen. Juan Leonel Bolanos as defense minister on Sunday, Nuila said it revealed a feeling of uncertainty within the Armed Forces caused by stepped-up guerrilla attacks.

Rebels attacked military posts more than five times a day, he claimed. Some 150,000 people have died in Guatemala's 30-year-old insurgency, he added.

Most of the dead were civilian victims of Army counter-insurgency sweeps, human rights groups have said.

Warren Buffet: What if you had given Warren Buffet $10,000 to invest in 1956? You'd have about $35 million now. He's a billionaire, but he doesn't use computers, he won't sell a mediocre business, he doesn't drive a Rolls Royce and he doesn't give $100,000 parties. He worries about the effect of money on children, and he's going to give most of his away. And he makes it sound like fun to be in business. (Transcript #628)

Larry King Live (CNN) May 21, 1990

Racial Tension & the Media / John Chancellor / Andrew Greeley: In their quest for higher ratings, are the media irresponsibly heightening racial tension? Howard Kurtz, New York Bureau Chief for The Washington Post, says the media needs to practice self- restraint. Roy Innis, National Chairman of the Congress of Racial Equality, feels the media does not present a wide variety of opinions among Blacks but rather chooses what is most readily accessible and sensational, thereby creating an unbalanced view of the Black community. Mr. King's second guest, John Chancellor, opposes the attitude that the Japanese will own the U.S. by the year 2000. He says

that's the kind of defeatist attitude that will get this country in trouble. The Peril and the Promise, A Commentary on America is Chancellor's answer to getting our country out of the deep water it's in. He thinks people underestimate the promise of America. We are twice as big as Japan, five times as big as West Germany, and incomparably the most powerful economic, military and diplomatic power in the world. Tonight's third guest, Father Andrew Greeley, believes in writing novels as a way of teaching about God's love. He feels he can reach those he normally wouldn't reach because they are outside the Church. His latest novel is The Cardinal Virtues. (Transcript #48)

Central Park Jogger Case: A judge has set June 13th as the date three defendants will go on trial in the attack on the Central Park jogger. The Manhattan District Attorney's office disclosed that DNA tests showed a semen stain on the victim's socks did not match the DNA profiles of any of the six defendants charged in the case, the prosecution's witnesses, or the jogger's boyfriend. The analysis of the sock appeared to be the prosecution's last hope of developing scientific evidence that would link any of the defendants to the crime. (Transcript #86)

HONG KONG (MAY 22) KYODO - THREE JAPANESE BANKS IN HONG KONG ARE APPROACHING THE MARKET TO RAISE 600 MILLION HONG KONG DOLLARS TO MEET LONG-TERM LOAN COMMITMENTS, THE SOUTH CHINA MORNING POST REPORTED TUESDAY.

THE MOVE REFLECTS CONCERN OVER HONG KONG DOLLAR DEPOSITS TO MEET LOAN DEMANDS AS FUNDS CONTINUE TO FLOW OUT OF THE TERRITORY, IT REPORTED.

THE SANWA BANK LTD., DAIWA BANK LTD., AND JUROKU BANK LTD. WILL RAISE THE FUNDS THROUGH FLOATING-RATE CERTIFICATES OF DEPOSIT AT A PREMIUM ABOVE THE HONG KONG INTERBANK OFFERED RATE (HIBOR), WHICH STOOD AT 9.75 PERCENT ON MONDAY.

SANWA BANK IS RAISING 300 MILLION HONG KONG DOLLARS FOR THREE YEARS AT A PREMIUM OF 6.3 BASIS POINTS OVER THE THREE-MONTH HIBOR. ONE BASIS POINT IS ONE-HUNDREDTH OF 1 PERCENT.

DAIWA BANK IS RAISING 200 MILLION HONG KONG DOLLARS IN TWO EQUAL TRANCHES.

THE FIRST TRANCHE IS FOR THREE YEARS AT 6.3 BASIS POINTS OVER THE THREE-MONTH HIBOR, AND THE SECOND FOR FIVE YEARS AT A PREMIUM OF 12.6 BASIS POINTS.

JUROKU BANK HAS LAUNCHED AN ISSUE FOR 100 MILLION HONG KONG DOLLARS FOR TEN YEARS AT 10 BASIS POINTS OVER THE HIBOR.

#90142k0040 05/22/1990 ~Japanese News Agency

KYOTO (MAY 22) KYODO - THE GOVERNOR OF THE BANK OF JAPAN (BOJ), YASUSHI MIENO, VOWED TUESDAY TO FIGHT INFLATED LAND PRICES ON THE MONETARY FRONT, BUT SAID THE CENTRAL BANK HAS NO PLANS TO CHANGE ITS OFFICIAL DISCOUNT RATE AT PRESENT, A BOJ OFFICIAL TOLD REPORTERS.

MIENO MADE THE REMARKS AT A MEETING WITH KYOTO GOV. TEIICHI ARAMAKI AND BUSINESS LEADERS IN KYOTO, THE OFFICIAL SAID.

HE QUOTED MIENO AS DESCRIBING THE RISE IN LAND PRICES AS ''A REAL HEADACHE'' AND SAYING HE DID NOT DENY IT WAS ATTRIBUTABLE PARTLY TO A RELAXATION OF MONETARY POLICY.

BUT MIENO STRESSED THE NEED TO TAKE A COMPREHENSIVE APPROACH TOWARD RESOLVING THE LAND PRICE ISSUE, POINTING OUT THAT A SURGE IN LAND PRICES WAS CAUSED NOT ONLY BY MONETARY POLICY BUT ALSO BY VARIOUS OTHER FACTORS.

MIENO SHRUGGED OFF THE POSSIBILITY OF THE OFFICIAL DISCOUNT RATE BEING RAISED AGAIN, HOWEVER, DESCRIBING THE PRESENT LEVEL OF THE KEY INTEREST RATE AS ''NEUTRAL.''

THE OFFICIAL DISCOUNT RATE, WHICH IS THE RATE THE CENTRAL BANK CHARGES ON ITS LOANS TO COMMERCIAL BANKS, NOW STANDS AT 5.25 PERCENT. THE BOJ HAS RAISED THE RATE FOUR TIMES SINCE MAY LAST YEAR, WHEN IT STOOD AT A HISTORIC LOW OF 2.5 PERCENT, IN MOVES SEEN AS PUTTING AN END TO AN EASY MONETARY POLICY.

OSAKA (MAY 22) KYODO - KUBOTA LTD., A DIVERSIFIED MACHINERY MAKER, SAID TUESDAY IT HAS AGREED TO PURCHASE THE CAST STEEL MANUFACTURING DIVISION OF FALCONBRIDGE LTD., A MAJOR CANADIAN MINING COMPANY, FOR SOME 25 MILLION CANADIAN DOLLARS.

THE PURCHASE OF THE FAHRAMENT DIVISION, BASED IN ORILLIA, ONTARIO, IS DESIGNED TO ENSURE A CAST SEEL-MANUFACTURING BASE IN NORTH AMERICA TO BOOST SALES OF CAST STEEL PRODUCTS WHICH HAVE SLUMPED ON THE CONTINENT DUE TO THE YEN'S STRENGTH, KUBOTA OFFICIALS SAID.

THE PURCHASE WILL BE COMPLETED ON JUNE 2, GIVING KUBOTA ITS FIRST MANUFACTURING BASE ABROAD FOR SUCH PRODUCTS, THE OFFICIALS SAID.

THE DIVISION HAS SOME 260 EMPLOYEES AND ENJOYED SOME 30 MILLION CANADIAN DOLLARS WORTH OF SALES IN 1989.

KUBOTA WILL SET UP A WHOLLY OWNED SUBSIDIARY, KUBOTA METAL CORP., IN ONTARIO ON JUNE 2 TO TAKE OVER THE STAFF AND ASSETS OF THE DIVISION, THE OFFICIALS SAID.

THE ACQUIRED FIRM WILL MAINLY PRODUCE HEAT-RESISTANT CAST STEEL PRODUCTS FOR THE PETROCHEMICAL INDUSTRY, WHILE KUBOTA WILL CONTINUE TO EXPORT HIGHER-GRADE PRODUCTS TO THE NORTH AMERICAN MARKET, THEY SAID.

THE OFFICIALS SAID THE TAKEOVER WAS FRIENDLY. FALCONBRIDGE, HEADQUARTERED IN TORONTO, ONTARIO, MAKES AND MARKETS COPPER, ZINC, NICKEL, AND OTHER NONFERROUS METAL PRODUCTS. IT REPORTED SALES OF SOME 2.1 BILLION CANADIAN DOLLARS IN 1989.

#90142k0073 05/22/1990 ~Japanese News Agency

TOKYO (MAY 22) KYODO - A JAPANESE BANKING INDUSTRY LEADER, REFERRING TO A CONCESSION MADE AT JUST-ENDED U.S.-JAPAN FINANCIAL TALKS HERE, SAID TUESDAY HE EXPECTS THE JAPANESE FINANCIAL INDUSTRY TO BE GIVEN SIMILAR TREATMENT TO THAT WON BY FOREIGN-OWNED BROKERAGES THROUGH NEGOTIATIONS.

TAIZO HASHIDA, CHAIRMAN OF THE FEDERATION OF BANKERS ASSOCIATIONS OF JAPAN MADE THE REMARK AT A REGULAR NEWS CONFERENCE SHORTLY AFTER THE END OF TWO DAYS OF BILATERAL TALKS AIMED AT SPEEDING UP DEREGULATION OF JAPAN'S FINANCIAL MARKETS.

WHILE SHOWING AN UNDERSTANDING OF THE NEED FOR MARKET LIBERALIZATION,

HASHIDA DEMANDED THAT FINANCIAL BARRIERS STILL EXISTING IN JAPAN BE SIMILARLY REMOVED SO AS TO ENABLE THE COUNTRY'S BANKS AND SECURITIES CONCERNS TO ''PLAY ON A LEVEL FIELD'' WITH FOREIGN FIRMS.

HE MADE THE COMMENT WHEN ASKED FOR HIS VIEWS ON AN AGREEMENT REACHED AT THE TALKS ALLOWING FOREIGN SECURITIES HOUSES TO PARTICIPATE IN BANKING OPERATIONS SUCH AS FOREIGN EXCHANGE DEALINGS IN THE DOMESTIC MARKET.

JAPANESE FINANCIAL AUTHORITIES SO FAR HAVE BEEN TAKING A CAUTIOUS STEP-BY-STEP APPROACH TOWARD LOWERING THE WALL SEPARATING THE NATION'S BANKING AND SECURITIES INDUSTRIES.

HASHIDA'S REMARKS THUS SUGGESTED THAT THE GOVERNMENT NEEDS TO CREATE A FINANCIAL SYSTEM IN WHICH BANKS AND SECURITIES FIRMS ARE PERMITTED FULL ACCESS TO EACH OTHER'S TRADITIONAL BUSINESS TERRITORIES.

ALSO ASKED TO COMMENT ON THE APPARENT FAILURE TO REACH AN ACCORD ON FULL LIBERALIZATION OF JAPAN'S INTEREST RATES ON BANK AND SAVINGS DEPOSITS, HASHIDA CALLED JAPAN'S REFUSAL TO PLEDGE A CLEAR DEADLINE FOR THE ACTION ''UNDERSTANDABLE'' IN VIEW OF ITS POTENTIALLY MAJOR IMPACT ON THE FINANCIAL INDUSTRY.

HASHIDA SAID HE EXPECTS THE ISSUE TO BE DISCUSSED ''FURTHER'' BETWEEN THE TWO SIDES, HIS OPINION BEING THAT FULL LIBERALIZATION OF JAPAN'S INTEREST RATE CONTROLS ON BANK DEPOSITS WITHIN A YEAR AS DEMANDED BY THE UNITED STATES WOULD NOT BE FEASIBLE.

HE ALSO STRESSED THE NEED FOR FINANCIAL INSTITUTIONS OTHER THAN BANKS TO JOIN IN THE DISCUSSION OF INTEREST RATE LIBERALIZATION.

INTEREST RATE CONTROL BY THE GOVERNMENT HAS REMAINED A MAJOR SOURCE OF U.S. COMPLAINTS THAT JAPANESE BANKERS GAIN AN UNFAIR ADVANTAGE THROUGH GOVERNMENT CEILINGS ON INTEREST RATES THEY CAN PAY TO DEPOSITORS.

AT THE FINANCIAL TALKS, JAPAN REFUSED TO COMMIT ITSELF TO A TIMETABLE FOR IMPLEMENTING A TOTAL DEREGULATION ON INTEREST RATES, DESPITE A STRONG DEMAND FROM THE U.S. SIDE.

#90142k0082 05/22/1990 ~Japanese News Agency

TOKYO (MAY 22) KYODO - THE BALANCE OF SHARES BOUGHT ON CREDIT ON JAPAN'S THREE MAJOR STOCK EXCHANGES ROSE LAST WEEK FOR THE SECOND CONSECUTIVE WEEK UP 134.2 BILLION YEN TO 8,854.6 BILLION YEN, THE TOKYO STOCK EXCHANGE SAID TUESDAY.

THE EXCHANGE SAID THE SHARP INCREASE FOR THE WEEK ENDED MAY 18 REFLECTED A RECOVERY OF THE NIKKEI 225 STOCK INDEX TO THE 32,000 YEN LEVEL FOR THE

FIRST TIME IN TWO MONTHS AS A RESULT OF THE YEN'S ADVANCE AGAINST THE U.S. DOLLAR.

THE BALANCE OF SHARES SOLD ON MARGIN ON THE TOKYO, OSAKA, AND NAGOYA EXCHANGES STOOD AT 688 BILLION YEN ON MAY 18 UP 20.7 BILLION YEN FROM A WEEK BEFORE.

-30- 801

#90142k0092 05/22/1990 ~Japanese News Agency

TOKYO (MAY 22) KYODO - OKI ELECTRIC INDUSTRY CO. TUESDAY ANNOUNCED THE DEVELOPMENT OF A LARGE-SCALE INTEGRATION (LSI) CHIP FOR AN 18-BIT DIGITAL-ANALOG CONVERTER WITH U.S. SEMICONDUCTOR MAKER BURR-BROWN CORP. OF TUCSON, ARIZONA.

OKI OFFICIALS SAID THE NEWLY DEVELOPED CHIP IS A BICMOS (BIPOLAR COMPLEMENTARY METAL OXIDE) HYBRID TYPE THAT HAS THE MERITS OF BOTH BIPOLAR AND CMOS TYPES.

BIPOLAR INTEGRATED CIRCUITS (ICS) ARE KNOWN FOR THEIR HIGH SPEED, WHILE CMOS ICS HAVE THE POWER-SAVING FEATURE. THE NEW LSI IS INTENDED FOR AUDIO EQUIPMENT AND SATELLITE BROADCAST RECEIVER APPLICATIONS.

THE OFFICIALS SAID OKI HAS OFFERED INFORMATION ON THE BICMOS LSI PRODUCTION PROCESS TO BURR-BROWN JAPAN LTD., A SUBSIDIARY OF THE U.S. COMPANY. BURR-BROWN JAPAN MADE A DESIGN ON THE BASIS OF THAT INFORMATION. OKI HAS TEST-MANUFACTURED THE LSI ON THE BASIS OF THE DESIGN.

UNDER THE AGREEMENT, OKI WILL MANUFACTURE THE NEW CHIP, AND THE LSI CHIPS THUS MADE WILL BE SOLD BY BURR-BROWN AND THE JAPANESE SUBSIDIARY, THE OFFICIALS SAID.

THE SHIPMENT OF SAMPLES WILL GET UNDER WAY IN JUNE, WITH EACH PRICED AT 11,700 YEN.

QUANTITY PRODUCTION OF THE NEW LSI WILL START IN OCTOBER AT A MONTHLY RATE OF 500,000-600,000 CHIPS, THE OFFICIALS SAID.

#90142k0095 05/22/1990 ~Japanese News Agency

BANGKOK (MAY 22) KYODO - THE THAI GOVERNMENT TUESDAY APPROVED A MAJOR EXPANSION PLAN FOR THAI AIRWAYS INTERNATIONAL, THAILAND'S NATIONAL FLAG CARRIER, A GOVERNMENT SPOKESMAN SAID.

THE CABINET, AT ITS WEEKLY MEETING, APPROVED THE AIRLINE'S PLAN, SECONDED BY THE MINISTRY OF TRANSPORT AND COMMUNICATIONS, TO PURCHASE 18 NEW PLANES WORTH A TOTAL OF ABOUT 2 BILLION DOLLARS DURING 1991-95, THE SPOKESMAN

SAID.

THE PLAN INVOLVES BOTH REGIONAL AND CONTINENTAL ROUTES AND PLANES WITH CAPACITIES BETWEEN 250 AND 400 SEATS, HE SAID.

THE CABINET ALSO GAVE THE NOD TO THE STATE AIRLINE'S LONG-TERM INVESTMENT PROGRAM, CURRENTLY BEING WORKED OUT BY REPRESENTATIVES OF VARIOUS GOVERNMENTAL AGENCIES AND THAI AIRWAYS OFFICIALS, THE SPOKESMAN SAID.

THE INVESTMENT PROGRAM IS BASED ON THE ASSUMPTION THAT BANGKOK WILL EMERGE AS THE REGION'S AIR TRANSPORT HUB IN THE NEAR FUTURE. THE AIRLINE WILL FOCUS ITS MARKETING EXPANSION EFFORTS ON NONSTOP FLIGHTS TO EUROPE AS WELL AS INCREASE CAPACITY AND FLIGHT FREQUENCIES WITHIN THE REGION AND ON DOMESTIC ROUTES.

THE CABINET ALSO APPROVED THE COMPANY'S PARTICIPATION IN THE ''AMADEUS'' GLOBAL DISTRIBUTION SYSTEM, A WORLDWIDE COMPUTERIZED RESEVATION SYSTEM CURRENTLY SUBSCRIBED TO BY SEVERAL EUROPEAN AIRLINES.

THAI AIRWAYS' SHARE IN THE SYSTEM WOULD COST ABOUT 4 MILLION DOLLARS AND HAVE AN EXPECTED RETURN OF ABOUT 155 PERCENT DURING THE PERIOD OF 1990-96, THE SPOKESMAN SAID.

-30- 1602

#90142k0101 05/22/1990 ~Japanese News Agency

TOKYO (MAY 22) KYODO - NIPPON TELEGRAPH AND TELEPHONE CORP. (NTT) ON TUESDAY ASKED THE GOVERNMENT TO LIBERALIZE THE MARKET FOR CERTAIN TELECOMMUNICATIONS TERMINAL EQUIPMENT.

THE EQUIPMENT, KNOWN AS A DIGITAL SERVICE UNIT, OR DSU, IS A MODEM-LIKE DEVICE USED TO CONNECT COMPUTERS TO A DIGITAL COMMUNICATIONS NETWORK. DSUS CONNECT NTT'S DIGITAL COMMUNICATIONS CIRCUITS TO SUBSCRIBER TELEPHONES.

IN JAPAN, NTT USED TO MONOPOLIZE THE MARKET FOR DSUS. IT WOULD BUY THE EQUIPMENT FROM MAKERS AND LEASE IT TO SUBSCRIBERS.

BUT NOW, NTT SAYS IT SUPPORTS FOREIGN COMPETITION IN THE HOME MARKET, AS LONG AS FOREIGN-MADE EQUIPMENT IS COMPATIBLE WITH NTT EQUIPMENT.

AS A FIRST STEP TOWARD LIBERALIZATION, NTT HAS LEFT THE PURCHASE OR LEASE OF DSUS TO THE DISCRETION OF SUBSCRIBERS IN REVISED DATA EXCHANGE CONTRACTS WITH SUBSCRIBERS.

NTT WANTS THE SAME ARRANGEMENT TO APPLY TO LEASED DIGITAL CIRCUIT CONTRACTS BETWEEN NTT AND CLIENTS. LEASED DIGITAL CIRCUITS ARE USED MAINLY IN INTER-COMPUTER DATA COMMUNICATIONS WITHIN THE SAME ENTERPRISE OR

AMONG DIFFERENT ONES.

THE TELECOM GIANT ALSO IS SEEKING PERMISSION FROM THE POSTS AND TELECOMMUNICATIONS FOR A SHARP REDUCTION IN DSU RENTAL RATES AND EXPECTS AN ANSWER NEXT MONTH.

#90142m0001 05/22/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (MAY 22) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

GANNETT CO. INC., publisher of "USA Today," adopts a "poison pill" provision designed to deter a hostile takeover, although the company says that it isn't aware of any such attempt.

KIDDER PEABODY revives program trading, but says it will apply significant safeguards aimed at reducing market volatility. ... PIC 'N' SAVE extends it's deadline for buyout bids to July 15.

WHAT'S AHEAD:

White House and Congressional budget negotiators meet at 3 p.m. EDT. closing of SILVERADO SAVINGS. The Denver-based S&L had employed NEIL BUSH, one of the president's sons. Neil Bush will appear before the committee on Wednesday.

MICROSOFT is due to unveil WINDOWS 3.0 computer software, designed for IBM and IBM-compatible personal computers to challenge Apple Computer's Macintosh for ease of use.

FROM THE BULLS:

"Ferdinand [the bull] is loaded for bear and he's a killer" as the Dow heads toward 3000, says GENE JAY SEAGLE in the May 16 edition of "Tactics and Technics."

Speaking as director of technical research at GRUNTAL & CO., Mr. Seagle tells Reuters, "Those who are waiting on the sidelines could lose their place in line. The market is continuing to show considerable strength without anything of the correction some [had expected]." (FNN's "Marketwrap" and Reuters, 5/21)

"If the Dow can close above 2860, then this market could fly and the shorts will really have to run for cover," says ANDREW ADDISON, editor of

the "Addison Report."

"The fact the Dow is testing the 2855 area many times shows there is some resistance there. My feeling is if the Dow does not punch through by Wednesday, then it'll probably have to do more backing and filling, and it could move lower for a while.

My guess is there could be a shakeout below 2800 to fake out some of the recent buyers. Nevertheless, I do feel the Dow will go through 2855 and move much higher. Looking out to mid- to late-1991, I am forecasting a Dow of 3500 to 3800." ("Investor's Daily", 5/22)

"There's a lot of momentum and a lot of money around to take stocks higher " says FAHNESTOCK & CO. strategist ALAN POOLE. "It may not be justified, but there's no point in fighting the tape. Near term, I wouldn't be surprised if the Dow went to 2900 or even 3000 on momentum alone." ("USA Today", 5/22)

FROM THE BEARS:

"The economy is sluggish; we've all decided that," says PAUL BOLTZ, chief economist of T. ROWE PRICE ASSOCIATES in Baltimore. "In that kind of environment, it's hard for the market to get up and run."

He believes that the outlook for inflation is bleak. "So, you end up with a sluggish economy and gradually rising interest rates, which is a difficult environment for the stock market. I don't see anything to help the market until later this year." (NYT, 5/22)

STOCK MARKET:

SHEARSON LEHMAN HUTTON's MICHAEL BENSON reports the London market "has been rip-roaring since the beginning this morning" up as much as 40 points. I don't see anything stopping this market from continuing to march at this pace." Benson predicts the Dow will close above 2850 today. (FNN's "World Business Report", 5/22)

"A Dow move to 2875 to 2900 looks doable, probably without a whole lot of effort," says McDONALD & CO. investment strategist BRADLEY TURNER. "But for the Dow to go much higher on a fundamental basis, you're going to need both higher corporate earnings and lower interest rates. The market's getting ahead of itself. Soberness will set in soon." ("USA Today", 5/22)

"I don't think we are at the end of our run," says TRUDE LATIMER at JOSEPHTHAL & CO. She continues, "Technically, we will probably stop short at 3000" on the Dow, at which point the market may be in for some serious selling. (WSJ, 5/22)

"The market still looks to be in pretty good shape," says THOMAS BROWN, strategist at RUTHERFORD, BROWN & CATHERWOOD in Philadelphia. Mr. Brown says the Dow is likely to go to 2950 in the next four to six weeks, provided interest rates don't rebound. ("The Washington Post", 5/22)

"It's encouraging to see better volume ... [to see] both institutions and individuals come back," says STEVEN BARRY, co-manager of the QUASAR FUND for ALLIANCE CAPITAL MANAGEMENT. Mr. Barry likes the way the rally in the secondary issues is broadening, but says that "we're not ready to say we've made a bottom." ("Investor's Daily", 5/22)

After Monday's "little bounce," says KENNEDY GAMMAGE of "The Richland Report", "We should look for a gradual working down toward sloppiness into the month of June. We will have a pause to refresh in June and then a continuation of the present rally." (FNN's "Wall Street Countdown", 5/21)

Yesterday's run-up may not be quite as significant as it seemed, says RODD ANDERSON, vice-president of equity trading at SHEARSON LEHMAN HUTTON. "There's a lot of program activity and it looks like they're buying the blue chips." (UPI, 5/21)

"Analysts' opinions - good or bad - are really moving stocks these days," says ROBERT STOVALL of STOVALL/TWENTY-FIRST ADVISERS. He continues, "As you know, I'm the keeper of the GENERAL MOTORS bellwether flame.

"It has been pointing upward now for months and General Motors had a pretty good day in the market today [Monday] and it's not far from making another higher high. And if it does, just over 50, it would mean four more good months for the market which would carry us through a nifty summer rally period, perhaps." (FNN's "Marketwrap", 5/21)

"There's virtually a lack of selling, and we're experiencing a mini-buying panic" in the OTC market, says GLENN PARKER, managing director and head of OTC trading at HAMBRECHT & QUIST INC. "People are waiting for the market to pull back so they can buy into it. And it's not pulling back." ("Investor's Daily", 5/22)

STOCK TIPS:

ROBERT STOVALL of STOVALL/TWENTY-FIRST ADVISERS says that he sold some stocks recently and will now be "reorienting those monies toward stocks that are just beginning to look good. Two stocks that I like a lot: SMITHKLINE-BEECHAM acts very well and LUBRIZOL made a move above 40 today for the first time in a long while. That is a great stock, I think, for global benefits out of sophisticated lubricants." (FNN's "Marketwrap", 5/21)

"The collapse of the LOTUS - NOVELL merger only magnifies MICROSOFT's

position," says SHEARSON LEHMAN HUTTON analyst DAVID READERMAN, who recommends buying stock in Microsoft. Microsoft's Windows 3.0 is expected to do well in the market. Readerman adds, "Sure the stock has moved up, but we think it is a core holding for long-term investors."

Also following the Lotus - Novell merger collapse, BEAR STEARNS & CO.'s LOUIS GIGLIO started touting Novell stock again saying, "Now it should be trading on fundamentals again." He expects Novell earnings to rise 61% this year to $2.35 a share. ("USA Today", 5/22)

PAINEWEBBER's STEVE SMITH says MICROSOFT's new release, WINDOWS 3.0, enhances the power of IBM-compatible computers to such an extent that the product may run APPLE into the ground.

"It's a formidable threat and the question is whether Apple's margins are going to be under a couple percentage points of pressure or whether it's going to lead to the long-term demise of the company. It's that fundamental a threat in my opinion." (CNBC's "Business View", 5/21)

CHARLES CLOUGH of MERRILL LYNCH says this rally is "within the context of a long-term cyclical peak." Any chasers should stay with three secure themes: technology, energy and capital goods, with technology having the greatest upside. (CNBC's "Business View", 5/21)

"If at first you don't succeed, try, try again and BTR may be doing just that," says CNN's DAN DORFMAN. After BTR's unsuccessful attempt to buyout NORTON, Dorfman reports BTR is on the prowl for two new victims, TIMKEN and CRANE. (CNN's "Business Day", 5/22)

KIDDER, PEABODY's MARC SULAM says environmental waste stocks are a strong play. "All of these stocks have significantly outperformed the market over the course of the last several years. Going forward, I think the dynamics of the industry are going to lead for continued outperformance for most of these companies." The big four players in the industry are up an average of 60%: WASTE MANAGEMENT, BROWNING FERRIS, CHAMBERS DEVELOPMENT and LAIDLAW. (CNN's "Moneyline", 5/21)

FNN's stocks to watch this morning include: PINNACLE WEST, GANNETT, MICROSOFT and UPJOHN. (FNN's "World Business Report", 5/22)

FANNIE MAE edged up 3/4 to 40 1/4 following increased earnings estimates from SMITH BARNEY. BOEING soared 1 1/4 to 79 1/8 benefiting from a repeated buy recommendation from SALOMON BROTHERS.

LOWES COMPANIES was up three to 43 5/8 on news that first quarter earnings were up 50% and KIDDER subsequently increased earnings estimates for the remainder of the year. DONALDSON LUFKIN increased earnings estimates and repeated a buy recommendation for ANTHEM ELECTRONICS pushing the stock up

1 7/8.

MICROSOFT climbed two points to 70 1/4 after SHEARSON repeated its buy recommendation. LOTUS fell a point to 33 3/4 following the merger disagreement with NOVELL and a sell recommendation from GOLDMAN SACHS. (NBR, 5/21)

-30- 9660

#90142m0002 05/22/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (MAY 22) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

GABRIELE SCHMITT, a corporate dealer for the BANK OF NEW YORK, downplays yesterday's dollar advance by saying that trading was so light before the Memorial Day holiday that any movement in the dollar may have been exaggerated. "There really is not any liquidity in the market to have a reasonable trading pattern." ("Investor's Daily", 5/22)

"The dollar appears to be coming back from the lows in the past few days," says PETER CANELO, chief market strategist at BEAR STEARNS, who suggests that investors should pay more attention to the dollar and less attention to bonds. Mr. Canelo notes that this dollar comeback "should help bonds, but stocks are already responding favorably." (WSJ, 5/22)

BRIAN FABBRI, the chief U.S. economist at MIDLAND MONTAGU BANK, says, "The dollar is no longer the pillar of strength it was in the first four months of the year, which decreases the relative attractiveness of U.S. investments by foreigners." ("Investor's Daily", 5/22)

"We think interest rates have peaked, and the market suspects the same thing," says JAMES SOLLOWAY, chief economist at ARGUS RESEARCH. Mr. Solloway says he expects yields to fall to 8% or lower by September. (WSJ, 5/22)

"The [bond] market didn't trade with a lot of conviction. The session was basically featureless and dominated by dealer activity. Retail investors were solidly on the sidelines," says WILLIAM SULLIVAN, a senior vice president at DEAN WITTER REYNOLDS. (NYT, 5/22)

"[Bond] market psychology still remains upbeat, as economic growth appears weak," says BRIAN FABBRI, the chief U.S. economist at MIDLAND MONTAGU BANK. "The market expects the next change in [official] monetary and credit policy to be toward easing."

Fabbri notes that it is "unlikely the [credit] markets will move dramatically in either direction over the next few weeks until further evidence emerges, possibly when the May economic statistics are released, to confirm the trend toward a weakening economy and lower inflation." ("Investor's Daily", 5/22)

THE ECONOMY:

"Fears of higher interest rates and inflation have been put to rest," says GARRETT NAGLE, president of Boston money management firm GARRETT NAGLE & CO. "The market is comfortable with rates at these levels, and as far as earnings go, we're closer to an upturn than a downturn." ("USA Today", 5/22)

The good news, according to a report released today by the NATIONAL ASSOCIATION OF BUSINESS ECONOMISTS, is that the current economic strength will continue. In a poll conducted by the organization, 82% of respondents "predict that there will be no recession through 1991. That would be a postwar record ... [109 months], exceeding the previous longest cyclical turnup of 106 months."

The bad news, according to the same report, is that the economy is likely to become much weaker. For example, "NABE forecasters estimate the budget deficit is deteriorating and, by fiscal year 1991, will come in about $70 billion more than the Gramm-Rudman-Hollings target." (UPI, 5/21)

IN WASHINGTON:

Despite continuing U.S. unhappiness with China's human rights record, PRESIDENT BUSH plans to notify Congress today that he will renew most-favored-nation trade status for China. Some officials said the announcement could come late this morning while others said the announcement would be postponed until later in the week. ("The Washington Post," 5/22)

FCC CHAIRMAN ALFRED SIKES says the new proposed over-the-air signal standard would mean up to 70% of the nation's cable systems would be regulated. "We think it's quite possible to have more competition in this industry. It's that kind of competition that will regulate prices by market disciplines, that will provide better service and more choices and that will offer better technical standards. So that's where we're aiming." (CNN's "Business Day", 5/22)

MICHAEL EVANS, president of EVANS ECONOMICS reports the deficit will amount to $150 billion this year, which signifies there has been no progress to reduce the deficit since 1987. "Well, it's not that so many things have gone wrong, but that administrative officials are living in a dream world. For practical purposes, spending and tax collection are

growing, so the deficit doesn't change. It's no surprise ... unless you're the President, then you're surprised." (NBR, 5/21)

NEW YORK (MAY 22) PR NEWSWIRE - Steve's Homemade Ice Cream Inc. (NASDAQ: STVEA), reported sales of $7,138,000 for the first quarter of 1990 as compared to $7,501,000 a year ago. Net income for the quarter just completed amounted to $79,000, including a $176,000 gain from the early extinguishment of debt as contrasted with net income of $378,000 in the comparable period last year. The decrease in net income resulted primarily from an increase in selling expenses and the decline in revenues offset partially by an improvement in gross profit.

Despite the decrease in revenues for the March 31, 1990, quarter, the company realized an improvement in both gross profit percentage and gross profit dollars primarily as a result of the introduction of Steve's Gourmet Light. During the first quarter of 1990, the company expended approximately $636,000 more than was expended in the comparable period in 1989 for advertising, marketing, selling and promotional expenses. The additional expenses were incurred in connection with the continued support of Steve's Gourmet Light and its introduction into new markets.

Richard Smith, Steve's chairman and chief executive officer, said, "The company anticipates that the continued above-normal advertising expenditures will, in the short-term, adversely affect the company's net income. However, management believes that the introduction of Steve's Gourmet Light and other new products will position the company for future long-term growth and profitability."

Steve's markets Steve's super premium and Swenson's premium ice cream and light productions and Heidi's Frozen Yogurt in 36 states and the District of Columbia and franchises and licenses ice cream shops and family restaurants throughout the United States and 16 foreign countries.

STEVE'S HOMEMADE ICE CREAM INC.

NEW YORK (MAY 22) PR NEWSWIRE - Samsung Information Systems America today announced that it will include the Microsoft Windows 3.0 graphical user interface with its 386SX- and 386-based personal computers. The agreement is part of a worldwide licensing arrangement between Samsung Electronics Company, Ltd. and Microsoft Corp. Samsung Information Systems America markets personal computers, monitors and local-area networking (LAN) hardware products in North America. The products are available immediately.

Samsung Information Systems America will include Windows 3.0 with its SD700 (386SX) and SD800 (386) computers. The company also plans to provide drivers for Windows 3.0 that will support all Samsung video adapters, displays and network adapters. The drivers will allow Samsung users to take full advantage of the high performance of Windows 3.0 and its capability to support multiple DOS applications.

The SD700 runs at 16MHz, includes 2MB of on-board RAM and has five expansion slots. The SD800 runs at 20MHz, includes 1MB of on-board RAM and has eight expansion slots.

According to Microsoft, high-resolution monitors enhance the image clarity of Windows 3.0. Two of Samsung's high-resolution low-cost monitors, the SyncMaster 2 and SyncMaster 3, allow users to display many windows simultaneously without the loss of information or clarity displayed on the screen.

Samsung Information Systems America, headquartered in San Jose, Calif., markets local-area network (LAN) hardware systems, Ethernet interface cards, personal computers, portable computers, monochrome and color monitors, and video adapter cards. Samsung markets its products through distributor and dealer channels in North America. Samsung has regional sales offices in Toronto; Chicago; Atlanta; Saddlebrook, N.J.; and Costa Mesa, Calif. The Samsung customer support number is 800-446-0262.

Samsung Electronics Company (SEC), Ltd., the Seoul, Korea parent company of Samsung Information Systems America, develops and manufactures electronic products ranging from computer systems to semiconductors to telecommunications devices/products. Since 1981, nine million computer products, including one million monitors, have been sold by Samsung. Samsung Group, based in Seoul, is a $39 billion international company focusing on the electronics, aerospace and precision instruments, food processing, textiles, information services and trade industries.

CONTACT: Karen Lippe-Brown of Regis McKenna, 415-354-4441, for Samsung Information Systems America; or Tim Lysgaard of Samsung, 408-434-5482.

#90142p0722 05/22/1990 ~PR Newswire

SAN JOSE, CA (MAY 22) PR NEWSWIRE - ICOT Corp. (NASDAQ: ICOT) today announced sales and earnings for the third quarter of fiscal 1990.

For the three months ended April 28, 1990, sales were $3,272,000 compared to $6,059,000 in the like period last year. Net income for the third quarter of fiscal 1990 was $10,000 compared to a loss of $2,441,000 in fiscal 1989. For the nine months ended April 28, 1990, sales were $11,243,000 compared to sales in the like period last year of $19,777,000. Net income for the first nine months of fiscal 1990 was $262,000 or $.02 per share compared to a loss of $6,674,000 or $.60 per share in fiscal 1989. The results for the third quarter and nine months of fiscal 1990 reflect operations since the company's sale of its EFTPOS business to VeriFone Inc. in June 1989.

According to Joe Becker, president of ICOT, "During the third quarter, the company sold, in an initial public offering, 110,000 of its 750,000 share holding of VeriFone, Inc. common stock and recorded a gain of $539,000 on the sale. During the quarter, the company had no revenue derived from sales of its airline terminal product line. Further, no significant future sales are expected from these products. Sales of the company's PC Connectivity products in the third quarter showed improvement over previous quarters this year. We are pleased to note that International Data Corporation (IDC), a leading market research firm, reported that ICOT is the U.S. market share leader in 3270 LAN to Mainframe Gateway products, ICOT's strategic market."

ICOT Corp. is a manufacturer of data communications systems including network interfaces and gateways. The products are sold throughout the world from its corporate headquarters in San Jose, sales offices located throughout the United States and a wholly-owned subsidiary in the United Kingdom.

#90142p0723 05/22/1990 ~PR Newswire

SAN DIEGO (MAY 22) PR NEWSWIRE - GTI Corp. (AMEX: GTI) announced today that it has signed a letter of intent to acquire approximately 90 percent of the outstanding stock of San Diego- based Valor Electronics for approximately $18.3 million. The acquisition will be funded through cash, debt and 2.5 million shares of GTI common stock valued at $7.5 million which will be placed with Telemetrix plc, GTI's major shareholder, at the close. Valor management will continue to operate the company and will retain the remaining 10 percent of Valor not acquired by GTI.

Gary L. Luick, president and chief operating officer of GTI Corp. stated that Valor is a perfect fit for GTI's strategy of acquiring businesses concentrating on electronics-based technologies. "This acquisition meets all of our criteria," said Luick, "and is right on target in terms of our strategic market focus. Valor's product line gives us entree into the Local Area Networking (LANS) market, one of the fastest growing areas of the electronics industry. In addition," said Luick, "Valor offers an attractive growth opportunity and a strong management team that wants to stay on with us." Jack VanderKnyff, president of Valor, said, "The association with GTI will enable Valor to continue its rapid growth. The management team is enthusiastic about the new opportunities, as evidenced by its continued equity position."

Valor Electronics is a leading manufacturer of a broad range of electronic components based on magnetics technology. Its signal processing and power products address data communications needs, particularly computer networking applications. The company operates manufacturing facilities in Mexico, Hong Kong and the People's Republic of China. The preliminary results for Valor's fiscal year ended March 31, 1990, were net income of $1.3 million on revenues of $19.3 million.

Consummation of the acquisition is subject to the execution of a definitive agreement, the approval of the transaction by the directors and stockholders of both companies and requisite regulatory approvals.

GTI is a multi-plant distributor and manufacturer of electronic components circuit boards and electronic component processing equipment for the automotive, instrumentation and computer industries. In 1989, GTI earned $1,969,000 on revenues of $41.4 million.

STAMFORD, CT (MAY 22) PR NEWSWIRE - Asea Brown Boveri Inc. (ABB) announced today a unit has entered into a sale and purchase agreement with IMETAL SA (IMETAL), under which IMETAL will purchase the C-E Minerals business for approximately $150 million. The proposed acquisition is

subject to approval by U.S. regulatory authorities.

ABB had previously announced its intention to sell C-E Minerals, based in King of Prussia, Pa., a leading supplier of alumina silica calcines and fused silica used in the refractory, investment casting and semiconductor industries. IMETAL, based in Paris, France, is active in building materials, industrial minerals, metal fabricating and international trading.

Asea Brown Boveri, with sales of approximately $7 billion and some 35,000 employees in the United States, provides products and services for the power, automation, environmental control, transit and other markets. It is part of the ABB Group, Zurich, the world's leading electrical engineering company with total annual sales of about $25 billion and 215,000 employees in 140 countries.

#90142p0734 05/22/1990 ~PR Newswire

PHILADELPHIA (MAY 22) PR NEWSWIRE - Macsil Inc., Philadelphia pharmaceutical manufacturer, reported record sales increases for its "Balmex"(R) product lines for fiscal year 1989 and for the first nine months of fiscal year 1990, to March 31, 1990, it was announced today by Edward Waxman, president.

Sales increased a record 37 percent in fiscal 1988, and Waxman said that sales for fiscal 1989, ended June 30, 1989, were up 25 percent. For the first nine months of the current fiscal year, sales increased 24 percent, even after Macsil Inc. announced a 10 percent price increase on July 1, 1989, its first price adjustment since 1984. Macsil Inc. is privately held; no sales figures were disclosed.

Macsil Inc. manufactures and markets "Balmex" ointment, lotion and powder, originally developed to relieve babies' diaper rash. The products are now widely used for soothing other skin irritations, including the relief of decubitis ulcers and problems associated with incontinence among geriatric patients.

Waxman attributed the sales gains to stronger marketing efforts, improved containers and modernized package design, and to increased distribution. Macsil's long-established sampling program to M.D.s, new mothers, nurses and hospitals strengthens identity of the "Balmex" product line.

"Balmex" products are distributed nationally by leading independent and chain drug stores and by many of the largest supermarkets. The products are also sold in Australia, Canada, Puerto Rico and Central America.

DAVIS, CA (MAY 22) PR NEWSWIRE - Calgene (NASDAQ: CGNE) scientists today announced they have cloned a gene for stearoyl-ACP desaturase, a key enzyme in the formation of vegetable oils used in both foods and industrial applications.

This major technical achievement brings Calgene closer to its strategic commitment to market domestically produced vegetable oils with unique, high-value compositions from genetically engineered and nutritionally improved canola. The desaturase enzyme plays a central role in determining the ratio of saturated to unsaturated fatty acids in vegetable oils. Nutritionists are now calling for less dietary consumption of saturated fats, in particular palmitic acid which is found in high concentrations in tropical oils such as coconut and palm oil. Increased stearoyl-ACP desaturase activity produced by enhanced expression of the desaturase gene is expected to contribute to lowering the saturated fat content, resulting in healthier vegetable oils.

Lloyd Kunimoto, vice president of corporate development, said, "The cloning of the desaturase gene is an important step in our comprehensive program to modify oil composition in canola. The desaturase gene, operating in concert with other oil synthesis genes which we are in the process of cloning, should enable us to create a family of high value oils tailored to specific consumer and industry needs."

Vegetable oils are currently sources of raw materials for soaps and detergents, paints, cosmetics, pharmaceuticals and lubricants, in addition to foods and food ingredients. U.S. consumption of edible oil and industrial oil exceeds 15 billion pounds per year.

Calgene has already introduced the desaturase gene into canola. The gene is expressed under the control of a proprietary promoter, which will limit gene expression to the developing seed where oil is produced and stored.

Calgene Inc. is an agribusiness biotechnology company developing improved plant varieties and plant products for the seed, food and specialty chemical industries. In addition to its three operating seed company subsidiaries -- NobleBear Inc., Plant Genetics Inc., and Stoneville Pedigreed Seed Co. -- Calgene operates a fully integrated vegetable oil business comprised of Ameri-Can Pedigree Seed Co., a major canola seed company; U.S. Canola Processors, a canola seed processing joint venture with Central Soya Co. Inc.; and Calgene Chemical, an oils sales and

marketing company.

#90142p0739 05/22/1990 ~PR Newswire

ST. LOUIS (MAY 22) PR NEWSWIRE - Monsanto Chemical Company and Exxon Chemical Company today jointly announced that an agreement in principle has been reached for merging their respective thermoplastic elastomers (TPEs) businesses to create a new, independent company to develop, manufacture and market TPEs.

The new enterprise would combine Monsanto's technical, manufacturing and marketing expertise in elastomeric alloys with Exxon Chemical's expertise in olefin-based raw materials and fundamental polymer science.

Specific details of the agreement are still to be determined. The targeted startup of the new company is by the end of 1990, pending the successful conclusion of negotiations and approvals of the appropriate government agencies in the United States, Latin America and Europe.

TPEs are a diverse family of cost-effective, high-performance rubber-like materials that, unlike conventional vulcanized rubber products, can be easily processed and recycled. TPEs are used in engineered industrial rubber and soft plastic applications in the automotive, medical, food, electrical, construction, appliance, business machine and other industries.

According to John L. Tuley, vice president and general manager of Monsanto Chemical Company's plastics division and elastomers business group, "Sales of TPEs have grown rapidly during the past 10 years as more companies recognized the performance, cost and processing advantages of TPEs over competitive thermoset rubber products. The goal of this new enterprise is to better serve both existing and new customers as well as advance the growth of this dynamic category of materials."

Monsanto has several TPE manufacturing and technical facilities throughout the world that would become part of the new company. Manufacturing facilities include its Pensacola, Fla., and Wadsworth, Ohio, sites in the United States; Newport, South Wales in the United Kingdom; Yokkaichi in Japan; and Sao Jose dos Campos in Brazil. Technical centers are located in Akron, Ohio; Sao Paulo, Brazil; Yokkaichi, Japan; and Louvain-La-Neuve, Belgium.

#90142p0742 05/22/1990 ~PR Newswire

LOS ANGELES (MAY 22) PR NEWSWIRE - Caesars New Jersey Inc. (AMEX: CJN) today announced its net income was $7,500,000, or 46 cents per share, for the fiscal quarter ended April 30, 1990. In the comparable quarter of fiscal 1989 net income was $7,506,000, also the equivalent of 46 cents per share.

Revenue for the fiscal 1990 third quarter amounted to $80,185,000, compared with revenue of $80,297,000 in the same quarter of fiscal 1989.

Net income for the first nine months of fiscal 1990 was $23,086,000, or $1.42 per share compared with $26,288,000, or $1.62 per share for the same nine months of fiscal 1990. Revenue for the fiscal 1990 nine months totaled $239,976,000, compared with $251,132,000 in the same nine months of fiscal 1989.

At Caesars Atlantic City, lower rental costs and reduced provision for bad debts were offset by higher casino payroll and marketing costs during the third quarter. During April of 1990, the opening of a new, large casino/hotel in the New ersey marketplace had an adverse effect on Caesars Atlantic City's casino revenue. Additionally, disruptions caused by the construction of a new parking and transportation center expected to open in July 1990 had a negative influence on Caesars Atlantic City's business.

The decline in earnings for the fiscal 1990 nine months, when compared with the same period of fiscal 1989, was mainly caused by lower casino revenue resulting from lower win percentages and higher casino expenses, partially offset by lower rental costs.

CONTACT: Jack Leone of Caesars World, 213-552-2711, ext. 263.

#90142p0748 05/22/1990 ~PR Newswire

ROCKVILLE, MD. (MAY 22) PR NEWSWIRE - Contel ASC announced it has signed a $400,000 contract with British Aerospace Communications (BAeCom) for a satellite data broadcast network.

BAeCom is one of six companies in the United Kingdom which have been granted licenses to provide shared data broadcast services.

The network includes Contel ASC's recently introduced EDB-1000 hub and Very Small Aperture Terminals (VSAT) components. The master station, located at British Aerospace Communications headquarters, about 40 miles north of London, will broadcast one-way data to VSATs at user sites throughout the United Kingdom.

The EDB-1000 system offers a number of enhanced capabilities, including twice as many data input ports at the hub station to accommodate a greater variety of customer services; four times greater channel capacity on the outbound channel; and the ability to support as many as 32 devices at the customer sites.

"We look forward to being a part of this new business sector in the United Kingdom," said Donna Birks, vice president of international operations for Contel ASC. "Not only is this an important market for us, it also is an excellent environment in which to showcase the features and benefits of the EDB-1000."

Contel ASC also provides data broadcast services in Spain, Sweden, and recently announced the sale of a data broadcast network in the Soviet Union.

Contel ASC, a subsidiary of Contel Corporation, provides data communications networks using satellite-based technology to domestic and international customers. Contel Corporation (NYSE: CTC), a company with more than $3 billion in annual revenues and sales, provides a broad range of telecommunications products and services.

#90142p0749 05/22/1990 ~PR Newswire

HARRISBURG, PA (MAY 22) PR NEWSWIRE - A Meadville new-car dealership which allegedly used illegal advertisements promising "free" groceries for car-buyers has paid $1,000 under a court agreement filed today.

Attorney General Ernie Preate Jr. said the agreement with Weber- Harris Ford Lincoln Mercury, 433 Baldwin St., was filed in Crawford County Common Pleas Court by the Erie office of his Bureau of Consumer Protection.

The agreement alleges that Weber-Harris advertised that it would give $100 worth of "free" groceries for consumers who purchased new vehicles.

"In almost every case, the purchase price of a car is a negotiable item, not a set figure," Preate said. "It's our position that claims of 'free' offers by businesses that negotiate selling prices are illusory and violate both Federal Trade Commission regulations and the state's Unfair Trade Practices and Consumer Protection Law."

Under terms of the agreement, known as an "assurance of voluntary compliance," the dealership doesn't admit wrongdoing but agrees to "cease and desist" from the allegedly illegal acts and to pay $1,000 in costs of

investigation.

Deputy Attorney General Daniel R. Goodemote, attorney-in-charge of the bureau's Erie office, said similar agreements regarding the use of the term "free" in ads were filed with three other new-car dealerships in northwestern Pennsylvania earlier this year.

#90142p0753 05/22/1990 ~PR Newswire

NEW YORK (MAY 22) PR NEWSWIRE - Four high-speed, multi-functional, plain-paper facsimile products -- including two units that operate as full-featured digital copiers -- were announced here today by Xerox Corporation (NYSE: XRX).

Xerox, the company that pioneered the use of plain-paper fax, now has seven plain-paper facsimile products, the broadest plain-paper fax offering in the industry.

The Xerox 3010 Digital Copier/Fax and the Xerox 3010 Editor Digital Copier/Fax utilize laser xerographic imaging to produce high-quality reproductions of documents on cut-sheet, plain paper. They are designed to perform both facsimile transmission and digital copying at a rate of 11 copies per minute (cpm), suitable for work groups and departmental settings.

The Xerox Telecopier 7033 Facsimile Terminal and the Xerox Telecopier 7032 Facsimile Terminal are full-featured facsimile products that operate as high-speed hub units for the fax networks of large, multi-site companies.

"The popularity of plain paper is growing rapidly," said John P. Lafferty, vice president and general manager, Office Products Organization, Information Products Division. "Plain-paper machines provides added convenience to end users and significantly increase their productivity. Our strategy is to lead the high-end, business and government segments of the facsimile marketplace with a wide-range of fully featured, plain-paper products that offer our customers higher productivity and added convenience. Today's announcement represents a major commitment by Xerox to the plain-paper facsimile marketplace."

The Xerox 3010 Digital Copier/Fax and 3010 Editor Digital Copier/Fax While most fax machines can double as casual-use, convenience copiers, the Xerox 3010 and the 3010 Editor provide high-quality copies at a rate of 11 cpm. Both units feature an automatic document feeder, electronic collation, or sorting, zoom reduction/enlargement and copying from a platen.

In the fax mode, they transmit documents at the rate of 11 seconds per page. The units also offer dual access to memory, which enables users to copy and fax documents simultaneously.

#90142p0754 05/22/1990 ~PR Newswire

ROCKVILLE, MD (MAY 22) PR NEWSWIRE - Contel ASC today announced a $4 million contract with Empresa Brasileira de Telecommunicacoes (EMBRATEL), the international and long distance telecommunications carrier in Brazil.

The contract is for two satellite data communications networks. Contel ASC in coordination with its Brazilian distributor, Victori Communications, and its manufacturing partner, DIGILAB, will provide EMBRATEL with a one-way data broadcast hub with 50 VSATs, and a two-way data hub with 100 VSATs. EMBRATEL, by the end of the year, plans to offer the first public shared network for low speed data broadcast transmission via satellite ever available in Brazil.

The two-way data network, using a Contel ASC DMN 3000 TDMA system, made available in C-band, is scheduled for commercial availability in the third quarter of 1991. The EMBRATEL hub for the DMN 3000 has the capacity to support 2,000 VSATs.

"With the introduction of these new services, EMBRATEL plans to increase the availability of data communications solutions for both small and medium size users," said Mario Cesar Pereria De Arujo, chief manager of data communications services at EMBRATEL. "VSAT technology makes a great deal of sense for a large country such as ours, where terrestrial lines are not available in many of the more remote areas."

EMBRATEL, by government regulation, is the only organization permitted to provide shared hub telecommunication services in Brazil. In the case of shared services, EMBRATEL is responsible for the installation of services and the operation of the hubs. Users will be responsible for the purchase of the VSATs needed for their data communications network. Large users, requiring private VSAT networks, will provide the entire investment for their system and EMBRATEL will be responsible for the supervision and operation of the network.

Including the EMBRATEL order, Contel ASC has sold $16 million worth of data communications networks in Brazil during the past 12 months. The company's first contract was with Banco Bradesco, S.A., Sao Paulo, for a nationwide satellite communications network to interconnect Bradesco's

1,700 branch offices.

Contel ASC, a subsidiary of Contel Corporation, provides data communications networks using satellite-based technology to domestic and international customers. Contel Corporation (NYSE: CTC), a company with more than $3 billion in annual revenues and sales, provides a broad range of telecommunications products and services.

#90142p0755 05/22/1990 ~PR Newswire

ROCKVILLE, MD (MAY 22) PR NEWSWIRE - Contel ASC announced that Xinhua (New China) News Agency has ordered a private data broadcast network valued at $1 million.

Xinhua will use this network to broadcast data, facsimile, and pictures to both its domestic and international news bureaus. The hub earth station for this network is scheduled to be operational by the end of this year.

In July 1988, Xinhua purchased an initial network of 50 Equatorial Data Broadcast C-100 units from Contel ASC. These 1.4-meter earth stations, located throughout China, receive Xinhua's 1200 bps data feed broadcast from a Hong Kong hub. With the new hub, Xinhua can broadcast via an Intelsat satellite directly from its headquarters in Beijing and provide multiple services at a higher 19.2 kbps data rate.

"The existing system has proven to be highly reliable," said Baochuan Sun, Xinhua technical director. "Therefore, we decided to put in our own uplink and implement plans to expand the network."

Xinhua will use an Intelsat satellite with global beam coverage reaching Asia, Africa, the Middle East and parts of Europe. Contel ASC has the only data broadcast services approved by Intelsat, having met the stringent procedures required by Intelsat for its Intelnet-1 global service.

"Contel ASC is pleased with the success of this first network in China," said Donna Birks, vice president of Contel ASC's international operations. "We are building an impressive portfolio of international data broadcast users, as evidenced by our recent contract wins with TASS and British Aerospace. Within China, we plan to expand our services into shared, interactive data networks in the near future."

Contel ASC, a subsidiary of Contel Corporation, provides data communications networks using satellite-based technology to domestic and international customers. Contel Corporation (NYSE: CTC), a company with

more than $3 billion in annual revenues and sales, provides a broad range of telecommunications products and services.

DENVER (MAY 22) PR NEWSWIRE - TSL Inc. (NASDAQ: TSLI) today announced that its patent pending application entitled "Method of Making A Tamper-Resistant Package" has been allowed for issuance as a patent by the Patent and Trademark Office of the U.S. Department of Commerce, and the patent will issue in due course.

This major packaging patent is the third awarded to TSL in the past eight months. This new TSL technology and tamper-evident packaging concept is specifically designed to protect perishable goods in flexible packaging.

"The issuance of this patent further establishes TSL as an innovative leader in the development of unique, tamper-evident packaging," said Bill Koleszar, TSL's chief operating officer. "We anticipate that this new patent will have an impact in protecting a great variety of packaged, perishable food products."

Based in Denver, TSL formulates and markets antitampering packaging technologies, under the trade name Tamper Safe,TM for the pharmaceutical, food, cosmetic, security and packaging industries.

#90142p0759 05/22/1990 ~PR Newswire

DETROIT (MAY 22) PR NEWSWIRE - Thomas F. McDonald, a 22-year veteran public relations executive, has joined Hill and Knowlton USA as senior vice president in its Detroit operations.

McDonald's responsibilities include serving as managing director of Hill and Knowlton's Detroit-based Mazda corporate account group, as well as public relations counselor for Mazda's U.S. manufacturing operations, based in Flat Rock, Mich.

Ron Hartwig, regional general manager for Hill and Knowlton and worldwide director of the firm's Mazda account activities, announced McDonald's appointment. "We are fortunate to have found an executive with the wide range of automotive, corporate, manufacturing, communications and product marketing experience to head the strategic corporate and manufacturing communications activities for both Hill and Knowlton and Mazda in the

Detroit area," Hartwig said.

McDonald began his business career in 1967 when he joined Volkswagen of America as a public relations trainee. He progressed through the Volkswagen organization, holding increasingly responsible public relations positions at the company's corporate headquarters and regional offices.

In 1977 he was named director of public relations for Volkswagen Manufacturing Corporation of America Inc., and was responsible for communications activities for Volkswagen's first automotive manufacturing facility in the United States. In 1979, he was named director of corporate public relations for the Volkswagen group.

Based in the Detroit area, he was responsible for the development, coordination and implementation of national and international public relations activities for the U.S. subsidiary of Europe's largest automobile manufacturer. McDonald held this position prior to joining Hill and Knowlton.

A former army officer, McDonald holds a bachelor of science degree from the University of Scranton in Pennsylvania. He resides in Troy, Mich., with his wife and four daughters.

Hill and Knowlton, based in New York, is a leading international public relations and public affairs counseling firm with 62 offices in 23 countries. Its parent company, WPP Group plc, is one of the leading advertising and marketing services groups in the world.

#90142p0761 05/22/1990 ~PR Newswire

WESTBORO, MA (MAY 22) PR NEWSWIRE - In a strong endorsement of Microsoft(R) Windows(tm) 3.0, Banyan Systems today affirmed its commitment to support the new product in the current VINES(R) Release 4.0, as well as in all future releases of VINES. Banyan had earlier been a beta test site for Windows 3.0, and VINES 4.0 is now shipping complete with Windows 3.0 support at no extra cost.

According to David C. Mahoney, Banyan president and CEO, "By virtue of our longstanding, close relationship with Microsoft, Banyan was quick to appreciate the importance to the marketplace of a network- aware Windows 3.0 product that could be coupled with VINES to expand our 'window' into the corporate-wide PC network. Banyan, our users and our resellers view today's Microsoft announcement with great enthusiasm and anticipation."

"In view of Banyan's position as a leader in corporate-wide PC networks,

we are pleased that they have made such a strong commitment to the Windows 3.0 graphical environment," said Steve Ballmer, senior vice president of Microsoft's systems Software Division. "By supporting Windows 3.0 in VINES 4.0, and by enabling users to run both VINES and third party applications simultaneously within the Windows environment, Banyan is providing a great benefit to users."

By providing support for Windows 3.0 in VINES 4.0, Banyan enables users, operating within the Windows environment, to run both Banyan and third party applications simultaneously. All Banyan applications are capable of operating in the Windows environment.

To support multiple, concurrently-running applications utilizing network resources, Banyan supports virtual machines under Windows-386. This lets each active window (i.e., application) have equal access to the network resources which the user is mapped to upon network login. As a result, each application can have a different current drive or subdirectory.

Windows 3.0 compatibility within VINES 4.0 also includes synchronous socket calls, as well as interrupt 21 calls. This means that any non-Windows applications written to Banyan DOS APIs will operate under Windows.

VINES 4.0 users can install Windows 3.0 on their local hard disk or on a network drive. To utilize Windows with VINES, users first login to the network, and then invoke the Windows software. To run Windows, PC's require 2MB (minimum) to 4MB of memory.

#90142p0762 05/22/1990 ~PR Newswire

PASADENA, CA (MAY 22) PR NEWSWIRE - Jacobs Engineering Group Inc. (NYSE: JEC) today announced that its Irish subsidiary, Jacobs International Inc., has been awarded a project to increase production at the Arab Potash Co. Ltd.'s fertilizer plant on the Dead Sea in Jordan by 33 percent.

The expansion project continues Jacob's 26-year association with the Arab Potash Co. Jacobs performed the original 1964 feasibility studies on which international financing was based.

In 1975 when the project was reactivated, Jacobs Engineering was entrusted with managing the $425 million project from initial design studies to construction which was completed in 1982. Jacobs was then selected to start up and operate the process facility for five years.

Where nothing but hot, barren wasteland 1,300 feet below sea level existed before, there now stands a complete town for the workers and staff and a process plant recovering potash from salts produced by solar evaporation ponds covering an area larger than the island of Manhattan.

The new project will have a constructed value of $66 million, according to Arlan Emmert, Jacobs International Inc., vice president and managing director. Jacobs International Inc.'s headquarters in Dublin, Ireland, will provide services to carry out a feasibility study, along with engineering, design, procurement, and construction management to expand production at the Arab Potash plant to 1.8 million tons annually.

The Arab Potash Co. is a major producer of potassium chloride which is exported to worldwide markets for use primarily as a fertilizer.

In 1986, Jacob's work on the Arab Potash refinery was recognized by the Institute for the Advancement of Engineering with its Engineering Project Achievement Award. The award honors outstanding engineering projects designed by companies in Southern California.

Potash is extracted from Dead Sea brine using a system of solar evaporation pans covering 40 square miles to precipitate carnallite, a double salt of potassium and magnesium. Carnallite is recovered from the pans using a unique floating harvester designed by Jacobs and is then fed to the process plant for conversion to potassium chloride.

Jacobs Engineering Group Inc. provides single-source environmental and hazardous waste management, consulting, engineering, design, architectural construction, construction management, contract maintenance, and operations services to government and industry worldwide.

ATLANTA (MAY 22) PR NEWSWIRE - Graphic Industries Inc. (NASDAQ: GRPH), a leading full service printing and graphic communications company, today reported record sales and higher earnings for the first quarter.

For the three months ended April 30, sales advanced to $84,211,000, up 16 percent over $72,494,000 for the first quarter last year. Net income increased 35 percent to $1,809,000 over $1,342,000 a year ago. Earnings per share of common stock were $.19, fully diluted, vs. $.14 per share, fully diluted, for the first quarter last year.

"The improvement in earnings for the second consecutive quarter reflects

the continuing strong efforts of our people to increase sales in a sluggish economic environment combined with strong price competition," said Mark C. Pope III, chairman of Graphic. "We are also continuing to keep tight control on expenses throughout our operations."

With sales up 15 percent to a record $310,330,000 for the year ended Jan. 31, Graphic ranks 22nd among commercial printing companies in North America.

Graphic's operating companies include IPD Printing & Distributing Inc., Williams Printing Co., Stein Printing Co., Atlanta Blue Print Co., Ryco Inc., Prizma Photographics, Finish-It Inc. and Northside Blueprint, all based in Atlanta; Edwards and Broughton Co., Raleigh, N.C., Craftsman Printing Co., Charlotte, N.C.; A&E Reprographics, Jacksonville, Fla.; W.E. EAST HARTFORD, CT (MAY 22) PR NEWSWIRE - Japan Air System (JAS) has placed an order for Pratt & Whitney PW4000 engines worth up to $290 million to power the airline's new fleet of Boeing 747-400 aircraft.

JAS previously placed a firm order with Boeing for four 747-400 aircraft and took options on four more.

Pratt & Whitney will supply JAS with 19 PW4000 engines, including spares, worth about $143 million for the four aircraft on firm order.

If JAS acquires all of the option aircraft, Pratt & Whitney would supply 19 additional engines worth about $147 million.

JAS, which is Japan's third largest airline, will operate the 747s on its domestic and international routes. Deliveries of the aircraft on firm order will begin in 1995.

Pratt & Whintey is a unit of United Technologies Corporation of Hartford, Conn.

LUND, SWEDEN (MAY 22) PR NEWSWIRE - Gambro AB (NASDAQ: GAMBY) announced today that the expiration date of the $37 per share all cash tender offer by Gambro's subsidiary, Polo Acquisition Corporation, for all outstanding shares of COBE Laboratories, Inc. (NASDAQ: COBE), has been extended until 12:00 midnight, New York City time, on Monday, June 4, 1990. As previously announced, the Federal Trade Commission has requested more information and documentary material concerning the transaction under the Hart-Scott-Rodino Antitrust Improvements Act of 1976. The waiting period required by the Hart-Scott-Rodino Act with respect to the tender offer will expire at 11:59 p.m., New York City time, on the tenth calendar day after the date of substantial compliance with the request, unless the waiting period is terminated earlier by the FTC and the Antitrust Division of the Department of Justice.

Gambro reports that it has agreed with the FTC not to assert that it has substantially complied with the FTC request until ten days after it has provided the FTC with certain requested documents. Gambro expects to provide those documents to the FTC on or about May 25, 1990, and to provide certain other information previously requested by the FTC shortly thereafter, and therefore expects to be in substantial compliance with the FTC request on or about June 4, 1990.

As of the close of business on May 21, 1990, approximately 4,443,610 shares of common stock of COBE Laboratories were tendered in the tender offer.

WASHINGTON (MAY 22) PR NEWSWIRE - Kevin R. Callwood today assumed the duties of vice president of corporate communications for the Overseas Private Investment Corporation (OPIC).

Prior to his appointment, Callwood served as deputy assistant secretary for African affairs of the Department of State.

OPIC is a self-sustaining U.S. government corporation which encourages U.S. private investment in over 100 developing nations throughout the world by providing such programs as direct loans, loan guaranties, and political risk insurance.

Callwood served as deputy director of the National Security Policy Staff of the Bush/Quayle campaign and as deputy director for National Security Affairs of the Bush Transition Team. His first post with the new administration was on the Secretary of State's Policy Planning Staff.

During 1985-1987, Callwood served on the Republican staff of the Committee on Foreign Affairs, U.S. House of Representatives. During 1984-1985, he was program officer for Africa at the National Endowment for Democracy. Previously, he served on the senior staff of the African Development Foundation. During 1980-1983, Callwood was executive director of the American African Education Foundation.

Callwood received a Bachelor's Degree in Political Science from George Washington University and a Master's Degree in Public Administration from the John F. Kennedy School of Government, Harvard University.

LOWELL, MA (MAY 22) PR NEWSWIRE - Wang Laboratories Inc. (AMEX: WAN) and Southern Electric International Inc. (SEI) today announced a marketing agreement under which both companies will market worldwide a new product that integrates SEI's NORMS(R) mainframe software with Wang's document image processing offerings. The product enables organizations to increase their operating efficiency by integrating sophisticated control and retrieval capabilities with image functions.

The primary markets for the product are nuclear and conventional utilities aerospace, automotive, and petrochemical companies.

SEI's NORMS offers users strong documentation control capabilities as well as records management, configuration mangement, and full text retrieval features. NORMS users can now add Wang's OPEN/image-CICS, a set of software tools that allow scanning, displaying, printing, and sending of paper-based information as electronic images using IBM's Customer Information Control System (CICS).

In a power company, for example, data processing integrated with imaging reduces paper-based processes, which can ensure file integrity and provide fast access to vital plant information. Users can have concurrent access to a mainframe-based maintenance information database and supporting

document images, such as equipment diagrams and procedure manuals.

Pricing for NORMS is based on the modules purchased and starts at $150,000. OPEN/image-CICS software is licensed at $4,000.

SEI -- a subsidiary of the Southern Company (NYSE: SO) -- designs, constructs, owns and operates independent power facilities in the United States. The firm also porvides a broad range of technical services and information systems and services to industrial companies and utilities outside the Southern electric system. Other Southern Company subsidiaries include Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric and Power, Southern Company Services, and the Southern Investment Group.

Wang Laboratories Inc., headquartered in Lowell, Mass., is a leading worldwide supplier of computer-based information processing systems including text, data, image and voice processing, as well as telecommunications and networking products.

#90142p0780 05/22/1990 ~PR Newswire

DALLAS (MAY 22) PR NEWSWIRE - Harken Energy Corporation (NYSE: HEC) of Dallas today reported a consolidated net loss for the first quarter of 1990 of $2,183,000, or $.10 per common share (after accrued preferred stock dividends). These results compare to a first quarter 1989 consolidated net loss of $1,179,000, or $.06 per common share (after accrued preferred stock dividends). Consolidated revenues were $279.7 million compared to $254.4 million in the first quarter of 1989.

Operating profit increased to $1.2 million from $.06 million in 1989's first quarter. This increase was due primarily to the net impact of the following:

-- Higher operating profits at Tejas Power Corporation ("TPC"), Harken's natural gas gathering, transmission and marketing subsidiary;

-- Higher supply and trading operating profits resulting from more effective management of supply and trading activities by Harken Marketing Company ("HMC"), Harken's refined products marketing subsidiary; and

-- Lower retail and wholesale gasoline margins and volumes, combined with higher selling, general and administrative expenses at HMC.

Earnings before depreciation, interest and taxes (EBDIT) also increased during the first quarter of 1990 to $3.8 million from $2.6 million in 1989.

Harken Energy Corporation manages and develops energy assets. HEC retails wholesales and distributes gasoline through its subsidiary, Harken Marketing Company. Through its subsidiary, Tejas Power Corporation, HEC constructs, owns and operates natural gas gathering and transmission facilities in Texas and Louisiana and markets third party gas to a variety of end-users. HEC explores for, develops and produces oil and gas reserves domestically through its subsidiary Harken Exploration Company and internationally through its subsidiary Harken Bahrain Oil Company.

LANGHORNE, PA (MAY 22) PR NEWSWIRE - Cabot Medical Corp. (NASDAQ-NMS: CBOT) today announced record sales and earnings for the second quarter and half year ended April 28, 1990.

Net earnings for the period were $407,000 or $.06 per share, a 28 percent increase over the previous year's $319,000 or $.05 per share. Net sales for the second quarter were $6,478,000 compared to $5,473,000 in the prior year's second quarter, an increase of more than 18 percent.

For the first half, net earnings were $738,000 or $.11 per share, an increase of 18 percent compared to the previous year's $626,000 or $.09 per share. Net sales were $11,875,000 compared to $9,964,000 in the previous year, an increase of 19 percent.

Commenting on the second quarter and first half results, Warren Wood, president of Cabot Medical stated, "We are particularly gratified that these record sales and earnings were produced by our core business and do not include any contribution from our newer Ultroid and general surgery product lines which have been the subject of recent announcements. We will be aggressively pursuing the new markets represented by these product lines and intend to increase our development and marketing activities to enable us to capture a significant share of these markets."

Cabot Medical Corp. designs, develops, manufactures and markets a variety of medical devices and systems for specialized surgical and diagnostic procedures. These products are sold under the Cabot, KLI, Berkeley, Cryomedics and Ultroid brand names.

TAMPA, FL (MAY 22) PR NEWSWIRE - Gary Winokur, founder and president of Win Enterprises, joined Invest Financial Corporation yesterday as vice president and national training manager.

Winokur, 46, brings with him a fine mix of sales experience, management and training. His "The Journey for Success" seminar, considered one of the best sales training programs in the industry, has been conducted across the United States and in 27 foreign countries.

"I am really excited to have someone of Winokur's calibre join the firm," states D. Mark Olson, executive vice president and director of sales and marketing for Invest. "With Winokur training and motivating our sales force, we could potentially surpass all of Invest's past production records."

Prior to forming his own international consulting firm, Winokur served as director of education and director of training for ATT Paradyne where he played an integral role in increasing revenues by 47 percent. While in production himself, he continually set the standard for sales at companies such as Data Control International and Sperry Rand, repeatedly receiving national awards for dollar volume, unit sales and new account generation.

"Invest is on the cutting edge of an industry that is ready to explode into the '90s," explained Winokur. "I am looking forward to be part of such a dynamic team and setting the standards for sales in the bank brokerage industry."

Invest Financial Corporation, one of the nation's largest full-service brokerage firms, offers customers of financial institutions a convenient way to own mutual funds, annuities, unit investment trusts, and other investment and insurance products. Invest, a subsidiary of Kemper Financial Companies, provides financial services and products through a nationwide network of over 730 offices located in banks, savings and loans and credit unions in more than 40 states.

#90142p0786 05/22/1990 ~PR Newswire

DANBURY, CT (MAY 22) PR NEWSWIRE - Union Carbide Chemicals and Plastics Company Inc. (UCC&P) announced today that it has acquired Vitaphore Corporation, Menlo Park, Calif., a biomedical products company that develops and markets innovative medical devices. Vitaphore will operate as a wholly owned subsidiary of UCC&P. The purchase price was not announced.

H. W. Lichtenberger, president of UCC&P, stated that for several years Union Carbide has sought high growth, high value business and technology opportunities that can build on UCC&P's basic strengths in water soluble polymers, and polymer and surface science. This has resulted in the acquisition of Amerchol Corporation (personal care products), and two

joint ventures -- Baker-Cummins Dermatologicals and Agri-Diagnostics Associates (biotechnology-based products). Also related to this group is the internally developed microbiocides business of UCC&P.

Joseph C. Soviero, president of the specialty chemicals division, said the acquisition of Vitaphore is a key element of this strategy by contributing important biomaterials technology. "This acquisition expands and extends our current position in personal care, dermatology and biopolymer products " he said. Vitaphore currently participates in three medical markets -- infection control, ophthalmology and surgical wound care.

Vitaphore Corporation was founded in 1985 and currently employs approximately 60 people. The company has grown steadily and has been recognized for the excellence of its technology and its marketing skills.

"Vitaphore is a materials science company that possesses the know- how to effectively market technology-intensive products in the medical products marketplace," said Soviero. "The company has demonstrated its ability to commercialize new products and efficiently reach the marketplace."

UCC&P, a wholly owned subsidiary of Union Carbide Corporation (NYSE: UK), is a leading, diversified chemical company manufacturing a wide range of basic and specialized chemicals and plastics sold throughout the world.

CONTACT: Harvey I. Cobert, 203-794-7027 or Jack Witemeyer, 203-794-2535, both of Union Carbide.

FREDERICK, MD (MAY 22) PR NEWSWIRE - Bell Atlantic Mobile Systems has put into service in Frederick County, Md., the first cell site to be activated in a rural service area by any cellular telephone carrier in the mid-Atlantic region.

Initially, coverage area will span approximately 150 square miles along routes 70 and 270.

When Bell Atlantic Mobile receives permission from a federal court allowing it to carry phone calls between the local calling areas, known as LATAs (Local Access Transport Areas), the company plans to link the Frederick system to the Washington/Baltimore system. Until then, the Frederick cell site must operate as a stand-alone system.

Presently, calls made by customers traveling to and from Washington or Baltimore will be disconnected as they approach or leave Frederick. Then customers will have to re-initiate the call once they have crossed into the coverage area around Frederick.

"We want to furnish the community with the best possible cellular service that technology can provide," said Bell Atlantic Mobile Systems President Robert P. Dahut, "but in cases like this, the legal restraints limit us. Once the restraint is lifted, we plan to immediately link the systems." The restraints stem from rules governing the 1984 breakup of the Bell System.

Dahut said that he is hoping the request submitted to the Department of Justice in July 1989, which asked that rural service areas be served in an integrated manner by carriers in adjoining major markets, will be acted upon shortly.

Bell Atlantic Mobile Systems, based in Bedminster, N.J., is a subsidiary of Philadelphia-based Bell Atlantic Corp. (NYSE: BEL). The company provides cellular service and equipment in Maryland, Virginia, Washington, D.C., Delaware, Pennsylvania and New Jersey.

CONTACT: Brian Wood of Bell Atlantic Mobile, 201-306-7508, or Audrey Schaefer of Schaefer & Company Communications, 301-890-1770, both for Bell Atlantic.

#90142p0808 05/22/1990 ~PR Newswire

NEW ORLEANS (MAY 22) PR NEWSWIRE - AT&T today announced a family of voice messaging products that improves customer service, controls expenses and increases productivity for small- and medium-sized businesses.

These voice processing systems automatically answer and direct incoming calls and can record voice messages for users of AT&T's Merlin(R) II, Merlin(R) Plus and System 25 Communications Systems.

"Now, even the smallest businesses can have every incoming call automatically answered promptly and handled efficiently," said Chuck Levine, product management/marketing vice president. "And any business that is easily accessible to customers has a competitive edge."

Levine said this announcement demonstrates AT&T's continuing commitment to their product line for small-and medium-sized businesses.

Merlin Mail(TM) voice messaging system and Merlin(TM) Attendant automatically answer incoming calls and promptly route them to their destinations. Users can program the systems to answer all incoming calls, calls on selected lines, overflow or after-hours calls. Users can easily administer these integrated systems from a touch tone telephone.

Merlin Mail prevents telephone tag by allowing the caller to leave a voice message if the line is busy or unanswered, and system users can retrieve messages from any touch tone telephone. The voice messaging system is recommended for up to 40 high volume users and works with Merlin II, a voice and data communications system for businesses with up to 56 lines and 120 telephones.

Merlin Attendant, when used with answering machines, also allows callers to leave voice messages. Merlin Attendant, works with Merlin Plus, a telephone system for businesses with up to eight lines and 20 telephones.

System 25 Integrated Solution II, Release 2, helps control expenses and increase productivity with enhancements to its Audix Voice Power messaging system. The automated attendant can now direct callers through several menus, quickly connecting callers with their desired extensions or departments. Users can respond to customers quickly with a feature that alerts them to voice messages -- even if they are in remote locations.

Integrated Solution II, Release 2, includes Audix Voice Power messaging system and Call Accounting, a system that provides detailed information on telephone use and expense, and an easy-to-use administrative package that runs on a Unix(R) System processor. The voice messaging system is recommended for up to 100 high volume users. System 25 is a digital PBX for businesses with up to 104 lines and 200 telephones.

All three messaging enhancements will be available in the third quarter. The price for Merlin Mail (for Merlin II) begins at $9,000. Merlin Attendant (for Merlin Plus) prices begin at $1,200. The price for System 25 Integrated Solution II, Release 2, begins at $15,000. These products will be available from AT&T's sales force and authorized dealers. For more information call 1-800-247-7000.

#90142p0809 05/22/1990 ~PR Newswire

PHILADELPHIA (MAY 22) PR NEWSWIRE - After adding more than 100,000 new rooms annually for the past seven years -- and losing money for the past five years -- the U.S. hotel industry has finally made abrupt cuts in new construction.

New hotel construction fell more than 40 percent in the first quarter of 1990 from the same period in 1989, according to "Hotel Industry Focus," a quarterly publication of Laventhol & Horwath.

Only 17,125 rooms were started, the fewest since the first quarter of 1979. The value of hotel building permits issued in March 1990 was down nearly 70 percent from March 1989.

Slowing construction will help make the industry profitable gain. "Focus" projects both higher room occupancy and increases in room rates that will outpace inflation.

In 1992, room rates are projected to rise 5.4 percent -- up from the 3.8 percent increase expected this year. Increases will be most noticeable in depressed markets. Occupancy should rise to 67.2 percent by the end of 1992, compared to 63.6 percent in 1989.

Credit for the slowdown goes -- not to the hotel companies, whose expansion plans equal or exceed last year's -- but to the nation's lenders which won't finance the hoteliers' plans.

"The hotel industry is feeling the credit crunch that is affecting all commercial real estate," said Saul F. Leonard, L&H's national partner for leisure time industries.

"Many lenders have been hurt by overbuilding and over-optimism. They have a lot of bad loans and can't afford more."

In addition, many hotel prices were artificially inflated -- some for their prestige value, others for anticipated long-term tax advantages.

Future prices will be determined by a hotel's ability to turn a profit, said Thomas W. Lattin, L&H's national director for hospitality industry advisory services.

"There will be less speculation," added Lattin. "Hotel managers who can fill beds and manage facilities profitably will be in demand."

For now, the nation's S&Ls are making no loans for new hotels, he noted, while banks and credit companies are limiting themselves to refinancing and long-term clients. Insurance companies and foreign investors are both more conservative; insurers were previously major lenders on hotel projects, but have been pressed to cut back by their pension-fund clients.

The killer: low rates Stiff competition and rates too low to cover development costs are major problems at many hotels. The industry's average daily rate increased only 3.6 percent in 1989, the second year in which rates increased less than the consumer price index.

Rates were softer still at hotels built before 1987; they achieved only a 3.2 percent increase.

Demand was up 5.6 percent in 1989, in part because hotel operators offered such incentives as weekend discounts to attract guests. Still, demand was not strong enough to compensate for the industry's excess supply.

Industry to benefit "in long run" The industry's interest would best be served by an economy that is neither booming nor in recession. Recessions depress demand, explained Leonard, while a boom could trigger inflation.

"Inflation would tempt the Federal Reserve to tighten the money supply," he said, "and that could produce a recession."

Less hotel construction will probably mean more hotel renovation, said Lattin.

"Hotel companies will behave more like homeowners," said Lattin. "For many fixing up will make more financial sense than building new."

Laventhol & Horwath is the national accounting and business consulting firm with services for the hospitality, real estate and health care industries. Headquartered in Philadelphia, it has 51 offices in major U.S. cities and is represented in 64 countries through its affiliation with Horwath International.

BILLERICA, MA (MAY 22) PR NEWSWIRE - Bull HN Information Systems Inc. today announced the addition of four new computers to its family of UNIX System V multi-user systems. The most powerful of the four more than doubles the performance of the previously most powerful computer of the DPX/2 family. Computer users can now select from among nine UNIX computer systems that are fully compatible and run under the Bull Open Software environment.

Among the new machines announced today is the computer industry's first multiprocessor system based on the Motorola 68040 microprocessor, the DPX/2 Model 360, making it one of the fastest multiprocessing UNIX systems available.

Groupe Bull, comprised of European-based Bull S.A., U.S.-based Bull HN Information Systems Inc. and Zenith Data Systems Corporation, provides information systems to customers around the world. Its products range from portable to mainframe computers using both open and proprietary

operating systems. With more than 47,000 employees in 90 countries and combined revenues of approximately $6.5 billion, Groupe Bull is among the top 10 computer companies in the world.

UNIX is a registered trademark of AT&T.

IRVINE, CA (MAY 22) PR NEWSWIRE - I-Flow Corp. today announced the appointment of Donald M. Earhart to the position of president and chief operating officer of the company. Earhart will commence his duties on June 4, 1990. After a short transition time, Earhart will be considered for the permanent post of chief executive officer and when such event occurs he will also be appointed to the board of directors.

Michael A. Pentopoulos, the current chief operating officer who assumed that position after the resignation of Eric Brown in February, 1990, will step down from his current position. Dr. John H. Abeles, chairman, said, "On behalf of all the people associated with the company I would like to thank Michael Pentopoulos for his diligent and enthusiastic work on such short notice. Mr. Pentopoulos helped solidify the company on both its present and future course."

Earhart has had a highly successful career in the medical products industry. Most recently from 1986 to 1990 he was president of Allergan Optical Division, managing a line of ophthalmic products with sales in excess of $350 million. Under his stewardship the division had an outstanding record of growth and gains in market share. Prior to joining Allergan, Earhart spent seven years with Bausch & Lomb where, among other positions, he was president of the Professional Products Division; he again engineered solid improvements in product and business performance. As president of the Microscopy and Image Analysis Division of Bausch & Lomb he had a fine record with this scientific instruments business. Between 1971 and 1978, Earhart held senior operations and engineering positions at Abbott Laboratories. Prior to that he was a management consultant at Peat, Marwick, Mitchell & Company, and an engineer with Eastman Kodak.

Earhart is 46 years old and is married with three children. He received his degree in engineering from Ohio State University and master of business administration from Roosevelt University.

In welcoming Earhart to I-Flow, Abeles said, "I know I speak for the board the shareholders and the staff of I-Flow when I say how enthusiastic I am

about Don's decision to join us. His dynamic and captivating personality and first class management skills complement a versatile an successful business capability; his references were impeccable. We are extraordinarily fortunate to have him join the company. That Earhart chose to join I-Flow, with so many other excellent business opportunities open to him, is a very strong testament to his and our faith in the future of the company.

TROY, MI (MAY 22) PR NEWSWIRE - Joseph E. Antonini, chairman of the board president and chief executive officer of K mart Corporation (NYSE: KM), recognized for the second year in a row five associates from across the country for their outstanding customer care at the company's annual shareholders' meeting.

The Chairman's Award for outstanding customer service is granted to associates who have been recognized by a customer either by letter or a phone call to K mart's toll-free 800 number (800 63K-MART). The number was established in 1988 as part of the K mart Customer Care Network.

The following five associates received the most awards within their region and attended the shareholders' meeting as guests of K mart: Jeanne Lambert from K mart 7142--Pittston, Pa.; Paul Patterer, K mart 3496--Battle Creek, Mich.; Robert Kwapil, K mart 7611--Hallandale, Fla.; Claude (Wess) Westerfield, K mart 3019--Shreveport, La.; and Ted Bacal, K mart 7225--Los Angeles. Patterer, Kwapil and Westerfield received awards for the second year in a row. As two-time winners they also received a trip to Las Vegas Nev., for their efforts, compliments of K mart.

Honoring these associates emphasized the theme of Antonini's address which centered around the company's strategies for being customer driven. Strategies highlighted included the use of retail automation programs like point-of-sale scanning and data capture systems and centralized merchandising. Antonini also reiterated the company's commitment to the $2.3 billion store expansion and refurbishing program announced earlier this year.

"Consumer acceptance of our new K mart prototype has been very rewarding," said Antonini. "But more important is the consumer acceptance achieved when we expand stores to our new full-size 86,000- or-more-square-foot prototype and fill these expanded stores with the exciting new merchandise in our merchandise assortments for the '90s."

Re-election of four directors to K mart's board for a three-year term

included Antonini, chairman of the board, president and chief executive officer; F. James McDonald, retired president and chief operating officer of General Motors Corporation; Donald S. Perkins, retired chairman of the board of Jewel Companies, Inc.; and Gloria M. Shatto, president of Berry College. Re-elected for a one-year term was J. Richard Munro, chairman of the executive committee of Time Warner Inc.

Seven other directors remaining on the board are: James F. Bere, chairman of the board and chief executive officer of Borg-Warner Corporation; Willie D. Davis, president of All Pro Broadcasting, Inc.; Joseph P. Flannery, chairman of the board, president and chief executive officer of Uniroyal Holding, Inc.; David B. Harper, president of David B. Harper Management Co., Inc.; Richard S. Miller, executive vice president, K mart Stores; Larry M. Parkin, executive vice president of warehouse and grocery operations, K mart Corporation; and Joseph R. Thomas, executive vice president and chief administrative officer, K mart Corporation.

Retiring from the K mart board was Ellen Marram, president of Nabisco Biscuit Company.

K mart Corporation serves America with over 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada. K mart, currently operating 2,322 K mart stores, is also the parent company for Pay Less Drug Stores, Builders Square, Waldenbooks, PACE Membership Warehouse Clubs, and The Sports Authority.

BOSTON (MAY 22) PR NEWSWIRE - Larry W. Reed has been named president and chief executive officer of BancNewEngland Mortgage Company, a Rhode Island-based subsidiary of Bank of New England Corporation's affiliate bank, BNE-Old Colony, BNEC Chairman and Chief Executive Officer Lawrence K. Fish announced today.

Reed has more than a dozen years experience in real estate lending in the residential home market. At BancNewEngland Mortgage he will be responsible for an organization that serves as the focal point for all mortgage lending activities of BNEC's affiliate banks. The Mortgage Company originates mortgages in BNEC's 450 branches in four New England states and has 350 employees.

In 1989, the Mortgage Company originated some $730 million in first mortgages. It services approximately 50,000 loans in its $3 billion servicing portfolio and has consistently reported credit quality above the national and New England averages. The firm is an important element in

the corporation's strategic plan for recovery because of its close link to BNEC's large retail distribution network.

"Larry Reed is a customer-oriented mortgage lender who will provide the leadership we need to buy, sell and service mortgages for creditworthy homebuyers," Fish said. "And while Larry will set the tone for treating prospective home owners as the valued customers they are, he has an outstanding track record in assessing credit quality."

"BancNewEngland Mortgage Company is an exciting opportunity for me to work with an outstanding team of managers and staff throughout the corporation who share my commitment to building a successful mortgage company based on the strengths of our vast retail network throughout New England," Reed said. "I am especially pleased to join the recovery effort of BNEC."

From 1980 until April 1989, Reed was a senior vice president at Columbia Savings and Loan in Irvine, Calif., responsible for residential and small apartment real estate lending. He also has served as the chief operating officer of Verdugo Savings in LaCanada, Calif., and as a senior vice president responsible for residential real estate lending at Downey Savings in Newport Beach, Calif.

Reed, 45, graduated from Nebraska Wesleyan University in 1968 and received an MBA from Michigan State University in 1970. He and his wife, Janice, have three children, Chad, Trent, and Ashlee.

Bank of New England Corporation (NYSE: NEB) is a Boston-based interstate bank holding company with assets of $25 billion and banking offices in four New England states. Its commmon stock is listed on the New York Stock Exchange under the symbol NEB.

SAN MATEO, CA (MAY 22) PR NEWSWIRE - Union Carbide Industrial Gases Inc. (UCIG), a major supplier of gases to the electronics industry, has signed a letter of understanding to purchase Flopure Incorporated of San Antonio, Texas. The announcement was made today at the Semicon/West '90 trade show.

Terms of the agreement were not disclosed. Flopure provides gas cabinets and related equipment and services primarily used in the manufacture of semiconductors.

"This union with Flopure will reinforce our commitment to the electronics

industry, one of the fastest growing markets for our Linde Division," stated E.G. Hotard, vice president of UCIG. "Joining with Flopure will enhance our ability to serve the electronics industry as a total supplier of ultrahigh-purity gases and related services from production to the wafer."

Commenting on the transaction, Flopure's vice president and chief engineer and one of its founders, Roger Gregoire, said, "Flopure was founded four years ago by a group of engineers who were employed by a leading semiconductor manufacturer.

"It was our charter then, and still is today, to manufacture the best, user-friendly equipment available. Flopure is now looking forward to becoming part of Union Carbide Industrial Gases so that we can continue to meet our charter.

"In addition, this union will facilitate growth, provide expansion of operations, make our equipment available throughout the United States and overseas, and allow us to introduce innovative solutions to tomorrow's gas-handling problems in a timely fashion. Flopure employees also will have an opportunity for growth."

By the end of 1990, Flopure will move into expanded facilities in San Antonio that will provide increased cleanroom capabilities, and state-of-the-art analytical equipment for testing and certifying cabinets.

Flopure offers a complete range of gas-related equipment and services, including design, fabrication, installation, and servicing of the gas delivery system up to the point of use. The company manufactures gas cabinets used to control supply of process gases in fabrication of semiconductor chips; purge, source, and gas panels; custom manifolds; tubing assemblies; controllers, and remote monitors.

#90142p0823 05/22/1990 ~PR Newswire

COURBEVOIE, CEDEX, France (MAY 22) PR NEWSWIRE - The Rhone-Poulenc Group (NYSE: RP Pr C, RP Pr A, RPU, RP WS), generated consolidated sales worth FF19.933 billion during the first quarter of 1990, a 7.4 percent improvement over the same period in 1989. On a comparable reporting basis sales have declined by 2.9 percent.

Net income per share amounted to FF23.16, compared with FF26.06 at the end of the first quarter of 1989.

Operating income totalled FF2.255 billion, 10.7 percent lower than in 1989. Income after tax and minority interests but before preferred dividends, amounts to FF1.370 billion, down by 9.6 percent.

This decline in sales and income is mainly due to exchange rate fluctuations -- notably the fall in the value of the dollar and yen against European currencies -- which have depressed the group's quarterly sales by 3.9 percent.

The second important factor is the implementation (since March 15, 1990) of the plan to stabilize the Brazilian economy. This has led to a sharp fall, and even stoppages, in the industrial activity of this country.

Both these factors will continue to depress the group's results in the coming months, especially the situation in Brazil, whose impact will be particularly noticeable during the second quarter.

Agro, Fibers and Pharmaceuticals all report improved results. Chemicals, like animal nutrition, is faced with a less favorable business environment more sensitive to fluctuations in exchange rates.

The increase in interest expenses related to new acquisitions has been offset by the capital gains generated on previous transfers (sale of Orogil and of certain financial assets) and by the implementation of the divestiture program designed to refocus the group's activities upon its core businesses commanding strong positions worldwide.

Rhone-Poulenc S.A. concentrates its activities in three areas: life sciences, advanced materials and specialty chemicals, and major organic and inorganic intermediates. Rhone-Poulenc's shares trade in Paris and, in the form of American Depositary Shares, on the New York Stock Exchange. The company operates in 140 countries and has 83,000 employees. Rhone-Poulenc's United States subsidiary, Rhone-Poulenc Inc., is headquartered in Princeton, N.J. In 1989, U.S. sales represented approximately 13 percent of overall group sales.

WASHINGTON (MAY 22) PR NEWSWIRE - Peter H. Coors, president of Coors Brewing Company, today was named chairman of the Beer Institute at the trade association's annual meeting.

At the meeting, Coors said that the brewing industry would, through the

Beer Institute, correct misperceptions regarding brewer efforts to fight alcohol abuse.

"The industry is facing a problem of public perception on the issue of alcohol abuse. It must be the role of the Beer Institute to set the record straight if we are to overcome efforts to restrict our products by limiting advertising and increasing taxes," he said.

James C. Sanders, Beer Institute president, said "Peter Coors' energy and enthusiasm will be invaluable to the Beer Institute at a time when our opponents are mounting serious challenges to the consumer's right to enjoy our products. He will continue the tradition of leadership as established by our previous chairmen."

Coors succeeds Leonard J. Goldstein, president and chief executive officer of Miller Brewing Co., whose one-year term expired.

The Beer Institute is the national trade association for the U.S. brewing industry. Members include national, regional and local brewers in addition to the suppliers of brewing goods, services and agricultural products.

#90142p0827 05/22/1990 ~PR Newswire

LORAIN, OH (MAY 22) PR NEWSWIRE - USS/Kobe Steel Co., hosted a tour for 200 customers, governmental and civic officials to formally unveil its $40 million modernization of the No. 4 seamless tubular mill now in operation.

Customers from around the United States, particularly from the "oil country" area of the Southwest, joined officials of USS/Kobe, USS Division USX Corporation and local government officials for a tour and program about the modernization effort, followed by a tour of the new operation, which resumed production earlier this year, after a four-week outage for installation of the new equipment.

No. 4 seamless mill, in its new configuration, produces pipe in size ranges from 1.900 inches to 4-1/2 inches outside diameter, in wall thickness from .145 to .674. The annual capacity of the mill is 255,000 tons. Benefits of the modernized mill to customers include: improved yield, better quality outside diameter and wall tolerances, and straighter tubes.

"We have been pleased by the smooth start-up of the facility," said Robert K. Fravel, president of USS/Kobe Steel Co. "It is a great tribute to the employees who made a special effort to see that this mill resumed

operation and got it up to capacity in time to serve the important oil country goods and standard pipe market that this mill serves."

USS/Kobe Steel Co., a 50 percent joint venture between USS Division, USX Corporation, and Kobe Steel of Japan, is the production operation for No. 4 seamless. All of the tubular products made at the Lorain facility are sold by USS on an exclusive basis.

The substantially modernized No. 4 seamless mill, which began original operations in 1949, under the former U.S. Steel, remains primarily an "oil country" mill producing seamless pipe for oil well tubing, coupling stock and drill pipe. About a third of the pipe, however, is manufactured for standard applications such as tubing for carrying fluids and gases used in industrial plants.

#90142p0831 05/22/1990 ~PR Newswire

HOUSTON (MAY 22) PR NEWSWIRE - Shareholders of Seagull Energy Corporation (NYSE: SGO) learned at the annual meeting today of the company's fourth natural gas discovery in Texas offshore waters since the beginning of 1990.

Chairman Barry J. Galt told the annual meeting audience in Houston that the company's Galveston Area Block 424 No. 2 OCS G-4186 well encountered 52 net feet of productive gas sands in five zones at intervals ranging from 7,386 to 8,162 feet deep in 100 feet of water approximately 30 miles south of Galveston, Texas. The zones tested at a combined flow rate of 16.6 million cubic feet of gas per day.

Seagull is the operator and a 50 percent working interest holder in the new discovery, where production is expected to be onstream later this year through a platform already in place on the tract. Other partners are Walter Oil & Gas Corp. and Columbus Mills, Inc., which have interests of 35 percent and 15 percent, respectively.

Galt told the shareholders that initial production from two of this year's earlier discoveries -- at North Padre Island A-72 and Brazos 399G -- is expected in 1991. He said production facilities are also in place at the site of the other 1990 exploratory success -- Galveston Area 383 -- and that gas can be flowing to markets later this year unless expansion of those facilities becomes necessary as a result of development drilling on the block. Seagull also is the operator of all three previous discoveries with working interests of 50 percent at North Padre Island A-72 and Galveston 383, and 37.5 percent in Brazos 399G.

In his prepared remarks, the chairman told Seagull's shareholders that the

company shifted its focus to emphasize exploration and production during the second half of 1987 in response to several factors that improved the outlook for domestic natural gas.

As it pursued its objective of controlling more gas reserves, the company saw two distinct developments in the exploration and production segment dramatically change Seagull. The first was four new gas and/or condensate discoveries in late 1988 and the other was two related acquisitions of gas and oil reserves in late 1988 and at year-end 1989.

In addition to its exploration and production activity, Seagull is engaged in the transportation, distribution and marketing of natural gas, liquids products and petrochemicals, and natural gas processing.

ATLANTA (MAY 22) PR NEWSWIRE - IRT Property Co. (NYSE: IRT) today announced that its wholly owned subsidiary, IRT Management Co., has purchased $4,535,000 face value of IRT Property Co.'s 2 percent Convertible Subordinated Debentures which are listed on The Stock Exchange (London) in privately negotiated transactions.

Purchases represent 18 percent of the total debenture issue of $25 million. After taking into account debentures previously converted, $20,415,000 face value of the debentures continue to be held by persons other than IRT Management Co.

Debenture holders are entitled to put up to one-half of the total issue back to IRT Property Co. in August 1991 at a premium of 27 percent and up to one-half of the total issue in August 1993 at a premium of 45 percent. Purchases by IRT Management Co. to date have been transacted at prices well below the face value of the bonds plus the amount accrued to date to cover the premiums upon exercise of the put options.

The company further announced that IRT Management Co. may purchase additional debentures, if available, at favorable prices. It was further announced that IRT Management Co. intends to hold the debentures it purchases and to exercise its put options as they arise.

In making the announcement, Donald W. MacLeod, chairman and president of IRT Property Co., said, "Purchasing these debentures at favorable prices with the ability of IRT Management Co., to exercise the put options will reduce not only the carrying costs of the debentures but also the put obligations in 1991 and 1993."

IRT Property Co., the Southeastern Shopping Center REIT, is a Real Estate Investment Trust which invests primarily in shopping centers in the Southeastern United States. The company owns in excess of 5 million square feet of retail space in its portfolio of 89 investments.

CORAL GABLES, FL (MAY 22) PR NEWSWIRE - C. Robert Black, president of Texaco Latin America/West Africa, will call for a policy supporting the "economic integration" of Latin America and the United States by the end of decade.

Black will propose eliminating all trade barriers within the hemisphere when he appears before the Joint Economic Committee of Congress today, May 22, in Washington.

"The need for Latin American countries to create stable business environments -- suitable for equity investments -- has never been greater " said Black. "I believe it is time to seriously consider a trade system which would eventually lead to a unified market -- much like Western Europe's."

Black stressed the role of equity investment in the economic reconstruction of the region. "Equity, he said, "rather than bilateral loans or aid, should finance economic expansion in Latin America."

Black will be joined on a special panel by David Rockefeller, as well as executives from Proctor & Gamble Co., International Business Machines Corp. and Goodyear Tire & Rubber Co. The hearings are being held in conjunction with the Council of the Americas' annual Washington Conference.

The panel will address such topics as the need for stronger economic and political relations between the United States and Latin America, liberalization of trade and investment policies, Latin America's potential for economic growth, and the development of the region as a market for U.S. exports.

Representative Lee H. Hamilton of Indiana is the chairman of the committee and Senator Paul S. Sarbanes of Maryland is the committee's vice chairman. The committee's offices are located in the Dirksen Senate Office Building.

Florida Senator Connie Mack also sits on the committee.

BASKING RIDGE, NJ (MAY 22) PR NEWSWIRE - AT&T (NYSE: T) and the Korea Telecommunication Authority have begun selling digital, fiber-optic private line service between the United States and Korea.

Applications for the new service include bulk data or file transfer, computer graphics, computer aided engineering, teleconferencing, high-speed facsimile and electronic document distribution.

"Our customers have been asking for fiber-optic connectivity," said Seong-Ho Sohn, managing director KTA international business group.

Drew McCahill, AT&T marketing manager, said, "Our customers want increased reliability, greater capacity, minimal signal interference and excellent price performance."

Customers who sign up for the service prior to July 3 will receive a discount of between 16 and 25 percent off regular monthly charges for the AT&T portion of circuits for one year. The amount of discount varies depending upon U.S. city of origination.

Service is available from AT&T international gateways in Los Angeles, San Francisco, New York and Washington and from 24 inland pricing points. The price of service varies depending on transmission speed, gateway and contract terms.

For example, the AT&T rate for a 64 kilobits per second circuit from New York to Seoul will range from $6,000 to $8,000 per month, depending on the terms of the contract for service. AT&T offers a volume pricing plan with discounts of 5 to 25 percent on International ACCUNET(R) Digital Services.

Service will be provided via an undersea fiber-optic cable that connects the U.S. mainland to Hawaii, Guam and Japan, and via the recently completed H-J-K cable, which connects Japan to Korea and Hong Kong.

AT&T International ACCUNET(R) Digital Services provides dedicated digital private lines at speeds ranging from 56 kilobits per second to 2.048 megabits per second. Among the speeds supported are 64 kilobits per second and the intermediate data speeds of 128, 256, 384, 512 and 768 kilobits per second.

NEW YORK (MAY 22) PR NEWSWIRE - The Bank of New York announced today that Rolls-Royce plc, one of the United Kingdom's foremost advanced technology engineering companies, had selected The Bank of New York as the depositary for its new American Depositary Receipt (ADR) facility. The new ADRs have been declared effective by the Securities and Exchange Commission. They will trade on the over-the-counter market.

The articles of association of Rolls-Royce contain provisions which restrict the number of shares held by foreign holders to 29.5 percent. The Bank of New York and Rolls-Royce have designed procedures for ADR issuances to take into account compliance with this ownership limitation.

Headquartered in London, Rolls-Royce's history dates back to 1906. It has a skilled workforce of 64,900 (of whom 22,700 are employed by Northern Engineering Industries) and is one of the country's biggest exporters with 75 percent of group sales being for overseas markets. At year-end 1989, its market capitalization was $3 billion. Rolls-Royce ordinary shares are traded on the London International Stock Exchange.

The Bank of New York is the largest issuer of ADRs in the country and is the depositary for more than 600 ADR programs. Its parent, The Bank of New York Company, Inc. (NYSE: BK), is the 11th largest bank holding company in the country with $48 billion in consolidated assets at March 31 1990. The company conducts major businesses in corporate and retail banking, securities processing, trust and investment management, and financial market services.

CONTACT: Joseph M. Velli, SVP, 212-815-2009, or Michael M. Pascale, VP, 212-495-1041, both of the Bank of New York.

HONG KONG (MAY 22) PR NEWSWIRE - Hong Kong and Korea will be joined this month to a worldwide fiber-optic network as AT&T (NYSE: T) and a group of telecommunication companies complete a $185 million undersea telecommunications cable.

The new cable carries telecommunications traffic among Korea, Hong Kong and Japan and connects in Japan to other fiber-optic cables that provide service to the Philippines, Taiwan, Guam, the United States, Canada and Europe.

With the new cable, a caller in Seoul or Hong Kong, for example, can have the international portion of a call to Tokyo, New York or Zurich routed entirely on fiber-optic cable.

The 2,857-mile cable can accommodate voice, data and video circuits. If it were used entirely for voice, it could handle 40,000 simultaneous conversations.

The cable includes four capital fibers and 70 repeaters. AT&T owns about 8 percent of the new cable. Among the owners are three Japanese companies, Kokusai Denshin Denwa, International Telecom Japan, and International Digital Communications; Cable and Wireless in Hong Kong; and the Korean Telecommunications Authority. Other owners include telecommunications companies in Australia, Brunei, Canada, Germany, the Philippines, Singapore, Spain, the United Kingdom and the United States.

Landing points for the cable are at Chikura, Japan; Cheju, Korea; and Deep Water Bay, Hong Kong.

AT&T plans further extensions of its Worldwide Intelligent Network during 1990. A fiber-optic system connecting the U.S. mainland to Puerto Rico, Jamaica, the Dominican Republic and Columbia is in place and undergoing final testing before being placed into service in June.

AT&T entered the world of underwater telephone transmission in 1950, installing the world's first repeatered submarine cable system between the United States and Cuba. Since then, AT&T has constructed over 85,000 miles of submarine coaxial and fiber-optic cable systems, more than any other company.

NEW YORK (MAY 22) PR NEWSWIRE - The world's airlines today announced the formation of a global action group to fight the delays and inefficiencies

on the ground and in the air that cost them billions of dollars a year.

The action group will seek to win backing in business and industry and within trade unions, consumer associations, and the travel and tourism industry.

Its aim will be to build up pubic support to eliminate the restraints which threaten to stifle the growth of the aviation industry.

The project is the brainchild of Sir Colin Marshall, deputy chairman and chief executive of British Airways, and was first proposed in a speech to the Wings Club in New York in January.

The group will be based in Geneva and will operate under the aegis of IATA. The executive committee of IATA has appointed John Meredith, head of commercial and government affairs at British Airways, to head up the action group. He will be seconded from the airline on a full-time basis from June 1.

The action group aims to alert governments to the problems facing the aviation industry and develop public support, particularly within businesses and other industries, to bring about solutions.

MOSCOW (MAY 22) PR NEWSWIRE - Eastman Kodak Company (NYSE: EK) will present advanced products for health care at Zdravookhranenie-90, the Health '90 USSR international exhibition on public health, medical equipment and drugs, here at the Krasnaya Presnya exhibit grounds, May 22-31.

The Kodak exhibit will feature products manufactured and sold by the businesses and subsidiaries comprising the Kodak Health Group. These include radiographic films and processors marketed by the Health Sciences Division, diagnostic blood analyzers from the Clinical Products Division, and pharmaceutical products offered by Sterling-Winthrop.

"We are participating in order to demonstrate our capability to the Soviet Union, and to further demonstrate our commitment to providing high-quality health care products and systems worldwide," said Leo J. Thomas, group vice-president and general manager, Health.

Radiographic products on display will include films for general radiography and mammography, a patient identification camera, a

high-volume film processor, and a table-top processor for mammography and other low-volume applications.

Blood analyzers to be available for inspection are a laboratory-size unit and a desk-top unit that use a unique dry chemistry technology that allows tests to be completed on small disposable slides.

Pharmaceutical products will include drugs used in the treatment of gynecological conditions and rheumatoid arthritis, an analgesic, and a radiographic imaging agent.

HARRISBURG, PA (MAY 22) PR NEWSWIRE - Representatives from Philadelphia Electric Co. (NYSE: PE) and Pennsylvania Power & Light Co. (NYSE: PPL) shared the spotlight here this morning when the Pennsylvania Electric Association's (PEA) Residential Committee presented awards in its annual contest.

Arlene P. Venditti and P. John Polizzi, both of Philadelphia Electric Co., placed first and second, respectively, in the Marketing-Sales category of the contest. And Robert A. Boyer and Linda McHale, both of Pennsylvania Power & Light Co., placed first and second, respectively, in the Load Management-Conservation category.

Other winners announced this morning at the Residential Committee's annual conference at the Marriott Hotel were Jeffrey A. Bishop and Susan C. Myers both of Pennsylvania Electric Co., third place and honorable mention, respectively, in the Marketing-Sales category, and Patrick R. McFerren, Metropolitan Edison Co., third place, and Sheila E. Cerulli, Pennsylvania Power & Light Co., honorable mention in the Load Management-Conservation category. Myers was a second-place winner in the contest last year.

The committee received 78 entries from PEA member-company personnel. First-place winners received a cash award of $200, second-place winners $100, and third-place winners $50. All received plaques.

The Residential Committee is one of 24 PEA standing committees which function to share information and innovative ideas among the personnel of the PEA member companies.

PEA is the trade association of the 11 investor-owned electric utilities in Pennsylvania. These utilities provide electric service to 95 percent of the state's population and supply about 98 percent of the electric energy

consumed in the commonwealth.

DALLAS (MAY 22) PR NEWSWIRE - Oryx Energy Company ("Oryx") (NYSE: ORX) and Wolverine Exploration Company ("Wolverine") (NASDAQ: WEXCC) today announced the signing of letters of intent, subject to definitive agreements, regarding two joint venture programs targeting horizontal drilling in two separate trends.

The first joint venture covers the fracutred Niobrara in northwest Colorado and involves a minimum of 60,000 net acres. Oryx will have a 60 percent to 66.7 percent working interest and Wolverine wll have a 33-1/3 percent to 40 percent working interest. The second joint venture involves certain portions of Wolverine's undeveloped acreage position in the Austin Chalk trend in Dimmit, Zavala and Maverick Counties, Texas, covering approximately 116,000 gross acres. Oryx will have a 50 percent working interest in this acreage, with Wolverine and its partners having the remaining 50 percent interest. Oryx will operate these joint venture programs.

Oryx is recognized as an industry leader in emerging horizontal drilling trends across the United States. Joint venture participation agreements such as these allow both companies to participate in the maximum number of plays possible, while spreading exploratory risk.

Dallas-based Oryx Energy Company is the largest independent oil and gas company in the world, with assets in excess of $5 billion and proved reserves of more than one billion equivalent barrels. Oryx Energy conducts its domestic operations through Sun Energy Partners, L.P. (NYSE: SLP), and is its managing general partner and 98 percent owner.

DALLAS (MAY 22) PR NEWSWIRE - Dresser Industries, Inc. (NYSE: DI) today announced that James L. Bryan has been elected vice president- operations of the company.

Bryan was formerly president of M-I Drilling Fluids Company, a joint venture based in Houston that is owned 64 percent by Dresser and 36 percent by Halliburton Company.

John J. Murphy, chairman and president, said Bryan will be responsible for Dresser's upstream (oilfield) product and service operations, including the Security Division and the Guiberson Division, as well as the company's interest in M-I Drilling Fluids. Bryan will report to Murphy and continue to office in Houston.

Murphy noted that William A. Lakey will succeed Bryan as president of M-I Drilling Fluids. Lakey was president of Dresser's Swaco Geolograph Division, which recently became part of M-I Drilling Fluids.

"These appointments reflect Dresser's increasing emphasis on serving upstream markets for oil and gas exploration, drilling, and production," Murphy stated.

Headquartered in Dallas, Dresser is a major supplier of highly engineered products and services primarily utilized in upstream and downstream energy activities throughout the world.

DENVER (MAY 22) PR NEWSWIRE - Royal Gold Inc. (NASDAQ: RGLD) today announced that its most recent exploration drilling program at its Crescent Valley Project has encountered additional gold mineralization. This work was done as part of the exploration agreement between Crescent Valley Gold Venture (now wholly-owned by Royal Gold) and Cortez Gold Mines.

Edwin W. Peiker, Jr., president of Royal Gold, stated, "The gold mineralization is a continuation and expansion of the mineralization previously encountered by the Crescent Valley/Cortez Venture." The current drilling program consisted of 10 reverse circulation drill holes, on 200 foot centers, located in the vicinity of drill hole GAS-2. This hole was identified in Royal Gold's press release dated Oct. 28, 1988,

which identified, in particular, a 40 foot zone with a grade of +0.04 ounces gold per ton.

All of this mineralization appears to be part of a sediment hosted gold deposit.

The exploration is taking place on a 4,000 acre claim block located between the Gold Acres and Cortex Mines in the Crescent Valley of north central Nevada.

The Crescent Valley Project is owned 20 percent by Royal Gold and 80 percent by Cortex Gold Mines, whose owners are Placer Dome U.S. Inc., which is a subsidiary of Placer Dome Inc.; Kennecott, a subsidiary of RTZ Corp. plc; and Vernon F. Taylor Jr. The claim block being explored is leased by the Crescent Valley Gold Venture from ECM Inc., Billings, Mont. Royal Gold is the operator of the Crescent Valley exploration project.

Royal Gold is a Denver-based, publicly held corporation. Royal Gold has a controlling interest in two mines in California, is developing another mine in Cailfornia, and has two additional exploration properties: one located in Nevada and one in Arizona. Royal Gold is traded on the NASDAQ National Market System under the symbol RGLD.

DALLAS/FORT WORTH AIRPORT (MAY 22) PR NEWSWIRE - American Airlines will begin daily nonstop service between Nashville and San Diego and Las Vegas this July as part of a major expansion of its Nashville hub. The expansion will add seven new cities and 20 new jet flights a day at the hub by the end of this year, American announced today (May 22).

The added services are the opening phase of a larger expansion of the Nashville hub under which American will increase its Nashville jet operations to about 150 flights a day by mid-1991. That will make the hub bigger than it has ever been and larger than the original projections for Nashville when the hub was announced in June of 1985.

Moreover, San Diego and Las Vegas will be added to American's existing Nashville-Los Angeles route to give the Nashville hub an important new east-west orientation to augment the hub's basic north- south route structure.

Much of the expansion will be accomplished with twin-engine McDonnell Douglas Super 80s, one of the quietest jets in the world.

"We are committed to the full development of the Nashville hub and to making Nashville one of the nation's principal connecting gateways," said William C. Wallace, American's central division vice president.

"A period of steady growth and expansion is about to begin," Wallace said, "and an important element of that growth will be services to key points in the western United States."

American has nearly 1,350 employees at Nashville and American Eagle, the regional airline partner of American, employs an additional 400 people. The hub pumps more than $500 million a year into the local economy.

At a news conference in the offices of the Metropolitan Nashville Airport Authority, Wallace said American's 1990 Nashville expansion will take the hub from its present level of 85 flights a day to 28 cities, to a new total of 105 flights to 35 cities by the end of October.

In addition to the new San Diego and Las Vegas services, the buildup will include new Nashville services to Indianapolis, Kansas City, Miami, Columbus and Fort Lauderdale, and the introduction of a third daily nonstop to and from Los Angeles.

MCLEAN, VA (MAY 22) PR NEWSWIRE - McDonnell Douglas (NYSE: MD) announced today that McDonnell Douglas Electronic Systems Co. (MDESC) has been awarded a $9.5 million contract by the U.S. Air Force for the Advanced Space Systems Hardening (ASSH) II.

The Air Force's Wright Research and Development Center's Materials Laboratory selected MDESC as one of three companies to be awarded ASSH II contracts. The program calls for the design, fabrication, and laser testing of satellite components.

In orbit, satellites must perform delicate tasks in a potentially hostile space environment. The object of ASSH II is to insure the survivability of a satellite subsystem by laser- hardening it. Laser-hardening a subsystem involves determining how exposure to lasers affect the components, and then designing solutions that will protect them from any resulting damage.

The objective of the program is to laser-harden three generic satellite subsystems: the star tracker, the on-board camera that watches the stars and lets the satellite know its position at all times; the solar arrays that collect solar energy to power the satellite; and the laser communications device used to transmit data to and from the satellite.

The program will take five years to complete.

MDESC will team with McDonnell Aircraft Co. to conduct the testing. McDonnell Aircraft's laser test facility includes lasers, data gathering equipment and vacuum chambers where subsystems can be cooled to near absolute zero, the temperature in which satellites operate.

Of the three subsystems that will be laser-hardened, MDESC will be responsible for the laser communications portion.

MDESC has already completed several study contracts on laser hardening for the Air Force. The ASSH II program will validate the findings of those previous studies by applying the resulting technology to subsystem hardening solutions.

NEW YORK (MAY 22) PR NEWSWIRE - NYNEX International Company has designated Michael Heath to be managing director, Singapore effective June 1. Heath will be located at 22 Malacca Street in Singapore where the BIS Group, a NYNEX subsidiary, has its BIS Singapore branch, which serves a large number of clients in South-East Asia.

"NYNEX International is committed to offering its resources and expertise in telecommunications technology and services to customers throughout the region," said Heath.

"Being the commercial heart of the Association of South-East Asian Nations (ASEAN), Singapore is an ideal location to develop new opportunities and relationships. We hope to facilitate the exchange of information and technology, specifically in the area of network-based telecommunications."

"We have been meeting our clients' needs in this region since BIS Singapore officially opened in 1982" said Tay Chee Tiew, Branch Manager, BIS Singapore. "Mr. Heath's presence here further exemplifies NYNEX's commitment to serving this part of the world."

NYNEX Corporation provides telephone service to the Northeastern United States. The NYNEX network serves 13 million customers using 15 million access lines and includes some of the most demanding telecommunications users in the world in the major metropolitan areas of New York and Boston.

The network handles 171 million calls each business day. NYNEX International Company, with offices in Geneva, London, Frankfurt, Hong

Kong, New York, and now Singapore, represents the NYNEX family of companies outside the U.S.

ORLANDO, FL (MAY 22) PR NEWSWIRE - Star Enterprise, a Texaco affiliate, today unveiled a vintage 1940s-style Texaco service station at Universal Studios Florida. The fully operational station is open to motorists and will also serve as a set for moviemakers filming at Universal Studios Florida.

At the ribbon-cutting ceremony this morning, John G. Curry, manager of Star Enterprise's Orlando Marketing Region, said the station, although vintage in appearance, offers the latest refinements of the 1990s.

"This one-of-kind Texaco station features full service and self-service islands, a car wash and complete service center," Curry said. "The 1940s era exterior conceals the modern food mart inside. And our attendants, although dressed in vintage attire, know the ins-and-outs of today's cars."

Steven W. Lew, president and chief executive officer of Universal Studios Florida, said that he welcomes Star Enterprise and the Texaco brand to Universal. "There is a history of successful collaboration between Universal Studios and the Texaco brand. This affiliation carries through to Star Enterprise's sponsorship of our Kongfrontation exhibit and to naming Texaco's System3 the official motor fuel of Universal Studios. I am proud to help John unveil this historic station that moviemakers can feature in films."

Universal Studios Florida is a $600 million joint venture between MCA Inc. and the Rank Organisation. Productions already completed at the studio complex include HBO's "Someone Has To Shoot the Picture," starring Roy Scheider, "Parenthood," a feature-length motion picture comedy produced by Ron Howard and starring Steve Martin, and the television shows "Super Sloppy Double Dare" and "Superboy." Steven Spielberg, producer of the most popular motion pictures in history, serves as creative consultant to Universal Studios Florida.

Star Enterprise, headquartered in Houston, refines and markets Texaco-branded products in the East and Gulf Coast regions of the U.S. There are more than 800 Texaco-branded outlets in Florida, including 245 that are operated by Star Enterprise or leased by Star Enterprise to independent retailers, and some 600 outlets supplied by independent Texaco-branded wholesale marketers.

SEATTLE (MAY 22) PR NEWSWIRE - Washington Mutual Savings Bank (NASDAQ: WAMU) today announced plans to open a new home loan center June 11 in Clackamas, Ore.

The new Washington Mutual facility will be located at 9895 S.E. Sunnyside Road, Suite H.

"The new home loan center continues our expansion into the Portland Tri-County area, where we have done very well over the past year in residential mortgage lending," said Kerry K. Killinger, president and chief executive officer of Washington Mutual.

Killinger pointed out that the bank's share of the Greater Portland residential mortgage market has grown considerably. In February 1990, the bank was the leading residential lender in Portland. "We are the No. 1 home lender in Washington and we want to be the No. 1 home lender in Portland," Killinger added.

In 1989, Washington Mutual was Washington's largest residential lender, having originated over $1.2 billion in residential and residential construction loans.

The Clackamas Home Loan Center will market Washington Mutual mortgage loans and assist customers with completing their loan applications.

Other Washington Mutual locations in Oregon include the Lake Oswego Mortgage Lending Office and the Salem Installment Loan Center. The bank recently announced that a new full-service location will open this fall in East Vancouver.

With $6.7 billion in assets, Washington Mutual Savings Bank is the largest independently owned financial institution in Washington.

CHICAGO, (MAY 22) PR NEWSWIRE - Du Pont (NYSE: DD) and the state of Illinois today announced development of a collapsible, three-piece highway barricade made of recycled plastic.

The barricade, called "SafetyCade," is manufactured by WLI Industries from recycled high-density polyethylene used for milk, juice and water jugs and detergent bottles.

"SafetyCade" is the first of several traffic control devices expected to be produced through a plastics recycling development partnership formed last year by Du Pont and the state.

The material will be supplied by the Chicago facility of the Plastic Recycling Alliance, Du Pont's joint venture with Waste Management Inc., to recycle plastics from the solid waste stream.

"This program demonstrates the leadership of Illinois in recycling and underscores Du Pont's commitment to work with government, industry and the public to help solve the solid waste problem," said Archie W. Dunham, group vice president-polymer products.

Karen Witter, director of Illinois Department of Energy and Natural Resources, said, "It gives important new life to valuable material through recycling while at the same time removing plastics from the state's solid waste stream."

The barricades will be tested by the Illinois Department of Transportation in July.

VALLEY FORGE, PA (MAY 22) PR NEWSWIRE - Shareholders of UGI Corp. (NYSE: UGI) today approved a 2-for-1 split of the company's common stock and an increase in the number of UGI's authorized common shares to 40 million from 20 million.

UGI will effect the split by distributing to stockholders on July 1 an additional share of common stock for each share owned on May 31. Presently the Pennsylvania gas and electric utility and national distributor of propane has approximately 10 million shares outstanding.

UGI's previously announced 4.9 percent increase in the common dividend is also effective July l for shareholders of record May 31. The new quarterly rate is 29-1/2 cents a share on the post-split shares.

James A. Sutton, chairman and chief executive officer, told shareholders at the annual meeting that UGI's divestiture of oil and gas and industrial gases businesses over the past four years has "transformed the company from one operating in four distinct industries through over 20 separate businesses into a company focused in two industries with three businesses."

While attending to divestiture, UGI made substantial commitments to

significantly enlarge its utilities and propane businesses during the same four-year period, Sutton said.

In that span, he noted that UGI increased the net physical assets of its utilities by 28 percent through capital investments of $124 million; increased the net assets of its wholly owned propane operations from $1.7 million to $63 million through the redeployment of cash from the industrial gases sale; and increased the net assets of its propane joint venture by more than $300 million through off-balance sheet financing.

EL PASO, TX (MAY 22) PR NEWSWIRE - David H. Wiggs Jr., chairman of the board, chief executive officer and president of El Paso Electric yesterday announced the selection of Curtis L. Hoskins as the utility's executive vice president and chief operating officer. Wiggs made the announcement at the company's annual shareholders' meeting.

Hoskins, a certified public accountant, is former executive vice president of administration at Utah Power and Light Company. His 23 years of experience at Utah Power and Light also included serving as a member of the office of the president's policy group, senior vice president of administration and vice president and chief financial officer.

In making his announcement of Hoskins to the new position at El Paso Electric, Wiggs said, "He will add a significant new dimension to our operation, and will give me some much needed time to concentrate on financial, regulatory and strategic planning matters."

As El Paso Electric's executive vice president and chief operating officer Hoskins will report directly to Wiggs and his responsibilities will include overseeing the day-to-day operations of the company and its senior officers.

NEW YORK (MAY 22) PR NEWSWIRE - Christopher S. Ruisi, 40, has been elected to the board of directors of The United States Life Insurance Company, a wholly owned subsidiary of USLIFE Corporation (NYSE: USH). The announcement was made today by Gordon E. Crosby, Jr., chairman of United States Life and chairman, president and chief executive officer of USLIFE Corporation.

Ruisi joined the parent company in 1974 and he was elected to his current position as senior executive vice president-administration on March 27, 1990. Previously, he served as executive vice president- administration and he continues as senior officer in charge of the company's new facility located in Neptune, N.J. Also, he oversees the company's group life and group accident/health operations located there.

In making this announcement, Crosby commented: "Mr. Ruisi brings to the board of directors 16 years of continuous service with the company in the critical management areas of corporatewide administration and human resources. His experience should be beneficial to both the board of directors and The United States Life Insurance Company."

USLIFE Corporation is a life insurance-based holding company whose principal subsidiaries engage in the life insurance business. With nationwide operations, USLIFE has four ordinary life insurance companies and a credit insurance group with $97 billion of life insurance in force as of March 31, 1990. Additionally, there are five other subsidiaries that furnish the life insurance companies with investment advisory, broker-dealer, real estate, data processing and administrative services.

PASADENA, CA (MAY 22) PR NEWSWIRE - Richard A. Hollar, CLU, has been appointed executive vice president-field marketing of USLIFE Life Insurance Company, a wholly owned subsidiary of USLIFE Corporation (NYSE:

USH).

The announcement was made today by William A. Simpson, president and chief executive officer of USLIFE Life Insurance Company.

In his position, Hollar will be responsible for the recruitment and appointment of profile general agents and marketing organizations, and the development of the company's life insurance field marketing. He will be located at the USLIFE Life Insurance Company's headquarters in Pasadena.

In making this announcement, Simpson stated: "The appointment of Richard Hollar to this key senior marketing position at USLIFE Life Insurance Company is further evidence of USLIFE's strong commitment to the life insurance industry. He brings to our company 20 years of life insurance experience and expertise which will benefit both USLIFE and the field force."

Richard A. Hollar began his life insurance career in 1970 as a sales representative with American General Life Insurance Company and, subsequently, he was promoted to regional manager and, then, to regional director. In 1977, he joined Philadelphia Life Insurance Company as regional director responsible for the Memphis/Arkansas region and, in 1982 he was appointed executive vice president of that company's western home office in San Francisco.

Hollar joined First Delaware Life Insurance Company in Los Angeles in 1986 as senior vice president-chief marketing officer and, most recently, since January of this year he served as that company's president and chief marketing officer.

Hollar is a graduate of the University of Texas at Austin where he earned his bachelor of business administration degree in 1969. He received his Chartered Life Underwriter (CLU) designation in 1976.

Hollar and his wife, Linda, and their two children reside in Mission Viejo Calif.

MINNEAPOLIS (MAY 22) PR NEWSWIRE - Varitronic Systems Inc. (NASDAQ: VRSY) a Minneapolis-based manufacturer and distributor of business graphics systems, has signed a private label agreement for 200 Merlin Express Elite lettering systems and supplies for the Soviet Union. The agreement, valued at over U.S. $450,000 for Varitronics, calls for distribution of

the machines by the end of August through West German dealer Ancla Marketing GmbH, under the Ancla Headliner label.

The Merlin Express Elite is one of five lettering systems manufactured and distributed by Varitronics. It prints lettering on adhesived-backed tape in type sizes ranging from 6 to 72 points. The tape is available in 1/2" and 1" widths in a variety of colors.

According to Scott Drill, chairman and chief executive officer of Varitronics, the company is manufacturing the cyrillic alphabet lettering systems to produce headlines for newspapers and magazines. Prior to purchasing the lettering systems, the Soviet customers used equipment ranging from manual typewriters to press-on lettering to produce the type.

"Because our lettering systems are easy to use and adaptable to a variety of language requirements, we're able to fulfill the needs of our international distributors and customers," said Drill. "The initial order to the Soviet Union denotes one example of our goal to expand distribution beyond Europe, which has been a sizable and successful market for us."

In order to effectively serve new global markets, Varitronics has recently recruited distributors to assist in entering the Far East and Middle East markets, as well as the Soviet Union. These markets, according to Drill, are expected to become major lettering system users within in the next few years. Local distributors are responsible for selling and servicing Varitronics' equipment.

Varitronics also has established internal committees to assist in the design and production of machines for international customers. A cyrillic production committee, for example, will engineer, develop the software and administer all product management activities for the Ancla Headliner.

"We're pleased to be able to meet both product modification needs and delivery deadlines set by Ancla for our Soviet friends," added Drill. "We're confident that this initial order will bring additional business from the Soviet Union as well as other overseas lettering system users."

Founded in 1983, Varitronic Systems Inc. develops, manufactures and markets business graphics systems. The company pioneered the application of thermal transfer imaging technology on print-on-tape systems in 1986. Varitronics' systems are marketed by more than 250 dealers and two private label vendors in the U.S., and internationally through more than 30 independent distributors.

NEWPORT NEWS, VA (MAY 22) PR NEWSWIRE - The board of directors of the Flight International Group, Inc. (NASDAQ-NMS: FLTIE) today elected Frederick S. Shaw, the company's new chief financial officer, to the board of directors. He replaces E. Donald Shapiro, an outside director whose resignation was accepted by the board on Friday, May 18.

"Fred Shaw will play a key role in returning Flight International to financial health," said J. Nelson Happy, chairman and chief executive officer. "Fred's extensive experience in financial oversight makes him a very valuable addition to our board."

Before joining Flight International in late April, Shaw was a managing director at Greenwich, Conn.-based Kouri Capital, Inc., an international merchant bank specializing in sophisticated financing. Earlier, he was director of financing alternative services, part of KPMG Peat Marwick's mergers and acquisitions practice. An honors graduate of Pace University, Shaw, a CPA, has held a variety of senior financial management positions over the past 20 years.

Since April, Flight International has undergone a near complete change in its top management ranks. The restructuring, which follows many months of financial uncertainty, coincides with a significant investment in the company by a firm specializing in financial turnarounds, Smith Technologies, Inc. The Flight International Group, Inc. is a leader in aviation services with interests in government and military contracts as well as commercial flight operations.

BLUE BELL, PA (MARCH 22) PR NEWSWIRE - Castle Energy Corp. (NASDAQ: CECX) reported increases of 32 percent in revenues and 89 percent in net income for its second fiscal quarter ending March 31, 1990.

Revenues amounted to $2,097,414 compared to $1,589,014 a year ago. Net income jumped $207,904 from $234,860 ($.06 per share) in the second quarter of fiscal 1989 to $442,765 ($.07 per share) in the corresponding quarter of fiscal 1990.

Joseph L. Castle II, president and chief executive officer, indicated that

the increases were attributable to improved operations of the company's oil and gas production and partnership administration divisions. He also stated that the company's refining subsidiary, Indian Refining Limited Partnership, did not expect to restart the Lawrenceville refinery until the fall of 1990; and that operations of the refinery would not impact the company's operations until that time.

Castle Energy Corp. is an independent energy company with headquarters in Blue Bell. The company maintains oil and gas production and exploration offices in Pittsburgh, and Tulsa, Okla., and owns a refinery in Lawrenceville, Ill.

TULSA, OK (MAY 22) PR NEWSWIRE - In a development called "significant, because of future business potential," a Parker Drilling Co. (NYSE: PKD) subsidiary has signed a contract to enter the helicopter- transportable rig market of Myanmar.

Until recently, Myanmar, formerly known as Burma, has been closed to outside energy exploration. Parker Drilling Co. International Ltd's 18-month, multi-well contract is with Yukong Limited, a South Korean energy company.

Robert L. Parker Jr., president and chief operating officer, said, "We consider this a significant contract because of the future business potential in Myanmar." Parker explained that the country's extreme remote drilling locations are ideally suited for Parker's patented TBA helicopter transportable rigs.

"Myanmar fits our marketing niche of remote location drilling and this contract puts us on the ground floor of the market," Parker said. He noted that outside energy investment has not taken place in the country for 40 years.

The Yukong Limited drill site is in the heavily forested, remote northwestern region of Myanmar. Rig 225 from Parker's Brazil Division is being utilized for the job, with a complement of new generation Partech H-700B pumps. The rig, equipment and base camp was disassembled and shipped to Myanmar. It later will be barged up river to a staging area and then transported by helicopter, in 5,500 lb. loads to the well site.

Spudding is expected to take place in September.

In addition, Parker Drilling has established a new division office in Yangoon, formerly known as Rangoon. Tim Heinritz has been named division manager.

Parker said that the company will also explore other business opportunities in Myanmar, such as providing catering services and leasing of base camp facilities, tractors and cranes.

#90142p0928 05/22/1990 ~PR Newswire

PHILADELPHIA, (MAY 22) PR NEWSWIRE - Philadelphia Electric Co. (NYSE: PE) said today that Unit No. 1 of its Limerick Generating Station in Montgomery County has completed one year of continuous electrical generation.

On May 22, 1989, the unit began generating electricity again following a refueling outage, and it has been in continuous operation ever since.

During the year, the unit produced 8.936 billion kilowatt-hours of electricity, 26 percent of PE's entire output, generating enough electricity to power the city of Philadelphia for nine months.

The nuclear fuel cost to the company and its customers during the unit's year of operation was approximately $197 million less than the cost would have been to produce the same amount of electricity with oil- fired generation.

PE said Unit 1 operated at 93.4 percent of full capacity during the year.

Dickinson M. Smith, PE senior vice president-Nuclear, called the continuous run "remarkable," in light of PE's safety-first operating policy. "The unit's operation for the past year," Smith said, "indicates that Limerick is truly a well managed and well maintained plant."

From the time the unit began commercial operation in February 1986, the longest previous period of continuous operation was 265 days, from April 22, 1988, to Jan. 11, 1989.

"Limerick Generating Station has been setting standards for excellence since Unit 1 started up," Smith said. "The unit holds the world record for the longest continuous run for a new GE boiling water reactor, and the 1988 collective radiation exposure for all workers on Unit 1 was the lowest ever for U.S. nuclear plants.

"The Limerick project has won high marks from federal agencies and industry observers in matters of safety and reliability," he added. "All of these accomplishments have been team efforts involving not only Limerick Vice President Graham Leitch and his staff, but our Nuclear Engineering and Services Department, many other PE support services, and General Electric Company and Bechtel Corporation."

Limerick's other reactor, Unit 2, went into commercial operation on Jan. 8 1990, and since that time has operated at a capacity factor of approximately 90 percent, with one brief outage for repairs and maintenance from March 25 to April 3.

It was only the second reactor in the country ever to receive all top construction grades from the Nuclear Regulatory Commission; it was completed under budget and ahead of schedule, and its construction program received the federal Occupational Safety and Health Administration Safety Excellence Award.

The unit's 200-day startup power testing program from fuel load to commercial operation was the best ever for a boiling water reactor in the United States.

#90142p0936 05/22/1990 ~PR Newswire

NASHVILLE, TN (MAY 22) PR NEWSWIRE - GENESCO Inc. (NYSE: GCO) today reported operating results for its first quarter ended April 30, 1990. Chairman and chief executive officer William S. Wire II said GENESCO's overall sales were up in comparison to last year's first quarter.

Sales for the quarter ended April 30, 1990, reached $109,969,000, a 5 percent increase from $104,960,000 recorded in the same period a year ago. This reflects higher footwear sales of 8 percent and a 3 percent decline in tailored clothing sales.

For the most recent quarter, GENESCO reported a loss (before an extraordinary charge) of $1,513,000, or $.07 per share, compared to a loss of $174,000, or $.02 per share, last year.

After an extraordinary charge of $1,173,000, or $.05 per share, from the Company's recently announced plan to prepay certain high interest rate debt, the Company had a net loss of $2,686,000, or $.12 per share.

"The first quarter of the year is traditionally our weakest, and this year we were particularly affected by the weak men's tailored clothing market,"

Wire said. "In addition, the earnings of our leather tanning company were adversely affected by continued high prices in the hide market.

"Overall business in our markets is soft right now," Wire added. "During the quarter, we continued to make progress toward further strengthening GENESCO's financial condition," Wire said. "The company's recently announced $45 million revolving credit agreement and prepayment of its 14.25 percent and 15.25 percent notes will provide the Company with increased flexibility and lower interest expense."

In addition, during the quarter GENESCO authorized payment of all remaining preferred stock arrearages which had accumulated since 1975.

GENESCO is a consumer products company with operations concentrated in footwear and tailored clothing.

#90142p0937 05/22/1990 ~PR Newswire

TORRANCE, CA (MAY 22) PR NEWSWIRE - P. Leiner Nutritional Products Corp. (AMEX: PLI) achieved the most successful fiscal year in its history during the twelve months ended March 31, 1990, with net income up 21 percent on a 19 percent sales increase.

Fourth quarter net income (unaudited) more than doubled to $2,746,000, equal to 52 cents per share, from $1,357,000, or 26 cents per share, a year ago, as adjusted for the three-for-two stock split effected Oct. 24, 1989. Net sales for the quarter advanced six percent to $39,152,000, from $36,829,000 a year earlier.

For the fiscal year, net income (unaudited) totaled $4,708,000, equal to 90 cents per share, compared with $3,906,000, or 75 cents per share, in the prior year, as adjusted for the above mentioned stock split. Net sales for the year grew to $148,232,000, from $124,210,000, in fiscal 1989.

Michael Leiner, chairman and chief executive officer, said: "Fourth quarter operating results were strong. In addition, earnings for the period benefited from a partial reversal of the $2.5 million pre-tax charge incurred in our third quarter due to the recall of L-tryptophan products.

"We have recently been successful in obtaining a partial recovery of the cost of the recall which, together with other factors, has reduced the aggregate provision to $1.4 million pre-tax. The net effect of this recovery was to increase fourth quarter net income by 12 cents per share.

We are continuing to pursue the possibility of further recovery.

"Even without the credit for the recall cost recovery, net income for the quarter would have risen more than 50 percent. This was despite the loss of L-tryptophan products sales and the drain of management's time caused by this unfortunate matter.

"Considerable progress has been made in investigating the connection between L-tryptophan and the outbreak of eosinophilia- myalgia syndrome (EMS).

"The Food and Drug Administration has recently stated that studies in certain states have provided extensive evidence that shipments from a single raw material supplier were contaminated, apparently with a by-product of the manufacturing process, and may have caused the illness in those states.

"Thus, we remain confident that the problem was not the result of any formulation or manufacturing fault of P. Leiner, and we believe that our company will not have any material uninsured liability that will not be recoverable from our raw material supplier."

Leiner continued: "Sales of our Your Life (R) brand vitamins and shipments of our expanding range of over-the-counter, non- prescription, drug products, including our Pharmacist Formula (R) brand, continued their rapid growth during the past fiscal year. Those product lines represent important opportunities for future development.

WASHINGTON (MAY 22) PR NEWSWIRE - The government of Thailand has notified the International Monetary Fund that it has accepted the obligations of Article VIII, Sections 2, 3 and 4 of the fund's Articles of Agreement.

Members accepting the obligations of Article VIII undertake to refrain from imposing restrictions on the making of payments and transfers for current international transactions or engaging in discriminatory currency arrangements of multiple currency practices without fund approval, and undertake to ensure the convertibility of their currencies. Some of the main purposes of the fund are to facilitate the expansion and balanced growth of international trade, and thereby contribute to high levels of employment and real income and to assist in the establishment of a multilateral system of payments in respect of current transactions between fund members. Among the ways the fund seeks to achieve these objectives

is by helping to eliminate restrictive practices in the exchange and payments areas among its member countries.

Thailand is the 68th member of the fund to assume Article VIII status. By accepting Article VIII status, Thailand gives confidence to the international community that it will pursue sound economic policies that will obviate the need to use exchange and payments restrictions on current transactions and thereby enhances its contribution to a multilateral payments system free of restrictions.

SCOTTSDALE, AZ (MAY 22) PR NEWSWIRE - EXECUTONE Information Systems Inc. (NASDAQ: XTON) introduces Custom Plus ACD, available for the IDS family of digital systems during the second quarter of 1990.

The Custom Plus ACD features expanded memory storage capacity, increased ACD historical reporting capability and enhanced dynamic activity screens, helping supervisors to quickly identify and respond to changes in calling patterns and staffing fluctuations. With the use of color and graphics, the Custom Plus Supervisor Screen displays call center activity, providing quick assessment of the status of calls and agents. If a caller is in queue too long or if an agent is in a particular status for an unusually lengthy period, the supervisor can react quickly. Additionally, call traffic can be displayed on an electronic marquee sign in view of the entire call center.

Custom Plus ACD provides the ability to print reports for a specified time period, including historical data, designed to assist managers in scheduling and forecasting. Data can be stored for an unlimited time period, permitting reports to be printed only when they are needed, rather than printing as a method of data storage.

"EXECUTONE pioneered affordable ACD systems for small inbound call centers. Several enhancements have been made since then, and we eventually created four ACD packages designed for every level of call center sophistication. Now, Custom Plus ACD is our fifth and most sophisticated ACD package," Terry Atwood, director of marketing, said.

EXECUTONE Information Systems Inc. designs, manufactures, sells, installs and services voice and data communications equipment for businesses with under 300 desktops, and is the leading supplier of specialized hospital communications equipment. Products are sold under the EXECUTONE(R), ISOETEC(R) and INFOSTAR(TM) brand names through a nationwide network of company-owned direct sales and service offices and independent distributors.

PORT WASHINGTON, NY (MAY 22) PR NEWSWIRE - Luxottica Group S.p.A. (NYSE: LUX) today announced its results for the three-month period ended March 31 1990.

Net sales increased 15.4 percent to lire 89,523 million (US$71.675 million) from lire 77,562 million in the first quarter last year. Net income rose 32.1 percent to lire 13,109 million (US$10.495 million) compared with lire 9,924 million in the comparable quarter of the earlier year.

Earnings per share for the first quarter 1990 was lire 291, equivalent to approximately $0.47 per American Depositary Share.

Leonardo Del Vecchio, chairman of the board and chief executive officer, said, "The increase in net sales reflects our successful strategy of expanding Luxottica's portfolio of designer lines, which now comprise Giorgio Armani, Genny, Byblos, Giugiaro and, most recently, Valentino."

The company noted that the lire 11,961 mil lion increase in net sales during the first quarter this year compared with the prior year was the result of expanded sales of its designer lines, which are sold at higher unit prices than its traditional lines. Designer lines accounted for approximately 22.6 percent of net sales compared to 10.6 percent of net

sales for the comparable period in 1989.

The company posted this strong increase in net sales despite the negative impact of unfavorable currency exchange rate translations during the first quarter this year. The company's total unit sales during the first quarter increased 140,368 units compared with the comparable period last year.

Gross profit increased 12.9 percent compared to the earlier period, principally as a result of the increase in higher-margin sales of the company's designer lines and, to a lesser extent, increased unit sales.

Selling, general and administrative expenses decreased to 41.8 percent of net sales in the first three months of 1990 from 42.4 percent of net sales in the first three months of 1989. Advertising and promotional expenses, which are included in SG&A expenses, decreased to lire 3,839 million compared with lire 4,350 million in the first quarter last year, reflecting higher advertising and promotion expenses to introduce designer lines last year. Selling expenses increased by 14.7 percent to lire 19,614 million in the first three months of 1989 largely due to commissions on higher sales and, to a lesser degree, royalties paid on the company's designer lines.

Del Vecchio added, "Many of our previously announced expansion plans will come to fruition during the next few months."

"Luxottica Group's joint venture with Charmant will begin marketing eyeglass frames later this month under the Giorgio Armani, Genny, Byblos and Giugiaro names in Japan and East Asia. This will be followed by the launch of the Valentino line in North America and Europe.

"Further, the new Mirari line, together with the Genny, Byblos and Giugiaro lines, have recently been launched in almost all the world's major markets and should yield their first commercial results over the next few months."

NEW YORK (MAY 22) PR NEWSWIRE - The Centaur Partners Group announced today that the independent inspector hired by National Intergroup, Inc. (NYSE: NII), to tabulate the consents solicited by Centaur in its recent consent solicitation had certified that holders of 11,282,983 shares -- 51.8 percent of the outstanding shares of common stock -- validly consented to Centaur's proposal to expand NII's board of directors from 12 to 15 members.

Centaur reiterated its belief that the Delaware Supreme Court would confirm that only a majority vote is required to amend the company's by-laws, reversing the earlier Chancery Court interpretation that an 80 percent vote was required for this purpose, thereby giving stockholders the opportunity to elect a majority of directors to NII's board at the annual meeting in July.

The inspector also certified that holders of 11,275,813 shares, representing 51.8 percent of the outstanding shares of common stock, had consented to Centaur's proposal to reduce to 45 days the advance notice to NII of a stockholder's nominee for director.

Centaur also said that it filed an action in Delaware Chancery Court today seeking a declaratory judgment confirming the inspector's count that a majority of outstanding shares had consented to each of Centaur's two proposals.

WASHINGTON (MAY 22) PR NEWSWIRE - CYTOGEN Corp. (NASDAQ: CYTO), a biopharmaceutical firm in Princeton, N.J., today reported clinical data which shows that its first monoclonal antibody-based imaging agent impacts the treatment of colorectal cancer in more than 25 percent of patients.

At the 26th Annual Meeting of the American Society of Clinical Oncology in Washington, Robert Maguire, M.D., director of clinical investigations for CYTOGEN, presented multi-center clinical trial results for OncoScint(R) CR103. OncoScint CR103 is an imaging agent designed to visualize the presence and extent of colorectal cancer within the body.

The data indicates that clinicians who reviewed the OncoScint images would treat their colorectal cancer patients differently in one out of four instances. According to these physicians, better patient management may ultimately improve patient survival. Maguire said that the instances where oncologists would change their treatment of cancer patients frequently involved situations where the OncoScint product revealed "occult" sites of cancer. In some instances, doctors may be able to remove these unanticipated tumors; in other patients, surgery might be ruled out for various reasons or replaced by other treatments.

The American Cancer Society estimates colorectal cancer will strike 155,000 Americans this year. Additionally, more than one-half million colorectal cancer patients are being monitored for recurrence of disease. OncoScint can be useful in finding cancer in both these patient populations. The company said it believes the U.S. market opportunity for its colorectal imaging agent should exceed $200 million annually.

The company submitted a Product License Application (PLA) for OncoScint CR103 to the U.S. Food and Drug Administration (FDA) in September 1989 seeking marketing approval for this product. Other CYTOGEN imaging products are being developed to visualize ovarian and prostatic cancers. A PLA for OncoScint ovarian was filed with the FDA in March of this year and OncoScint prostate is in Phase I/II human clinical studies.

CYTOGEN Corp. is a biopharmaceutical company which has developed proprietary systems for linking drugs and diagnostic agents to monoclonal antibodies in order to optimize the function of the antibody as a delivery vehicle. With major emphasis on human cancer, current product development efforts at CYTOGEN are focused on improved cancer diagnostic imaging agents and the targeted delivery of cancer therapeutic agents directly to tumor sites.

CHICAGO (MAY 22) PR NEWSWIRE - Oil-Dri Corporation of America (NASDAQ: OILC) today reported sales of $22,562,000 for the quarter ended April 30, 1990. This represents a 9 percent increase over the $20,615,000 reported for the same period of fiscal 1989. Net income for the quarter was $1,538,000, or $0.22 per share, an increase of 44 percent over the

$1,066,000, or $0.15 per share, earned in the third quarter last year.

Sales for the nine months were $70,622,000, up 14 percent over the $61,836,000 reported for the comparable period last year. Net income was $5,114,000, or $0.73 per share, showing a 16 percent increase over last year's earnings for the nine months of $4,403,000, or $0.63 per share.

"Sales for the period have continued to demonstrate healthy growth over last year. The improvement in margins for the quarter are a reflection of stabilized fuel costs and good progress in resolving the operational difficulties experienced in the previous quarter," stated Richard M. Jaffee, president of Oil-Dri Corp.

"Oil-Dri's recent acquisition of Industrial Environmental Products Inc. has positioned the company to enter the environmental and spill response business. Oil-Dri's new line of polypropylene sorbents will help fill a current and growing need in both industrial and marine spill cleanup."

"Another exciting development during the quarter was the election of Joseph C. Miller, a member of our board of directors, to the position of vice president of corporate planning and market development. As former president of both Lowe's Inc. and Whiteford Systems, he brings with him years of proven success and experience in the sorbent mineral industry and the transportation and distribution side of the business."

"As part of our company's ongoing commitment to improving the environment, we have recently promoted Susan Jaffee Hardin to vice president of public affairs. Hardin will chair our newly formed environmental concerns committee and coordinate all company activities in regard to environmental health and safety regulations."

Oil-Dri is a leading producer of sorbent technologies for the consumer, agricultural, industrial and environmental and specialty chemical markets. The corporation is headquartered at 520 N. Michigan Ave., Chicago.

HOUSTON (MAY 22) PR NEWSWIRE - Opicoil America Inc., an affiliate of the Chinese Petroleum Corp. (CPC) of Taiwan, and Roy M. Huffington, the chairman and CEO of Roy M. Huffington Inc., announced jointly today that Opicoil's acquisition of Huffington Corp. (Huffco) had been completed.

Huffco is the parent company of Roy M. Huffington Inc. Both Opicoil and Huffco are headquartered in Houston.

CPC, based in Taipei, Taiwan, and owned by the Republic of China, conducts oil and gas operations worldwide. It signed a 20 year LNG sales contract with Pertamina, the Indonesian state oil and gas enterprise, in 1987, under which CPC imports 1.5 million tons of LNG annually. C.Y. Huang, vice president, represented CPC in the acquisition.

Opicoil is a subsidiary of Overseas Petroleum and Investment Corp. (OPIC), which is CPC's worldwide exploration arm. Opicoil is also a joint venture participant with Phillips Petroleum in United States exploration activities.

Huffco controls a 16.7 percent working interest in an Indonesian joint venture formed in 1968 to explore for oil and gas in East Kalimantan, Indonesia. The Indonesian Joint Venture (IJV) comprises Huffco and affiliates of Union Texas Petroleum Holdings Inc., Ultramar PLC, and Universe Tankships Inc., and supplies natural gas to one of the world's largest liquefied natural gas (LNG) facilities. CPC recently began receiving LNG cargoes from this facility.

Huffco also owns the equivalent of 11 city blocks in downtown Houston and 419 acres of undeveloped land adjacent to Houston's Intercontinental Airport, among other real estate assets.

WASHINGTON (MAY 22) PR NEWSWIRE - Air Atlantic, a Canadian partner airline based in St. John's, Newfoundland, Canada, recently inaugurated jet service with British Aerospace 146-200 jetliners.

With two of three aircraft on order, the airline began its first jet service to St. John's, Gander, Stephenville, Halifax, Charlottetown, Moncton, Montreal and Ottowa.

The remaining 146-200 will be delivered in early June and complement the airline's existing fleet of 15 de Havilland Dash 8-100s. On June 17, the airline will add scheduled jet service to Saint John and Fredericton in new Brunswick as well as Toronto, Ontario, where Air Atlantic will be the first scheduled commercial carrier to offer BAe 146 jet service at Pearson International Airport.

Neal Jackman, president and chief operating officer of Air Atlantic, said, "We feel the 146 is perfectly suited to meet the high standard of service our customers have come to expect from Air Atlantic. The provision of Business Class service on our new jets combined with the speed, comfort and convenience of jet service will, I am confident, have wide appeal in the communities we will service."

Brian Thomas, president of British Aerospace, Inc., noted the significance

of the new 146 carrier. "The start of BAe 146 service with Air Atlantic further highlights the aircraft's economic benefits as well as the importance of environmental considerations to airlines and communities."

The BAe 146 has four Textron Lycoming ALF502R-5 turbofan engines, and has proven to be the quietest jetliner in the world. To date, there have been 186 orders from 36 operators worldwide.

Air Atlantic currently flies to 23 destinations in Atlantic and Central Canada and the Eastern United States.

BOULDER, CO (MAY 22) PR NEWSWIRE - NBI Inc. (NYSE: NBI) today announced the introduction of Legacy(TM), a powerful new advanced word processing program developed exclusively for the Microsoft(R) Windows graphical version 3.0 environment. Legacy builds on the historically powerful document processing tools of its predecessor Legend 2.0, with significant enhancements including two-way Dynamic Data Exchange (DDE), tightly integrated graphics manipulation and extensive page layout features.

"Legacy establishes a bold new standard to which all document preparation products will be compared," said John Ball, director of marketing of NBI. "By working extremely close with the Microsoft Windows 3.0 development team, NBI has accomplished an exceptional feat in crafting a new standard of advanced word processing features, performance and ease-of-use."

"Users no longer need to struggle with two separate software programs to accomplish their day-to-day word processing and high-end document creation projects," expanded Ball. "Legacy combines all functions into a single graphically-oriented solution."

Based in Boulder, NBI designs and markets advanced word processing software packages. A leader in the word processing industry for more than a decade, NBI also provides customer service and support to a wide base of system users in domestic and international locations.

SAN JOSE, CA (MAY 22) PR NEWSWIRE - IXI Limited today unveiled X.deskterm(tm), a revolutionary X Windows(tm)-based technology at Xhibtion '90, an X Windows trade show at the San Jose Convention Center.

X.deskterm is a sophisticated terminal emulator that allows existing character-based applications to run in the graphical world of OSF/Motif(tm) and OPEN LOOK(tm). Using X.deskterm, software can run in a windowed, mouse-driven graphical environment featuring pull-down menus, scroll bars, dialog boxes, resizable windows, cut-and-paste and multiple fonts and colors.

"X.deskterm provides the power software developers need to quickly deliver the high quality X Windows applications that users are screaming for," said Anil Malhotra, IXI Limited vice president of sales and marketing. "The market for X.deskterm is enormous particularly since the vast majority of UNIX applications are still character-based, unable to take advantage of user friendly GUIs."

Already an integral part of major X products such as Uniplex Windows(tm) Office Automation Software and an X version of Informix-SQL(tm) from Altered Image, a U.K.-based software developer, X.deskterm reduces the time to market for any X product. NCR is using X.deskterm to help NCR VARs move UNIX applications over to X allowing the software to run on the NCR TowerView X Station. Dell Corporation is also bundling X.deskterm with their DELL Station family of computers.

Using X.deskterm, developers of character-based applications don't need any previous knowledge of X programming. X.deskterm is designed to allow the developer to configure the application to use X.deskterm commands.

X.deskterm takes the character output and converts it to graphical display. Typically the effort involved is less than 10 percent of the original programming effort and is much quicker and far less costly than redesigning the existing application to work directly with X.

IXI Limited, founded 1987, is a leading developer and supplier of X-related software products and technology. The company develops and markets X.desktop 2.0(tm) the leading desktop manager program licensed by Dell Computer Corporation, IBM, Uniplex Ltd., The Santa Cruz Operation, Locus Computing, Unisys Corporation, Opus Systems, and NCR Corporation. IXI's corporate objective is to make it easier for non-technical users to take advantage of powerful computers.

PARSIPPANY, NJ (MAY 22) PR NEWSWIRE - General Public Utilities Corp. (NYSE: GPU) announced the promotion of Cynthia Mansfield as vice president-government affairs of GPU's subsidiary, GPU Service Corp. (GPUSC).

Currently GPUSC's government affairs director in Washington, Mansfield will assume her new post June 1, 1990.

In announcing the appointment, Standley H. Hoch, GPU chairman, president and chief executive officer, said, "This promotion recognizes the growing importance of the government affairs function within the GPU System and the strong executive talents that Ms. Mansfield brings to the job."

Mansfield will direct the System's federal government relations efforts for legislation and regulation important to GPU and its subsidiaries. In order to provide enhanced System coordination of government and legal affairs, Mansfield will report to GPU Senior Vice President and General Counsel Ira H. Jolles.

Mansfield joined the GPU System in 1981 as a federal affairs representative. She was appointed director of government affairs in 1988. Before coming to GPU, she was press secretary to Pennsylvania Congressman Don Bailey. In that position, she directed media relations and managed legislative issues.

A native of McKeesport, Pa., Mansfield graduated from The Pennsylvania State University with a bachelor's degree in journalism.

GPU is an electric utility holding company with three operating

subsidiaries: Jersey Central Power & Light, Pennsylvania Electric and Metropolitan Edison. It has two service subsidiaries, GPUSC, which provides integrated system plans and services, and GPU Nuclear, which operates the subsidiaries' nuclear plants. The GPU System serves about 1.8 million customers, or a population of more than 4.6 million, in a service territory encompassing about half the land area of Pennsylvania and New Jersey. Total revenues are $2.9 billion.

DENVER (MAY 22) PR NEWSWIRE - On May 19, 1990, Gross Industries Inc., a Colorado corporation, received multi-million dollar funding from a group of prime investors. The investors included Prometheus Capital of Montreal, Canada, and Lincolndale International Inc. of New York. The signing at the DTC Embassy Suites, in Englewood, Colo., was assisted by notary Sylvie Lajoie of Montreal and Gregory Anderson of Merrill Lynch of Denver. The funding gives Gross Industries the financial strength to expand into the world market place as a major participant in the petroleum industry.

After the signing, Gross Industries Chairman William J. Gross III announced that acquisition plans will be implemented immediately. Acquisitions include: Groco Petroleum Services Inc., Groco Production International Marketing Inc., Tamara Investment Corp. Inc., Pureco Energy Inc., Associated Fire Consultants Inc., Turbo Refinery of Alberta, Canada, S&H Petroleum, Gemini World Travel, and Olympic Transport of Indiana Inc. Gross also stated that further acquisitions are forthcoming. They are designed to enable Gross Industries to respond to changing ecological needs in the petroleum world. The inclusion of ethanol and natural gas

will be two of the products that will lead Gross Industries' drive toward cleaner fuels for cleaner air.

#90142p0977 05/22/1990 ~PR Newswire

LAS VEGAS (MAY 22) PR NEWSWIRE - Harold E. Sells, chairman and chief executive officer of Woolworth Corporation, today urged the nation's shopping center landlords not to over-store or "saturate" their centers with "a particular category of merchandise" and to strive instead for a diversified tenant mix.

Sells said that while he recognized that higher construction costs and other expenses are driving the need for higher rents, he cautioned that "when you over-store one category of merchandise, you reduce the tenants' ability to pay those high rents."

"Instead of putting in more of the same, find a new tenant in a different merchandise category. This will only make your center more appealing to customers," Sells said.

In a luncheon address before the 1990 Spring Convention of the International Council of Shopping Centers here, the Woolworth executive also had a cautionary word for retailers in the audience. "Constant and pervasive 'sale' or off-price signs are a threat to retailing and store credibility," he said, adding that this practice encourages customers simply to wait and "buy only sale items."

"We all must be more disciplined in our pricing policies," Sells stated. Sells also suggested that shopping center landlords and tenants strive to cut down oversized stores in some older shopping centers and to create new stores "that would benefit the landlord, the tenant, as well as the customer, who would have a broader assortment of stores and formats to shop."

Terming the shopping center "the greatest vehicle ever developed for distributing consumer goods," Sells attributed Woolworth's vigorous expansion into specialty retailing in recent years to its extensive utilization of shopping center locations.

As of April 28, 1990, the end of its first quarter, the company operated a total of 8,275 stores in the United States, Canada, West Germany, Australia, Belgium and the Netherlands. These stores consist of 6,622 specialty stores in over 40 different retail formats and 1,653 general merchandise stores. Of the company's more than 5,800 stores in the

United States and Canada, 90 percent are located in shopping centers where they occupy 49 million gross square feet of space, Sells said.

For 1990, Woolworth is planning record capital spending of $325 million, mainly to support the opening of about 800 stores, "about 90 percent of which will be specialty stores, and virtually all in your shopping centers " Sells told the landlord group.

In 1989, Woolworth paid more than $400 million in rent to shopping center landlords, or about 95 percent of its total gross rents, Sells reported. In some United States malls, Woolworth has as many as 12 different formats in a single center, he said. In Canada there are 14 stores in a dozen formats in one mall alone, he added.

LOS ANGELES, (MAY 22) PR NEWSWIRE - Occidental Petroleum Corp. (NYSE: OXY) said today it is devoting nearly half of its companywide $1.4 billion capital budget to oil and gas and this year plans to drill 35 exploratory wells in China, Indonesia, Latin America, Malaysia, Oman, Pakistan, Syria and the U.K. North Sea.

Chairman and Chief Executive Officer Dr. Armand Hammer said Occidental has the best portfolio of international oil and gas exploration prospects in its history.

In remarks to more than 1,500 shareholders at the company's annual meeting at the Santa Monica Civic Auditorium, Dr. Hammer said Occidental last year replaced 124 percent of the reserves it produced on a worldwide energy equivalent basis. At year-end 1989, Occidental had reserves of 750 million barrels of oil, 2.9 trillion cubic feet of natural gas and 2.7 billion tons of coal.

Dr. Ray R. Irani, Occidental's president and chief operating officer, said production from the Claymore and Scapa fields in the North Sea, which resumed last August, is now at 50,000 barrels per day and is expected to reach 100,000 barrels per day by year-end. He also said a development program is under way for the Piper field and its satellite fields, from which we and our partners expect to recover 275 million barrels of oil and condensate.

In domestic oil and gas operations, Dr. Irani said, Occidental already is benefiting from a restructuring program that enhanced its position as a low-cost producer. The restructuring will reduce costs by an estimated $100 million per year.

Dr. Hammer also noted the dramatic growth of Occidental's chemical operation, whose earnings have increased more than 12 times during the past five years, from $91 million in 1985 to more than $1 billion in 1989.

"Over the past several years, we have pursued a clear and successful strategy that has built OxyChem into a market leader in size, low-cost production and integration, and we have a lean organization that is well positioned to take advantage of opportunities in any economic climate," Dr. Irani said. "This strategy has served us well in good times and in tough times."

He said OxyChem's 20 percent return on sales last year was the highest of the companies against which it competes.

Occidental's natural gas transmission subsidiary, MidCon Corp., is undertaking significant expansion projects, Dr. Irani said.

"As the gas industry experiences a resurgence in the years ahead, MidCon will be able to draw on its strategically located pipeline network, low costs and lean organization to be a strong performer for Oxy," Dr. Irani said.

To increase its operating flexibility and provide access to new markets, MidCon recently completed a 200-mile pipeline project linking its main transmission systems in Oklahoma and Texas; will build a 107- mile line to move gas from the Arkoma Basin in Arkansas and Oklahoma; and plans a 150-mile pipeline in Iowa to connect its interstate system to an existing pipeline that brings gas from Western Canada to the United States.

Dr. Irani said Occidental's coal subsidiary, Island Creek Corp., has increased productivity by 79 percent since 1984 and "we expect to be in excellent shape as coal prices recover." He said IBP, inc., the beef and pork processor of which Occidental owns 51 percent, is adding more plant capacity and is introducing cost-saving innovations that will further improve profitability.

NEW YORK (MAY 22) PR NEWSWIRE - CCMI, the nation's leading supplier of telecommunications rate and tariff information, reported today at the opening of the International Communications Association (ICA) conference and exposition in New Orleans that its telecommunications price index declined by 3.7 percent in the first quarter of 1990. The decrease is a continuation of the almost constant quarter-to-quarter decline in the

index since 1984. The CCMI index tracks a market basket of interstate and intrastate business telecommunications services.

The index, which uses 1984 as the base year, ended the first three months of 1990 at 70.4, down 2.7 points from the fourth quarter of 1989 and 6.8 points lower than the first quarter of last year. The first quarter 1990 decline follows a decrease of 2.6 recorded in the final quarter of 1989. The two quarters together represent an acceleration of the more modest quarterly decreases of late 1988 and early 1989.

George David, president of CCMI, said, "Across-the-board decreases in all interstate service categories averaged almost 2 percent in the first quarter, and were compounded by sizable reductions in intralata private line rates for the major states covered by the index." He added that, "The tremendous growth in the use of high band width digital private line services is accelerating downward pressure on price, as the carriers fight to preserve or gain market share in the large-user segment of the telecommunications market.

"While the switched service market was the primary competitive battleground in the immediate post-divestiture era, AT&T's main rivals, MCI and US Sprint, now have in place national digital networks, enabling them to offer a broad product line clearly comparable to AT&T. Under these conditions, price and service become critical decision criteria -- and the index reflects the price aspect through the most recent reporting period," the CCMI executive noted.

David also stated that the index itself has been revised, effective with this quarter. "When originally developed in 1985, the market basket of services we selected contained only toll, WATS and analog private line. Over the past five years, the typical business user, presented with more choices, has responded by altering the mix of services. These services now include a wide range of volume-oriented discounted switched services, and a greater deployment of high capacity digital private line services.

A division of McGraw-Hill, CCMI provides rate, tariff and analytical information to vendors and users in the telecommunications marketplace.

#90142p0990 05/22/1990 ~PR Newswire

SALEM, NH (MAY 22) PR NEWSWIRE - Hadco Corporation (NASDAQ: HDCO) today announced net income for the second quarter of fiscal 1990 ended April 28, was $1.8 million, or 15 cents per share, as compared to $1.7 million, or 14 cents per share, for the second quarter of fiscal 1989. Net sales for the second quarter of fiscal 1990 were a record $43.1 million up 6.1 percent from $40.6 million for the same period a year ago.

Net income for the six months ended April 28, 1990, was $3.0 million, or 25 cents per share, as compared to $.1 million, or 1 cent per share, for the first six months of fiscal 1989. Net sales for the first half of fiscal 1990 were $80.5 million up from $72.2 million for the same period a year ago.

Backlog at the end of the second fiscal quarter of 1990 is less than it was at the end of the second quarter of fiscal 1989. However, the portion due in the next 45 days is approximately the same as it was a year ago. This pattern reflects the shorter horizons inherent in a weak market but also indicates Hadco's success in attracting and retaining key accounts despite the prevalent conditions. Backlog at the end of the second quarter was $27.2 million, compared to a backlog of $27.7 million at the end of the first quarter and $37.8 million at the end of the second quarter of fiscal 1989.

Second quarter bookings were $42.7 million as compared to $37.3 million in the first quarter and compared to $52.7 million in the second quarter of

fiscal 1989.

Jon F. Kropper, president and chief executive officer stated, "We are pleased with Hadco's continued strength. Revenue for the first half of fiscal 1990 was $80.6 million, up 11.4 percent from the same point a year ago. Earnings per share for the first half increased 24 cents over last year's first half despite depressed market conditions.

"Our balance sheet remains strong as shown by the increase in our cash position to $22.6 million at the end of the quarter. This increase occurs as we continue to invest in the assets needed to move up-scale technically and the environmental control equipment needed to produce our products safely. During this quarter we broke ground on an addition to our Owego, N.Y., facility that will make us virtually self-sufficient in advanced technology innerlayer capacity. The total investment is expected to be approximately $12 million. Production will begin in the second half of 1991.

Hadco is a leading independent manufacturer of dense double-sided and multilayer printed circuits, serving customers in the computer, telecommunications, industrial automation and instrumentation industries. The company also manufacturers backplanes. It operates six facilities in the United States.

TORONTO (MAY 22) PR NEWSWIRE - Wharf Resources (NASDAQ: WFRAF) announces encouraging drill results have been reported at their mining operation near Lead, South Dakota. Drilling has encountered possible additional economic mineralization within the current mine boundary and in the vicinity of the old Clinton Mine.

The exploration program will involve additional drilling in the current Foley Ridge Mine area in hopes of extending the ore reserves within the currently permitted boundaries. In addition, drilling and environmental studies will also be conducted in the area of the Clinton underground mine workings immediately east of the present mine boundary. The Clinton Mine, located in the historic Bald Mountain Mining District, was one of the longest running underground mines in the area until its closure in the late 1950s.

#90142p0996 05/22/1990 ~PR Newswire

DALLAS (MAY 22) PR NEWSWIRE - Quest Medical Inc. (NASDAQ: QMED) today announced that the United States Court of Appeals for the Federal Circuit upheld the favorable decision Quest received in Federal District Court in March 1989 in its defense of a patent infringement lawsuit brought by Minnesota Mining & Manufacturing Co. (3M) (NYSE: MMM) in January 1986. This latest decision entitles Quest to receive an additional $1.2 million in cash that was part of a holdback in the sale of certain assets in 1987.

Kendall McGaw Laboratories, which purchased Quest's electronic intravenous infusion device product line in 1987, held back $3.5 million of the purchase price pending resolution of the 3M lawsuit, which had asserted that Quest had infringed certain 3M patents. When the Federal District Court ruled in Quest's favor in March 1989, Quest received approximately $2.8 million, including accrued interest, from Kendall McGaw. An additional $1 million of the purchase price, plus accrued interest, was held back pending outcome of 3M's appeal.

Thomas C. Thompson, president and chief executive officer of Quest, said, "although Kendall McGaw bore the expense of defending the appeal, the case has been an albatross around the company's neck for more than four years. The lawsuit had a dramatic negative effect on Quest's ability to sell the electronic intravenous infusion device product line and at times also has made it difficult to redirect the company's growth into new areas. We are pleased that our original assessment of the lawsuit's lack of merit has been completely vindicated by both the district court and the appeals court."

Quest Medical develops, manufactures and markets proprietary products to the hospital market.

REDMOND, WA (MAY 22) PR NEWSWIRE - Eddie Bauer, a specialty retail and catalog company offering active lifestyle apparel and outdoor gear for men and women, will open a new store in the Saddle Creek South Mall in Germantown, Tenn., on Thursday, May 24. This is the first Eddie Bauer retail store in the Memphis area.

"We are quite pleased to be in the Memphis area," said Rick Fersch, the company's senior vice president in charge of store development. "We believe our classic, traditional apparel -- what we call 'weekender wear' -- and our outdoor wear will be extremely pleasing to the shoppers here."

A number of local people will be employed in the store, said Fersch, with that number increasing during seasonal and holiday peak periods. Suzanne Olson will be store manager.

More than 95 percent of Eddie Bauer products are private-label goods, that is, exclusively made only for Eddie Bauer. Many of the garments and accessories are designed by the company's in-house product development group, located near Seattle, and then closely monitored by the company's

quality assurance team. "We believe we bring more value to the customer by offering private label clothes and accessories," said Fersch.

The 7,000-square-foot store is one of 60 Eddie Bauer stores scheduled to open in 1990, the company's 70th year in business. For the past two years Eddie Bauer has made a substantial commitment to retail store expansion into major retail markets in the United States and Canada. Some 40 retail stores were opened in 1989; with the 1990 openings, the year-end total will be some 180 retail stores. The company plans to continue its retail store openings through the 1990s with the goal of placing at least one store in every major market in North America.

In addition, the Eddie Bauer Outlet stores network will also grow, with some 10 new openings scheduled in 1990, for a total of 15 outlet stores.

Eddie Bauer's catalog business also thrives. This year, some 20 different catalogs with a total circulation of more than 50 million, will be distributed to customers worldwide. Around-the-clock phone operators process as many as 25,000 orders a day through a toll-free Eddie Bauer number: 1-800-426-8020.

NEW YORK (MAY 22) PR NEWSWIRE - John C. Whitehead, a former deputy secretary of state and chairman of the Hungarian-American Enterprise Fund, today announced that the fund has received its grant and has appointed Alexander C. Tomlinson president and chief executive officer.

The fund, established and capitalized with $60 million by act of Congress, will promote development of Hungary's private sector, including small businesses, the agricultural sector, and ventures with U.S. and Hungarian participants. Through equity investments, loans, grants, technical assistance, training guarantees and other measures, the fund will promote policies and practices conducive to private sector development.

Tomlinson, retired chairman of the executive committee of the First Boston Corporation, founded and served as executive director of the Center for Privatization in Washington, D.C. He was also formerly a partner and managing director of Morgan Stanley & Co. Most recently, he has been advising the Hungarian government as it creates a program for the divestiture over the next several years of more than 2,000 state- owned enterprises.

"We are delighted that Alec Tomlinson has agreed to take on this

assignment," said Whitehead. "His broad financial and investment experience make him well qualified to carry out the mandate of Congress and bring U.S. funds, business acumen and economic skills to bear to develop Hungarian entrepreneurship and to establish a free market."

An office has already been opened in New York, and personnel are being recruited to establish the fund in Budapest, Tomlinson said.

"I am very excited about this opportunity to take part in the historic developments in central Europe and to contribute to Hungary's economic and democratic rebirth," Tomlinson said.

The creation of the fund was mandated by Congress in November under the Support for Eastern European Democracy Act (SEED 1).

#90142p1003 05/22/1990 ~PR Newswire

ARLINGTON, VA (MAY 22) PR NEWSWIRE - Bell Atlantic (NYSE: BEL) today announced that its Thinx(TM) software, the first "intelligent graphics" program for IBM PC and compatible microcomputers, will be commercially available in August.

Running under Microsoft windows 3.0, Thinx software provides complete integration of data and images, enabling users to work with information on the computer in nearly the same way the human mind works. Bell Atlantic's new software takes full advantage of the expanded graphics, memory management and hyptertext capabilities in Windows 3.0, making Thinx software easy to install and use.

"Thinx is an evolutionary step in PC computing with revolutionary results " said Jack Coppley, Thinx product manager for Bell Atlantic. "It allows people to work in a natural way with computers rather than bending to the rules of data manipulation that computers usually demand. When you have an integrated vision of images and data, it's much easier to do "what-if" analyses and see relationships that might otherwise remain hidden in lists of names or columns of numbers."

Thinx software creates a dynamic, relational interface between images and data, giving users a powerful new planning, presentation and decision-making tool they can use to visually explore relationships in spreadsheets or data bases, or have calculations done automatically as a plan or image is drawn.

Thinx software works directly with spreadsheet programs such as Microsoft Excel or Lotus 1-2-3, data base programs such dBase, and graphics/design programs such as Micrografx Draw Plus. It is also a self-contained package. It includes the logic and mathematical functions of a powerful data base and spreadsheet program, plus sophisticated graphics tools.

No matter how you put the elements in, Thinx software relates them to each other. Change the data and the Thinx program automatically changes the drawing. Change a drawing or plan and the Thinx program adjusts costs or other data to reflect those changes.

Thinx software is one of the products spawned by the Bell Atlantic CHAMPION program, an intrapreneurial venture started in 1988 to give creative, market-minded managers the opportunity to champion "big ideas" from concept through commercialization with a minimum of red tape.

Bell Atlantic plans to ship Thinx software to retail outlets this August. The software has a suggested list price of $495. Interested consumers should check with their local software dealer, or they can call 800-388-4465 for more information.

PHILADELPHIA (MAY 22) PR NEWSWIRE - A $13 million settlement on behalf of SmithKline Beckman Corp.'s shareholders was approved after a hearing in the Court of Common Pleas in Philadelphia today.

The $13 million fund will be paid pro-rata to shareholders of SmithKline who held shares between the close of business on April 10, 1989, and the close of business on June 26, 1989.

The settlement concluded litigation filed by a group of shareholders against SmithKline Beckman and certain of its officers and directors, and Beecham Group, p.l.c. The suit alleged claims in connection with the merger of two pharmaceutical giants, Philadelphia-based SmithKline and Beecham, which is based in Great Britain. The merger became effective on July 26, 1989.

Judge I. Raymond Kremer, sitting in the Court of Common Pleas in Philadelphia, authorized Notice of the Settlement to be sent to shareholders in March 1990, and at a hearing today, Kremer approved the settlement.

Dianne M. Nast of the Philadelphia firm of Kohn, Savett, Klein & Graf, P.C., a lead-counsel for the shareholder class, said today, "The settlement is an excellent one, achieved after difficult negotiations involving complicated issues with respect to the merger. There is always a substantial risk involved in any litigation. A settlement eliminates the risks to all parties, and a settlement of this magnitude is a fine result for the class members."

#90142p1017 05/22/1990 ~PR Newswire
MINNEAPOLIS (MAY 22) PR NEWSWIRE - Donaldson Company Inc. (NYSE: DCI), today reported record third quarter and nine-month sales and earnings for the period ended April 30, 1990.

For the quarter, sales were up 12.2 percent to $112.2 million from prior year sales of $100.0 million. Net earnings of $7.3 million, or 74 cents per share, were up 61 percent from last year's net earnings of $4.5 million, or 47 cents per share.

For the nine months, sales were up 5 percent to $313.8 million from $299.0 million last year. Net earnings of $15.9 million, or $1.64 per share, were up 29 percent from last year's earnings of $12.3 million, or $1.29 per share. Last year's results included $1.6 million of expenses related to the closing of the company's Integrated Air System's (IAS) operations which reduced net earnings by $1.1 million, or 11 cents per share.

According to William A. Hodder, Donaldson chairman and chief executive office, "Compared to the first half performance, sales in the third quarter were particularly strong in the traditional construction and agricultural markets. Continued weakness, however, was reported in the new production heavy duty truck market. In the quarter, we continued to report strong sales growth for dust collection and high purity products. Though slightly down for the year, gas turbine filtration sales increased in the quarter and total backlogs increased to near record levels.

"For the quarter, gross margins increased to 29.8 percent from 27.9 percent last year. For the year-to-date period, gross margins improved to 28.1 percent from 27.2 percent last year. The favorable margin performance

was across all product lines and reflects first-quarter price increases, stable material costs and strong sales volume.

"For the year, operating expenses as a percentage of sales increased from 17.2 percent last year to 17.5 percent this year. The increase was related primarily to increased marketing expenses and to product development costs for the company's new diesel particulate trap product offering."

Hard order backlogs -- goods scheduled for delivery in 90 days -- stood at $75.9 million at the end of the third quarter. This compares to $77.6 million at the end of the second quarter and $78.0 million at the end of the third quarter last year. The backlog decline from the prior periods was related primarily to lower defense product backlogs due to weaker demand and deemphasis of non-traditional product offerings.

Donaldson Co. Inc., is a worldwide manufacturer of air cleaners, liquid filters and exhaust products and accessories for heavy-duty mobile equipment; in plant air cleaning systems; air intake systems and exhaust products for industrial gas turbines; and specialized filters for computer disk drives, copiers and clean room components.

ARLINGTON, VA (MAY 22) PR NEWSWIRE - Ye Olde Fishwrapper, a monthly publication for boating and outdoor enthusiasts in northern Ohio, has been

acquired by Gannett Co., Inc.(NYSE: GCI), it was announced today.

The purchase was announced jointly by Pam Kane, former owner and James F. Daubel, editor and publisher of The News-Messenger in Fremont, Ohio.

The Fishwrapper will be operated as a subsidiary of The News- Messenger, a Gannett newspaper, with Daubel as publisher. Terms of the purchase, which is effective immediately, were not announced.

"Pam Kane has established a lively, informative and highly successful publication meeting the needs of advertisers, boaters and fishermen in the Lake Erie vacationland region," Daubel said. "We plan expanding the product and services."

The monthly publication, founded in 1986, is distributed to 40,000 owners of registered boats in northern and central Ohio. Assets of the Michigan Fishwrapper, which discontinued publication in 1988, also were included in the purchase.

Gannett is a nationwide news and information company that publishes 83 daily newspapers, including USA Today, and 52 non-daily publications, including USA Weekend, a newspaper magazine. It operates 10 television stations, 16 radio stations, Gannett News Services and the largest outdoor advertising company in North America.

SIMSBURY, CT (MAY 22) PR NEWSWIRE - Kollmorgen Corporation (NYSE: KOL) announced today that, in furtherance of the previously announced divestiture of its discrete wiring systems business, it has signed a definitive agreement to sell the patents, technology and certain other operating assets of its PCK Technology Division's discrete wiring business to a U.S. subsidiary of Hitachi Chemical Co., Ltd., of Tokyo, Japan. The sales price is approximately $12 million plus the assumption of certain liabilities by the purchaser. The sale of the patents and technology is scheduled to occur by June 1, 1990, at which time Kollmorgen will receive $6.5 million, and the closing respecting the remaining assets is expected to occur by Oct. 31, 1990, at which time Kollmorgen will receive the remainder of the purchase price less the then current value of certain retained accounts receivable. This transaction, when taken together with the ultimate disposition of the remaining portion of the discrete wiring systems business, is not expected to result in any significant gain or loss.

John Youngblood, president, chief executive officer and chairman of the board of Kollmorgen, said, "Hitachi Chemical and Kollmorgen have enjoyed an excellent business relationship and close cooperation for more than 25 years in the interconnection field. Having practiced the Multiwire Interconnection technology successfully in Japan for many years, and more recently in the USA, it is appropriate and fitting for Hitachi Chemical to continue to proliferate the discrete wiring technology. We are confident that Hitachi Chemical, already committed to this unique wiring technology, will develop it to its fullest potential."

Kollmorgen also announced that it has entered into an agreement to sell its 79.9 percent interest in Magnetic Bearings, Inc., a corporation jointly owned by Kollmorgen and the French company, Societe de Mecanique Magnetique, S.A., to TI United States Limited for approximately $2.4 million. The transaction is expected to close by the end of May and is not expected to result in any material gain or loss to Kollmorgen.

Youngblood added, "These transactions represent another significant step in our previously announced intent to sell our interconnection businesses and pursue our restructuring program."

Kollmorgen has continuing operations focused in two business segments: special purpose servo motors and controls, and electro-optical instruments.

CONTACT: James A. Eder of Kollmorgen, 203-651-3757; or Patrice M. Kozlowski of Georgeson & Company, 212-440-9865, for Kollmorgen.

#90142p1030 05/22/1990 ~PR Newswire

RICHMOND, VA (MAY 22) PR NEWSWIRE - Reynolds International Inc., a wholly-owned subsidiary of Reynolds Metals Company (NYSE: RLM), today announced that it has acquired 100 percent of the Austria Dosen aluminum beverage can making facility in Enzesfeld, Austria.

The plant, which has an annual capacity to produce approximately 450 million cans, has been 50-percent owned by a Reynolds subsidiary in Europe and 50-percent owned by Austria Metall Aktiengesellschaft, which has transferred its interest to the Reynolds group. Terms were not disclosed.

"Acquiring the balance of Austria Dosen allows us to expand the facility as the first step in growing our overall can making capabilities in Europe at a time when the market for aluminum beverage cans is showing rapid growth there," said Randolph N. Reynolds, president and chief executive officer of Reynolds International.

He said that Reynolds will move immediately to upgrade Austria Dosen's

production capacity in stages which will ultimately double the plant's capacity to 900 million cans a year.

"We expect double-digit growth in demand for aluminum beverage cans over the next several years in Europe and want to be in a position to participate in this growth," Mr. Reynolds said.

He noted that the Austria Dosen facility is strategically situated to serve established markets across Europe as well as developing markets emerging in Eastern Europe.

Reynolds is a major aluminum can maker in the United States with 13 plants and has been the pioneer in the development of consumer aluminum recycling here. Since 1980, the company has recycled the equivalent to more than 100 percent of the cans it has manufactured.

"We see consumers across Europe embracing the aluminum beverage can today just as Americans have over the last two decades because it is the most environmentally sound package available due to its recyclability," Mr. Reynolds said.

He said that the company also is promoting consumer recycling of aluminum in Europe.

NEW YORK, (MAY 22) PR NEWSWIRE - The Time Inc. Magazine Company is establishing a new entity -- Time Publishing Ventures, Inc. -- which will include all of the company's regional and special interest businesses and its worldwide development activity, it was announced today by Reginald K. Brack Jr., chairman, president and chief executive officer of The Time Inc. Magazine Company.

Christopher Meigher will become the president and chief executive officer of Time Publishing Ventures, Inc. He remains an executive vice president of Time Inc. Magazines.

Initially, Time Publishing Ventures will consist of the Southern Progress Corporation -- the Birmingham, Ala.-based publisher of Southern Living, Progressive Farmer, Southern Accents, Travel South and Cooking Light magazines -- and Sunset Publishing Co., publisher of Sunset Magazine. The previously announced acquisition of Sunset is expected to be completed by the end of May. Time Publishing Ventures also will include Asiaweek, President, Parenting, In Health, Working Woman, Working Mother and Elle Japon.

In making the announcement, Brack said, "As a past publisher of People, and group publisher at one time or another over most of our titles, Chris is a consummate publishing executive who is eminently well qualified for this entrepreneurial and challenging role." Most recently, Meigher spearheaded the company's international joint ventures in addition to overseeing the development of its growing partnerships in the United States. He was also group publisher of Life, Fortune, Money and Entertainment Weekly.

The Time Inc. Magazine Company, the nation's largest magazine publisher, is a wholly-owned subsidiary of Time Warner Inc. (NYSE: TWX).

ARMONK, NY (MAY 22) PR NEWSWIRE - IBM Corporation (NYSE: IBM) today announced that it has established a corporate staff overseeing the company's ongoing environmental, energy and safety programs. Heading this staff will be Arthur J. Hedge Jr., who has been named IBM vice president, environmental affairs.

In making the announcement, C. Michael Armstrong, IBM senior vice president, said, "IBM has long been committed to conducting business in the safest way possible for our employees, the communities where we operate and for the world at large. Bringing environment, energy and safety programs together under this new position will enable us to further coordinate our work in these interrelated areas."

Hedge, who will assume his new position July 1, will be responsible for developing and coordinating IBM's worldwide programs covering the environment, energy use, workplace safety and product safety.

After joining IBM in 1960, Hedge held a variety of positions in marketing, management services and real estate. In 1987 he was elected an IBM vice president; and prior to today's announcement, he was IBM vice president, real estate and construction.

Hedge will be succeeded in his prior position by Lee A. Dayton, who was formerly senior managing director, management services, IBM Asia Pacific.

#90142p1059 05/22/1990 ~PR Newswire

PITTSBURGH, (MAY 22) PR NEWSWIRE - National Intergroup Inc. (NII) (NYSE: NII), said today that a final tally of the results of voting by NII's shareholders in the recently completed consent solicitation shows that the Centaur Group's attempt to amend NII's bylaws has failed by a wider margin than was previously estimated.

According to the results certified by Corporate Trust Co., an independent election certification authority, the dissidents received the votes from approximately 27 percent of NII's independent shareholders, not 29 percent as previously estimated by Centaur. Including the 25 percent owned by the Centaur Group and Walker Street, this indicates that the dissident group received the support of approximately 52 percent of NII's shareholders, which is less than the 54 percent previously claimed by the dissidents.

The final result also is significantly less than the 80 percent vote which the Delaware Chancery Court has held is required to effect an amendment to the bylaws relating to board size. Centaur is appealing that court case. The reduction in the final tally reflects duplicate ballots, revocations and incorrect ballots.

NII also said it believes that none of the consents obtained by Centaur after April 13, 1990 (the deadline Centaur had imposed for termination of the solicitation) should be counted. Accordingly, NII is seeking, through its federal complaint in Pittsburgh, to nullify, at a minimum, those consents. If the court upholds this complaint, the number of votes received by the dissident group will be reduced further.

HOUSTON (MAY 22) PR NEWSWIRE - Wyoming-California Pipeline Company (WyCal) said 36 natural gas shippers requested 1.5 billion cubic feet per day (Bcfd) of firm transportation during its 45-day open season for pipeline transportation services. WyCal, a subsidiary of the Coastal Corporation (NYSE: CGP), plans to build an interstate pipeline from Wyoming to California. The pipeline also received interruptible transportation requests for 4.7 Bcfd.

Noting that WyCal's initial capacity will be 600 million cubic feet a day, WyCal President Charles Oglesby said, "We are delighted with the tremendous shipper response, particularly since most of these shippers are high priority residential and electric generation customers."

Oglesby indicated that contracts will be negotiated with most of these natural gas shippers during the next 30 days.

"With the signing of these contracts, WyCal has more than sufficient firm business to commence construction late this year," he said.

The Coastal Corporation is a Houston-based energy holding company. It has consolidated assets of $8 billion and subsidiary operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, and independent power production.

#90142p1068 05/22/1990 ~PR Newswire

DALLAS (MAY 22) PR NEWSWIRE - Harken Energy Corp. (NYSE: HEC) of Dallas

today announced that its board of directors has approved a proposed common stock rights offering to be made to all of its stockholders under which it plans to raise in excess of $40 million. Under the terms of this proposed offering, stockholders will receive rights to purchase shares of stock in Harken's wholly owned subsidiaries, Harken Marketing Co. (HMC) and Tejas Power Corp. (TPC). Certain major stockholders have indicated an interest in entering into a standby purchase agreement with Harken under which they would exercise any rights not exercised by the other stockholders. HMC and TPC plan to utilize the proceeds to partially fund their respective capital expenditure programs, to retire debt and for working capital.

HEC contemplates that it will distribute to its stockholders one right per HEC share held to subscirbe for a unit of newly issued shares of stock in both HMC and TPC. HEC further contemplates that the rights of HMC and TPC will be transferrable and may be sold and traded during the solicitation period. Stockholders will be able to oversubscribe for their proportionate interests in any non-excerised rights. Additional terms of the proposed rights offering are currently being formulated. Following the completion of the rights offering, TPC, HMC and HEC will trade separately in the public markets and operate independently.

HEC's operations will consist of oil and gas exploration and development activities primarily focused domestically in the Anadarko Basin and internationally in Bahrain as well as contract drilling activities primarily in Texas and Oklahoma. HMC retails, wholesales and distributes gasoline and other petroleum products through over 800 retail outlets and 41 refined product terminals in the Sunbelt states in the United States. TPC constructs, owns and operates natural gas gathering and transmission facilities in Texas and Louisiana, markets third party gas and is developing its Moss Bluff Gas Storage Facility.

HEC further stated that, in anticipation of the proposed right offering, it has, effective May 21, 1990, entered into a credit agreement with certain major HEC stockholders pursuant to which those stockholders will provide $26 million to HMC. Such funds will be used to retire $15 million of HMC bank debt. The remaining funds will be used for working capital of HMC. In consideration for the $15 million principal reduction HMC's bank lenders have agreed to revise certain financial covenants through July 31, 1990 and to extend the maturity date of the bank borrowings to April 1, 1991.

HEC manages and develops energy assets. HEC retails, wholesales and distributes gasoline through its subsidiary, Harken Marketing Co. Through its subsidiary, Tejas Power Corporation, HEC constructs, owns and operates natural gas gathering and transmission facilities in Texas and Louisiana and markets third party gas to a variety of end-users. HEC explores for, develops and produces oil and gas reserves domestically through its subsidiary Harken Exploration Company and internationally through its

subsidiary Harken Bahrain Oil Company.

#90142p1069 05/22/1990 ~PR Newswire

AURORA, IL (MAY 22) PR NEWSWIRE - Barbara Kattermann, former director of development for Aurora, now deputy commissioner of business services for Chicago's Department of Economic Development, announced the official commencement of the Toyota Motor Corp.'s 87-acre development at I-88 and Orchard Road in Aurora, Ill.

The project will contain a 36,000-square-foot office complex and a 454,000-square-foot parts distribution center. The groundbreaking ceremony wil ltake place Thursday, May 24. Gov. James Thompson and Toyota Motor Sales U.S.A. Vice Presidents Tom Ishikawa and Al Wagner will attend the groundbreaking.

Kattermann discussed the process and evolution of the site and project as it took place over the last several years. ''In 1987 Toyota Motor Corp. became interested in purchasing the 87-acre parcel at I-88 and Orchard Road, based on several major issues being resolved or supplied in order for the project to be viable.'' Kattermann continued, ''The Orchard Road interchange was something the representatives of Toyota and I used to draw on photographs once the property became of real interest to Toyota.''

Rep. Suzanne Deuchler, Sen. Forest Etheredge, County Board Chairman Frank Miller, Mayor David L. Pierce and staff had held many hours of meetings planning and strategizing for the new interchange. ''But nothing makes interchanges necessary better than traffic,'' Kattermann continued. With contracts in hand from both Toyota and an additional land purchase of 40 acres by Farmers Insurance Co., which officially opened its doors last week, the interchange was no longer a wish, but was about to become a reality.

Development was occurring at a rapid rate on the west side of Aurora. Within months, Sun-Times Distribution Inc. joined Toyota and Farmers with another 30 acres, while on the west side of Orchard Road the USAA Corp. recently finalized the sale of approximately 500 acres to the Primus Corp. to be used for a mixed use development of approximately 1,000 homes nest ed around a golf course and about 200 acres of ORI zoned property. ''Preliminary site plans of Primus's Orchard Valley received city approval and Phase I should be underway soon,'' Kattermann reported.

Kattermann went on to say, ''The accumulated acreage of these projects is 655 acres, which includes two buildings already completed -- Farmers

Insurance with 150,000 square feet and Sun-Times with 320,000 square feet, and groundbreaking today for Toyota, with Primus close behind.'' She continued, ''Within the first two buildings we created almost 900 new jobs and Toyota will soon employ approximately 200 people in Phase I.''

''Special duties by three local businessmen, Charles Doss, Jim Pearson and Chet McKee, added a special element of business-to- business conversation that I believe was important to the closure of the deal,'' said Katterman. ''It takes business partnerships to interface with government.''

''Partnerships, speed of process, one person providing control within the process, a great city staff, Mayor Pierce and the aldermen, and the Aurora Economic Development Commission's support is what helps get projects like this one off the ground,'' Kattermann said.

PITTSBURGH, (MAY 22) PR NEWSWIRE - Chambers Development Co. Inc. (AMEX:

CDVB) today announced that it has reached a preliminary agreement to acquire the assets of W.B. Industries Inc. and Mainline Sanitation Co., both in Cambria County, Pa., and Cleansweep Industries in Indiana County, Pa.

W.B. Industries received a permit earlier this month from the Pennsylvania Department of Environmental Resources (DER) to construct a sanitary landfill near Vintondale, Pa., under the commonwealth's new regulations. W.B. Industries, Mainline and Cleansweep also are engaged in the collection and hauling of solid waste.

The acquisition is conditional upon re-issuance by the Pennsylvania DER to Chambers of the permit to operate the landfill.

"This acquisition enables us to better serve the western Pennsylvania market," said Alexander Rangos, executive vice president of corporate development at Chambers.

"W.B. Industries, Banks Wright and Dominic Bellvia (W.B. Industries president and vice president, respectively) have been providing safe and reliable disposal services to area residents for years. And now we welcome the opportunity to provide these services to the community in an environmentally sound and economically efficient manner.

"This new state-of-the-art landfill fits well into our plans for multi-site regional disposal systems that will provide long-term, environmentally sound solid waste disposal," Rangos said, adding that the site is more than 50 miles closer to Chambers' Altoona Transfer Station than its Southern Alleghenies landfill.

The 27-acre landfill footprint is located within a previously undeveloped 211-acre site. The landfill will be constructed using Chambers' state-of-the-art technology.

The combined companies are expected to generate annual revenue of more than $6.5 million for Chambers.

"We welcome this opportunity to provide more service to a larger share of customers in this community," Rangos said. "We're no stranger to the area. We've been providing solid waste disposal to the area for the past 17 years at our sanitary landfill in Somerset County and will continue to do so. This acquisition will make our operations in the area more efficient."

Bellvia said he was pleased about the agreement. "Chambers has the experience and expertise to be responsive to the needs of the community for solid waste disposal. This represents the best way to provide environmentally sound and economically efficient waste disposal services to Blair, Cambria, Indiana and Somerset counties," Bellvia said.

Chambers Development Co., headquartered in Pittsburgh, is a leading environmental firm offering services in collection, hauling, disposal, recycling and landfill development. The company also provides security through its wholly owned subsidiary, Security Bureau Inc., one of the 20 largest U.S. security firms.

#90142p1088 05/22/1990 ~PR Newswire
NEW YORK (MAY 22) PR NEWSWIRE - The Global Utility Fund today issued the

following release:

Distribution Information

Amount	Payable Date	Record Date	Declaration Date
$ 0.135	June 29, 1990	June 15, 1990	May 16, 1990

Investment Adviser Commentary:

- The board of directors of Global Utility Fund, Inc. met on May 16, 1990 and declared a second quarterly dividend of $0.135 payable on June 29, 1990 to shareholders of record on June 15, 1990. Ex-dividend is June 11.

- At its May 16, 1990 meeting, the board also gave consideration to the fact that the Fund's stock has been trading at a discount to its net asset value per share. In view of the short operating history and the fully invested position of the Fund, the board determined that it was too early to initiate extraordinary measures in an effort to potentially narrow or eliminate the discount from net asset value. Nonetheless, the board decided to inform shareholders that the Fund's Investment Adviser, Wellington Management Company, at its discretion, may repurchase shares of the Fund from time to time at market prices on the New York Stock Exchange. Notice of an intention to make repurchase is required to be provided to shareholders under Section 23(c) of the Investment Company Act of 1940.

- The investment performance of the net asset value of the Fund for the year-to-date period through May 18 was 0.3 percent, including income. This compares favorably with the roughly 4.2 percent decline of the S&P Utility Stock Index.

- The Fund's Investment Adviser believes that domestic economic growth in 1990 will be moderate at best and that the underlying trend in the rate of inflation will be much less of a problem than the market currently anticipates. This should be beneficial to the types of securities in which the Fund invests. In addition, there has been no change in the Adviser's expectations that fundamental growth opportunities for utilities both in the United States and abroad, are accelerating and should be recognized in improving relative valuations of utility stocks. At recent price levels, the Fund has added to its electric utility and telecommunications stock holdings. The foreign component of the Fund, which represents about 27 percent of the equity holdings, is primarily invested in European countries. Global Utility Fund owns no Japanese stocks.

Global Utility Fund, Inc. is a diversified closed-end management investment company whose investment objective is to provide total return, without incurring undue risk, by investing primarily in income- producing equity and debt securities of domestic and foreign companies in the utility industries.

SALT LAKE CITY (MAY 22) PR NEWSWIRE - Bonneville Pacific Corp. (NASDAQ: BPCO), located in Salt Lake City announced today that its has arranged for the permanent financing of its Whitewater Hill (California) wind park in a sale and leaseback transaction with Westinghouse Credit Corp. The sales price for the 14 megawatt project, which sells electricity to Southern California Edison, was $18,159,952. Bonneville also was paid a $2.1 million restructuring fee for the refinancing efforts involved in retiring an interim loan from SDS Bank of Copenhagen, Denmark.

The wind park, located 10 miles from Palm Springs in the windy San Gorgonio Pass, has been leased by Bonneville Wind Energy Technology Associates, a California limited partnership. Partners in the limited partnership include a Bonneville affiliate, the manufacturer of the wind turbine-generators used in the project, Vestas/DWT of Viborg, Denmark, and Bonneville Aero Power Plant, a limited partnership owned by investors in West Germany. Park management is provided primarily by San Gorgonio Farms Inc., of Torrance, Calif., and day-to-day maintenance is provided by Field Service & Maintenance Inc., of Desert Hot Springs, Calif.

NEW YORK (MAY 22) PR NEWSWIRE - In response to press inquiries about Moody's announcement today, Citicorp (NYSE: CCI) said:

We're very disappointed with Moody's action. We don't expect any significant increase in overall funding costs. Increasing securitization of assets has substantially decreased Citicorp's use of long-term debt, while deposit grwth has reduced commercial paper to 2 percent of funding needs. Citibank retains the highest short-term deposit rating.

The move is in line with a number of banking downgrades in recent weeks by Moody's, citing exposure to real estate and leveraged transactions and anticipation of weak industry earnings. Moody's actions have generally been more severe than those of the other rating agencies. Citicorp remains committed to its clear long-term strategy and confident that the strength of its core businesses and well-positioned global franchises will continue to provide excellent returns and growth.

This commitment has produced consistent record earnings from its increasingly important consumer businesses, as well as high returns from local currency corporate businesses in developing countries.

As previously indicated, Citicorp will rebuild capital throughout 1990 from retained earnings, sale of non-strategic businesses and appreciated assets, and vigorous asset management.

The Aaa ratings on credit card receivables securitized by Citicorp are not affected by today's action. Ratings on some mortgage-backed passthroughs were lowered one notch. Additionally, several tranches of multi-class mortgage securities were reaffirmed.

SAN FRANCISCO (MAY 22) PR NEWSWIRE - President Enterprises Corp. of Taiwan and Wyndham Foods, Inc. jointly announced today that they have signed a letter of intent for President to acquire the stock of Wyndham Foods and its wholly owned subsidiary, Wyndham Baking Company.

The total value of the transaction, including Wyndham Baking Company's existing long-term debt, is US$335 million. Wyndham Baking Company's 13-5/8 percent senior subordinated notes due 1998 are expected to remain outstanding following consummation of the acquisition.

The transaction is expected to close in June 1990 following approval by Wyndham's shareholders, the execution of a definitive purchase agreement,

and Hart-Scott-Rodino clearance. President Enterprises will fund the purchase of the Wyndham Foods stock from internal sources.

The senior management of Wyndham Baking will remain with the company following the acquisition. Wyman Harris, presently Wyndham Baking Company's chief operating officer, will become president and chief executive officer. Ian R. Wilson, currently chairman and chief executive officer of Wyndham Foods, will remain with the company as a consultant for a period of one year following the acquisition.

President Enterprises Corp., founded in 1967, is the largest integrated food company in Taiwan and the 12th largest publicly traded company in that country. Its product lines include instant noodles, edible oils, dairy products and fruit juices.

In addition to its food manufacturing operations, President is the exclusive distributor in Taiwan of Welch's juices and Budweiser beer, and is the Taiwan franchisee of Pepsi, 7-Eleven stores, and, through a joint venture, Kentucky Fried Chicken. President's annual sales are approximately US$1.1 billion, and its equity market capitalization is in excess of US$1 billion.

Wyndham Baking Company, headquartered in Augusta, Ga., is the third largest cookie manufacturer in the United States. Its brand names include Murray, Jack's, Jackson's, Greg's, Barbara Dee and Plantation. Wyndham was formed in 1985 by Ian R. Wilson and a group of equity investors, and has been built through the leveraged strategic acquisition of eight regional cookies companies.

#90142p1131 05/22/1990 ~PR Newswire

NORTH MIAMI BEACH, FL (MAY 22) PR NEWSWIRE - Corporate Management Group, Inc. (NASDAQ: KORP) ("CMG") announced today its execution of an Agreement in Principle with JW Charles Financial Services, Inc. ("JWC Financial") reflecting the companies' intention to merge their operations.

JWC Financial, through its operating subsidiaries that are members of the National Association of Securities Dealers, Inc. ("NASD"), is engaged in retail securities brokerage and investment banking operations, and is the second largest regional securities firm based in Florida.

Its principal subsidiary, JW Charles Securities, Inc. ("JWC Securities"), is a member of The New York Stock Exchange, Inc. ("NYSE"). CMG, through its subsidiary and NASD member firm Corporate Securities Group, Inc. ("CSG"), is also engaged in retail securities brokerage and investment

banking.

Marshall T. Leeds, president and chief executive officer of CMG, stated that, if consummated as contemplated in the Agreement in Principle, "the merger would create significant synergisms, combining the financial resources, securities self-clearing capacity, and extensive managerial and retail brokerage capabilities of JW Charles, with CSG's network of brokers and registered representatives and CSG's senior management that has generated operating profits in all four years since CMG acquired CSG."

Leeds said the combined companies would have operations in 12 states, with over 40 branch offices and approximately 250 registered representatives.

The proposed merger, which is subject to the parties successfully negotiating and executing a definitive merger agreement and ancillary documents, would involve JWC Financial becoming a wholly owned subsidiary of CMG.

In the merger, the shareholders of JWC Financial would receive shares of CMG common stock equal to 50 percent of CMG's outstanding common stock following the merger, and would also receive shares of a new class of non-voting CMG stock that would pay preferential dividends up to a specified aggregate maximum amount (expected to be approximately $2,200,000), at which point it could be redeemed for nominal consideration.

The shares issued in the merger would not be registered and thus would be subject to resale restrictions, although the former JWC Financial shareholders would be able to register their shares of CMG common stock for resale in connection with certain types of future registrations by CMG.

Joel B. Marks, chief financial officer of CMG, pointed out that the proposed issuance of shares of preferential dividend stock to JWC Financial shareholders recognizes that they incurred substantial obligations to other parties in making vital financial support available to JWC Financial.

Marks said, "The use of the non-voting, preferential dividend stock would provide these shareholders a preferential but limited financial return, without altering the voting arrangements that the parties want and without introducing debt to CMG's balance sheet." The proposed terms would require that a specified percentage of CMG's excess cash flow be used to pay the preferential dividend until the maximum dividend amount is reached.

As currently proposed, the board of directors of CMG would be expanded from two to six members following the merger, and the parties would agree for Leeds and a JWC Financial representative to each identify three persons who would be supported for election to the board. Leeds, who would continue as president and CEO of CMG following the merger, stated

that the parties will establish appropriate arrangements to seek to avoid deadlocks on the board.

To prepare for consummation of the merger, CMG would make certain payments of deferred compensation and special bonuses to members of its senior management, using certain of its assets not required to be included in the merged operations.

In addition, employees of CSG, who own approximately 15 percent of its stock, would exchange their CSG stock for shares of CMG common stock, so that following the merger CSG would also be wholly owned by CMG. That exchange would increase the total number of outstanding shares of CMG common stock from 1,700,108 to approximately 2,000,000 immediately before the merger.

Leeds stated that the proposed payments to CMG's senior management (which would include himself), as well as the consummation of the merger itself, would be submitted to CMG's shareholders for their approval.

Leeds indicated that the payments to management could be substantial, relative to CMG's past compensation practices, and so while there might not be a legal obligation to obtain shareholder approval for them, he wants the shareholders to vote on the payments along with the overall merger proposal.

"We have always strived to operate CMG for the benefit of all our shareholders, and management has made significant sacrifices at times in order to do so. We believe the merger would produce a larger, stronger, and more competitive company for the shareholders, even after the payments being considered for management; but, we want to confirm that the shareholders agree."

Management of CMG beneficially owns approximately 48 percent of the CMG common stock that would be entitled to vote on the proposals, although Leeds stated that he expects management to vote their shares pro rata in accordance with the vote by non-management shareholders on the special payments proposal.

The parties expect that their negotiations, which began several months ago and have covered varied scenarios, will result in a definitive merger agreement within the next few weeks, and that the necessary steps for obtaining shareholders approval can be completed in two months or so. Said Leeds, "We are looking forward to establishing what will be the largest South Florida-based New York Stock Exchange member."

PHILADELPHIA (MAY 22) PR NEWSWIRE - Right Associates(R) (NASDAQ: RMCI), one of the world's leading outplacement and career management firms, today announced the acquisition of Dexter Mastel Associates Ltd., an outplacement firm based in Calgary, Alberta.

The purchase price was not disclosed. Founded in 1980, Dexter Mastel is Western Canada's largest independent Human Resources Management Consulting firm. Specializing in outplacement, relocation consulting and pre-retirement counseling, Dexter Mastel is recognized for its dynamic, innovative and highly personalized client service.

Rick Mastel, the former owner and co-founder of Dexter Mastel, will become the managing principal of Right Associates' Calgary and Edmonton offices.

Right Associates' previous acquisitions of outplacement consulting firms include: Executive Services Associates, Seattle, in December 1988; Compass Inc., Minneapolis, in November 1988; and the New York and London-based Thinc Consulting Group International Inc. in August 1987.

Headquartered in Philadelphia, with 65 offices across the United States and Canada and around the world, Right Associates is one of the world's leading organizations specializing in outplacement consulting and career management guidance. Outplacement consulting services are designed to assist employers with termination issues and, after termination, help the separated employees develop skills and strategies to find new employment.

OLYMPIA, WA (MAY 22) PR NEWSWIRE - Employment Security Commissioner Isiah Turner announced he was lifting the suspension of referrals to Nintendo of America and all agencies which provide its temporary employees, following a meeting with officials of the company and representatives of the Seattle Core Group. Both parties agreed to subsequent meetings.

Turner met this morning with Philip Rodgers, vice-president of the Redmond-based corporation, and Oscar Eason, spokesperson for the group which had questioned Nintendo's hiring and promotion practices.

Based on the spirit of cooperation exhibited at the meeting, Turner said he was confident the two parties will work together to resolve their differences.

He added that Nintendo's desire to be a good corporate neighbor in the Northwest, coupled with the Core Group's efforts on behalf of minority workers, could produce a model program for managing cultural diversity in the workplace.

WARRENTON, OR (MAY 22) PR NEWSWIRE - A.B. Holding Group, Inc. (NASDAQ: AGBG) announced today its operating results for the quarter ended March 31 1990. Net sales totaled $2,020,178, up 16 percent from $1,747,358 in the comparable 1989 period; net income of $26,099 was up from $16,568 (in each case, nil per share).

In commenting on the results, Sohail Masood, president, said, "The first quarter is traditionally a slow sales period for the company, and the results reported were as projected by management. We are expecting a very strong second and third quarter and, as usual, a weak fourth quarter. In preparation for the expected surge in second-quarter sales, our inventory position has been built up to $5 million at March 31, 1990, vs. $3.6 million at March 31, 1989. At the same time, we are in a very strong financial position with only $560,000 borrowed against our $3 million line of credit."

Management's primary attention is currently focused on several areas, including increasing the acceptance of bagging of silage by the agricultural industry as customers realize the significant cost savings; further emphasis of European sales through a 50 percent-owned joint venture, Ag-Bag Europe plc, and (3) a reduction in the cost of sales as a percentage of net sales.

A.B. Holding Group, Inc. manufactures and sells bagging machinery and large (up to 250 feet long) disposable plastic storage bags to the agricultural industry for the storage of feed.

#90142p1155 05/22/1990 ~PR Newswire

ST. LOUIS (MAY 22) PR NEWSWIRE - Trans World Airlines (TWA) today announced its lowest, most aggressive domestic air fares for 1990. Savings up to $160 off TWA's already low roundtrip fares are designed to attract passengers to fly TWA in the summer and fall 1990 season.

Significantly, TWA's "lowest fare guarantee" means that even if TWA's fares are reduced after purchase, passengers will be refunded the difference.

"TWA wants this summer to be a banner season for domestic travel without subjecting our customers to meet the cumbersome obstacles required by some other airlines," said Robert Cozzi, senior vice president, marketing.

The lowest fares for travel Tuesday through Thursday have been reduced to $99 for flights up to 1,500 miles and $149 for flights more than 1,500 miles. Prices are each way and require roundtrip purchase.

Tickets must be purchased by June 7 and travel completed on or before December 13. Passengers must book their flights 7 days prior to departure and purchase their tickets 24 hours after booking. These fares are non-refundable and require a Saturday overnight stay.

Sample roundtrip fares are $198 from New York to Chicago and $298 from Boston to Los Angeles and $298 from St. Louis to San Francisco.

VIRGINIA BEACH, VA (MAY 22) PR NEWSWIRE - P. Douglas Richard, Executive Vice President of Seaboard Savings and Loan Association, (NASDAQ: SEAB), announced today that the State Corporation Commission has approved Seaboard's application for a new branch office at 2901 Cedar Road, Chesapeake, Virginia in The Crossing at Deep Creek Shopping Center. The branch will be leased from Deep Creek Property Associates.

Richard stated that Seaboard is particularly pleased to be opening the Deep Creek Branch since it will be the Association's first entry into the Chesapeake Market. The Association hopes to open the office in mid July.

Seaboard is a Virginia chartered stock savings and loan assocation and provides mortgage and retail banking services principally in the Hampton Roads area of Virginia. Headquartered in Virginia Beach, Virginia, the Association has four offices, two in Virginia Beach, one in Norfolk and one in Portsmouth. Currently the Association has approximately 900 stockholders and 891,184 shares of stock outstanding.

NEW ORLEANS (MAY 22,) PR NEWSWIRE - The U.S. Navy awarded a $24.4 million contract to Avondale Industries, Inc. (NASDAQ: AVDL) for the overhaul of the Spruance Class Destroyer, USS Stump (DD 978) at Avondale's main yard in metro New Orleans.

This was announced today in Washington by Senator J. Bennett Johnston (D), Congressman Bob Livingston (R) and Congresswoman Lindy Boggs (D) who serve on the Appropriations Committee as well as Senator John Breaux (D) and Congressman "Billy" Tauzin (D).

The repair and overhaul work will be performed at the company's main yard and at its Algiers Facility. The contract will require 12 months to complete and will provide employment for 350 Avondale workers during this period.

Avondale Industries Inc., headquartered in metro New Orleans, is one of the nation's leading marine fabricators. In addition to its shipbuilding operations, the company specializes in boat and LCAC construction and is a major repair contractor for commercial and Navy ships. It is also involved in the modular construction of plants and components for a variety of land-based industries.

PORTLAND, Ore. (MAY 22) UPI - Kevin Duckworth sank a tie-breaking jumper with 17.3 seconds left and reserve Danny Young followed with a crucial blocked shot Monday night, pushing the Portland Trail Blazers to a 100-98 victory over the Phoenix Suns in the opener of the Western Conference final.

Shrugging off the effects of their taxing seven-game series against San Antonio that ended only two days earlier, the Blazers also received 20 points from Clyde Drexler and 19 from Jerome Kersey to edge their well-rested opponents.

The Suns had six days off after completing a surprising elimination of the Lakers, lost for the 18th straight time at Memorial Coliseum dating to the 1984 playoffs. Phoenix has dropped 13 of its last 17 meetings with Portland.

The Blazers, 7-0 in the postseason before their 12,844 home fans, will be home against for Game 2 of the best-of-seven series Wednesday night.

With the score 98-98, Drexler, under heavy pressure by Dan Majerle on the baseline, threw a pass behind Duckworth. Majerle claimed the turnover with 48 seconds left.

But Kevin Johnson missed a twisting layup on the other end, and Duckworth took Terry Porter's pass and canned an eight-foot jumper from the right flank for the winning points.

Phoenix called a timeout and inserted Mike McGee into the game for the first time. McGee took a shot from the baseline, but Young came over to deflect the shot with about five seconds remaining. The Blazers gained possession and inbounded the ball successfully to seal the triumph.

Kersey, who missed eight of his first nine shots, added 11 rebounds and Drexler had 10. Buck Williams added 16 points for Portland and Duckworth 12.

Tom Chambers had 29 points and Johnson added 20, though he hit only 2 of 12 shots in the final quarter for eight points. The Suns hit only 41

percent of their field goal tries for the game.

With three minutes left, Drexler swooped inside to put back Kersey's miss for a 98-93 lead. But Jeff Hornacek scored on a drive for Phoenix and was fouled at the 1:52 mark. He missed the free throw but Chambers followed with a left-handed layup in the lane, was fouled and made his foul shot to tie it 98-98 with 69 seconds left.

The Trail Blazers argued Chambers double-dribbled before his move to the basket, but traveling was not called.

Kersey, playing with a sprained right thumb, shedded much of the the bandage around his hand, and sank six of seven attempts to score 13 points in the third period. Drexler added 10, and Portland led 84-80 entering the fourth quarter.

Rookie Drazen Petrovic came off the bench to score 11 points in the second quarter as the Blazers battled back from a 9-point deficit to a 50-48 halftime lead.

Trailing 42-38, Portland scored eight unanswered points in a 12-2 spurt fueled by its fastbreak. Williams gave the Blazers their first lead since the opening seconds, taking Porter's pass and soaring over Mark West for a sensational slam that made it 44-42 with 3:26 left in the period.

Phoenix, relying on its perimeter game, had raced to a 10-2 lead. The Suns exptended the lead to 15-6 on Chambers' 3-pointer, but Williams scored six points in a 10-2 burst that put Portland back in the game.

(MAY 22) UPI - Palestinians and Arabs took to the streets in Israel and the occupied territories Monday in response to yesterday's massacre of seven Palestinians by an Israeli dressed as a soldier. 170 people were wounded in clashes with Israeli troops, and three people were killed in the Gaza Strip.

The violence in Israel spilled over into neighboring Jordan, where Westerners caught the brunt of it. A Palestinian opened fire on a busload of tourists in Amman, wounding nine French citizens and a Jordanian. And the U-S Embassy was surrounded by 60-thousand Palestinians and Jordanians who were dispersed by riot police.

NO group has claimed responsibility for Monday's assassination of chief Islamic cleric Moulvi Farooq in the incendiary Indian region of Kashmir. But the bloodshed has only increased. Mourners trying to seize the priest's body came under fire from Indian security forces. 25 people were killed. More than 250 people were wounded in clashes across the nation.

Liberal Party Senator Federico Estrada Velez was assassinated in the Colombian cocaine capital of Medellin Monday, gunned down in his car by two men riding motorcycles. Assassination by motorcycle is a favorite tactic of cocaine-cartel hit squads, but authorities have NOT yet placed responsibility for the murder.

#90142u0181 05/22/1990 ~United Press International

(MAY 22) UPI - The leaders of the Contra rebels say their disarmament will continue next week. But the Contra rank and file remains opposed to surrendering arms as long as the Nicaraguan army remains under the command of the Sandinistas. International observers say the Contras are shifting back and forth to delay the peace process.

A U-S congressional report says the Salvadoran military is corrupt and that it has developed a dependence on human-rights abuses. The government of El Salvador Monday agreed to talks with the Salvadoran rebels and a six-month timetable aimed at bringing peace to the nation.

A Texas county deputy was killed Monday and 20 people were injured when a tractor-trailer rig ran into a procession of Vietnam War vets marching from Cleveland, Texas, to Houston for a Memorial Day vigil. The deputy had been escorting the vets from the rear in a patrol car when he was blind-sided by the truck.

(MAY 22) UPI - President Bush has until June 3rd... the anniversary of the Tiananmen Square massacre... to decide whether to extend China's ''most-favored-nation'' trade status. White House officials expect the president to buck public sentiment and grant China the trade privileges. National security adviser Brent Scowcroft, who aroused international anger with his trips to China last year, says only to ''stay tuned.''

A varied group of interests- from scientists and human-rights activists to U-S academics and Soviet dissidents- joined in Washington Monday to say they're through waiting for Bush to move on China. The conglomeration plans to start work aimed at freeing Chinese dissidents Fang Lizhi and Li Shuxian... who've been holed up at the U-S Embassy in Beijing for almost a year. A Soviet dissident attacked Bush by saying the president ''is NOT ready for democracy'' in the rest of the world.

The founder of ''gonzo'' journalism, Hunter S. Thompson, goes to court in Aspen, Colorado, Tuesday for a preliminary hearing on felony and misdemeanor charges of drug possession and sexual assault. Thompson's main accuser is a 35-year-old former pornographic movie actress, who says Thompson took drugs in her presence and that he touched her breasts during a visit to his Aspen house.

Director David Lynch is riding high. His television series ''Twin Peaks'' is a hit, and now he's won the Golden Palm award for the best movie at the

43rd International Cannes Film Festival in France. Lynch's latest work, ''Wild at Heart,'' is said to be a tale of violence and lust in the southern United States. It drew audible gasps from even the jaded Cannes critics at its showing last Saturday.

(MAY 22) UPI - Charges of campaign discrepancies are marring elections in yet another East European country. 36 opposition parties in Bulgaria are accusing the ruling communists of undermining their campaigns through bullying and intimidation. The parties Monday refused to sign a NON-violence pact with the government. June 10th marks Bulgaria's first democratic elections in four decades.

Polish Prime Minister Mazowiecki is taking a tough stand against a wildcat strike that has crippled rail traffic throughout the nation. The railway workers are demanding an 85-percent raise, which would still leave them with salaries below the national average. Mazowiecki says the government does NOT have the money, and that the strike is ''harmful to Poland.''

BOISE, Idaho (MAY 22) UPI - A light voter turnout was expected in Idaho's primary election, which features a contest for an open seat in the Senate, the House of Representatives and a three-way Republican gubernatorial race.

Secretary of State Pete Cenarrusa said he expected 30 to 35 percent of the state's estimated 527,500 registered voters to cast ballots in Tuesday's election.

''I don't see a great deal of activity out there interest-wise, for various reasons,'' Cenarrusa said.

One reason for the apparent lack of voter interest was that several better-known politicians were unwilling to enter the races for Congress or governor.

The race generating the most interest was for the seat being vacated by Sen. Jim McClure, R-Idaho, 65, who is retiring after three terms in the Senate. He previously served three terms in the House.

Rep. Larry Craig, R-Idaho, a 10-year congressman faced determined - but admitted underdog - state Attorney General Jim Jones.

Craig, 44, raised more than $394,000. But many political insiders believe Jones, 48, who has raised less than $40,000, has a solid chance of

upsetting Craig - especially if the turnout is light.

Three Idaho newspapers have endorsed Jones; none have endorsed Craig. Jones has honed his image as a tough lawman over the past eight years, but Craig cites a long record of service to constituents.

The winner will be favored to become Idaho's next senator. An Idaho Democrat has not been elected to the Senate since the late Frank Church in 1974.

On the Democratic side, former state Senate minority leader Ron Twilegar, 46, of Boise, is a heavy favorite over Idaho Falls businessman David Steed 41, in Steed's first run for office.

Attracting almost as much attention as the open Senate seat is the GOP gubernatorial primary.

Gov. Cecil Andrus, 58, is unopposed in the Democratic race. Despite his opposition to abortion, some anti-abortionists feel Andrus's veto March 30 of a bill that would have given Idaho the most restrictive state abortion law in the nation may cost him in November.

But Andrus, who said he vetoed the bill because he said it was too restrictive, will be overhwelmingly favored for election to an unprecedented fourth term this fall.

Running in the GOP gubernatorial primary are state Sen. Rachel Gilbert, 59 of Boise; former state Sen. Roger Fairchild, 37, of Fruitland; and political newcomer Milton Erhart, 49, a Boise stockbroker and the sole candidate favoring abortion rights.

The Democratic primary for the 1st Congressional District is between Boise stockbroker Larry LaRocco, 43; former state agriculture director Dick Rush 45, of Meridian; and former state legislator Jeanne Givens, 38, of Coeur d'Alene.

LaRocco is the front-runner in a bitterly negative battle with Givens, but Rush is given a slight chance by some political observers because of his ties to agriculture and because he has remained out of the Givens-LaRocco fray.

The winner faces State Sen. Skip Smyer, of Parma, who is unopposed in the GOP primary.

Rep. Richard Stallings, D-Idaho, 49, a heavy favorite for election to a fourth term from the 2nd Congressional District, is unopposed in the primary.

The Republicans in the primary are Boise lawyer Dan Hawkley, 45; former Army Ranger Sean McDevitt, 26, of Pocatello; Idaho Falls poet Janet Reid, 43; and state Sen. Ann Rydalch, 54. Rydalch is the front-runner.

(MAY 22) UPI - Not even icy winds and frozen hands could cool the Red-hottest team in baseball.

Jose Rijo survived five errors by his teammates and Todd Benzinger drove in two runs to boost the Cincinnati Reds to a 4-3 victory over the Chicago Cubs in blustery Wrigley Field. The game time temperature was 51 degrees and 20 mph winds whipped off Lake Michigan.

''It was the coldest game we've played in,'' Reds Manager Lou Piniella said.

Numb hands accounted for seven errors between the two teams but the Reds pulled together to overcome their mistakes.

''We pick each other up,'' Reds second baseman Ron Oester said. ''The infielders pick each other up and the pitchers pick the rest of the team up.''

''We're second in the league in fielding but you wouldn't know it tonight '' Piniella said. ''It was a good ballgame even though we booted the ball a couple times. You don't expect to win with five errors.''

The Reds have come to expect to win just about every night. They have won six of their last eight and Monday night improved to 26-9 overall and 14-3 on the road. Both their overall and away records are the best in the majors.

Rijo, 3-1, gave up three runs on six hits over 6 1-3 innings, striking out two and walking one.

Cincinnati relievers Norm Charlton, Rob Dibble and Randy Myers combined with Rijo on a seven-hitter. Myers pitched the ninth inning for his eighth save.

Greg Maddux, 4-3, missed his third attempt at his 50th major league victory, giving up six hits and four runs over seven innings.

But at least Maddux got to return to a warm and cozy clubhouse before the game was over.

Reds shortstop Barry Larkin, who committed one error, also left the game

early. He was pulled in the ninth when his right elbow tightened.

''I couldn't get it loose,'' Larkin said. ''It started getting colder and colder. It was bone chilling.''

In other NL games, Atlanta nipped St. Louis 6-5, Houston edged Pittsburgh 3-2 in 11 innings, Philadelphia downed San Francisco 5-2 and New York trounced Los Angeles 12-3.

In the American League it was: Oakland 4, Toronto 1; Chicago 6, New York 5; Boston 4, Texas 2; Minnesota 7, Baltimore 2; California 5, Cleveland 3; Detroit 11, Kansas City 6 and Seattle 9, Milwaukee 4.

-- AROUND THE NL --

Braves 6 Cardinals 5

At Atlanta, Jim Presley doubled home Ron Gant with one out in the ninth inning, giving Atlanta the victory. Atlanta had gone in front 5-4 in the sixth on solo homers by Dale Murphy, Ernie Whitt and pinch-hitter Francisco Cabrera. Reliever Joe Boever, 1-2, earned the win and Scott Terry, 0-3, took the loss.

Astros 3, Pirates 2 (11 innings)

At Houston, Eric Anthony's homer with one out in the 11th inning off Ted Power gave the Astros the win. Anthony slammed his third homer of the season to make a winner of Juan Agosto, 2-1, who pitched two innings of one-hit shutout ball. The Pirates led 2-0 on Jose Lind's two-out bases-loaded double in the fourth. Franklin Stubbs hit his fifth homer of the year for Houston.

Phillies 5, Giants 2

At San Francisco, Len Dykstra raised his batting average to over .400 with three hits and Randy Ready and Dickie Thon drove in two runs apiece to lead Philadelphia. Phillies' starter Terry Mulholland, 3-1, allowed two runs on eight hits and one walk while striking out three over 5 2-3 innings against his former team. Roger McDowell gained his 10th save. Matt Williams hit his eighth homer of the season and drove in both Giants runs.

Mets 12, Dodgers 3
